A recent return of the British Board of Trade, comparing English trade to and from the East in certain particulars with what it was before the Suez Canal was opened, having excited some animadversion, the *Pall Mall Gazette* devotes some space to a consideration of the exact improvement in communication effected by the canal. The Board of Trade memorandum suggested that the improvement was so small as not to have given a material stimulus to the trade between England and the East, and the journal referred to says that it does not see how that statement can be disputed. Freights have not even been lowered by it, and the chief direct gain to trade has been a saving of 1 per cent. in insurance, which may not, it is suggested, be altogether due to the canal. Steamers would in any case have been largely substituted for sailing vessels in direct trade with the East, and this substitution would have effected nearly all the saving in insurance which has actually been effected. The canal, it is admitted, offers some advantages over the Cape route, otherwise it would not be used, but the balance of advantage, though sufficient to divert the trade, is very small. In regard to the question as to England's loss or gain, the London journal is of opinion that the direct gain to England by reason of the canal is very small. The value of the goods annually passing between England and the East is estimated at £80,000,000. The saving to consumers amounts to about 1 per cent. per annum, or £800,000. This divided between the consumers on either end would leave to the English consumer a gain of say £400,000. On the other hand England has sustained special losses. Its *entrepôt* trade, formerly very profitable, has diminished. A direct trade between the Mediterranean countries and the East, amounting to over £5,000,000 annually, has sprung up since the opening of the canal, and is said to be for the most a diversion from the *entrepôt* trade referred to. The commissions and profits upon this trade have been lost, and the demand upon English shipping and capital is less than it was before the canal in respect of the same work. The conclusion arrived at by the journal quoted is that while the canal has been of advantage to the world, though in a much smaller degree than it has been the fashion to suppose, the gain has been, to some extent, at the expense of the English shipowner and capitalist. This being the case, the article concludes, it cannot "be seriously said that England has a supreme commercial interest in keeping the canal open. It would be folly for us on account of such supposed interest to spend millions of money and involve ourselves in political embarrassments."

The arrangements for the International Exhibition to be held at Calcutta are proceeding satisfactorily, and the complete success of the enterprise is said to be ensured. This is evidenced by the interest taken in the exhibition by consuls of foreign countries, and by the number of applications for space received from all parts. Recent official communications are to the effect that the necessary annexes in course of erection adjacent to the India Museum will be completed by July or August. A large space facing the museum will be devoted to the display of machinery and agricultural implements. Gas and water will be available throughout the building, but it is proposed that the lighting be done by electricity. Specimens of boats, diving apparatus, life-saving apparatus, etc., will be exhibited in a deep reservoir, covering an area of nearly 90,000 square feet. Negotiations are in progress to obtain from the railway authorities of the several presidencies and provinces special rates for the carriage of goods intended for the exhibition. In short, the enterprise is to have not alone the patronage of the Viceroy, but the active support of the great feudatory chiefs and nobles of India and of the leading European and native officials. The best results are expected to spring from the holding of the exposition. It is hoped that it will do much to remove the apathy regarding the launching of industrial or commercial enterprises which is now so prevalent among the general native population. It is not alone the effect upon the native mind that is regarded by the managers of the exhibition, and perhaps the most important result of the enterprise will be that it will suggest to the European mind commercial and industrial possibilities of which it will not be slow to avail itself. Well-informed English authorities are of the opinion that the development of Indian resources has scarcely begun, and that there still exist vast sources of wealth in the soil and forests of the great Asiatic dependency which can be brought forth by the judicious application of capital. The more enthusiastic of them believe that the exposition will mark the beginning of a new era in the development of India.

SPECIAL CORRESPONDENCE.

PROPOSALS IN ENGLAND FOR ECONOMIZING GOLD.

London, April 3.—We, in England, have recently heard a good deal less concerning bimetallism than we did ten or twelve months ago, and the bimetallists at length appear to have become impressed with the utter hopelessness of ever forcing such a doctrine pure and simple through the English legislature. They have, therefore, shifted their ground, and recently more than one treatise has appeared from the pens of avowed adherents to the lost cause offering suggestions to extend the uses of silver and to economize gold. Suggestions of this kind when found to be practical are certainly likely to obtain favorable consideration in London, where financiers are far from ignoring the difficulties which beset Europe and America in finding sufficient supplies of gold, and which beset Asia in finding a sufficient demand for silver. If the market value of the latter can be raised in relation to the former by a natural process, it will stand a very fair prospect of being adopted should it be clearly set before the British public, and it is for this reason that the question of reissuing £1 notes has been so powerfully advocated both in Parliament and by the public press during the past six months. Mr. William Fowler, M. P., who was in the United States last autumn, came back much impressed with the utility of the small note when effectually secured upon a gold basis, and he not only raised a discussion in the House upon the subject, but has taken it up in other ways. An avowed bimetallist, Mr. W. S. Reid, who is at the same time a bank manager, has boldly advocated an issue of £50,000,000 in sovereign and half sovereign notes by the government, a similar amount of gold to be withdrawn and the bulk of it employed in redeeming debt. Such a proposition, however, would have to be accompanied by provisions for the establishment of a suitable gold reserve, although the greater part of the demonetized metal would, of course, become available for augmenting the supplies of gold in Europe. There was even a suggestion that the postal note might be converted into current money, though there are certain drawbacks which would probably prevent its ever becoming very

serviceable. Mr. Fowler's proposition is, all things considered, one that would work well enough, viz., to allow the Bank of England to issue £1 notes against coin and securities in certain proportions, a proposition which would at the same time do away with the "fixed issue" which at the present time so effectually cripples the banking operations of the Bank of England. That fixed issue is represented by the power of the Bank of England to circulate notes to the amount of £15,750,000 against a like amount of government securities in the issue department, while for every additional note issued an equal amount of gold must be held. Thus if the Bank of England had only £20,000,000 of notes in circulation and £20,000,000 of hard money in its vaults there would be a reserve of notes to the extent of £15,750,000, which would equal 78¾ per cent. of the notes in circulation. Now, if we increase the circulation of the bank to £40,000,000 in notes and the bank stores coin against every additional note—that is, holds £40,000,000 in hard money—there will still be a reserve of £15,750,000, but that will only represent about 39 per cent. of the note liabilities. Thus the proportion of reserve to note liabilities steadily decreases as the amount of notes increases, and to obtain a full proportion of reserve the bank ought to store about thirty shillings in hard money for every twenty that it issues in the form of notes. The result is that the note issues of the Bank of England do not increase. It is precisely the same when we come to the banking department, where every week we contrast the reserve of notes with the banking liabilities, and to maintain a sufficient "proportion" the bank is compelled more and more to see banking business drift into other hands. In this way the fixed issue of the Bank of England is, we might almost say, year by year rendering the position of the bank more difficult, and even the *Economist* a couple of weeks ago ventured to ask the question, "whether this class of legislative action, intended to preserve the integrity of a note circulation, does not interfere with the ordinary operations of the bank, and whether the unfettered system of the Bank of France is not followed by more equable results? Legislative interference with trade has been abandoned in almost all other directions; does it in the instance before us fully attain the object desired?" When so conservative a paper as the *Economist*, edited by a well-known banker, writes in this strain we may be very safe in concluding that the time has arrived when that question should be unhesitatingly answered in the negative.

A series of papers have recently been contributed to the London *Bankers' Magazine* upon the extension of the note circulation in England, setting forth the disabilities of the Bank of England, the advantages to be derived from an extension of the note circulation, especially in regard to the reissue of £1 notes, and finally dealing with the question as to the best means by which the powers of the Bank of England could be enlarged for these purposes. All such propositions must start with the abandonment of the existing "fixed issue." At the same time it is equally desirable that all the notes in circulation in this country should be based upon the same security and the same central store of gold. In short, that the £1 and £2 notes should be issued from the same department as the £5 and £10 notes. The writer therefore strongly advocates that the entire note issues should be Bank of England notes, not government notes, as some people have recently suggested. A good deal of the old ground is gone over as to the advantages of saving the wear and tear of the gold circulation; the collection of a much larger store of gold at a central point—that is, in the vaults of the Bank of England; the greater facilities at the present day for preventing and detecting forgery, and the readiness with which paper money can not only be brought into circulation when required, but can also be demonetized when no longer required. Then, of course, there is the advantage that say £50,000,000 of notes does not demand the security of a full £50,000,000 in gold, and it is not only perfectly safe, but is fully supported by precedent, that such paper money may be based upon a fair percentage of government securities as well as gold, and that the latter can thus be extensively economized.

This is for the most part traveling over known ground, but the writer goes on to argue out the latent advantages of the £1 note in this way. He says: Let us take the case of a Scotch bank with one hundred branches and a note circulation of perhaps £700,000, against which it has stored nearly a similar amount of coin. If such a bank lost its power to issue notes it would not only be compelled to store £700,000 in cash but a very much larger sum, for the reason that it can readily maintain a very large sum of its unissued notes at every one of its branches, such notes merely standing for a certain weight of printed paper and not more costly to maintain. But if, at each one of those hundred branches, such a bank had to retain a full store of sovereigns, the locking up of these hundred different stores of "till-money" would prove most onerous. Under such circumstances, the writer thinks that probably one half the existing branches of the Scotch banks could only be worked at a loss, and would therefore have to be closed. He says: "It is the *power* of issuing notes, not their actual issue—the power of keeping a reserve of idle paper, not idle gold—which is of such inestimable value to the Scotch banker." We have, then, placed before us the following proposition: "Let us regard the Bank of England, for note-issuing purposes, as the central office, and that all the other 2,000 and more banks and their branches now existing in England and Wales are established for note-issuing purposes, as branches of this central office. It would then be within the power of the Bank of England to hold gold to cover every note actually in circulation in England and Wales, and yet to economize the gold coinage to the extent of many millions sterling." This proposition is, therefore, to the effect that every well-established bank in the country should have the right of holding Bank of England notes as "till-money," but that such notes should not be reckoned as in circulation until actually issued to the public. Such a proposition, it is apparent, would not only substitute notes for gold, but, as far as the public were concerned, a comparatively small amount of notes for a comparatively large amount of gold; and the questions arise as to the manner in which such a system of note-issue could be effectually regulated, and who should be the recipient of the large profits which would accrue upon the substitution of idle paper in the tills of all these banks for idle gold? The writer is clearly of opinion that sufficient inducement could be given to bankers to make them readily indorse such a proposition; and, as it would undoubtedly add to the magnitude and influence of the Bank of England, a large proportion of this accruing profit, or rather these accruing savings, should be the property of the government.

The details of the scheme are considered at some length, and it is laid down that no note-issuing agency of the Bank of England—which of course would be a bank—should be enabled to receive a larger supply of notes into its till for future issue than there was government stock registered in its name at the Bank of England. Further, that this government stock, representing till money, should bear a definitely reduced rate of interest. But as soon as that agency issued a portion of those notes to the public, as in the course of business it would be doing every day, it would be compelled to pay gold into the Bank of England against them. Thus not only would the note be secured upon government stock to the full extent of the *authorized* issue, but also upon hard cash to the full extent of the *actual* issue. At the same time this would not involve any daily remittance of gold to London, because bankers at the present day always maintain a balance in the hands of that establishment. Such balances would have in the first instance to be increased, but the gold which would be paid in would to a considerable extent soon definitely be transferred to the Bank of England in payment for notes circulated, and afterwards there would be a fairly constant return of notes for demonetization, sufficient as a rule to counterbalance the reissues. I will not trouble you with the various details of this scheme, which not only provides for economizing the at present appreciated gold, but would also collect a much larger stock in the Bank of England, a portion of which the government might at a future day be entitled to borrow without interest. I have dwelt at this length upon the scheme in question, because it appears to contain a proposition for drawing the whole system of English banking more closely together, while basing every note as soon as it becomes an actual liability upon gold itself. Such discussions at the present time in England point clearly to the general drift of public opinion, and it may be safely predicted that within a few years the important question of extending the note circulation will receive effectual consideration in this country.

LETTERS TO THE EDITOR.

THE BANKRUPTCY QUESTION IN ENGLAND.

To the Editor of BRADSTREET'S.

SIR—Mr. Chamberlain's bankruptcy bill having been read a second time and referred to a grand committee, it might have been supposed that there would be a lull in the discussion on the subject; but, on the contrary, everybody is now eagerly setting forth his views. By everybody I mean all persons who take an interest in the matter, for the general public is quite apathetic. The only point of agreement is that something ought to be done. A minority in influence if not in number disapproves of the government bill, and on the other hand those who approve of it generally, object to certain clauses and provisions, so that it has been predicted that before the measure leaves the House of Commons—if it does so this session—it will be so changed that it will be virtually a different bill from that brought in by the president of the Board of Trade. Some critics complain that the bill is too drastic, others that it is too lenient to be effective in operation. Some denounce the officialism and others contend that too much discretion will be left to the creditors. A brief summary of the opinions and views now being enunciated may interest your readers.

The doctrine that there ought to be no law of bankruptcy is asserted by Mr. Joseph Cowen, and by a few other persons, including, I believe, Mr. Dixon-Hartland, who as a banker has had considerable business experience. From a strictly theoretical view the doctrine seemed very strong indeed. When men were imprisoned for debt, it was expedient, both on account of justice and humanity, to enact laws for their relief from what otherwise might have been life-long incarceration; but since imprisonment for debt is abolished there is no longer that *raison d'être* for a law of bankruptcy. Why should the law intervene to absolve men from their freely-contracted liabilities? If men thought that they could not get rid of a liability without full payment, unless the creditor of his own free will granted a release, they would be extremely careful in their dealings. Those who disagree with the doctrine say that it would be harsh and unjust to prevent an unfortunate man having the chance of a fresh, unencumbered start, especially as often the creditors are not quite free from blame. If there was no bankruptcy law the honest insolvent would be sure to have a few creditors who would refuse any compromise. Also it is urged that if a man found himself in difficulties he would avoid a declaration of insolvency as long as he could, and finally would have the strongest inducement to take care of himself by the concealment of a part of his estate. The abolition of the law of bankruptcy would not prevent roguery; it would discourage fair dealing with creditors, and it would press hardly on traders who were honest though unfortunate.

It has been suggested, and I hear that some persons deem the suggestion feasible, or at least worth consideration, that there shall be no law of bankruptcy, but at the same time it shall be enacted that no debt or liability shall be valid after three years from the time it was contracted. This limitation is to be so absolute that no form of acknowledgment and no renewal of an acceptance shall extend the period of the liability. Assuredly such a law would render a law of bankruptcy, so far as the debtor is concerned, comparatively unimportant; but it would be an unfavorable change for the creditor.

There are not many supporters of the abolition of a bankruptcy law, and the opinions of the majority as to what the bankruptcy law ought to be are wonderfully diverse. The only point of agreement is this: that a man pledges the whole of his estate to his creditors when he takes credit, and that if he becomes insolvent the whole of his estate belongs to his creditors. After that there is no unanimity, though probably very few dissent from the averment that the claim of every creditor is to a full pro rata share of the whole of the insolvent estate. Here we come to the main conflict as to what ought to be the character of a bankruptcy law. Those who are called the officialists contend that as the law compels the creditor to take in lieu of 20s. in the pound such a dividend as the estate will yield, that the law ought to provide for every creditor getting his full pro rata share of the whole of the insolvent estate. That is his due as a creditor of an insolvent estate, and it is as unfair to him that a majority of creditors should have power to compel him to take less than his due as it would be to empower the majority of creditors of a solvent estate to compel a minority or an individual creditor to take less than 20s. in the pound. The obvious deduction from this theory is that the law should enforce the realization of the estate, and the distribution to each creditor of his share of the assets. That is to say, the insolvent estate has to be realized and distributed under official supervision and direction; the only right of the creditors being the right of the individual creditor to have his full pro rata share of the whole of the insolvent estate. The advocates of officialism admit that Mr. Chamberlain's bill is an improvement upon the existing law, but they complain that it does not go far enough in the direction of officialism. Why, under any circumstances whatever, should liquidation or composition be allowed? Why should any creditor, under any circumstances, be deprived of the guarantee and satisfaction of having the affairs of the debtor officially investigated? or why should any creditor be deprived of his full pro rata share of the whole estate? If a man is insolvent he should become a bankrupt; and as for the plea that bankruptcy is a disgrace, it is the honest insolvent who does not shrink from investigation, and it is known from experience that the rogues have resorted to liquidation or composition; and often, perhaps in nine cases out of ten, the dishonest insolvent is aided and abetted by unscrupulous creditors—by creditors who combine with the debtor to defraud the other creditors. As to the disqualifications attached to bankruptcy, such as not being able to sit in Parliament or to act as a justice of the peace, if they are proper they should apply to all declared insolvency, and if there is any bona fide stigma it is the inability to pay and not the submission to the full length of official investigation.

The opponents of officialism find fault with Mr. Chamberlain's bill because it goes too far in the direction of official intervention and control. They say that the whole of the insolvent estate belongs to all the creditors as a body, and it ought to be at the complete disposal of the creditors, and that one or two creditors ought not, from spite or unreasonable harshness, to be able to gainsay the will of the majority of the creditors as to the disposal of the estate. Then as to the bankrupt, they contend that he ought to be judged by his creditors, and that he ought not to be injured and virtually persecuted by spiteful creditors, or creditors who hope by harshness to compel a special settlement of their claims. As for the allegations of fraud on the part of the debtor or some of his creditors, the reply is that such conduct should be dealt with as a criminal offense, and ought to be kept quite apart from the civil affair of the arrangement between an insolvent and his creditors. The change they are most anxious for in Mr. Chamberlain's bill is, that an insolvent may, without any official intervention, call a meeting of his creditors, and if at that meeting a majority in number and three-fourths in value approve of a composition or of liquidation, and if the resolution is confirmed at a subsequent meeting, that there shall be no bankruptcy, no official intervention, and the arrangement shall be binding on all the creditors. In a word, they ask that it shall be entirely at the option of a majority of the creditors in number and value whether there shall or shall not be officialism.

To the above views I will only add that some persons stoutly deny that insolvency is generally disastrous or ruinous to creditors. These persons ridicule the assertion that the unpaid amount due by insolvents is a dead loss. How can there be any loss of the wealth when not a pennyworth of property is destroyed? No amount of insolvency decreases the amount of property or of money in the country; and the only possible disaster is the disturbance of trade that may result from the diminution of credit. Then as to the creditor, it is remarked that he who gives credit charges for the credit, and not only charges for interest on the outstanding amount, but also for the risk of making a bad debt. Bad debts are to the trader what fires are to an insurance company. They are losses, but they are insured losses, and if the business is properly conducted, if a sufficient credit premium is charged, if the credit risks are prudently limited and distributed, the trader still makes a profit on giving credit despite the bad debts. In life assurance business the office sometimes has to pay the amount of the policy after the receipt of one or two premiums; but of course the rule is that the life lasts long enough to render the assurance profitable to the office. Now and then the trader makes a bad debt with a comparatively new customer, but the rule is that when he makes a bad debt he has done business with the debtor long enough at a profit that much more than covers the amount of the bad debt, from which has to be deducted the dividend and the profit charged on the transaction. The credit system, it is contended, would not continue if it did not pay, and since it pays it does not require a rigid bankruptcy law or any other sort of legislative protection. It may be that such views extensively prevail, and if so it accounts for the apathy with regard to the amendment of the law of bankruptcy.

J. H.

A CENTURY OF THE BRITISH GRAIN TRADE.

To the Editor of BRADSTREET'S.

SIR—On March 23 England's great commoner, Mr. John Bright, in an address before a mass-meeting at Glasgow, called to mind the repeal of the iniquitous corn laws, the agitation which pre-

ceded that triumph of public opinion in 1846, the extension of the franchise accomplished by the passage of the reform act of 1832, and its subsequent enlargements, as well as modern legislation respecting the land laws in the United Kingdom. On the occasion Mr. Bright was presented with the freedom of the Scotch commercial metropolis. On the preceding day he had been made Lord Rector of Glasgow University. No less significant were the ceremonies of the mass-meeting at the Glasgow city hall on the 23d ult., when he took occasion to call to mind the struggles of the people for the right to purchase the necessities of life at the cheapest price in the most favoring market. The eminent gentleman's references to the services of his friend, Mr. Cobden, Villiers, himself and others in securing the repeal of import duties on wheat were received with great enthusiasm. The lesson which the speaker sought to teach was that the opposition—that party which had embittered the battle by holding out against those who had fought for free corn and representation in Parliament—better known as the conservatives—should now frankly confess that their predecessors had been possessed by false fears and should themselves avoid like guidance in the treatment of public questions. Mr. Bright thought that the radical difficulty in discussing vital questions may be attributed to a liability to mistake the husk for the ear, thus rendering possible the mistake in not going to the kernel of a subject.

The prominence given to the anti-corn law fight, 1836-46, in the speech of Mr. Bright, was rendered of double significance by a statement he made respecting the United States, wherein it was pointed out that a like fight has been begun here. The question at issue has not come home to us as vitally as prohibitory duties on foreign wheat did to the British laboring man in 1840, but the contest has no less surely begun. Mr. Bright said he had received a letter from "a very eminent citizen of the United States," saying that they (we) are now "endeavoring to emancipate and elevate our politics" through the system of civil service appointment, and that we are also endeavoring to withdraw our legislation with respect "to economic questions, taxes and trade from the grasping hands of the monopolists who, since the war, have had them so entirely in their own power."

It appears to me that it requires only an active interest in public affairs to perceive the truth of this, and a brief review of British wheat production and consumption, as well as the market therefor in the United Kingdom during the century closing twenty years after the repeal of the tariff on wheat imported into the United Kingdom, cannot fail to add to the equipment of those entering into the merits of the great debate here respecting the question of tariffs.

In 1765, Adam Smith, in giving some figures concerning the crops of England and Wales, showed that the exports exceeded the imports by 3,188,000 bushels of grain. The fact is thus brought to mind that England was a grain exporting country for the first sixty-six years of the last century. The bounties paid by the British government for the export of grain for the ten years ending 1751 amounted to £1,515,000. The great increase of population after 1760, "but particularly after the peace of Paris in 1763, when the commerce and manufactures of the country were extended in an unprecedented degree, gradually reduced this excess of exportation, and occasionally inclined the balance the other way."

The price of wheat per quarter of eight bushels averaged £1 13s. 6d. for the thirty years ending 1755; at this price none but the best land could be cultivated to pay the farmer, especially as the precious metals had fallen at the beginning of the eighteenth century to their lowest point of purchasing power. It was only when the average price of wheat rose in the ten years ending 1775 to 51s. 3d., that it paid to bring second-rate land under cultivation, and it was only in 1795 when wheat was high, that third-rate land was cultivated. England's becoming an import country led to the suspension of the restrictions on importation. In the year 1773 an act was passed allowing the import of wheat at an nominal duty of 6d. per quarter when the home price was at or above 48s. per quarter, and exportation was to cease when the price was at or above 44s.

The total crop of grain in Great Britain in 1800 was 220,000,000 bushels, of which 25,000,000 bushels was used for seed. This left 195,000,000 bushels, which was all consumed. After the year 1789, Great Britain permanently imported more grain than she exported. The act of 1773 was repealed, and an act passed in 1791 allowing wheat to be imported, when the price was raised to 54s., at a duty of 6d. per quarter, under 54s. and above 50s., at duty of 2s. 6d., and when the price of home wheat was under 50s. a prohibitory duty of 24s. 3d. per quarter was placed on imports of wheat. It will be well to note that the act of 1791 was the first inauguration of prohibitory duties on imports of wheat, when home price was under 50s., and that act was not passed until two years after England ceased to be a grain exporting country.

Such was the stimulus given to agriculture by the rise in the price of grain, through the rapid increase of trade and manufactures, by the effect of Watt's improvement of the steam engine and the inventions of the spinning jenny and power loom, that one-third more land was inclosed by act of Parliament and brought under the plow from 1770 to 1800.

The total crop of grain in Great Britain in 1814 was 348,000,000 bushels, of which 100,000,000 bushels was wheat. Of this 12,000,000 bushels were used as seed and 5,000,000 bushels additional were imported, making a total consumption of 93,000,000 bushels for food, or about 4.9 bushels per capita.

During the period from 1793 to 1815 British agriculture reached a height of prosperity never attained at any previous or subsequent period; a redundant, irredeemable bank-note circulation, manufacturing prosperity from improved machinery, etc., kept prices of breadstuffs so continually high-priced during the whole time of the war with France that farmers were enabled to pay their rents to their landlords with the proceeds of the sale of a smaller portion of their crops than at any former period; in fact, the period of expansion is always the debtor's opportunity, as the following prices of wheat will show:

PRICES OF MIDDLING OR MEALING WHEAT PER QUARTER.

	s.	d.
Average of ten years ending 1775	51	8
Average of ten years ending 1785	47	8
Average of ten years ending 1795	54	3¾
Average of ten years ending 1805	81	2
Average of ten years ending 1815	97	6

The British farmer was in a perfect paradise of prosperity during the eighteen years ending 1813. I shall show in the sequel how tremendously the farmer suffered during the period of contraction of the paper currency that preceded the resumption of specie payments in 1821. The wheat crop of the United Kingdom in 1831 amounted to 120,000,000 bushels, of which 15,000,000 bushels were used for seed and 18,790,000 bushels were imported, leaving 123,790,000 for consumption, or about 5.07 bushels per capita.

The principal events that operated to the disadvantage of the agricultural interest were the great decline that took place in prices of grain, in consequence of the peace of 1814 and 1815, and the contraction of the circulation of the currency. No fewer than 240 country banks stopped payment in 1814, 1815 and 1816. In fact, the ruin that took place between the return of peace in 1815 and the resumption of specie payments in 1821 among the British farmers was appalling, as the following prices will show:

PRICES OF WHEAT PER IMPERIAL QUARTER.

	s.	d.		s.	d.
1812	126	6	1817‡	96	11
1813	109	9	1818	86	3
1814*	74	4	1819	74	0
1815†	65	7	1820	67	10
1816†	78	6	1821	56	1

* Peace. † War 100 days. ‡ Bad crops.

In the year 1822 the hard pan of prices was reached, and the average price of wheat in England that year was 44s. 7d. per quarter, the lowest price touched for thirty years.

In 1815 a Parliamentary commission examined witnesses as to the price that farmers could afford to let foreign wheat be imported free of duty for, and the decision arrived at was that the British farmer could not afford to raise wheat at less than 80s. per quarter. Accordingly, Parliament passed an act in 1815 that no foreign wheat could be entered for home consumption until the price of wheat reached 80s. per quarter. Above that price the British ports were to be opened free of duty. No act ever passed by a legislative body before or since has ever caused as much human misery as this. The farmers for whose benefit it was enacted were impoverished, and in many cases utterly ruined. Instead of keeping wheat at the price of 80s. per quarter or above, the price fell to less than one-half of that figure—at one period, in 1882, to less than 40s. per quarter. Its effects upon manufacturers and mechanics were appalling. England, not buying wheat from the countries of continental Europe, failed to sell manufactured goods to foreigners, and immense numbers of people were thrown out of employment.

As may be recalled, this led to starvation and riots. The yeomanry broke all restraint, and massacred the people at Peterloo, near Manchester, in 1818. The Scotch Lothian yeomanry overawed the city of Glasgow, and sabered some workingmen near Stirling. If the act of 1815, commonly called the corn laws, had not been enacted, the British farmer would have forced an adjustment of his rent in 1815, and prevented or mitigated the losses that afterwards fell upon him. The prices of wheat from 1822 were as follows:

PRICE OF WHEAT PER QUARTER.

	s.	d.		s.	d.
1822	44	7	1827	58	
1823	53	4	1828	60	
1824	63	11	1829	66	
1825	68	6	1830	64	
1826	58	8	1831	66	3
					4

It should be added that while foreign wheat could not be entered for home consumption unless home wheat was selling at or above 80s. per quarter, wheat grown in the English North American colonies could be entered for home consumption when British wheat was at or above 67s. per quarter; and that the prices of British rye, peas and beans should be 53s., barley 40s. and oats 26s. before these foreign grains could be entered for consumption.

In 1845 the crop was bad and not a fair criterion of the position of the British crops, while in 1844 the crop was a good one. Out of 440,000,000 bushels of grain raised that year, the wheat crop was 150,000,000 bushels. Of this, 15,000,000 bushels were used for seed, and 9,902,192 bushels were imported, giving an aggregate consumption of wheat of 144,902,192 bushels, or 5.18 bushels per capita. As the crop of 1844 was a fine one to afford a fair estimate of the state of British agriculture at this time, I shall give an estimate of the crop of 1845—the crop which was consumed in 1846, the year in which the corn laws were repealed.

In 1845 the crop of grain was 380,000,000 bushels—leaving for consumption (less seed) 325,000,000 bushels. The imports of wheat were 20,000,000 bushels, and of other grain 18,000,000 bushels—in all, 38,000,000 bushels, or a total consumption of 366,000,000 bushels of grain. Of the above, the wheat crop was 101,000,000 bushels, less seed, 15,000,000, leaving 86,000,000 bushels. There was imported 20,000,000 bushels of grain, showing that 106,000,000 bushels of wheat were consumed. There was a modification of the corn laws in 1822, when a kind of sliding scale of duties were enacted, which was improved upon in 1828, and again by Sir R. Peel in 1842. The extreme wet summer of 1845, and consequent bad crops, determined Sir Robert Peel to abolish the corn laws in the summer of the year 1846.

The average weekly wages of a common laborer in England during the last twenty-five years under the corn laws was 10s. per week, and the average price of a bushel of wheat during that period was 7s. 3d., and the average quantity consumed by a family of five persons was 25 bushels of wheat. It will thus be seen that the laborer had to pay 34.8 per cent. of his income for bread, leaving but $65^2/_{10}$ per cent. for meat, rent and clothing. Wages now average 16s. per week, and the average price of a bushel of wheat during the last five years to November was 5s. 6d. per bushel, and the average quantity of wheat consumed by a family of five persons for one year was 27½ bushels. It will be at once seen, therefore, that the cost of cereals to the British laborer has declined to $17^9/_{10}$ per cent. of his wages; the residue of his wages, as compared to that remainder during the corn laws, is $81^2/_{10}$ per cent. of his income as compared to $65^2/_{10}$ per cent.

It must not be denied that the abolition of the monopoly of the East India Company (as the sole importers of tea) of the prohibitory duty of 63s. per cwt. import duties on foreign sugars, the removal of duties on foreign wool, cotton and all raw materials has by increasing the foreign trade of England faster than the increase of population assisted (as well as freedom of the corn trade) in increasing the value of the wages of labor; but it is also to be maintained that no misdirection of labor and capital can equal the waste caused by high prices of grain through prohibitory duties, which forced the cultivation of inferior soils.

HENRY KEMP.

RECENT LEGAL DECISIONS.

[*Prepared expressly for* BRADSTREET'S.]

The question of the validity of contracts for futures was touched upon in the case of Rountree, plaintiff in error, vs. Smith et al., decided by the Supreme Court of the United States on the 16th inst. The suit grew out of speculations in domestic produce in the city of Chicago, upon "margins," and was brought by the firm of Smith & Lightner, brokers, to recover a balance alleged to be due them by their customer Rountree, on account of purchases and sales of provisions and grain made by his order. The defense set up by Rountree was the usual one in such cases, namely, that the brokers had not actually bought or sold for him the commodities specified, but had merely speculated in "options" on his account, that these "options" were nothing but gambling contracts or bets on the future prices of the various articles of produce, that they were not designed to be actually performed by delivery, but that the differences were to be adjusted and payments made and accepted according to the differences between the contract price and the market price at the date fixed for delivery, and that finally these gambling contracts were illegal and void. No proof was offered that the particular contracts in controversy were really bets on future prices, but evidence was offered to prove that a large proportion of all the contracts made by members of the Chicago Board of Trade for the sale of produce was settled by the payment of differences, that nothing else was expected, and that the proportion of such betting contracts in comparison with bona fide contracts was so great as to warrant the inference that the contracts in controversy were of the gambling kind. The Circuit Court of the United States for the Western District of Wisconsin, in which the case was brought, gave judgment in favor of the brokers, and this decision was affirmed by the Supreme Court on Monday. The court said that evidence of what other people intended by other contracts of a similar character, however numerous, was not sufficient of itself to prove that the parties to the contracts in question intended to violate the law or to justify a jury in making such a presumption. The court remarked in addition that the plaintiffs were not suing on the contracts, but for services performed and money advanced for the defendant at his request, and though it was possible that they might under some circumstances be so connected with the immorality of the contract as to be affected by it, they were certainly not in the same position as a party suing for the enforcement of the original agreement. The decision seems to be in line with the best English and American precedents.

In a recent case in Massachusetts, Byington vs. Simpson, it appeared that a building contract upon which suit was brought was in writing, and purported on its face to have been made by the plaintiff with the defendant's husband as agent. The contract was to be executed under his supervision, and was signed by him as agent. Simpson was, in fact, contracting as agent for his wife, and this fact was known to the plaintiff at the time the contract was made. The defendant contended that, inasmuch as the plaintiff knew of the existence of a principal before the contract was made, and was then contented to accept a written agreement which on its face bound the agent, he must be taken to have dealt with and to have given credit to the agent alone. The plaintiff had judgment below, and this judgment was affirmed by the Supreme Court, which took the view that the plaintiff's knowledge did not make his case any weaker than it would have been without such knowledge. The court held that the question whether the plaintiff in reality elected to consider the agent as the only responsible party was one of fact, and, consequently, was properly one for the jury. It, therefore, refused to disturb the finding below.

A case recently decided by the Kentucky Court of Appeals illustrates some of the devious means resorted to by unscrupulous officials in order to increase their wealth. It seems that an assessment under a certain ordinance of the city of Louisville was illegal on account of the omission of some necessary act. The clerk of the Board of Aldermen, knowing of the illegality, offered to supply a firm of attorneys with the necessary evidence to recover taxes paid on the assessment in return for a share of the fees received by them. A contract was made on these terms, but the attorneys refused to pay the clerk his share. The latter thereupon brought suit to recover his share, but was defeated. On appeal to the Court of Appeals, Lucas vs. Allen, the judgment below was affirmed, the court remarking that the plaintiff being charged with the custody and power to copy and attest the very ordinance on the authority of which the illegal assessments were made, the contract entered into by him with defendants was against public policy and consequently void.

In the case of Lewis, plaintiff in error, vs. The City of Shreveport, which was a suit upon the coupons of a series of bonds issued by the city of Shreveport in aid of the Texas & Pacific Railroad Company, the United States Supreme Court held the bonds void for want of valid legislative authority. The court holds that unless specific authority has been given by the legislature to a municipal corporation to grant pecuniary aid to railroad companies all bonds of the municipality purporting on their face to be for such a purpose are void, even in the hands of bona fide holders, whether the people voted the aid or not, and that every purchaser of such a bond is chargeable in law with notice of want of power in the municipal authorities to bind

the body politic in that way. In the case before the court it was not pretended that any such power was expressly granted, and there was no provision of the charter from which anything of the kind could be inferred.

BUSINESS NOTES.

The proposed reduction of the production of whisky by western distillers, after July, to one-quarter of the capacity, it is said, will not affect the market much, as one-third of the capacity is all that is now being worked. This will mean a reduction in output of but 8 per cent.

The cable dispatch dated Berlin, April 13, states that the regulation forbidding the importation into Germany of American hog products was gazetted on that day. The same dispatch stated that the Prussian live stock census, just completed, shows an important increase, except in sheep, as compared with the total in Prussia ten years previously.

The British *Trade Journal* seriously discusses the statement that "an ingenious American has succeeded in solidifying whisky so that it may be carried about in cakes in the waistcoat pocket.' The journal named explains that "in this country (the United Kingdom), at least, the essential element of whisky is alcohol," and that "alcohol has never been solidified."

The London *Labour News* of April 7 states that the British labor market generally is good. The only exceptions noted are that in the mining districts the restricted output keeps the miners unsettled; the electroplate and file trades at Sheffield are suffering for want of sufficient orders; the textile trades do not show much activity; the Coventry weavers demand higher and more uniform wages, and Nottingham and Leicester factories are not very busy.

The Mexican government is contemplating a number of improvements in its postal service. Among other things it promises to expedite the mail throughout the (Mexican) frontier states in connection with the American service, thus giving a daily, instead of a tri-weekly, mail. The new system also provides for the issue of international money orders. This should greatly facilitate the development of trade relations between Mexico and the United States.

The business situation in France shows no signs of improvement. The vast numbers of idle workingmen have not found employment, and their very idleness renders them as so much tinder, politically. This reacts again upon the finances and general trade, and helps to preserve the industrial depression which they complain of. The iron trade is very dull, and orders are barely sufficient to keep them running. Even the retail trade of the capital is said to be stagnant, and ordinarily desirable shops in the heart of the city are tenantless.

The total immigration into the United States in March amounted to 38,730, against 65,234 in March, 1882. For nine months ended March 31 the total number of immigrants received in the United States was 339,214, against 440,327 in the like nine months of 1881–82; about 100,000 less. Out of the total (38,730) arriving in March, 27,832 entered the country at the port of New York, 3,605 at Huron, Mich., 2,815 at Baltimore, 1,603 at Detroit, 1,351 at Boston, 1,059 at Philadelphia, 155 at New Orleans, 131 at San Francisco, and 92 at Passamaquoddy.

The outlook in that centre of hop culture, the region tributary to Waterville, N. Y., is that hop acreage will be largely increased. This is the natural outcome of the unexampled high prices and short crop which prevailed last season. Many farmers are reported to be turning all their attention to hop cultivation. The extent of the mania for hop cultivation is to be inferred from the fact that hop-vine runners, "cut off for the good of the vine" and usually thrown aside to decay, are fetching $5 per bushel. The demand for hop-poles is also very heavy.

The March statement of the British Board of Trade showed that the exports had declined £280,000 in iron and steel, £211,000 in cotton and worsteds, £137,000 in apparel, and £52,000 in cottons of all kinds. These points are explained by the facts that India having sold less cotton to England takes less cotton goods in return. In addition to this the British trade with China and Japan continues to droop, and the United States took less iron and steel. A British commentor adds that "it is consolation, however, to know that France and the United States are also suffering."

Some months ago the Dominion government, inspired no doubt by the success of various national statistical bureaus in this country, organized a Bureau of Industries for the collection of manufacturing data in Canada, previous efforts at gathering agricultural statistics having met with a measure of success. It is learned that the experiment was unsuccessful. Circulars were sent to all manufacturers, but out of 5,838 establishments thus addressed only 919 responded. The statistics were thus comparatively valueless, and the government will not continue their collection. The opinion has been expressed that the questions were "too inquisitorial" to secure answers.

During the past week a movement has been made looking to the placing underground all telegraph, fire and telephone wires in the city. It originated at a meeting of most, if not all, of the electrical companies, held for the purpose. There have been 350 devices for conducting electric wires underground, but the companies referred to have not learned of any reliable system. The plan is to combine on some one system of placing the wires underground, and share the expense among the companies. The three points to be considered are the scientific arrangement of an underground system, its mechanical construction, and its comparative merits financially. It is expected to have these views of the systems considered, thoroughly investigated.

Louisville's great Southern Exposition, to be opened August 1, and to continue for 100 days, is being rapidly progressed. Active preparations are making in the way of notifying various foreign countries and perfecting arrangements in other ways. As is doubtless known, the purpose of the exposition is a general exhibition of the products, manufactures and arts of the country, with the special end in view of bringing the industries and products of the north and south face to face at Louisville. From the present outlook, as pictured by the *Courier-Journal*, success seems assured. New Yorkers will be able to judge of the quality of the attractions by the announcement that the Seventh Regiment band of New York will furnish the music at a cost of $35,000.

Recent reports from the Wyoming Territory stock grazing regions are that the past winter has been a good one for cattle and that they have done well. Also that prices will be high as the supply does not equal the demand for consumption by the increasing population there and the augmented requirements east. The *Post* recently published an account of a project to slaughter beeves on the grazing lands in the Yellowstone region for shipment east in refrigerator cars. It was added that something over $6 per head could be saved in this way owing to the great shrinkage in the weight of cattle shipped 1,300 miles east to Chicago on the hoof. It has been demonstrated that dressed meat can be shipped and preserved sufficiently long in this way to render it a formidable competitor to that slaughtered at the point of consumption.

The total number of failures in the United Kingdom and Ireland, reported to *Kemp's Mercantile Gazette* for the week ended March 31, was 142, against 224 in the like week of 1882, and 296 in the corresponding week of 1881. England and Wales had 123, against 211 and 270 respectively in the like weeks of 1882 and 1881; Scotland had 17, against 13 and 21, and Ireland had 2, against none in the last week of March, 1882, and 5 in the same week, 1881. The grand total for the week ended March 24 was 277, against 260 and 287 respectively in the like weeks in 1882 and 1881. This shows how great the decline was in the succeeding week, when the total was but 142. In the week ended March 24, England and Wales had 248, against 236 and 262 in corresponding weeks in 1882 and 1881, Scotland had 20, against 20 and 22, and Ireland had 9, against 4 and 3.

In his budget speech, Sir Leonard Tilley, the Dominion Minister of Finance, estimates that the total revenue for the year ending June next will aggregate $34,750,000, and the expenditure $28,750,000, a surplus of $6,000,000. The proceeds from the sale of land in the northwest are estimated at $1,750,000, when the total surplus for the year will be $7,750,000. For the year 1883–4 the revenue is estimated at $33,250,000, and the expenditure at $30,250,000, a surplus of $3,000,000. The sale of land in the northwest is estimated to yield $2,250,000, making the estimated surplus $5,250,000. It was added that no loan would be placed on the London market this year or next, except for the purpose of covering maturing bonds. It was stated that an effort would be made before next session to extend the trade relations between the Dominion and the West Indies and South America, the Canadian government proposing to reduce the duty on sugar when corresponding reductions are made by other governments. Several changes have been made in Canadian import duties. The most important are on tobacco and cigars. Books published seven years ago are to go in free. Sheet copper, brass and copper wire and fine iron wire are also to be free. Steel rails and fish-plates remain as before. The duties on dried fruits have been reduced 5 per cent.; on lampblack and ivory black, 10 per cent.; nitrate and acetic lead, 20 per cent. Duties on agricultural implements, carriages, cottons (printed or dyed) have been increased. After July next steel ingots and bars are to be charged $5 per ton. In all cases where Canada is not as favored as other nations in her foreign trade relations, Parliament will be asked at the next session to assent to differential duties being levied upon imports from such countries.

The city of Portland, Oregon, is experiencing a very active trade. This has been indicated by recent reports of the rush of immigration to Washington Territory and the tide of travel and commerce between San Francisco and Portland, via the Oregon Steamship Company's line. Portland has recently witnessed the advent of a new morning daily, the *Northwest News*, which displays marked enterprise and ability in keeping abreast of the doings of the world from day to day. In discussing the trade situation at Portland, the *News* of April 3 said: "There are at present in this city a far greater number of interior merchants or their representatives than at any corresponding period since the northwest became the objective point of emigration. Merchants and business men are almost overrun with trade. That quarter chiefly devoted to wholesale business is almost impassable, owing to the mountains of cased goods piled upon the sidewalks. Heavily loaded trucks clog the streets. Everywhere are merchants and their salesmen busy with customers. Merchants say orders for goods are larger than ever before, and the disposition is shown to pay cash as an inducement to secure liberal discounts."

The following national banks have been organized: The Cincinnati National Bank; capital $500,000; Joseph F. Larkin president, Edgar Stark cashier. The Swedesboro (N. J.) National Bank; capital $53,000; Isaac H. Vanneman president, John C. Rulon cashier. The Tacoma National Bank, New Tacoma, W. T.; capital $50,000; John W. Sprague president, Isaac W. Anderson cashier. The Citizens' National Bank of Whitewater, Wis.; capital $50,000; John S. Partridge president, Edgar M. Johnson cashier. The First National Bank of Paxton, Ill.; capital $50,000; Sherrill P. Bushnell president, John B. Shaw cashier. The First National Bank of Georgetown, Ky.; capital $50,000; H. P. Montgomery president, N. Spears cashier. The First National Bank of Albany, Oregon; capital $50,000; John Conner president, Henry F. Merrill cashier. The Amesbury (Mass.) National Bank; capital $100,000; Alex. M. Huntington president, F. F. Morrill cashier. The Home National Bank of Milford, Mass., has elected George W. Johnson president in place of S. Walker. The Sioux City (Iowa) National Bank proposes to increase its capital from $200,000 to $500,000 to meet the growing demands of business.

A complaint comes to the State Department at Washington from Consul Judson A. Lewis, at Sierra Leone, that a large proportion of tobacco sent from the United States to Africa is fraudulently packed. The consul writes: "I have known, of my own personal knowledge, during a residence here of nearly five years, that American leaf tobacco in hogsheads (Kentucky) is dishonestly packed, or dishonestly inspected, or both, in not being according to samples in quality, length and color, occasioning great loss to the importer; for no sooner is it sold, duty paid, and taken to the retailers' shops and opened than a complaint comes of the tobacco being bad. The merchant goes and inspects it, and finds large quantities of very short leaves and inferior tobacco, and some hogsheads contain from one to six bagsfull of refuse tobacco that will not sell for half enough to pay the duty, and an allowance has to be made by the importer, varying from 25s. to £12 per hogshead." This tobacco is imported into Sierra Leone from New York and Boston, by three houses, one American, one French and one English, by whom it is sold to traders by inspector's samples. The Sierra Leone customs reports show that the imports of the American leaf fell away from 993,653 pounds in 1880 to 881,890 pounds in 1881. It appears that the sanded cotton complaint is not the only instance of the kind wherein American exporters have been open to censure. This case does not call for special comment. It speaks for itself, and it now remains to be seen if the tobacco shippers in this country will be wise in their day and generation.

SOUTHERN COMPETITION IN TRADE.

The Philadelphia *Times* says: The dry goods merchants of New York and the New England manufacturers of the cheaper grades of cotton goods are just now wrestling with a new problem that causes them a good deal of anxiety. They find that goods of southern manufacture are competing with them for the western trade, and that the southern goods have immense advantages in rates of freight. In order to meet this danger to their western trade the New York Chamber of Commerce has appealed to the Railroad Commissioners of that state to interfere in their behalf and furnish a different classification of rates on goods of this description. It is difficult to see how the railroad commissioners of a single state can be of any service to the dealers who are striving to hold the western trade. If anything is to be done by railroad commissioners which will be effective it must be the work of a national board, a body which as yet has no existence. The railroads themselves may in the end think it worth while to reduce rates, in order to prevent the loss of this carrying trade. The southern roads have the advantage even in this form of competition, however, as their cars nearly all go west empty, while a great proportion of the west-bound cars of the northern roads are loaded with other freights. But the important revelation made by this action of the eastern dealers and manufacturers is the fact that southern cotton manufactures have become prominent enough to be an important factor in the trade of the west. This indicates the beginning of a business revolution in that part of the country. The south has always had admirable natural advantages for this particular branch of manufacturing. She grew the cotton, had abundant water-power and cheap labor. But until quite recently she was content to buy her manufactured goods from northern mills. Since the war, however, southern men have gradually opened their eyes to their own interest, with what results the complaints of the eastern manufacturers attest. It is probable that the eastern manufacturers have no permanent remedy against this new competition, except in the manufacture of a finer and and better finished grade of goods.

In relation to the above, the Boston *Traveller* has the following: "Though, however, cotton manufacturing in the south is as yet in its infancy, it is nevertheless becoming rapidly apparent that New England must not be too sure of retaining a monopoly of this branch of manufacture. A sharp competition already exists, not only for the trade in sheetings in the cotton states, but southern cottons are now entering the markets of the southwestern states, and the New Englander finds himself confronted in all the leading markets of the Mississippi valley with sheetings and shirtings in no way inferior in quality to those manufactured by himself, and which are offered at a less price than he, to make his customary profit, can possibly afford. Instead of a possible competition twenty-five years hence, the danger wich threatens the New England manufacturer is already imminent. * * * * The southern mills are not yet producing the finer qualities of goods, but remembering the history of the last ten years, it is not safe to assume that with the same machinery that is used in the north they will not successfully do this within the next ten years. We do not share the fears expressed in some quarters that New England cotton manufacturers are doomed; but it is evident that they are to meet with a sharp competition, and that very likely, to insure their future success, their methods of conducting business will have to be changed and new markets for their produce opened."

RAILWAY EXTENSION IN INDIA.

The Indian *Official Gazette* gives some interesting particulars of railway extension in India. At the end of the year 1882–83 there were open for traffic 10,251 miles of rails, showing an increase of 290 miles during the year; and there were in course of construction 2,332 miles, being an increase of 1,030 miles during the year. The net returns from the traffic, excluding the lines in the native states, were Rs. 7,40,17,500, or an average return of 5.07 per cent. on capital and cost. The length of the railways open for traffic has been doubled in the course of the last ten years.

FINANCIAL.

THE LOAN AND INVESTMENT MARKETS.

It seems to be useless to try and take a cheerful view of things in Wall street. Though there was a sudden upward flurry yesterday, yet the bull movement in the stock market has disappeared in smoke. It has "fizzled out" ignominiously. It was said last week that its continuance was as much a matter of conjecture as ever, though it had then been running about two weeks. It broke down on Monday morning, and once more demonstrated that a merely speculative advance of the market, with little if anything in the industrial and commercial situation to justify it, is bound to break down just as soon as one set of professionals has been able to sell out to another set. Which set got "landed" in the recent evanescent bull movement is a matter of conjecture to outsiders; but it is certain that one of them did, for the public did not buy stocks. There was a fair amount of business done in bonds, but the speculative buying of stocks was of the most timid kind; the mere buying and selling again on the turn of a few fractions which the street calls "scalping." All sorts of reasons are given for the sudden change in the market, but the only valid one would seem to be that the time was inopportune, for, practically, there were no buyers in the market but the regular Wall street hands. Certain operators who were bulls two weeks ago and suddenly came out as bears, asserted that they found, as the market was strengthened, that nearly every company whose stock was active at all was preparing to issue more stock or more bonds, and against this it was impossible to bull prices. Doubtless there is a large measure of truth in this, for it is undisputed that very many large railroads had a very poor time last year, and though they have been doing better this year, they laid up heavy floating debts which must be provided for by the issue of more securities. It is certainly a discouraging circumstance that so many companies are now in the market, or are known to be coming into the market, as borrowers. There is, after all, one criterion only by which to test the stock market, viz., the price of iron. If the iron market be stagnant, as it is, with prices weakening, it is nonsense to talk about a legitimate rise in the stock market. All the plausible explanations in the world do not alter the hard facts. Such advances as the market has while the industrial situation is in the condition that a falling iron market betrays are local movements, purely speculative in their origin, and generally merely reactions consequent on overselling.

The events of the week have not been calculated to encourage confidence in a rise of prices. First, there was the Northwest affair. It will not be forgotten that the recent rise was originally started by a sudden jump in the price of this stock, and it was announced that all the chief men of the company had been called to meet in executive session to take action on providing for the purchase of the stock of the Omaha road. The meeting was held last Tuesday, but meantime the price of the stock had had a considerable reaction, not suggestive at all of a coming scrip dividend. The meeting was held, and the result of it was announced as the adoption of a resolution to issue $10,000,000 of bonds to pay for the Omaha stock. Instead, therefore, of a scrip dividend for holders of Northwest, they found that an annual interest charge of half a million had been added to the company's obligations. This, of course, caused a general feeling of disgust and disappointment. Yesterday the scrip dividend story was revived, to the tune of a sudden jump upward again in the price of the stock, it being stated that an issue of ten millions of new stock would be made, and for the present only placed in the treasury. The next trouble was with Union Pacific. The negotiations referred to last week seem to have had an unfavorable termination, for instead of the stock advancing it has declined, and its decline has been most depressing in its effect on the general market, since there is a feeling abroad that more trouble is in store. The company had five millions of new bonds listed on the Exchange this week, for which it has yet to find a market. Central Pacific has shown its capacity for tumbling back, and seems to utterly lack support from "insiders," who ought to know its value if any one does. Various disquieting rumors, also, have been in circulation respecting the supporters of the Northern Pacific stocks; and it is said that here also there is an urgent need for more money.

The drop again in Chicago, Burlington & Quincy stock from its highest figures of last week may perhaps be accounted for by its forced purchase of the Hannibal & St. Joseph road. Mr. Gould's tactics were successful in the end, as they generally are, and the preparations so ostentatiously made to extend the road to Chicago appear to have frightened so many large stockholders of the Chicago, Burlington & Quincy that they prevailed upon President Perkins to modify the terms on which he had offered to buy the road, and which Mr. Gould had rejected as being too low. On the other side, Mr. Gould consented to take his pay in Chicago, Burlington & Quincy bonds instead of cash, which he had originally demanded, and by this mutual concession the bargain was made. As far as the Chicago, Burlington & Quincy is concerned, it had only a choice of evils; for it was undeniable that with the Hannibal road in Mr. Gould's control he could have worried the Chicago, Burlington & Quincy Company in a variety of disagreeable ways. The purchase adds a heavy sum to the annual interest charges of the purchasing company; but it is yet too soon to say how the minority of the Hannibal & St. Joseph stockholders will fare. If the Chicago, Burlington & Quincy Company should decide to merely lock up its purchased stock in its treasury and pay no dividends on it, the holders of Hannibal & St. Joseph preferred would be in bad case. Some of the directors of that company who "got left on the deal," as the street phrases it, were extremely wroth. As is customary with Mr. Gould, the transaction was not made known until it had been completed. When the Board of Directors met on Wednesday they were told that the property had passed into the control of the Chicago, Burlington & Quincy.

The lease of the Wabash road to the Missouri Pacific (technically to the Iron Mountain to avoid certain legal obstacles) has had some further and rather remarkable developments. As they appear now, they are not the sort of stuff to bull Wabash on or the general market. At the last annual meeting of the Wabash Company, which was held in St. Louis, a resolution was adopted authorizing the company to issue $10,000,000 more of 6 per cent. bonds. This only came out a few days ago, as the meeting seems to have been secret. That the Wabash was heavily in debt, and that Messrs. Gould and Sage had sustained it from their own resources, was well known. A new issue of bonds, therefore, which could only come after all other obligations now resting on the road, and which it has been unable to earn the full interest on, would not be likely to find very ready purchasers. Vague reports about the bonds floated around the street; it was said that they would not be issued at all; that they would be issued at some future time when a market could be found for them; and that $3,000,000 had been reserved to pay for equipment already bought on credit, while the rest had been issued and taken by somebody. Yesterday the astonishing story was told that the Iron Mountain—really Missouri Pacific—company had taken them all at fifty cents on the dollar, and that the proceeds had been used to repay to Messrs. Gould and Sage the advances they had personally made to the Wabash Company. As Wabash preferred stock was quoted at 51, the sale of the company's bonds at 50 was a story simply amazing. Whether it be true or not we cannot yet say.

The loan market has been easy through the week, and the bulk of the business in call loans has been done at 5 to 6 per cent. Time loans are freely offered at 5½ per cent. The banks, as will be seen by the statement below, are filling up again, and a good exhibit is expected this week. Foreign exchange receded half a point, and has been steady at $4.83½ and $4.86, actual rates being the usual percentage below these figures. The London market is quiet. The Bank of England lost some gold during the week, but slightly increased its reserve against liabilities. The discount rate remains at 3 per cent. In the government bond market there has been no movement of note. Closing quotations yesterday were as follows:

	April 13, bid.	April 20, bid.	April 20, asked.
U. S. 5s extended (3½ p. c.)	101	103	—
U. S. 4½s 1891, registered	113¼	113¼	113⅜
U. S. coupon	113¼	113¼	113⅜
U. S. 4s 1907, registered	119¼	119⅜	119¾
U. S. 4s 1907, coupon	119¾	119⅜	119¾

The bank statement of Saturday was a good one, and in the large increase in reserve showed that the banks must have been better off at the close of the previous week, as well as that they had been accumulating money since then. The increase was $3,411,650, which nearly wiped out the deficit from the 25 per cent. line, that being now only $289,350. The following are the comparative totals of the statements of April 7 and April 14:

	April 7.	April 14.	Differences.	
Loans	$311,039,400	$310,222,600	Dec.	$816,800
Specie	50,020,400	53,062,800	Inc.	2,442,400
Legal-tenders	15,023,700	17,685,100	Inc.	1,761,400
Deposits	280,080,400	284,149,000	Inc.	3,168,600
Circulation	16,532,600	16,496,800	Dec.	35,200

The proportion of total reserve to liabilities is now 24.99, against 26.70 per cent. at the same time last year.

From Baltimore, Md.: Dullness again characterizes the stock market, and orders are chiefly for the better class of investments, which are difficult to obtain at current prices; state bonds are dull; city stocks are readily sold and command full prices; railroad stocks rule inactive; bonds are in demand, but the supply is limited.

By telegraph from New Orleans, La.: Stocks quiet. Union National Bank issue 2,500 shares, making capital stock 500,000; new shares to be given to old shareholders at rate $70 for $100 par value. Louisiana 7s have changed but very little. Premiums dropped one point.

By telegraph from Halifax, N. S.: Sterling exchange 9¼ @ 9¾.

THE FOLLOWING WERE THE CLOSING QUOTATIONS FOR STOCKS ON THE DATES NAMED:

COMMERCIAL.

The dispatches to BRADSTREET'S this week from the principal business centers of the country indicate a moderate improvement in the general trade situation. Wheat has advanced between 4 and 5c. per bushel in the last week under the influence of unfavorable crop reports, especially from California. These latter have since been contradicted, but the effect on the foreign markets was reflected on the American markets in the latter part of the week and prevented the decline. Corn has advanced 2c. during the week, partly in sympathy with the advance in wheat, and partly on account of the diminishing receipts at the principal western points. The iron market is still more depressed than for some time past. Various furnace men look for the closing out of a number of furnaces in the near future, as stocks of pig are being piled up in yard, and consumers persist in buying from hand to mouth only. The opinion is also expressed that prices, which are now nominally $24@$22 for Nos. 1 and 2 respectively, will suffer a material reduction. Scotch pig arrivals are small, and a portion is being stored. Conflicting views are expressed as to the outcome of the issue between the western iron mill owners and their employés. Petroleum certificates during the week have been regarded with comparative indifference, and the speculative market has therefore been less animated than for some time past. Anthracite coal continues dull and prices are cut below the schedule. Full time at the mines will be observed next week. The rate of production during the first quarter indicates over 2,000,000 tons on the year in excess of 1882. Ocean freights are low, and petroleum tonnage is the only variety particularly in request. The movement of wool has been mostly in small lots, proportioned to the nearest wants of manufacturers, but the market has undergone very little change. There were 160 failures in the United States reported during the past week, 7 more than the preceding week, 74 more than the corresponding week of 1882, and 73 more than the same week of 1881.

BREADSTUFFS.

In the past few days the foreign grain markets have been influenced by the advance in American markets caused by the unfavorable reports of the condition of winter wheat in the middle states, and especially the telegraphic reports from California on Thursday in regard to the damage by drouth, which caused an advance in New York and Chicago on that day of nearly 2c. per bushel. But, aside from this, the predominant influences in the foreign markets were, for the time, in favor of lower prices. Since April 1 the weather in the United Kingdom, and, in fact, throughout western Europe, has been very fine, and favorable for spring sowing of all grain. Mail advices up to April 6 from St. Malo and other points in France speak of a depression in the wheat market caused by the abundant offers of home-grown wheat. Similar accounts also come from Mannheim and other points in Germany. The competition of American flour in the British markets has deprived the French millers of one of their most profitable markets for their finer grades of flour, and the result is that they are not able to take their usual quantities of French wheat to manufacture for English consumption. Latest Bombay advices also say that the rates of railway freights on all grain from the interior had been reduced 18¾ per cent., with a view to stimulating the export of wheat; this reduction being equal to 1s. 6d per quarter on wheat. These features had given all the foreign markets a downward tendency until it was reversed by the reports of the damage to the winter wheat in this country.

The increased supplies of home-grown wheat, and the prospective increase from India and Russia were, however, regarded as at best but a temporary influence. The general outlook for supplies later in the year from the next crops has not been greatly improved. Even the advices from France of April 6, which speak of the depression of prices consequent upon the competition of American flour, say at the same time that the crop prospects are far from satisfactory; that the area planted in France is still 20 per cent. below the average, and that the wheat plant, affected by the prolonged wet winter, looks weak and sickly, and that it would require almost a miracle to give a good average yield from what is planted.

The statisticians in the United Kingdom are also all in a muddle with their figures. It is now generally conceded that the methods which have heretofore been considered satisfactory for arriving at he consumption of wheat and at the amounts of surplus wheat and flour in store in the United Kingdom, are now found to be erroneous; that the consumption of wheat per capita there has certainly increased, and that the surplus supplies in store are found to be very much less than was supposed. At the six principal ports of the United Kingdom there was on April 5 an aggregate of 3,000,000 bushels more wheat (in wheat and flour) than at the same time in 1882, but also that the amount of wheat afloat for the United Kingdom on that date was 304,000 quarters, or over 2,400,000 bushels, less than on April 5, 1882, so that the accumulation at these principal ports is nearly offset by the diminished amount on passage. The aggregate of wheat and flour at these ports also shows a decrease equal to nearly 1,200,000 bushels of wheat from January 1 to April 5.

Attention both there and in this country is now being directed to the fact that the price of wheat in England is abnormally low, considering the certainty that the next British crop will scarcely be over two-thirds of an average, and that the general crop of western Europe will scarcely be over 75 per cent. of an average. The average price of English wheat in the five weeks to April 5 was 42s. per quarter, whereas the average price of the last ten years is 46s. 11d. per quarter, thus showing that the prices of the five weeks were 15@16c. per bushel below the average of ten years. Thus, while the pressure of the immediate supplies of both home-grown and foreign wheat in both France and Great Britain had made an abnormal depression of prices, it is acknowledged that even with a good average crop in America prices are likely to be as much above the ten-year average in the latter part of 1883 as they have lately been below it. While it is too early yet to make any forecast of the spring-wheat crop in the United States, it is beyond doubt that the winter-wheat crop has been damaged to some extent. With a fair yield of spring wheat, the increased area—which will certainly be planted for that crop in the northwest—may make up for the damage to the winter wheat, but certainly not more than that. All things considered, the prospect is that the last half of 1883 will show prices for wheat at least 25c. per bushel higher than in the first four months.

The Department of Agriculture at Washington report for April 1, 1883, makes the condition of the wheat crop in the United States 80 against 104 on April 1, 1882, and 85 on April 1, 1881. The returns also indicate an increase of 1 per cent in the acreage. But in order to make this low estimate of 81 for the condition of the winter-wheat crop the department has put in the condition of the crop in California at 62. The secretary of the State Board of Agriculture of California telegraphed on Thursday that, from the latest and best information, the state will produce a full average crop. It will be seen by this one instance that the department's estimate of a condition of 81 for the winter-wheat crop of the United States does not represent the present condition.

AMERICAN WHEAT MARKETS.

The past week has been marked by a strong upward movement in prices, caused by reports more or less exaggerated in regard to the winter-wheat crop, and accompanied in numerous instances with estimates of the probable shortage of the crop of 1883. The advancing tendency of the market has also been stimulated by the improved tone of the foreign markets, and there has been some export demand for wheat for the United Kingdom and the continent, checked, however, to a considerable extent by the enhanced prices demanded by holders. There has been active speculative trading in future options, and the public generally have favored the long side of the market until prices have been carried to a point from which they are pretty sure to react should the weather during the next ten days prove favorable for the crop. It is undeniable that some damage has occurred in the low wet lands of several of the states, but it is too early yet to arrive at positive concluclusions as to the extent. Only two weeks ago it was strongly asserted that the yield of wheat in California would not exceed more than one-half of the average crop, and now it is claimed that owing to the recent rains and increased acreage the largest crop ever raised is likely to be produced. Farmers generally throughout the west are busily engaged in sowing spring wheat and oats, and preparing the ground for the planting of corn, and have no opportunity to market any wheat they may have on hand unsold, consequently the movement of wheat from first hands is quite small, as will be seen by referring to the following statement:

The total amount of the receipts of wheat at Chicago, Milwaukee, Detroit, Toledo, Indianapolis, Peoria and St. Louis, for the week ending April 13, were 422,360 bushels, against 593,789 the previous week, and the shipments 336,265 bushels, against 303,466 the previous week.

The course of the wheat market during the past week is indicated by the following prices in the New York and Chicago markets, for May wheat, at the dates mentioned: New York, 2 p.m. Saturday last, $1.17¾; Monday, $1.18⅝; Tuesday, $1.20; Wednesday, $1.20; Thursday, $1.21¼; Friday, $1.21. Chicago, 1 p.m. Saturday last, $1.05⅛; Monday, $1.06¾; Tuesday, $1.08¼; Wednesday, $1.09; Thursday, $1.10¼; Friday, $1.09⅞.

The visible supply of wheat in the United States and Canada, April 14, as compared with the previous week, shows a decrease of 641,623 bushels.

CORN.

The early part of the present week witnessed a quiet market for corn, and the demand for home consumption, speculation, and export was light, but later in the week, when wheat had shown considerable improvement in price, corn attracted more attention, and on Thursday the advance became quite noticeable. The chief and very important feature at present is the large falling off of receipts of corn at the principal western receiving points, where the movement aggregates not more than one-fourth as compared with three weeks ago. The winter and spring movement of corn at the west from first hands has been unusually large this year, and the presumption is that the reserves in the hands of farmers are reduced to quite small limits. The large stocks now at Chicago and St. Louis will soon have become depleted by an outward movement, and the present improvement in prices seems to be justified by the situation. Parties in the trade anticipate light receipts at the west for some weeks to come, as there is but little corn in the cribs to keep up much of a movement, and farmers are too busily occupied with field work to make deliveries. The stock of corn at the seaboard is quite moderate, and interested parties are expecting to see May corn badly squeezed, if not cornered, in the New York market.

The aggregate receipts of corn at the seven principal receiving points for the week ending April 13 amounted to 1,594,991 bushels, against 1,982,378 bushels the previous week, and the shipments 336,265 bushels, against 1,201,825 bushels the previous week.

The course of the corn market during the past week is indicated by the following prices in the New York and Chicago markets for May corn at the dates mentioned: New York 2 p.m. Saturday last, 65⅜c.; Monday, 65¾c.; Tuesday, 66½c.; Wednesday, 65¾c.; Thursday, 67¾c.; Friday, 67c. Chicago, 1 p. m., Saturday, 53½c.; Monday, 54¾c.; Tuesday, 54⅝c.; Wednesday, 53¾c.; Thursday, 55⅜c.; Friday, 55⅛c.

The visible supply of corn in the United States and Canada, April 14, as compared with the previous week, shows a decrease of 93,082 bushels.

PROVISIONS.

The business in provisions during the early part of the past week was characterized by stagnation, the demand for home consumption and export having been quite moderate, and speculation confined principally to a few heavy packers and operators. On Thursday there was more activity and considerable improvement in prices, caused by the upward turn in the grain markets and the continued light receipts of hogs at packing points. The small speculators have largely held aloof from the markets, fearing manipulation and uncertainty in regard to future supplies, which, since the commencement of summer packing, have been very much less than was expected. The recent heavy decline in corn has induced farmers to keep it at home and to use it in the feeding of hogs, so that later on increased receipts of hogs may fairly be anticipated.

The total export of hog product from November 1, 1882, to April 14, 1883, as compared with the corresponding time in 1881–82, was as follows:

	1882–83, *pounds.*	1881–82, *pounds*
Pork	23,665,600	28,447,000
Bacon	231,247,497	242,176,485
Lard	119,169,403	137,859,411
Totals	374,082,500	408,482,896

The following shows the export of hog product from the places mentioned for the week ending April 14, 1883:

	Pork, barrels.	*Bacon, pounds.*	*Lard, pounds.*
New York	4,319	4,810,434	53,116,182
Boston	1,199	2,442,177	292,540
Portland	..	....	....
Montreal	..	....	....
Philadelphia	200	....	13,500
Baltimore	..	122,100	....
New Orleans	56	3,750	660
Totals	5,774	7,378,461	2,845,882
Previous week	4,751	10,566,035	3,396,953

The aggregate receipts of hogs at Chicago, Milwaukee, Cincinnati, St. Louis, Kansas City, Peoria, Indianapolis and Cleveland, in the week ending April 18, amounted to 115,702, against 102,945 the previous week, and 210,911 for the corresponding week last year.

THE PROVISIONS MARKETS BY TELEGRAPH.

From Louisville, Ky.: There has been a slight improvement in the sales and quotations of provisions.

From Kansas City, Mo.: Provisions steady and market on jobbing account active. Cattle steady at last week's prices. Hog market irregular; prices substantially unchanged.

From St. Louis, Mo.: Provisions have been dull, but are now in brisk movement at advancing values. Hog receipts are heavy for the season. Market dull and declining. Cattle also declining.

From Memphis, Tenn.: Meats and lard are higher, as the supply is diminished.

From Nashville, Tenn.: The cattle trade is good, the supply short, and prices high.

From Topeka, Kan.: The provisions market is weaker.

From Chicago, Ill.: Pork and lard active and fairly steady under liberal speculative buying; consumption light. Meats firm; short ribs active on speculative demand; fair shipping demand.

THE NEW YORK DRY GOODS MARKET.

The jobbing and retail trade report a very fair volume of business for the past week. The prevailing mild weather has no doubt had considerable to do with this. Jobbers report good sales from stock to city trade, and also a fair receipt of orders from near-by trade. The commission merchants, importers and manufacturers report trade generally as rather quiet, though there are indications of a better business at an early day. A few firms say they are in receipt of some very fair orders from the west for immediate shipment. They are not in sufficient number, however, to warrant them to pronounce trade as good. With the continuance of mild weather it will no doubt improve.

THE BRITISH COTTON GOODS MARKET.

[By Cable to BRADSTREET'S.]

London, April 20.—The Manchester cotton goods, after a slight improvement at the close of last week, are again quiet. Business is done at last week's lowest prices. Yarns are still selling at rather better prices.

THE DRY GOODS MARKETS BY TELEGRAPH.

From Portland, Me.: The dry goods trade is improving.

From Boston, Mass.: The wholesale dry goods trade generally has been quiet, though some houses largely in the New England trade report an improved business. This, however, is merely sectional, and has no special significance. New England trade is always late, and is now beginning to open. Jobbers report that, as a rule, dealers are buying only for their immediate wants. There is quite a flurry in the retail line, in consequence of a leading house withdrawing from the wholesale trade and transferring stock to its retail department at greatly reduced prices. There are some imitators, and the result is an exceedingly active trade and general cutting of prices.

From Providence, R. I.: The print-cloth market is steady and firm, the sales being moderate; 64s

are quoted at 3⅝c. less ½ of 1 per cent., and 56x60s at 3 1/16c. There are about 125,000 pieces on hand. The cotton market is steady, and sales are reported moderate. Middling uplands are worth 10¾c., and middling gulfs 11c. The stock on hand is about 15,000 bales.

From Buffalo, N. Y.: The jobbing dry goods trade continues of liberal proportions, and maintains an average increase of 10 to 12 per cent. over corresponding weeks of last year. House sales, as compared with road orders, are in proportion of 60 to 40 per cent. in favor of the former. Retail departments are fairly busy under the influence of warmer weather.

From Rochester, N. Y.: The week has shown a marked increase in the jobbing dry goods trade over all previous corresponding weeks, one house being obliged to double force of entry and shipping clerks, all working overtime. Retail trade has also been excellent, showing in actual figures 50 per cent. better than last year.

From Philadelphia, Pa.: There has been a fair trade in jobbing lines, but hardly the animation expected at this stage of the season. The package movement has been collectively liberal, but individual purchases have been chiefly in small lots. The general market is steady.

From Pittsburgh, Pa.: The dry goods trade has been very active this week, and jobbers are kept busy filling the orders now coming in from the country districts.

From Cleveland, Ohio: The dry goods trade is excellent and the spring business will compare very favorably with previous years.

From Columbus, Ohio: Trade in dry goods reported very fair for the past week; collections very fair.

From Dayton, Ohio: The dry goods market is reported quiet; collections slow.

From Chicago, Ill.: The dry goods trade is moderately active; orders for personal selections larger than same week last year; millinery, notions and furnishing goods active; hats and clothing in very moderate demand.

From Indianapolis, Ind.: In dry goods trade does not appear quite so good as last week. Collections fair.

From Detroit, Mich.: In dry goods an active business is reported by jobbers generally; volume over last year considerably increased.

From Grand Rapids, Mich.: Favorable weather for the past week has given the retail dry goods trade a slight boom and business is showing an increased activity.

From Louisville, Ky.: The dry goods trade continues active, with a reasonable demand. Weather favorable and collections fair.

From St. Louis, Mo.: The dry goods output is about the same as last week, and quite good; prices steady, but not so strong as previously.

From Kansas City, Mo.: The dry goods trade continues very satisfactory; sales have fallen off somewhat on spring goods, but a steady and increasing order trade is being done, and the prospects are excellent.

From Burlington, Iowa: The dry goods trade continues to improve, and is satisfactory in all departments. Collections are generally good. Weather favorable to trade.

From Davenport, Iowa: The dry goods trade is still rather dull.

From Des Moines, Iowa: The retail dry goods trade shows some improvement.

From St. Paul, Minn.: Dry goods sales fair, but improved over last week to regular customers and newly opened country stores. Summer fabrics are slow on account of late bad weather. The principal demand is for lawns, prints, ginghams and dress goods.

From Topeka, Kan.: The dry goods trade is quite strong, and a heavy increase in sales is noted.

From Denver, Col.: Dry goods are in active demand. Trade much better than at this time last season.

From San Francisco, Cal.: The dry goods trade is active, prosperous and increasing. Large orders are received from Oregon and the northwest states. The demand is good.

From Baltimore, Md.: The dry goods market the past week was active, and sales are reported to have been larger than the previous week. Jobbers report country orders coming in more freely, and have no complaints to make against collections. Retail dealers continue to do well, and the outlook is favorable. Prices are steady.

From Richmond, Va.: The dry goods trade is active and improving.

From Norfolk, Va.: Dry goods jobbers are doing a fair business for the season.

From Wilmington, N. C.: The dry goods jobbing and retail trade is dull.

From Savannah, Ga.: The dry goods market has shown some activity, but sales not thought to be as large as previous week.

From Atlanta, Ga.: The dry goods trade continues fair, with a good demand. Sales fully up to last week.

From Selma, Ala.: The dry goods trade continues good.

From Memphis, Tenn.: Jobbers in dry goods report sales as showing an increase; this is due to the presence of so many strangers in town attracted by the races, and the increase is thought to be temporary as the spring trade had reached its highest.

From Halifax, N. S.: The dry goods trade has not changed, though the retailers speak more favorably than they have done for three or four weeks.

COTTON.

The New York cotton market for the week past has been higher for spot middling uplands, the price having advanced to 10¼c. The sales for the week have been for export 3,503 bales, and for consumption 1,915 bales. The deliveries on contract amount to 3,396 bales.

Below will be found the closing quotations for prompt delivery uplands at New York Friday evening, as compared with last week and the corresponding week last year:

	This week.	*Last week.*	*Last year.*
Ordinary	7 5-16c.	7 3-16c.	9 9-16c.
Strict ordinary	7¾	7⅝	10⅛
Good ordinary	8 9-16	8 7-16	10 15-16
Low middling	9¾	9⅝	11 13-16
Middling	10¼	10⅛	12¼
Good middling	10⅝	10½	12⅝
Middling fair	11⅜	11¼	14⅜
Fair	12⅛	12	14⅛

The market for spot cotton closed quiet.

The future market at New York has been lower, the price having declined an average of 1 point for near months and 4 points for later months. The sales for the week foot up 646,600 bales, against 516,900 bales for the corresponding week last year.

The following table shows the closing quotations for futures at New York Friday evening, compared with last week and the corresponding week last year:

	This week.	*Last week.*	*Last year.*
April	10.16c.	10.15c.	12.22c.
May	10.19	10.21	12.25
June	10.35	10.37	12.38
July	10 49	10.49	12.52
August	10 60	10.61	12.67
September	10.34	10.38	12 26
October	10.02	10.08	11 61
November	9.92	9.97	11 41

The future market at New York closed weak.

The southern markets during the week past have been quiet and steady. Below will be found the sales for the week and the closing quotations for middling uplands at five leading ports as compared with last year's quotations:

	Week's sales.	*To-day.*	*Last year*
Galveston	7,275	9¾	11⅞
New Orleans	27,250	9¾	12
Mobile	2,400	9⅝	11⅞
Savannah	4,200	9⅝	11¾
Charleston	2,800	10⅛	11⅞
Norfolk	3,279	9⅞	11¾

The total receipts of cotton at the ports since September 1 are 5,535,646 bales, an increase of 1,172,601 bales over the receipts of last year for the same time. The total at each port since September 1 is as follows, compared with the total to the same date last year:

	This year.	*Last year.*
Galveston	770,088	406,166
New Orleans	1,556,545	1,138,614
Mobile	302,736	250,523
Savannah	.....	701,470
Charleston	551,786	478,290
Wilmington	125,928	130,965
Norfolk	740,604	577,225
Baltimore	57,607	27,377
New York	147,680	161,086
Boston	160,259	197,310
Philadelphia	68,654	58,172

The receipts at the ports for the week were 66,379 bales, against 72,459 last week and 29,079 for the corresponding week last year.

The receipts at the twenty-four interior towns usually reported were 17,841 bales, against 19,341 bales last week and 10,320 bales for the corresponding week last year. The shipments for the week were 43,904 bales, against 37,622 bales last week and 30,458 bales for the corresponding week last year. The stocks for the week were 194,302 bales, against 219,218 last week and 163,237 for the same week last year.

At Liverpool the spot market is reported easy, with a moderate demand which is freely met, the quotations remaining unchanged at 5⅝d. for middling uplands, and 5 11/16d. for middling Orleans.

The sales for the week at Liverpool were 72,000 bales (of which 50,000 were American), against 76,000 (of which 49,500 were American) last year. The sales for export were 5,000 bales, against 11,000 bales last year. The sales for speculation were 4,600 bales, against 5,500 bales last year. The amount forwarded was 25,500 bales, against 15,000 bales last year. The stock in port is 1,011,000 bales (of which 748,000 are American), against 907,000 bales (of which 586,000 were American) last year. The total imports for the week were 112,000 bales (of which 81,000 were American), against 119,000 bales (of which 70,000 were American) last year, and the amount afloat 256,000 bales (of which 122,000 are American), against 504,000 bales (of which 218,000 were American) last year.

The Liverpool future market has been dull and flat, prices having ruled a trifle higher. Below will be found the closing quotations on Friday of low middling uplands for delivery, as compared with last week:

	To-day.	*Last week.*	*Last year.*
April	....	....	6 41-64d.
April-May	5 40-64	5 39-64	6 41-64
May-June	5 42-64	5 42-64	6 42-64
June-July	5 46-64	5 46-64	6 46-64
July-August	5 50-64	5 49-64	6 51-64
August-September	5 53-64	5 51-64	6 55-64
September-October	5 50-64	5 49-64	6 47-64

The Manchester market closed quiet.

COTTON REPORTS BY TELEGRAPH.

From New Orleans, La.: This week's cotton movement has been fair. Spots advanced ⅛c. on all grades except low middling, which is up 3/16c. Bulls and bears have seemed indisposed to make long turns, and have been endeavoring to realize profits, consequently futures have been up and down, but close firm at about 1/10 to 2/10c. advance.

WOOL.

The consumptive demand for wool during the past week has been of the same conservative character as noted in previous reports. The unsatisfactory state of trade in its manufactures makes buyers very indifferent as a rule, and transactions are limited to the supply of actual wants. The market is irregular. The near approach of the new clip inclines dealers to push sales of broken and undesirable lots even at concessions, and the general position favors buyers, although there is a show of steadiness on really good wools. The clips of California and Texas are accumulating in primary markets, and new spring Colorado and New Mexican wools are now offered at St. Louis. Shearing has commenced in Tennessee and is about to begin in Kentucky. Eastern buyers are not so eager to operate as in former years. The future of the market is somewhat uncertain, and a cautious policy is likely to be pursued in negotiating for the new clip that will delay the concentration of supplies in the seaboard markets to a later date than usual. This will contribute to a steadier market for new wool, and the small remaining stocks of old are likely to be exhausted before any large amount of this year's growth can come forward.

IRON.

Instead of reporting merely no improvement in the iron market this week, it remains to be said that it is rather more depressed. The pig iron furnaces are beginning to stock up. This, at the present time, with buyers practically out of the market, or, when buying, taking a month's supplies only, is very unsatisfactory. It will not be surprising to learn of a number of furnaces blowing out within a short time. It is no secret that some of them cannot operate to the same advantage as others, owing to a want of latest improved methods of manufacture and other causes, and several agencies of Pennsylvania furnaces report this outlook. Telegrams from Philadelphia to the Wall Street Iron Exchange report the pig iron market there the dullest yet noted. Western dealers in this product have no words of encouragement. The quotations for standard grades of American pig continue to be $24 for No. 1, and $22 for No. 2. It would be nearer the facts if quotations were made at $21.50@$22, and $23.50@24. It is currently rumored that there will an early cut in prevailing figures for good American brands. Scotch pig is coming here in decreased quantities. About 1,000 tons have arrived during the week, a considerable proportion of which has been stored. Sales are of course correspondingly diminished. Prices of Scotch pig for immediate delivery are higher than for three weeks hence. Coltness, for instance, can be obtained for $24.75 only for spot delivery, but for delivery three weeks ahead $24.50 is quoted. Manufactured iron is dull, and very little is doing. Steel rails are quoted at $38@$39 for ordinary weights at the mill. The labor problem with the iron mills has not been solved. Proprietors (in the Western Association) insist that a reduction must take place in the rate of wages after June 1, next. The men, members of the Amalgamated Association, declare that if makers hold to this that another long strike will be a consequence. The New York Metal Exchange was organized on Wednesday by committees named for the purpose, one from each of the two exchanges. Temporary officers were elected and a committee appointed to prepare by-laws.

THE BRITISH IRON MARKET.

[By Cable to BRADSTREET'S.]

London, April 20.—Iron and steel prices are about steady. Shipments good. Engineer and shipbuilding trades are still doing the best.

DOMESTIC IRON MARKETS BY TELEGRAPH.

From Philadelphia, Pa.: Domestic pig is sluggish, and weaker than ten days ago. Muck bar is active at concessions. Merchant bar is selling fairly in small lots for current requirements. Nails are active, at improving figures; stocks are low. Structural iron is moving fairly at concessions. Plate and tank are moderately active at March rates. A few large blocks of steel rails have been sold for summer delivery at $38. Old material is unusually dull.

From Pittsburgh, Pa.: Pig iron is dull, but prices are, however, generally well maintained. No large lots changing hands, and sellers do not care to force iron upon the market. Present consumption very fair, and no large stocks held at furnaces. As to the iron hypothecated to the banks by James Marshall & Co., who failed this week, no present trouble to the market is anticipated, on account of the notes held by the banks extending over several months, and the iron cannot be sold until they mature. There is a fair demand for manufactured iron, but both trade and prices are far from being satisfactory.

From Cleveland, Ohio: There is but little new to note in the iron market, its general conditions being virtually unchanged. Considerable pig iron is changing hands, but prices continue low and unsatisfactory, with no indications, however, of any further reduction. Manufactured iron is in fairly active demand, and as the favorable building weather approaches the prospective demand is believed to be good.

From Chicago, Ill.: Hardware and collateral goods active. Bar iron is jobbing fairly. Pig is meeting with a good demand for immediate consumption. Stocks moderate. Nails in good request.

From Detroit, Mich.: The iron market is dull and unchanged.

From St. Louis, Mo.: The demand for manufactured iron is better than was expected; rates are unchanged, but the market is very firm, owing to the possibility of labor troubles after June 1, which is the beginning of the iron year. Pig iron is in slow sale at weak prices.

COAL.

The anthracite coal trade continues to move ahead with that slow and unsatisfactory pace which has been noted in this column for several weeks past. Prices, of course, are not up to circular rates, and dealers seem to think they will secure an advantage by holding off before making spring contracts. The companies claim that they will not. The result is a dull market. Work has been carried on at the mines on full time this week, and next week will witness like working hours. The possibility of some iron furnaces having to shut down, owing to overproduction or excess capacity for producing pig iron, is regarded in some quarters as threatening to the coal interests, as it would necessarily cut down the demand to a certain extent. The six-days-a-month cessation of work at the anthracite mines will probably be continued until July, unless a marked revival is experienced in the consumption. The official report for the production of anthracite (Pennsylvania) during the first quarter of the current year, as against the like portion of 1882, is:

	Tons. 1883.	1882.
In January	2,075,741	1,833,910
In February	1,937,996	1,605,243
In March	2,375,512	2,108,042
Totals (first quarter)	6,389,249	5,547,195

The excess anthracite mined in 1883 to March 31 was, therefore, 842,054 tons. In the first week in April there were 379,652 tons mined, against 399,626 tons in the corresponding week in 1882.

There is no improvement in bituminous coal prices or demand. Some Clearfield mines are working on half time. Only a fair output is recorded from the Cumberland region. The railroad coal-mine owners in the Pittsburgh region have declared that competition from western bituminous coals and the low price generally will not permit them to pay 3½c. per bushel for mining, and that on and after Monday next but 3c. per bushel will be paid. The men affected are those who were so unsuccessful in their five-months' strike against a reduction last year. A strike is predicted next week.

PETROLEUM.

There have been no marked features in the speculative petroleum market during the week ending last evening, unless it be that the inevitable waning in production in the Balltown and Cooper

tracts has shown itself and tended to stiffen prices. The market has shifted with every wind that blew, as the oil situation is particularly wont to do. Most of the days furnished some statements on which to base more or less activity, and so a general average of total weekly transactions has been maintained. Owners of oil territory are quite energetic in boring, and no sooner is one group of wells sufficiently manipulated (*i. e.*, the news respecting them), than another lot of boreings are ushered to the front with a few choice mysteries among them for the special entertainment of the public investors in pipe-line certificates. This routine sufficiently characterizes the exploitations in the Pennsylvania petroleum regions at present. On Saturday, transactions in the exchanges were moderately active, prices closing ¾c. below Friday evening's figures. On Monday, however, this decline was more than made good, with a variable and exciting market on Tuesday, owing to the varying nature of the "news" received. Wednesday saw sales made at a little under prices paid the day before, but Thursday recorded an advance of ½c., which was primarily due to the apparently authentic reports of the anticipated decline in the production in Cooper and Balltown tracts.

The market for certificates of crude was somewhat firmer on Friday, opening at 94c. and closing at 94⅜c. The closing price bid at the end of the afternoon session was 94⅛c., against 94⅜c. last week Friday, a decrease of ¼c. in the week.

The record of opening, highest, lowest, and closing prices bid for certificates of crude petroleum on the New York Exchange for the week ending April 20, is as follows:

PRICES OF CERTIFICATES OF CRUDE.

	Opening.	*Highest.*	*Lowest.*	*Closing.*
Saturday	94½	94¾	93⅛	93¾
Monday	93⅜	95½	92⅞	95½
Tuesday	95¾	95¾	93½	94
Wednesday	93¾	95½	93¾	93¼
Thursday	93⅞	94⅞	93¾	93⅞
Friday	94	94⅞	94	94⅞

The refined market was duller on Saturday though case oil was in rather better request. Monday witnessed a decline in the price of crude of ¼c. This was variously interpreted. At Pittsburgh, operators declared it was the long-expected movement of the Standard Company against the independent refiners. At New York it was said to be "in sympathy with the unsettled condition of crude." There was a better request for refined oil for export on Tuesday, and prices were advanced ⅛c. all around. On Wednesday and Thursday refined oil was tame and not much in demand at prices last noted.

The quotations for certificates of crude petroleum and of petroleum products last evening as against those of April 13, April 6, and March 30, are as follows:

	March 30.	*April 6.*	*April 13.*	*April 20.*
Certificates, crude..	94½	91	94⅜	94⅛
Refined, 110°.....	8¼	8¼	8⅜	8¼
Refined, 70°.....	8⅜	8⅜	8½	8⅜
Crude, in barrels....	7⅛@7⅜	7⅛@7⅜	7⅛@7⅜	7⅛@7⅜
Case, plain.....	11	11	11	10¾
Naphtha..... ..	6¾	6¾	6¼	6

The total quantity of petroleum (crude equivalent) exported from the United States from January 1 to April 14 was 146,075,278 gallons, against 151,089,195 gallons in a like period of 1882, a decreased exportation of 5,813,917 gallons, against a decrease of 1,810,663 gallons reported up to April 7. For the week ending April 14 the foreign shipments were 6,312,055 gallons, against 15,780,298 gallons in the preceding week. New York city's exports of petroleum from January 1 to April 14 amounted to 125,329,270 gallons (leaving but 21,746,008 gallons for all other ports), against 127,008,098 gallons in a like period in 1882.

OCEAN FREIGHTS.

The ocean freights market has experienced no revival during the week. The only class of deep-water tonnage in demand at New York was for petroleum, and even that was not brisk enough to help rates any, owing to caution of shippers and foreign buyers under the unsteady condition of the petroleum market. Grain continues to be neglected for export, and rates are merely nominal. There is no advance looked for in the immediate future, although any permanence in petroleum prices would permit a fair quantity of that product to seek tonnage for export.

SPECIAL TRADE AND INDUSTRIAL REPORTS.

[By Telegraph to BRADSTREET'S.]

Special telegrams from leading cities, given below, include special reference to the condition of the manufacturing industries of the country, the cereal crops, general trade, and the movement of merchandise:

EASTERN STATES.

From Portland, Me.: Groceries active. Lumber advancing.

From Boston, Mass.: The boot and shoe trade is good. There are a good many buyers in town, who are giving good orders for fall goods, and reports regarding the western trade are very favorable. The condition of the trade is specially spoken of as being excellent. Collections have been good, and there have been but few bad debts. Shipments for the week to places outside of New England have been 41,901 cases, against 39,295 cases the sixteenth week in 1882. Total shipments since January 1, 823,453 cases, against 742,564 cases same time last year.

MIDDLE STATES.

From Albany, N. Y.: The general trade here, though somewhat improved, is not equal to expectations; with few exceptions, the volume of business is considerably less than the corresponding period of last year. The furniture and carpet trades are very busy, sales exceeding prior year.

From Buffalo, N. Y.: General trade continues to show a moderate improvement over the preceding week, but is still lacking in decided activity, excepting possibly in one or two special lines. Interest at present is largely centered in the opening of navigation, from which dates the opening up of many important lines of trade. The late spring has retarded this event, so that in all probability it will be two weeks yet before the spring movement of heavy merchandise is fully under way. Jobbers in nearly all departments, however, have felt the effect of warmer weather, and regard the situation as more encouraging. Collections are only fair.

From Troy, N. Y.: Several leading lines of trade report increased sales for the week past, and there exists good cause for encouragement. Because of the backward season collections have been dull, but now show some improvement.

From Rochester, N. Y.: Trade generally has felt the influence of good spring weather, and the season opens very satisfactorily in the tobacco business. Jobbers report a fair trade, and the internal revenue office will show fully 20 per cent. increase in receipts in this line alone subject to rebate.

From Philadelphia, Pa.: The wholesale markets have exhibited no decided activity during the past week, but the volume of general business has somewhat increased as a result of the continued spring-like weather. Merchants as a rule do not expect that the balance of the season will make up for the backward movement to date, but there is a feeling of greater hopefulness for the future. The industrial situation has not materially changed. Staples of manufacturing supply move slowly. English chemicals have again advanced slightly, and close firm. The soap, glass and paper works are generally well employed. Cotton and wool continue dull. As usual on the eve of a new wool clip, there is some anxiety on the part of dealers to clean up undesirable stocks even at concessions. The grain trade has been more active, and wheat and corn have advanced under a lighter movement from the interior and the covering of shorts in all markets. Export business has been light, the rise in prices blocking trade. Flour is active and stronger, owing to the lessened production and increased cost of wheat. Ocean freights are dull. Petroleum has weakened slightly under a slow demand for export. Farm products are fairly active, and potatoes have advanced under light receipts. Provisions are more active. Groceries continue quiet.

WESTERN STATES.

From Cleveland, Ohio: General business has improved with the weather, and in most lines a satisfactory week's trade has been done. Collections have been fair.

From Cincinnati, Ohio: There is a marked change in business and increased volume, with better prices.

From Indianapolis, Ind.: Trade is reported good in most lines, and satisfactory, the latter part of the month showing quite an improvement. Prices are steady in staples; the prospects of the growing wheat is improving under the influence of better weather.

From Evansville, Ind.: The weather during the past week has been fine and trade has shown a marked degree of improvement in almost every line, and while not as much in volume as was expected is very satisfactory. Country trade seems more cautious than common, and purchasers for immediate wants replenishing often.

From Chicago, Ill.: Agricultural outlook improving; indications favor large increase in acreage. Linseed oils active and firm. Groceries more active on orders; stocks reduced. Sugars firm. Wool dull; stocks small, chiefly coarse and undesirable.

From Peoria, Ill.: Business reported dull. Very little grain is moving, and receipts at this point are light.

From Detroit, Mich.: Business of week in all lines generally improved; collections only fair; money market close, with active demand.

From Grand Rapids, Mich.: General trade report is favorable. Collections improving.

From Louisville, Ky.: The general merchandise trade during the past week was somewhat irregular, but on the whole satisfactory and reasonably active. Sales appear to be on the basis of current consumption, and in the absence of speculation the markets rule steady. Field work is progressing favorably, but there is too much rain. Grain is fairly active, with more buyers than sellers on call. Flour is slow but firm. Groceries are in good movement. Produce is in liberal supply, with a light demand. Building materials are in good request. Leather is steady, with a moderate inquiry, and some complaint of overstocks. Leaf tobacco animated and firm; offerings continue extraordinarily large, and are readily sold at well-supported figures. Whisky is dull and steady, with a pressure to sell. Cotton is in active demand at full prices, and much better feeling prevails.

From St. Louis, Mo.: General trade is in quite good volume and is steadily improving from most sections. Collections are easy. The weather is seasonable, and farming operations are progressing finely. Wheat seems in good condition. Oats are about all sowed, and plowing for corn is well advanced, and a little corn is planted. All grains high and advancing, with active movement. Flour is selling a little better.

From Kansas City, Mo.: Wholesale trade in all lines is reported good. Collections satisfactory. Retail trade this season has been less active so far than was anticipated.

From Burlington, Iowa: The retail business is showing great improvement with the advance of the season. Jobbers are full of orders in all departments, and trade is generally good.

From Davenport, Iowa: General trade in all lines is improving. The grocery trade for the past week has been very good, better than at this time last year. The spring trade has hardly begun.

From Des Moines, Iowa: The provision market is quiet; prices weak. All lines of retail trade are quiet. Wholesale trade in all lines good. Continued warm weather has caused a better feeling among all classes, and a corresponding improvement in trade.

From St. Paul, Minn.: General trade retarded by muddy country roads in the north and northwest, and by farmers seeding in dry places elsewhere; but volume slightly exceeding last year's in hats and caps. Clothing, hardware, including building material, farm tools and nails, very active. Nails in light-stock orders received. Boots and shoes in better demand. Groceries comparatively slow. Local and shipping lumber trade active. Collections improved. Great rush of immigrants.

From Lawrence, Kan.: General trade has been fair the past week, except in certain branches. The grocery trade moderate. Boot and shoe trade slow. Less credit is being asked for than last year.

From Topeka, Kan.: General trade still shows a gradual improvement. Hardware and building supplies active. Collections good.

From Denver, Col.: All branches of business lively. Wholesale dealers are happy over an improved demand for their goods, with a prospect for a good season.

CALIFORNIA.

From San Francisco, Cal.: Rainy weather throughout the state materially increases prospects for a large crop. General business is good. Hardware and iron active. Large arrivals of tin; prices shading. Grain freights unchanged. Wheat and barley 5c. cental higher.

SOUTHERN STATES.

From Baltimore, Md.: General trade was satisfactory the past week, and in some branches considerable activity was displayed. Building has begun on a larger scale, and the demand in the lumber market has been fair and prices firm. Good grades of southern wheat have been in brisk demand, and prices are firmer; western ruled inactive, but steady. The inquiry for southern corn has been fair. In the cotton market buyers are making more inquiry, but do not appear disposed to meet holders' views, and business is quiet. Very little is doing in the live-stock market, and the tendency is for lower prices.

From Richmond, Va.: Weather fine, and business in all lines active and improving.

From Norfolk, Va.: There has been but very little change since our last report. A recent severe wind and rain storm doing considerable damage in the country has its effect on trade. All branches of trade fairly active. Cotton not moving so briskly. The receipts at this port for the year will be larger than any previous. Collections only fair.

From Wilmington, N. C.: The weather has been pleasant; cotton receipts small; market prompt; sales at full figures. Lumber quiet; shingles firm. Grain quiet and steady; breadstuffs advancing. Freights, foreign dull; coastwise firmer; spirits turpentine and rosins quiet; tar and crude turpentine steady.

From Savannah, Ga.: Trade steady, without any noticeable features, except the cotton market having a slightly better demand. Rice continues quiet, but prices still firm and unchanged. There has been some demand for hides, wool, etc., and receipts fair for early season, and stock on hand fine for advancing market.

From Atlanta, Ga.: Retailers report an unusually good trade in all lines; jobbers of groceries report a more active trade and a better demand; collections fair to good.

From Selma, Ala.: The grocery trade is still dull. There has been no improvement since last report.

From New Orleans, La.: Sugar slow, but firm. Rice dull and unchanged. Flour and provisions firmer, owing to the declining waters of the Mississippi and other streams. Coffee dull; fair, 9¾c. Grain market featureless.

From Galveston, Tex.: The weather since last report continued rather cool for the season. The general jobbing trade is only moderate.

From Memphis, Tenn.: Trade in general continues fair. Grain and flour dull. Meal quiet and tending to dullness. There is very little doing in country produce, prices of which are lower.

From Nashville, Tenn.: A better feeling exists among the jobbing trade this week; more merchants are in the city and orders are coming in from the country. The weather has been favorable for planting and the growing wheat is improving rapidly. Flour very dull; corn dull, but steady; no change as to prices; wheat quite dull at $1.10; only small lots from wagons on the market.

NOVA SCOTIA.

From Halifax, N. S.: Quite a fair amount of business has been done this week. The weather continues very fine for the season, at least one month ahead of last year. From Newfoundland we hear that the seal fishery outside of the gulf is good. Several vessels report an exceptionally large catch. In Prince Edward Island the spring trade is reported to be opening up very well.

LATE MAILS.

From Chicago, Ill., April 18.—The falling off in receipts of grain has materially reduced the demand for bank accommodations from dealers in that article, but there is a good demand from most other branches of business, the tendency, however, is to an easier loan market. The supply of exchange on New York is lessened by the small amount being made by shippers, and money has been forwarded east by bankers who were unable to buy a sufficient supply of bills to cover drafts made for customers. The interior demand for money is small, and the receipts from the same direction quite large. Jobbers report their country collections as better than at any previous time this year, the general verdict of the dry goods houses is that payments were seldom, if ever better. The splendid weather of the past few days was of incalculable benefit to all leading interests, as it has enabled farmers to make good progress with their work, greatly improved the agricultural outlook, especially as regards the winter-wheat prospects, and has imparted

increased confidence in commercial and manufacturing circles. The attendance of interior merchants in the city is large for the season, and the dry goods houses have had a very active week so far. Millinery is very active, the demand for the best grades of goods being especially large. Ready-made clothing is selling freely, and a good trade is reported by the boot and shoe houses, some of whom say their sales for the past few days have been very heavy. Hardware continues to meet a large order sale, and a fairly free movement is reported in mechanics' tools and most classes of heavy iron goods. Metals and tinners' goods are selling freely in an order way, and an active demand is noted for job lots of nails. But the size of the orders offer ample proof that the interior trade is only buying for immediate sale. This course, while it prevents a large business, has a tendency to keep the market in a healthy condition. Bar iron is meeting a fairly good jobbing demand; pig is quiet, but the week's sales show a fair average, and as stocks in hands of dealers are moderate, and all classes of workers are compelled to buy for daily consumption, the position of the market is more assuring. Steel rails are meeting a fair inquiry, but transactions are mainly in small lots. Iron ore is more called for, and a number of sales have recently been made at a slight advance on prices at which mine-owners were anxious to sell thirty days since. But the entire movement in iron industries, while showing more confidence than thirty to sixty days since, is on a conservative scale. The wheat market has shown a hardening tendency since the opening of the week, the chief element of strength being the crop reports fulminated by the Washington and a number of state agricultural bureaus, whose statements, although a month old and, of course, far from reflecting the present condition of the plant, have served the bulls, who were long and anxious to unload, a good purpose, as they have brought large buying orders from outside operators. The meager character of the receipts also favors an advance. Many of those who are buying are doing so on the supposition that a corner is being engineered; but such an event is not likely, as the bears turn too quick to allow the bulls to give them even a respectable squeeze. Corn is depressed by large stocks and increasing rumors as to the condition, and holders find it difficult to prevent a severe decline in values. The speculative movement in oats is small, and confidence is apparently lacking. The provisions market shows increasing strength, prices are slowly but steadily advancing, and as stocks are moderate and there are scarcely any back in the country, and the arrivals of hogs are too meager to more than supply shippers and fresh meat dealers, no cured products of consequence are being made, hence the statistical position of the market is gradually becoming stronger.

GRAIN IN CHICAGO ON DATES NAMED.

	Wheat, bushels.	*Corn, bushels.*	*Oats, bushels.*	*Rye, bushels.*	*Barley, bushels.*
April 14, 1883	6,075,000	7,687,000	1,520,000	848,000	101,000
April 15, 1882	3,675,000	2,225,000	98,000	307,000	57,000
April 16, 1881	7,980,000	3,681,000	804,000	80,000	165,000
April 16, 1880	8,725,000	3,780,000	599,000	56,000	405,000

In addition to the above, April 14, all of which is in regular elevators, there was also 400,000 bushels corn in a private elevator, whose receipts are deliverable on contracts on the Board of Trade, and 714,000 bushels wheat, 1,476,000 bushels corn, and 102,000 bushels oats on vessels in the harbor, making the total stocks afloat and in store 6,783,000 bushels wheat, 9,563,000 bushels of corn, and 1,622,000 bushels of oats.

The following table, giving rates on prime commercial paper and exchange on New York at the cities named, is based on special dispatches to BRADSTREET'S, received yesterday:

	Prime com. paper, per cent.	*Exchange selling on New York.*
Boston, Mass	6 @ 6½	30c. discount per $1,000.
Buffalo, N. Y	6 @ 8	Par.
Chicago, Ill	@ 7	75c. premium.
Cincinnati, Ohio	@ 8	50c. premium.
Columbus, Ohio	@ 8	1-10 premium.
Dallas, Texas	@	⅛ premium.
Davenport, Iowa	8 @	1-10 premium.
Dayton, Ohio	7 @ 8	Par.
Des Moines, Iowa	8 @10	⅛ premium.
Detroit, Mich	@ 7	
Galveston, Texas	@	Par.
Halifax, N. S	7 @ 8	⅝ premium.
Indianapolis, Ind	7 @ 8	Slight premium.
Kansas City, Mo	10 @12	$1 premium.
Louisville, Ky	7 @	80c. premium.
Lincoln, Neb	10 @	1-10 premium.
Macon, Ga	8 @12	3-10 premium.
Marshall, Tex	12 @	½ premium.
Memphis, Tenn	6 @ 8	¼ premium.
Milwaukee, Wis	7 @10	25@50c. premium.
Montgomery, Ala	12 @	½ premium.
Nashville, Tenn	8 @	$2 per $1,000
New Orleans, La	@ 7	$1.50 premium.
Norfolk, Va	@ 9	⅛@¼ premium.
Portland, Me	6 @ 7	1-10 premium.
Providence, R. I	@ 6	Par.

Toledo, Ohio	7 @ 8	1-10 premium.
Topeka, Kan	@	$1 premium per $1,000.
Troy, N. Y	6 @	
Wilmington, N. C	6 @ 8	Par.

THE BRITISH BANKRUPTCY BILL.

A carefully prepared paper on the proposed British Bankruptcy bill was read at a recent meeting of the London Banker's Institute:

"It was a matter for satisfaction," the writer said, "that the bill is a consolidating as well as an amending one; yet, although it was a considerable step in advance, he doubted whether it could be considered a final one. With regard to official supervision by the Board of Trade and its officers, he considered that the powers of examination and of directing proceedings against fraudulent debtors were proper functions to be discharged by a department of the state, nor could he see that the administrative duties of the Board were open to reasonable objection. The proposal that the Board of Trade should audit all trustees' accounts was open to the objection that it would dispense with audit by the committee of inspection, and would thus overburden the Board of Trade. On the whole, however, he did not think the powers conferred on the Board interfered with the perfect freedom of creditors to exercise that control which they were entitled to exercise over what was undoubtedly their own property. On the other hand, they were well calculated to promote a proper working of the bankruptcy law by holding out to all reckless and dishonest debtors the certain prospect of exposure and punishment, and by making trustees realize that they have duties to perform from which they cannot escape, as they have done in the past, from the want of powerful and efficient control. Strong provision should be introduced into the bill to prohibit a creditor from making a secret bargain with a debtor. In concluding, he firmly entertained the belief, as well as the hope, that if the measure passed through Parliament without any material mutilation it would do something not inconsiderable towards checking the abuses which had characterized the past history of our bankruptcy legislation, and raising the tone of commercial morality throughout the country." In the course of discussion, Sir John Lubbock, president of the Institute, said that the government had adopted in their bill the suggestions made by the council of the Institute. He doubted whether officials of the Board of Trade could look after the interests of creditors better than they could look after their own interests

---

RAILROAD REGULATION IN THE SOUTH.

The Louisville *Courier-Journal* has the following regarding railways and state regulation in the south: "The Tennessee Senate, by a vote of twenty-two to eleven, rejected the caucus bill regulating the railroads. The objections to this bill were innumerable and fundamental. No observant man can fail to see dangers, actual and threatened, in the railroad situation, but the remedy is not so plain. The value of the railroads to society is inestimable; transportation is as much an element in the cost of an article as is labor, and we must so consider it. The trouble is to know how best to deal with this problem; to determine how far it is wise to go, and yet to do nothing to depreciate the value of the capital invested in railroads.

"The pressure in Tennessee at first to do something radical was very strong. There were some leaders, as there always are, who had patent nostrums of their own concoction, warranted to cure on the first application, but such remedies will not bear examination. No greater calamity could happen to Tennessee than the passage of such a bill as that proposed by the Democratic caucus. Because the *Courier-Journal* undertook to point out in plain terms the objectionable features of the bills, it pleased a number of its advocates to assail it with some bitterness in their public speeches. We trust that now they are convinced we have betrayed none of the people's rights. This bill was finally defeated because of the loud protests which came from the people themselves in every part of the state as soon as the character of the bill was understood. We doubt even if the House would pass such a bill today, so much good has been done by calm and intelligent discussion.

"In Missouri a bill similar to that under discussion in Tennessee has also met with defeat. During the last legislature a movement was made in Kentucky to enlarge the powers of the advisory commission, and it failed. In North Carolina and in Arkansas attempts to take the railroads out of the hands of the corporations and put them under commissions have recently come to naught, and the conclusion must be that the people in the southern states believe in railroads, want more of them, and are willing to wait and see if some of these transportation problems will not in time solve themselves. At any rate, not knowing exactly what to do, they are disposed to deal with the question in a manner which at least involves little risk."

TRADE EMBARRASSMENTS.

There were 160 failures in the United States reported to BRADSTREET'S during the past week, 7 more than the preceding week, 74 more than the corresponding week of 1882, and 73 more than the same week in 1881. Compared with the previous week the middle states had 34, an increase of 6; New England states 31, an inecrease of 15; southern states 30, a decrease of 9; western states 46, a decrease of 10; Pacific states and territories 19, an increase of 5; Canada and the Provinces 32, an increase of 7. Among the suspensions reported were Hunter, Keller & Co., iron pipe, and Newell & Wight, oil cloths, New York; James Marshall & Co., iron founders, Pittsburgh. In the principal trades they were as follows: Grocers 19; general store 17; hardware 12; manufacturers 12; drugs 10; dry goods 10; liquors 8; furniture 7; bakers and confectioners 6; jewelry 5; tobacco and cigars 5; shoes 4; clothing 4; fancy goods 3; butchers 3; millers 3; leather 3; cotton 2; coal 2; millinery 2; books and stationery 2.

ALABAMA.

MARION.—James Gregory & Son, general store, have assigned. Liabilities $5,000; assets $3,000.

WOODVILLE.—J. E. Wann & Co., drugs, have failed.

ARKANSAS.

HAMBURG.—Norman Brothers, dry goods, have been attached. Liabilities $20,000; nominal assets $10,000.

YELLVILLE.—J. F. Clarke, publisher, is advertised to be sold out by the marshal.

CALIFORNIA.

FOREST CITY.—H. J. Redmond, saloon, has compromised at 50 cents.

OAKLAND.—R. R. Kirkpatrick, oils, has been attached.

PETROLIA.—C. W. Gill, general store, has been attached and failed.

SACRAMENTO.—C. F. Klink, drugs, has been attached and filed a petition in insolvency.

SAN FRANCISCO.—William Backer, bakery, has gone into insolvency.

SAN FRANCISCO.—Application has been made to force G. Baum, furniture, into insolvency.

SAN FRANCISCO.—J. Cazeaux, butcher, has compromised.

SAN FRANCISCO.—Cronin & Dunbar, metal roofers, have filed a petition in insolvency.

SAN FRANCISCO.—J. D. Culp & Co., wholesale cigars, have assigned. Last fall they were granted an extension, showing liabilities $35,000 and nominal assets $99,823.

SAN FRANCISCO.—L. W. Hoenes, butcher, is offering to compromise at 30 cents.

SAN FRANCISCO.—Wah Lung Chung Lee, shoes, has failed.

SAN FRANCISCO.—F. W. Silliman & Co., liquors, have filed a petition in insolvency.

SAN FRANCISCO.—L. Zimmerman & Co., butchers, have compromised at 30 cents.

SUSANVILLE.—T. D. Ridenour, general store, has assigned.

COLORADO.

DENVER.—G. D. Root, cigars and tobacco, has been attached.

DENVER.—M. Sands, grocer, has been attached.

DENVER.—Rose & Wolff, saloon, have sold out to creditors.

DENVER.—Mrs. M. E. Wells, millinery, is being sold out by the sheriff.

LEADVILLE.—F. W. Hurd, stationer, has confessed judgment for $510.

CONNECTICUT.

FAIR HAVEN.—H. W. Broughton, hardware and crockery, has assigned.

STAMFORD.—John T. Giblin, liquors, has assigned.

DAKOTA.

FARGO.—Kjos & Jensen, clothing and dry goods, have assigned to A. E. Boysen. They were overloaded with stock, business was dull, and collections poor.

SIOUX FALLS.—The Sioux Falls Water Power Company has been attached $30,000 by the Metropolitan National Bank of New York and $56,000 by the Merchants' National Bank of St. Paul.

GEORGIA.

ATLANTA.—Holman, Coffin & Co., stationers, have asked an extension until fall. They gave a chattel mortgage for $5,000, and application has been made for a receiver.

EATONTON.—J. H. Boatwright, general store, has assigned.

FORSYTH.—James D. Proctor, grocer, has been closed by the sheriff.

SAVANNAH.—A. F. Flint, jeweler, has been attached.

SAVANNAH.—The Georgia & Florida Inland Steamship Company is not in the hands of the sheriff, as reported in BRADSTREET'S of the 14th inst. The steamboat Florida, belonging to the company, was levied upon in the foreclosure of a mortgage upon it given to the Ocean Steamship Company for balance of purchase money. The levy was only upon this one boat, and not on the other property of the company. Bond has been given and the boat released. Refusal to pay the balance of the purchase money was on account of a counter-claim which the Georgia & Florida Inland Steamship Company had against the Ocean Steamship Company. In view of the error this correction is due to the Georgia & Florida Inland Steamship Company.

ILLINOIS.

BYRON.—A. H. Rood, hardware, has failed and turned his stock over to his brother.

CHICAGO.—Charles Gloecker, trading as Charles Gloecker & Co., cabinetware, has been closed by the sheriff on judgments for $9,493.

CHICAGO.—Petrie & Hardy, grocers, have been closed by the sheriff.

CHICAGO.—Samson & Freedman, cigars, have been closed by the sheriff on confession of judgment for $12,000. They began as a firm November 16 last.

CHRISMAN.—Thayer & Co., grocers, have assigned. Liabilities $2,600; assets about $2,400.

JOLIET.—The liabilities of The Sun Printing Company are about $9,000; assets about the same. The presses are chattel mortgaged for $2,000, and there are judgments for $7,797.

MARENGO.—E. W. Treat, hardware, has failed.

PEORIA.—Joseph Fisher, undertaker, owes $1,800; assets about $400.

PEORIA.—D. Lyon & Brother, cigar manufacturers, have been attached for $550 and closed by the sheriff.

QUINCY.—Aldrich, Corbin & Co., livery, have assigned.

ROCKFORD.—The Rockford Grape Sugar Company is advertised to be sold out by the marshal on May 8.

INDIANA.

BOONVILLE.—Nester & Becker, dry goods, have failed. The liabilities exceed the assets by $6,000.

EVANSVILLE.—Elles & Knauss, wholesale millers, have failed and sold out.

EVANSVILLE.—D. Heinmann & Co., wholesale liquors, gave chattel and realty mortgages for $7,400 and sold out.

EVANSVILLE.—C. D. Long & Co., wholesale saddlery, gave a chattel mortgage and sold out to creditors.

INDIANAPOLIS.—John A. Craig, confectioner, has sold out.

TERRE HAUTE.—Jacob White, wholesale confectionery, has assigned to Philip Schloss.

ZIONSVILLE.—Nichols & Worth, drugs and books, have sold out.

IOWA.

COUNCIL BLUFFS.—Mrs. L. C. Arbuthnot, millinery, is reported to have failed.

EDDYVILLE.—Judgments and attachments have been entered against The Eddyville Woolen Mills.

IDA GROVE.—E. A. Porter, hotel, is reported financially embarrassed.

MOUNT AYR.—C. A. Danforth & Co., hardware, have assigned. Liabilities $9,000; nominal assets $10,000; actual assets $5,000.

MUSCATINE.—Lewis & Co., dry goods, have been attached.

SIOUX CITY.—John Ross & Son, hotel, have been attached for $2,400.

SPENCER.—J. D. Powers, hardware, has assigned to J. Q. Adams.

WASHINGTON.—A. Poth & Son, stoves, have assigned.

KANSAS.

COYVILLE.—Findley Brothers, dry goods and groceries, have assigned.

PHILLIPSBURG.—J. V. Close, drugs, has compromised.

WYANDOTTE.—William Schmelzer, drugs, has been closed by the sheriff.

KENTUCKY.

LEXINGTON.—R. S. Cluke & Co., hardware, have assigned to Isaac Smith and R. West. Liabilities about $40,000.

LOUISVILLE.—F. D. Barnum, jeweler, has assigned to Irving Dugan.

LOUISVILLE.—Charles Levy, dry goods, has assigned to Simon Hoffman.

LOUISVILLE.—Frank B. Oberhausen, groceries and saloon, has been sold out by the marshal.

MILTON.—Samuel J. Fearn & Son, millers, are reported to have suspended.

ROCKY HILL STATION.—David R. Kinnaird, drugs, is reported to have failed.

LOUISIANA.

ALEXANDRIA.—N. L. McGinnis, general store, is asking an extension.

NEW ORLEANS.—Dillingham & Wuerpel, future brokers, have failed.

MAINE.

ALBION.—Jonathan B. Besse, tanner, has been attached.

BOOTHBAY.—Alden Blossom, drugs, has been attached.

CAMDEN.—F. H. Calderwood, grocer, is in insolvency, and is reported offering 30 cents.

GARDNER.—The real estate of A. Rich, ice, has been attached for $4,000.

LEWISTON.—The liabilities of R. E. Patterson, mason, are about $25,000, of which $20,000 are secured. He is reported to have left the state. He has no unencumbered assets.

NEWBURYPORT.—Charles W. Kimball, provisions, is reported offering 20 cents.

PORTLAND.—The liabilities of Peter E. Deehan, drugs, are about $4,000. He thinks the assets will pay about 25 cents.

PORTLAND.—The real estate of the Whitney Gaiter Shoe Company has been attached for $1,600.

ROCKLAND.—Samuel Pillsbury, lime, has been attached.

SKOWHEGAN.—Creditors of Mitchell & Parlin, grocers, have filed a petition in insolvency against them.

WATERVILLE.—J. L. Cote & Co., drugs, have been attached.

MARYLAND.

CAMBRIDGE.—L. J. Ballard, grocer, has assigned.

CRISFIELD.—J. C. Taws, green grocer, has failed.

CRISFIELD.—John W. Gillett, general store, has failed. He was recently damaged by fire about $2,500.

CRISFIELD.—J. E. Thornton & Co., general store, have failed.

MASSACHUSETTS.

BARRE PLAINS.—Frank E. Stevens, general store, has settled at 40 cents.

BOSTON.—John Guild, baker, has filed a petition in insolvency.

BOSTON.—Joseph A. Hartshorne, grocer, has failed and offers 30 cents. Liabilities about $4,000.

BOSTON.—Samuel J. Sanger, grain leather, has failed. Liabilities about $9,000; assets about $4,000.

BOSTON.—A. O. Swett, auctioneer, has failed.

CHELSEA.—S. J. Haradin, grocer, owes about $800; assets small.

HOKAH.—M. A. Bailey, general store, has assigned. Liabilities about $7,000.

HUDSON.—D. F. Pope, livery, who was recently burnt out, is offering 20 cents.

IPSWICH.—Maynard Whittier, grocer, has failed and gone into insolvency.

LAWRENCE.—The real estate of William F. Gearin, beer manufacturer, has been attached.

SPENCER.—Stanley & Riley, woolen manufacturers, who recently failed, owe about $5,500 and have agreed to assign all property to creditors, which most of them have accepted. It is said that Mr. Stanley owes individually about $8,000. The failure is attributed to lack of demand for their goods.

SPRINGFIELD.—A. M. Galpin, stoves, has failed. Liabilities $3,200.

SPRINGFIELD.—Charles W. Turk, grocer, has failed. Liabilities about $600; nominal assets about the same.

WORCESTER.—Augustus Marrs, confectioner, has failed.

WORCESTER.—Creditors of H. A. Richardson, machinery, have filed a petition in insolvency against him.

MICHIGAN.

BALDWIN.—George W. Jones, general store, is reported to have assigned. Liabilities $7,000.

BOYNE CITY.—Thomas McCaskill, dry goods, has been closed under a chattel mortgage.

KENT CITY.—W. N. Batterson, furniture and undertaker, has turned over stock to mortgagee and made a trust deed of store building and lot. Unsecured liabilities $600.

ST. CLAIR.—T. J. Rooney, saddler, has been closed by the sheriff.

MINNESOTA.

MINNEAPOLIS.—Louis Blonstein, clothing, has been attached by local creditors.

ST. PAUL.—William Schmidt & Co., wholesale liquors, have assigned to R. W. Walsh.

MISSOURI.

NEW MADRID.—R. M. Purdy, grocer, has been attached.

MONTANA.

HELENA.—I. O. McCloskey, hardware, has been attached by local creditors for $1,000.

NEW HAMPSHIRE.

CAMDEN VILLAGE.—Moore Brothers, grocers, are reported to have suspended. Liabilities about $1,000; nominal assets $1,700.

CANDIA.—Moore Brothers, grocers, are reported to have suspended.

KEENE.—Theron Hayward, hardware, has suspended. Liabilities $13,000; nominal assets about $8,009.

NEW JERSEY.

MILBURN.—H. M. Graves, doing business as Albert Graves, hat manufacturer, offers 40 cents in secured notes at three, six, nine and twelve months. Liabilities $9,000; nominal assets $7,000. Besides, there are mortgages of $6,800 on real estate which is said to have cost $10,000.

NEWARK.—Schwitzgaebele & Schenck, grocers, have been attached, and are advertised to be sold out under a chattel mortgage of $400 on the 21st inst. Liabilities about $700.

NEWARK.—James Van Horne, furniture, has assigned to Isaiah Peckham. Liabilities $9,000; nominal assets $5,000; actual assets about $3,000.

NEW YORK.

ALBANY.—Sanford R. Haskell, trading as H. C. Haskell's Son, machinist, assigned on the 17th inst. to Peter S. Haskell.

NEW YORK CITY.—The schedules of Walter P. Beers, hatters' trimmings, show liabilities $15,961; nominal assets $8,608; actual assets $4,080.

NEW YORK CITY.—Lydia A. Camp, grocer, assigned on the 19th inst. to Charles H. Phelps, giving preferences to Austin, Nichols & Co. $402; Charles H. Camp $2,250; John Phair $500; Frank Flock $200; total $3,352. She is the wife of William A. Camp, who has failed twice.

NEW YORK CITY.—J. H. Chapman & Co., wholesale jewelry, assigned on the 18th inst. to Thorndike D. Hodges, without preference. They began February 1, 1882. Liabilities about $10,000.

NEW YORK CITY.—The schedules of John Cunningham, suits and cloaks, show liabilities $50,966; nominal assets $18,015; actual assets $11,846.

NEW YORK CITY.—Herman Hagedorn, cotton broker, has suspended.

NEW YORK CITY.—M. S. Heyman's Sons, artificial flowers and feathers, assigned on the 16th inst. to Bernard Metzger, giving preferences to Morris Bermond $350; Simon Hermann $2,175; A. Lyons $2,000; Frederick Hess $660; Stephen T. Hopkins $241; total $5,426. The liabilities are about $10,000. The assignment was precipitated by an attachment.

NEW YORK CITY.—The schedules of C. C. Houghton & Sons, veneers, show liabilities $138,337; nominal assets $96,724; actual assets $43,360.

NEW YORK CITY.—Charles E. Hume & Co., builders, assigned on the 16th inst. to Arthur T. Gillender.

NEW YORK CITY.—Hunter, Keller & Co., iron pipe, have suspended payment on their notes since the 17th inst. Included in their bills payable are $30,000 notes given to E. J. Dunning, Jr., the note broker, to sell, for which they claim they received only $4,000 cash, and none of the proceeds, although the notes were sold by him three months ago. Two of these notes have been protested and others are about maturing, and will take the same course, as the firm thought it just to all the creditors not to make any payments until their liability on the notes is determined. The liabilities are about $150,000, and the firm claim the assets are sufficient to pay all the merchandise and legitimate debts in full. They are endeavoring to obtain an extension covering five years, payable in four installments each year.

NEW YORK CITY.—The schedules of A. K. Leon & Brother linens, show liabilities $31,416; nominal assets $10,589; actual assets $6,706.

NEW YORK CITY.—The schedules of John McCue, liquors, show liabilities $8,156; nominal assets $2,762; actual assets $1,381.

NEW YORK CITY.—Newell & Wight, oilcloths, have failed and confessed judgment for $50,000 to J. A. Skilton, a lawyer. The liabilities are said to be about $110,000. Mr. Newell entered the firm in 1879, and Mr. Wight January 1, 1880, the business having been established in 1877 by H. Force & Co. Their factory, at Plainfield, N. J., is said to have cost $25,000, and was mortgaged for $11,000.

NEW YORK CITY.—At a meeting of the creditors of George A. Palen & Co., leather and hides, the statement presented showed liabilities $506,000; nominal assets $395,000; actual assets $213,000. A committee composed of Messrs. Thomas O. Richardson of Boston, Case of the Second National Bank of Newark, N. J., Lewis H. Bullard, George Van Campen and King Gleason were appointed to examine and report.

NEW YORK CITY.—The schedules of Seymour & Pell, provisions, show liabilities $14,112; nominal assets $13,346; actual assets $10,260.

NEW YORK CITY.—Thomas Spillane, dry goods, assigned on the 15th inst. to Carlton C. Randall, giving three preferences for $740.

NEW YORK CITY.—The schedules of E. G. Wiechmann & Co., wholesale cloths, show liabilities $325,510, of which $18,345 are contingent; nominal assets $232,299; actual assets $177,127, which includes stock $88,658; accounts $85,000; cash, fixtures, etc., $3,273.

NEW YORK CITY.—The schedules of Williston, Knight & Co., buttons, show liabilities $185,473; nominal assets $115,248; actual assets $84,320.

NEW YORK CITY.—The schedules of Henrietta Wolf, clothing, show liabilities $9,677; nominal assets $6,062; actual assets $4,277.

NEW YORK CITY.—The schedules of Adolf Zeltmacher, leather goods, show liabilities $9,060; nominal assets $10,324; actual assets $2,002.

NORTH PEMBROKE.—G. A. Bickford, general store, who recently assigned, owes $2,583; assets $1,267; preferences $1,075.

ROCHESTER.—John Craighead, pianos, has assigned to W. S. Thompson, giving preferences for $1,660.

SARATOGA SPRINGS.—Albert C. Coleman, clothing, sold out to a creditor, to whom he owed $4,000, with the understanding that the latter pay a note of $1,500. He owes about $1,000 besides, and has, it is said, nothing to pay it with.

SCOTTVILLE.—H. P Wheeler, general store, has assigned to Jonathan L. Childs, giving preferences for $3,889.

TROY.—Flood & Baucus, coal, are reported to have failed.

NORTH CAROLINA.

CEDAR ROCK.—John A. Coppedge, general store, has assigned.

TOWNESVILLE.—J. Y. Overby, general store, has assigned.

OHIO.

CLEVELAND.—Lapham & Co., manufacturers of woodenware, gave a chattel mortgage for $3,800 and a bill of sale for $6,000, and assigned to C. B. Bernard.

CLEVELAND.—The Cleveland Furnace Company has assigned to Harry L. Vail. The company obtained an extension last fall of six, nine and twelve months, the liabilities being then about $75,000. The company was chartered in July, 1880, with a paid in capital of $30,000.

COLUMBUS.—The liabilities of A. H. & G. A. Blood, Jr., fancy grocers, are $33,303; nominal assets $35,000, consisting of stock $15,000; book accounts $20,000.

DAYTON.—A. J. S. Shroyer, agricultural implements, has assigned.

DEFIANCE.—T. R. Carroll, wholesale and retail grocer, has assigned to C. A. Fleckinger.

MINSTER.—Francis Sprehe, general store, has assigned. Liabilities $22,000.

ROBERTSVILLE.—Ballard & Booker, general store, are reported to have failed.

UNIONTOWN.—Ritter Brothers, millers, have assigned to E. Berry.

OREGON.

PORTLAND.—F. X. Thibault, saloon, has assigned.

YONCALLA.—Booth Brothers, general store, have assigned.

PENNSYLVANIA.

CORRY.—Mrs. L. Isaac, tobacco and cigars, is reported to have failed.

HANOVER.—William Althoff, coachmaker, has been closed by the sheriff.

INDIANA.—Bruce & Logan, dry goods, have been closed by the sheriff on executions of $16,000, some of which are disputed. A stay of ten days has been obtained until these are investigated.

LANCASTER.—Hess & Flinn, furniture, have been closed by the sheriff on executions for $12,500.

LEACOCK.—Henry Swope, potter, has been sold out by the sheriff.

PHILADELPHIA.—J. Addison & Clara A. Bush, manufacturers of ink, mucilage, etc., were advertised to be sold out by the sheriff. Judgment for $1,535, in favor of E. C. Bush, was recently entered up against them.

PHILADELPHIA.—Jonathan Eisenhower, manufacturer of shoes, has suspended. He owes about $4,000; assets small. He has been in business thirty years.

PHILADELPHIA.—Felten & Aspell, leather manufacturers, have been sold out by the sheriff. A very small amount was realized, not sufficient to satisfy the judgment for $72. Liabilities about $3,000. They continue as agents.

PHILADELPHIA.—Solomon Jacobs, furniture, is asking an extension. A judgment for $840 has been entered against him.

PHILADELPHIA.—Samuel Kecht, wholesale notions, is advertised to be sold out by the sheriff on the 27th inst.

PHILADELPHIA.—James H. Land, soap manufacturer, is advertised to be sold out by the sheriff.

PHILLIPSBURG.—W. A. Nangle, jeweler, is advertised to be closed by the sheriff.

PHILADELPHIA.—Nichols & Geistweit, Keystone Printing House, have been sold out by the sheriff. Mrs. Markley took back machinery, etc., for her claim, $3,047, which left little or nothing to satisfy another judgment of $4,100.

PHILADELPHIA.—Joseph W. Price, dry goods, etc., is offering to compromise at 30 cents cash, the funds to be furnished by a friend. Merchandise liabilities said to be about $3,000, and he owes for back rent about $1,000. His stock is said to be worth over $3,000.

PHILADELPHIA.—Stark & Clarke, wholesale notions, have had judgments for $9,769 entered against them and are reported in the hands of the sheriff. Liabilities about $20,000. The stock is estimated about $7,000 and accounts $8,000.

PHILADELPHIA.—Frank Theobald, baker, was advertised to be sold out by the sheriff on a judgment for $410 in favor of J. Gries. Another judgment was recently recorded against him for $178, in favor of Aaron K. Frick. It is thought a sale will not realize $50.

PHILADELPHIA.—Zane Brothers, manufacturers of straw hats, have been sold out by the sheriff.

PIPERSVILLE.—Abraham O. Hockman, general store, has assigned.

PITTSBURGH.—J. Caro, fancy goods, has assigned.

PITTSBURGH.—The Keystone Coal Company (Limited), which recently failed, is in the hands of receivers. The property consists of 2,600 acres of land; $275,000 bonds have been issued, and a small amount is due outside creditors.

PITTSBURGH.—James Marshall & Co., iron founders, assigned on the 16th inst. to George I. Whitney. The liabilities are reported at about $1,950,000, and assets $1,550,000. The failure is attributed to unprofitable operations in pig iron. They carried a large amount of iron purchased at high figures several years ago, in anticipation of a rise, on which they had obtained advances. They found no chance to realize on the dull and declining market. The expenses of carrying it were heavy, and, seeing no prospect of extricating themselves, it was decided to assign. It is said the firm have over $1,000,000 worth of iron in storage, which they hypothecated for loans to the banks, the latter being secured for their advances either by the storage certificates or by indorsement. The unsecured creditors are said to be principally the furnace men, who sold the firm the metal on Mr. Marshall's individual paper. The business was established about forty years ago by the late James Marshall, who died in 1869, leaving an estate valued at about $450,000, and the business has since been continued by his son, James Marshall, for the benefit of the estate.

QUAKERTOWN.—Jesse R. Doll, plasterer, has assigned.

SPRUCE HILL.—J. L. Casner, blacksmith, is reported to have failed.

STROUDSBURG.—W. H. Sweet, furniture, is reported to have been attached.

WEST CHESTER.—Edwin Chambers, leather manufacturer, has assigned to William R. Chambers.

RHODE ISLAND.

JOHNSTON.—Philip O'Reilly, chemicals, has assigned.

PROVIDENCE.—Gowdin & Gay, manufacturing jewelers, have assigned to M. Fifield, Jr.

PROVIDENCE.—George K. Virgin, harness, has assigned.

SOUTH CAROLINA.

CHARLESTON.—L. Bernstein, clothing, has been closed by the sheriff.

CHARLESTON.—I. J. Corby, Jr., drugs, has been closed on a distress warrant.

CHARLESTON.—E. B. Earle, shoes, has assigned.

TENNESSEE.

PARIS.—A. G. Treviathan, dry goods and hardware, has failed.

TEXAS.

AUSTIN.—Josiah D. Wilson, sewing machines, has been attached.

LAMPASAS.—J. G. East, hardware, has assigned. Liabilities $7,500; nominal assets $5,400.

ORANGE.—M. Hockwald, grocer, offers 50 cents.

SHERMAN.—A. L. Parrott & Co., saloon, have been attached.

UTAH.

SALT LAKE CITY.—J. J. Halpin & Co., hardware, have assigned to F. Williams. Liabilities $15,000; assets $26,000; preferences $10,000.

VERMONT.

JERICHO.—The liabilities of the Jericho Chair Company are estimated at $20,000; nominal assets about $15,000.

MORGAN.—Thompson & Howard, lumber, are reported to have failed.

VIRGINIA.

NORFOLK.—J. D. Hofheimer, dry goods, is reported offering to compromise.

SUFFOLK.—Wells, Boon & Co., general store, are in the hands of a receiver.

WASHINGTON TERRITORY.

CHENEY.—Payne & Rich, general store, have been attached and failed.

PORT TOWNSEND.—O. H. Holcomb, varieties, has been attached.

MANITOBA.

BRANDON.—Scott & Paisley, dry goods, are asking an extension.

OAK RIVER.—C. W. Marlatt, general store, has assigned.

WINNIPEG.—Alexander & Boyce, dry goods, have obtained an extension.

WINNIPEG.—Hagan & Gibbons, hotel, offer to compromise at 30 cents.

WINNIPEG.—William Nay, grocer, has assigned and offers 50 cents.

WINNIPEG.—Woodington, Arnold & Co., late wines and liquors, have assigned.

NEW BRUNSWICK.

KINGSTON.—Frank McInerney, clothing, owes about $4,000; nominal assets $2,500. He lost heavily, it is said, in lobster packing.

ST. JOHN.—T. Sherman Peters, coal, owes about $17,000; actual assets $6,000.

SHEDIAC.—Gallant & Brean, general store, owe about $2,300; nominal assets $1,560; actual assets $1,000.

NOVA SCOTIA.

HALIFAX.—Robert Baxter, furniture, has assigned.

MIDDLE MUSQUODOBOIT.—Alex. J. Reid, general store, has assigned.

WESTVILLE.—The Acadian Co-operative Society, general store, is asking an extension.

PROVINCE OF ONTARIO.

CHESTERVILLE.—Miss C. Coyne, general store, has compromised at 40 cents.

CORNWALL.—J. P. Tobin, general store, has assigned.

DUART.—John Cavers, hotel, is reported to have left town with debts unpaid.

HAMILTON.—Stewart & Appleton, grocers, have assigned.

JARVIS.—Thomas Morrow, grocer, is reported in financial difficulties.

JORDAN STATION.—George Sutherland, general store, is reported to have left town.

KILROY.—The stock of King Vann, general store, has been sold under a chattel mortgage.

MOUNT FOREST.—Timothy Maroney, livery, has been closed by the bailiff.

RUGBY.—R. McKinnell, miller, has assigned.

STRATFORD.—J. Weir & Son, fanning mills, have obtained an extension.

PROVINCE OF QUEBEC.

BEDFORD.—Vitty & Co, general store, have assigned.

BELOEIL.—F. Charland, general store, has assigned.

BROWNSBURG.—Alex. Paul, general store, has assigned.

CHATEAUGUAY BASIN.—P. A. Herbert, hotel, has assigned.

MONTREAL.—D. A. Chauvet, grocer, has assigned.

MONTREAL.—Antoine Lefebre, grocer, has assigned.

MONTREAL.—H J. Pring, commission, has assigned.

MONTREAL.—C. C. Snowden & Co., hardware, offer 50 cents.

MONTREAL.—Mrs. M. Valade, fancy goods, was advertised to be sold out by the sheriff.

NICOLET.—O. Gadbois, painter, offers to compromise at 25 cents.

RIVER DAVID.—Normandin & Frere, general store, have assigned, and offer 45 cents.

RIVER DAVID.—Elie Touchette, general store, is offering to compromise at 60 cents.

SHERBROOKE.—J. Arthur & Co., grocers, offer 50 cents.

SHERBROOKE.—F. Pelletier, general store, has been sold out by the sheriff.

SOREL.—J. D. Tellier, grocer, has compromised at 65 cents.

ST. CESAIRE.—Charles Garceau, tinsmith, has assigned.

ST. MARTINE.—Gilbert Boursier, general store, has assigned, and offers 40 cents.

VALLEYFIELD.—F. X. Barbeau, general store, has assigned.

WINDSOR MILLS.—E. St. Ouge, grocer, has assigned.

IMPORTANT NOTICE.

SCIENCE.

The undersigned begs leave to state a specimen copy of SCIENCE—the new weekly illustrated paper—will be sent to any address on receipt of ten cents. It should be borne in mind that SCIENCE is the only periodical of its class in America, and every reading American can well afford to have it regularly sent to his home, in order to get concisely the scientific news, in all departments of science, from all parts of the world. SCIENCE is owned by The Science Company, whose directors are Daniel C. Gilman, of Baltimore, President; Alex. Graham Bell, of Washington, Vice-President; Gardiner G. Hubbard, of Washington; O. C. Marsh, of Yale College; and Samuel H. Scudder, of Cambridge, Editor and Treasurer. The price of SCIENCE by the year is $5. (52 numbers, two volumes, 1,500 quarto pages, neatly printed and well illustrated.) By single numbers, 15 cents each.

THE GREAT

Northern Pacific Route

IS NOW OPEN

FROM ST. PAUL AND DULUTH TO LIVINGSTON, AT THE HEAD OF THE YELLOWSTONE VALLEY, AND FROM PORTLAND AND PUGET SOUND TO A POINT NEAR MISSOULA.

THE GAP IS NOW ONLY 240 MILES
and will be closed early in the working season of 1883.

The Northern Pacific Railroad

IS THE DIRECT LINE

To the famous Wheat Fields of Dakota.
To the beautiful Yellowstone Valley.
To the wonderful National Park.
To the great Montana Cattle Ranges.
To the new Gold and Silver Mines.
To the new Grain Belt of Washington.
To the Rich Valleys of Oregon.
To the magnificent Puget Sound Region.

It runs through the Growing Towns of the New Northwest.

IT PASSES THROUGH SCENERY OF UNSURPASSED BEAUTY.

IT IS THE BEST ROUTE

For Settlers, Travelers and Sportsmen.

Fast Trains and Pullman Cars.

BRADSTREET'S:

A Journal of Trade, Finance, and Public Economy.

PUBLISHED BY THE BRADSTREET COMPANY,
279, 281, 283 BROADWAY, NEW YORK.

Terms, $5.00 per year in advance, including postage.

SINGLE COPIES, TEN CENTS.

SPECIMEN COPIES WILL BE SENT FREE UPON APPLICATION.

As a financial and commercial newspaper the foremost purpose of BRADSTREET'S is to be of practical service to business men.

Its special trade and industrial reports; its weekly epitome of bankruptcies throughout the United States and Canada, and the summaries of assets and liabilities, are alone worth the subscription price.

The synopses of recent legal decisions constitute an exceedingly valuable feature.

As commercial transactions, in the wider sense, are coming to be more and more conducted on a statistical basis, the information contained in BRADSTREET'S is of the first importance both to producers and middle-men.

THE TRADE AND AGRICULTURAL SITUATION THROUGHOUT THE UNITED STATES AND CANADA IS REPORTED BY TELEGRAPH TO BRADSTREET'S UP TO THE HOUR OF PUBLICATION.

WORSTED YARNS.
NONANTUM WORSTED CO.
Office, 5 Chauncy St., Boston.
Worsted Yarns for Cassimeres, Coatings, Dress Goods; also Knitting Yarns for hand and machine work; also Tops for Worsted Spinners.
HALL & CO.,
COMMISSION MERCHANTS,
No. 5 Chauncy Street, Boston.

MAVERICK NATIONAL BANK
COR. WATER AND CONGRESS STS.,
BOSTON.
CAPITAL, - - - - $400,000
SURPLUS, - - - - 400,000
Transacts a general Banking business. Receives the accounts of Banks, Bankers and others. Draws Foreign Exchange and makes Cable Transfers in Europe and Telegraphic Transfers of money throughout the United States. Buys and sells Government and other Investment Securities, and executes any business for its Correspondents in the line of Banking.
ASA P. POTTER, PRESIDENT.
J. J. EDDY, CASHIER.
J. W. WORK, ASS'T CASHIER.

J. R. LEESON & CO.,
LINEN THREAD IMPORTERS.
Selling Agents in U. S. A. for FINLAYSON, BOUSFIELD & Co., Johnstone, Scotland; and THE FLAX MILLS, Grafton, Mass.
298 DEVONSHIRE STREET, - - BOSTON.
The only Prize Medal of the London Exhibition, 1851; at Northampton Exhibition of Leather Work, 1873; at Cincinnati Exposition, 1879-'80; The Gold Medal Leather Exhibition at Frankfort-on-Main, Germany, 1881, etc., etc. Adopted by every machine on exhibition at New England Manufacturers' and Mechanics' Institute Fair, 1881 (Boston), to show the quality of work the machines would do. Did not exhibit at Paris, Philadelphia, or Charitable Mechanics' Fair, Boston, 1881.

JOHN P. SQUIRE & CO.
Packers of
PORK, LARD, HAMS,
AND MANUFACTURERS OF EXTRA LARD OIL,
21, 23 & 25 FANEUIL HALL MARKET, AND 39 NORTH MARKET STREET, BOSTON.
JOHN P. SQUIRE. [*Established in* 1842.] FRANK O. SQUIRE.
Slaughtering and Curing Establishment, Gore Street, East Cambridge.

FORBES LITHOGRAPH MANUFACTURING CO.
PRINTING
EXECUTED BY ALL KNOWN METHODS AT SHORT NOTICE.
Albertypes, Tickets, Tags, Color-work and Embossing.
181 DEVONSHIRE STREET, BOSTON.

THE
PLUME & ATWOOD MFG. CO.
MANUFACTURERS OF
BRASS & GERMAN SILVER, SHEET AND ROLLS,
BRASS, COPPER AND GERMAN SILVER WIRE,
KEROSENE LAMP-BURNER GOODS,
COPPER RIVETS AND BURS,
BRASS JACK-CHAIN, Etc., Etc.
Warehouses: 13 FEDERAL ST., BOSTON. 18 MURRAY ST., NEW YORK. 115 LAKE ST., CHICAGO, ILL.
Factories: WATERBURY, CONN. *Rolling Mills:* THOMASTON, CONN.

EDWARD J. HAMMOND & CO.
Wholesale Commission Dealers in
WESTERN PINE AND HARDWOOD
LUMBER,
No. 55 KILBY STREET, BOSTON, MASS.
TERMS: Cash less 2 per cent. and 5 per cent. commission; 75 per cent. advanced on Bills of Lading, if desired.
Refer to FREEMAN'S NATIONAL BANK, Boston.

BROWN, WOOD & KINGMAN,
SELLING AGENTS FOR
RENFREW MANUFACTURING CO.,

BRADSTREET'S

A JOURNAL OF

TRADE, FINANCE, AND PUBLIC ECONOMY.

PUBLISHED WEEKLY BY

THE BRADSTREET COMPANY,

NOS. 279, 281 & 283 BROADWAY, NEW YORK.

London Office, 84 Newgate Street, E. C.

TERMS: $5.00 PER YEAR IN ADVANCE; SINGLE COPIES 10 CENTS.

All communications regarding editorial or literary matters should be addressed to the Editor; all others to the Publishers.

ENTERED AT THE POST OFFICE AT NEW YORK, N. Y., AS SECOND-CLASS MATTER.

SATURDAY, APRIL 28, 1883.

NOTES OF THE WEEK.

Telegraphic dispatches to BRADSTREET'S from leading trade centers throughout the country disclose but little change in the general trade situation. In some sections the unseasonable weather has had an appreciable influence in retarding business. Such has been the case to some extent in the east and in the middle states. The industrial outlook in Pennsylvania has apparently not improved. The reports from the west vary somewhat, but on the whole the situation shows a slight improvement. The dullness complained of in some localities is due in part to the fact that the farmers are putting in their crops, and in part to the circumstance that the week fell between seasons. In the south the trade situation continues practically unchanged. In most departments the movement has been only fairly satisfactory. The weather has not been uniform in this section, and how the crops will be affected is as yet uncertain. The dispatches from the Pacific coast indicate that trade there is in a very satisfactory condition, and the reports concerning the growing crops in that section are encouraging. Special dispatches to BRADSTREET'S received yesterday from the principal western wheat states show a general improvement during the month. The reports confirm the general belief that the wheat plant was injured by the winter in some states.

There is no life or movement in Wall street. The market is dull and weakening, and the most sanguine operators seem to have abandoned hope of any substantial improvement until we can know what sort of a winter-wheat crop we are to have this year. The worst blow the stock market received this week was in the great reduction in the price of iron, it being well understood in Wall street that when the price of iron is falling it is not a good time to buy stocks. Some little buying of bonds shows the influx of investment capital, and in the bond market purchases can certainly be found now which will pay good profit to those who can wait. But there is no necessity to run after any of the goods exposed for sale in the Wall street shops at this time. Sellers seem as if they would be willing to mark down prices soon. There is no immediate danger of a boom.

The correspondent of BRADSTREET'S in London presents in this issue some important considerations regarding American trade and Indian competition. It is pointed out that, while India can grow wheat as cheap or cheaper than the United States, the cost of transportation continues so high that successful competition year in and year out is impossible. The opinion is expressed that only in short years in the United States is India able to come to the front. It is urged that these conditions will continue, and that India need not be feared as a formidable competitor. This is doubtless true so far as can now be seen, but much may yet be done in lessening distance and cheapening rates of transportation. Meanwhile the fact that India is able, when American crops are short, to keep prices down by forwarding unexpected supplies, would seem to be of more importance than our correspondent is inclined to admit, as from this on the crop outlook in India must be regarded as an important factor in making the prices of American wheat and corn.

The Secretary of the Treasury has made another important decision under the tariff act. There has been a question between the planters of rice and the brewers as to the rate of duty which should be imposed upon what is called "granulated rice-meal." Under the law, as it has been interpreted by the Treasury, this article has been admitted at 20 per cent. ad valorem, which is about ½c. per pound, while the duty on rice is 2½c. per pound. The brewers use granulated meal to give a bright amber color to their beer, which is considered desirable, and to give it certain other qualities which are known in the trade as "brilliancy." The rice growers have charged that this granulated meal, instead of being mere refuse of foreign rice-fields, as the brewers have maintained, is, in point of fact, composed in considerable part of whole kernels of rice, and that it for that reason should be charged with the same duty as rice. The Assistant Secretary of the Treasury in charge of customs, Judge French, and the chief of the customs division, decided that the granulated rice-meal was entitled to entry at 20 per cent. ad valorem, as claimed by the brewers, and that the new law makes no change. The Secretary of the Treasury, after examining a great many samples furnished by the collector at New York, sustains the decision of his subordinates.

The report of the committee of the New York State Senate, which has been investigating the matter of "corners" with a view to checking undue speculation by passing some law or other, has been received and considered by the press. It was a fruitless inquiry from the start. If the committee had but studied the results in other states of such legislation as was contemplated, the expenses of the investigation might have been saved to the state. The results in Illinois alone should have been sufficient to teach the wisdom of the let-alone policy. The facts show that during recent years committees of New York legislators have gained prominence as tax-eaters. A number of investigations appear to have been set on foot with little or no end in view save affording junketing tours. As regards excessive speculation in wheat and corn or other staple products, there is reason to believe that the evil is lessening through natural causes.

The events of the winter and spring have given further proof that no thorough and abiding municipal reform is to be expected in New York until the seat of government is returned to Manhattan island. Here is the legislature undertaking to decide regarding the advisability of repaving Fifth avenue. The question of a new Croton aqueduct is sought to be decided at Albany quite independently of the local authorities. This while the Philadelphia councils and the chief engineer of the city's water-works are considering a similar question, with full power to decide. When the question is decided the chief engineer of the Philadelphia water-works will attend to the expenditure of the money without the intervention of an august commission. As regards any addition to New York's water-works, there exists a commission of one in the person of Chief Engineer Newton. So accustomed has nearly every one become to the idea of a commission that, so far as we are aware, no one has as yet directed attention to the fact that a sufficient commission exists in Engineer Newton.

The real difficulty is that New York city does not possess in the full sense a machinery of government. The board of apportionment—the local legislature as far as any exists—is no more than a committee of executive officers empowered to fix the tax levy and appropriate the same. The lessons of the present legislative session all point to the necessity of returning the seat of government to the city. There is no direct way of doing this save to again clothe the aldermen or city council with the power of taxation and appropriation. This could be done without giving to the aldermen the power of confirming the mayor's appointments. There is no possible compromise between New York's having a local elective body which shall be again clothed with the taxing power and the one-man power. If New York city cannot govern itself through the ordinary local forms, then local government hereabouts is a confessed failure, and the sooner the people set about looking up a strong man the better.

We give place elsewhere to a statement from Mr. David A. Wells as to what would be the probable effect of a sudden repeal of the iron tariff. The points made by Mr. Wells are of interest as showing a sincere belief that the United States are capable of industrial independence; that while temporary disorder and inconvenience would result from a removal of the iron tariff the secondary result would be to transfer the control of the iron markets of the world from Great Britain to the United States. We believe it to be certain that ultimately the United States will attain to industrial independence, but this should be brought about through gradual reductions rather than by a sudden transition to free trade. It is plain that there is growing up in the country a stronger and more widespread belief that at a day not far distant the United States will be prepared to assert their industrial independence. It is to this growing force that we have sought to direct the attention of manufacturers, to the end that it might be recognized rather than ignored.

Among the many strange rumors that have come over the cable recently perhaps the most striking is that Prince Bismarck intends to propose a simultaneous disarmament of the powers at a European congress, and that the object of the recent alliance between Germany, Austria and Italy was entered into with the design of bringing the result about by securing the isolation of France. It would be sufficiently remarkable to witness the "man of blood and iron" giving in his adhesion to the principles of the Peace Society. The sight would, indeed, be one of the strangest seen by the men of a generation crowded with startling historical situations. But is the end sought a practicable one at this juncture? France, if the teachings of recent history are taken to heart, will be seen to be a far less dangerous enemy to the peace of Europe than the great empire of the north, and in view of Russia's unsatisfied longings for southern expansion, how is it possible to bring about the disarmament said to be contemplated?

NEW YORK CITY'S BOOK-KEEPING.

The daily journals of New York are troubled regarding the condition of the city sinking fund. The *Evening Post* is of the opinion that "the bonds now in the sinking fund ought to be canceled and expunged, and all new bonds taken into it ought to be served in like manner, for a variety of good and sufficient reasons, the principal one being that this enormous fund, while kept alive, is a constant temptation to fraud, extravagance and waste." The *Times* is, perhaps, less direct, but it would have "steps taken to check the increase of the fund," and is also of the opinion that "there is no good reason why the entire excess (of bonds) over the amount held as a security for the payment of the sinking-fund bonds, should not be canceled." The *Post* is further of the opinion "that the temptation offered by this fund to the indulgence of extravagant and wasteful schemes, will grow as the fund grows. The fund amounts to $34,000,000 at the present time, and is increasing at the rate of $6,000,000 per year. It has the same effect upon the imaginations of city officials and politicians as a surplus fund awaiting investment."

Light will be thrown on this sinking-fund jugglery, as existing in New York city, by recalling its origin. The so-called fund dates from 1813, the year following the beginning of the city's funded debt. The first official unfolding of the scheme exists in a report made to the Common Council in the year named by Thomas R. Marcein, controller. In his own words he had applied himself since his appointment "to the consideration of a plan for the gradual extinction of the funded debt. The city then owed, in round numbers, $700,000, to fall due December 31, 1826. Mr. Marcein had figured out that by applying the revenues from the sale of city real estate, the income from city property, etc., to the purchase of stock through the medium of a sinking fund, there would be paid $400,000 of the then existing debt at its maturity in 1826, leaving $300,000 unredeemed. It was proposed to secure an extension on this amount for ten or twelve years, the theory being that in this time the sinking fund would extinguish the whole debt. Controller Marcein in his report suggested the appointment of sinking-fund commissioners, and advised that they "be permitted to have a credit with the city treasurer (when in funds) for the amount of this quarterly revenue, and thus by anticipating their own quarterly payments and being at all times prepared to make advantageous purchases of city stock whenever it was offered for sale, they will render the fund more certain and productive." After due consideration, the finance committee of the Common Council were prepared "to recommend the adoption of a system for the gradual extinction of the city debt." This report was signed by the city Solons of the time. De Witt Clinton was then mayor of New York. In the same year the contemplated fund was established. The ordinance recited that it was highly desirable to establish a fund out of which purchases of New York city stock may be made from time to time whenever the same can be done at par or the true value thereof, whereby the said stock will be prevented from depreciating and the redemption of the same will be regularly progressing. It was therefore resolved that certain moneys shall constitute and form the fund for the purpose aforesaid, until the final redemption of the whole of said stock. The mayor, controller and other officials were named as the sinking-fund commissioners. As regards the origin of the fund, it does not appear that any calculations were presented going to show that a surplus of revenue could be maintained. Indeed, no reference whatever was made to the necessity of an excess of revenue over expenditure in order to insure a reduction of debt. The city simply became a broker, so to speak, in its own promises. By the device of an extra cash account, otherwise known as the sinking fund, the contraction of further debt was facilitated; that was all. In 1844 the sinking fund ordinance was revised and reenacted. The new legislation set forth that "the object to which the sinking fund was to be devoted was twofold—the liquidation of the principal and payment of the interest as it accrued." The revenues of the fund were sacredly pledged to the payment of interest and principal "until the whole of the stocks of the city of New York shall be finally and fully redeemed." It is unnecessary to recite further points in the history of the fund beyond mentioning that of late years it has been customary to make certain loans payable from the "fund" and certain other loans payable from taxation. To condense a long story, the contrivance, which at first served to facilitate the process of increasing debt, is now used as a means of disguising a surplus revenue, and preventing said surplus from going to decrease old debt through the absorption of new bonds direct from the city treasury—that is to say, the board of apportionment at one meeting authorizes a fresh issue of city bonds—for the Brooklyn bridge or what not—and afterwards the sinking fund commissioners (whose membership is practically the same as that of the board of apportionment) solemnly vote to purchase said bonds from the city. The only adequate remedy for such absurdities is to do away with the extra cash account (sinking fund) entirely. Any security to the bondholders exists in given proceeds of taxation (all the income of the city being included for this purpose under the head of taxation), which have been assigned to meet certain portions of the debt. To abolish the extra bookkeeping (sinking fund) would not lessen by a nickel the city's revenue. In fact its surplus revenue would be increased by the amount of the expense of keeping the extra cash account. Let a bill be introduced (if that be necessary) abolishing the fund and ordering that thereafter the city shall keep but one cash account. So far as relates to the sinking-fund jugglery itself, no further legislation is required. The security of the bondholders, as stated, exists in the maintenance of certain taxes. Let these be maintained so far as may be necessary to fulfill the city's legal obligations.

IMPENDING LABOR TROUBLES.

The attention of the public has been attracted to various labor disturbances at industrial centers in eastern and central western states. The troubles have of late expanded and now affect lines of industry which were not originally in the path of the movement. The salient features of the situation, as it now appears, are quite as pronounced as were those demonstrations of dissatisfaction which were becoming noticeable one year ago. At that time the trouble was with the Pennsylvania Panhandle coal miners—later on with the Cumberland and Clearfield bituminous coal miners and the western iron-mill employés. The discontented Pittsburgh coal miners struck against a reduction in wages from 4 to 3½ cents per bushel. They were out five months; many were reduced to the verge of starvation, and crimes were not unknown as the outcome of the destitution caused by the strike. The employers themselves lost hundreds of thousands of dollars. But the strike was a failure, and after months of trial and privation to prevent the loss of ½ cent a bushel the men went to work at the lower rate. These are the men who have just decided to strike on May 1 against a reduction of from 3½ to 3 cents per bushel, which the operators have declared necessary, owing to the competition of the Ohio mines and the more favorable location of the latter from which to supply the west. There are about 8,000 men interested in the decision to quit the mines next Tuesday.

The puddlers in the western iron mills one year ago declared for $6 per ton, in place of $5.50. The manufacturers called to mind the decline which was marking the price of iron from month to month, and the absurdity of expecting wages to be increased on a declining market. But the puddlers were stubborn and well organized. The Amalgamated Association of Iron and Steel Workers, of which they were members, became the recognized treaty-making power for the discontented iron-mill men, and conducted negotiations with the manufacturers. The magnitude and importance of this strike has only been exceeded by the general uprising of railway employés in 1877. In both cases Pittsburgh was the center of the ferment. Beaten in last year's struggle, the puddlers now refuse to accept a reduction from $5.50 to $5, and will try to bring the manufacturers to terms with the weapon which proved of so little service during the summer and fall of 1882. The terms offered by the manufacturers at the recent secret conference with representatives of the Amalgamated Association are particularly offensive to the latter, in that they include not only a reduction in present wages, but a lowering of the basis of the same. The existing rate is that when bar iron sells for 2½c. per pound, puddlers shall be paid $5.50 per ton. The new scale to be enforced would substitute $5 for $5.50 in the above, and adds that when bar iron drops to 2c. per pound, puddlers shall receive but $4.50 per ton. The manufacturers claim that this reduction is necessary, for the reason that eastern mills pay puddlers 25 per cent. less than the rate existing in the west. The men reply by declaring that eastern mills pay 25 per cent. of the helper's wages, while in the west the puddler pays his helper unassisted. It is believed that the new rates will then be paid, or none. The Pittsburgh puddlers and their allies, the helpers and finishers, declare that, if the mill-owners do not forego this position, a strike rivalling that of 1882 will result. A vote taken on this point in the lodges of the Amalgamated Association is reported to have resulted almost unanimously in favor of a strike. The existing outlook, then, is for a prolonged and bitter struggle between labor and capital in the Pennsylvania Panhandle coal mines, and among the iron mills included in the Western Association.

The numerous minor labor troubles which have floated to the surface of late do not appear to be serious or likely to be lasting, with the possible exception of that among the operatives in the Philadelphia cheaper cotton-goods mills and kindred industries in that vicinity. Some compromises have already been made, which suggest the probability that others may ultimately follow. The numerous smaller strikes for higher wages in the east and west among bricklayers, carpenters, house-painters and allied trades have in many instances been met with the desired advance. Others have been adjusted by compromise. At several of the larger cities, including New York, the cigar makers have struck for a portion of the recently repealed internal revenue tax on cigars. In most cases $1 extra per 1,000 has been demanded. This claim has been granted in the majority of cases. The Havana cigar makers in New York, however, struck for $2 out of the $3 repealed tax per 1,000, and several firms have decided to pay it rather than stop work at this their busy season.

It is not, therefore, the comparatively limited labor disturbances of the class last referred to which seriously threaten the industrial prosperity of the country. It is to be regretted that the outlook in the case of the striking coal miners and the prospective struggle of the iron puddlers does not promise the early capitulation of one side or the other instead of a season of prolonged idleness. Those who declare they will strike and hold out to that end which is by common consent called "bitter," appear to have contracted for a series, instead of for one lesson only, from that high-priced teacher, experience.

PIG IRON FURNACES AND PRICES.

A portion of the iron trade were treated to a surprise late last Saturday by the announcement that the Thomas Iron Company had reduced the price of pig $2 per ton. The cut, while nominally one of $2, in reality amounts to but $1.25 per ton, for 75 cents worth of circular rates has for some time past been shaded. No. 1 and No. 2 foundry irons, which were last week quoted at $24 and $22 per ton, respectively, are now scheduled at $22 and $20. This marks a net decline of $4 a ton during the past fifteen months. In January, 1882, No. 1 foundry was sold at $26. It dropped to $25.75 in March that year, and to $25.50 in the following month. September witnessed a revival in prices, and $26 was again quoted, while $26.25 was asked in October. In November last the nominal rates were once more $26, so that the decline has taken place, in reality, within the past six months. In December, 1882, No. 1 foundry was quoted at $25.75, in January last at $25, in February at $24.50, and last month at $24. This month takes off $2 more.

When BRADSTREET'S reported on Saturday morning last that it was "currently reported that there will be an early cut in prevailing figures for good American brands," it was done advisedly and with more than an intimation of the source of the change. When the new rate was made public the Thomas Company closed contracts for 6,000 tons of pig which had been hanging fire for some time past. There has been much comment on the reduced prices among members in the trade, and the interest apparent among outsiders is quite general.

The chief causes of the decline in pig iron are unquestionably to be found in the unwillingness of buyers to enter into contracts at rates which have prevailed, and

the anxiety of producers to avoid piling stocks. "Dullness in trade" and "overproduction" have also been named. The former is the outgrowth of the latter. Overproduction is not the only irregularity contributing to the present depression in pig iron, for sooner or later it will have to be admitted that the iron producers (north and east) have long been voluntarily handicapped by old-fashioned furnaces. The latter have been a dead weight on the industry. How the larger and more efficient furnacemen have been induced to keep prices up for some months past in order to let the others dispose of their products, is difficult to explain. Now that the pinch has come, overproduction caused by those who should have long since given way under the law of the survival of the fittest is very likely to be radically dealt with. One of the largest furnace companies has cut prices and proposes to look for its own interests. This means that the foundry foundlings which have grown old in years, but not in experience, must ultimately go to the wall. The quicker this is acis accomplished the better it will be for the iron industry in general. An important point lies in the fact that the most efficient anthracite furnaces in Pennsylvania can produce pig iron, No. 2 foundry, at $18 and less per ton. This is not hearsay, or the guess or "estimate" of an outsider. A large proportion of the older furnaces cannot make pig iron within from $1 to $3 per ton as cheap. Yet prices, under the stimulus of heavy requirements and the aid of the tariff, have been so held up that the old or small furnaces, as well as the larger and newer ones, have both been able to work at a profit. Some idea of how much profit the latter class have been making, while holding prices above the water line of their comparatively decrepit neighbors, may be gained from the fact that a Harrisburg concern recently divided profits equal to an 18 per cent. annual dividend.

We hear much about cheaply-manufactured pig iron in the south costing to make (according to various authorities) from $11 to $16 per ton. The fact remains that, notwithstanding the proximity of iron ore, coal, limestone and cheap labor in the south, Pennsylvania furnaces, of improved patterns, have been turning out the better grades of pig approximately as low in cost to manufacture as the higher figure quoted with reference to southern furnaces. These improvements include larger stoves, requiring but from one to one and one-quarter tons of anthracite, to two and two and one-quarter tons under old methods, to one ton of pig. Taller stacks, closed tops and high heats also come in this list.

The consumption of pig iron in the United States in 1881, according to the last report of the American Iron and Steel Association, amounted to 4,982,565 gross tons, and in 1882 to 4,963,278 gross tons. The production of domestic pig iron in 1881 is given at 4,144,254 gross tons, and in 1882 at 4,623,323 gross tons. These figures show that foreign pig iron was required during those years to meet the demand. In 1881 the importation of pig iron is given at 520,835 net tons, and in 1882 at 654,978 net tons.

This record explains why prices of pig iron have (until the past six or eight months) been high and why the weaklings among the furnaces have been enabled to keep at work. But there has been developed a spirit of conservatism in consumption of all kinds, due of course to the curtailed crops in 1881–82, to excessive rail laying and other well known causes. After four or five months' experience of the effects of this new pace in trade the better blast furnaces are recognizing the fact that self-preservation is nature's first law. They can afford to cut prices and are beginning to do so. Well informed members of the iron trade look for the early blowing out of some of the superfluous stacks.

Still, the present may not after all prove to be the appointed time for the more modern furnaces to assert themselves. There may be a compromise of some sort, and higher prices after consumption has been stimulated a little. But the time must come when self-interest will compel those furnaces which can afford to make and sell good iron for $20 per ton to do so, even though it retires those which cannot do so well by the public.

OUR TRADE WITH THE SPANISH ANTILLES.

It is reported by cable from Madrid that the Spanish Cabinet has considered the question of submitting to the United States government the propriety of reducing the duties on sugar imported from the Antilles, and that it has been stated in the Spanish Senate that that country is anxious to conclude a treaty of commerce with the United States. This is the first indication of a movement on the part of Spain to save Cuba from destruction. Cuba, commercially, has become a dependency of the United States, while politically a dependency of Spain. The island is attracted to the United States by commercial and material considerations, but is allied to the home country by race, language, traditions, customs, religion and political ties. The conflict between material prosperity and political conditions has for years prevailed in Cuba, and the result of it, our consul-general in Cuba has recently said, must be "that this conflict must terminate either in complete commercial assimilation with the United States or in the ruin of her material interests and the disappearance of her civilization."

The planters in vain have displayed energetic activity in their attempt to reconstruct the sinking prosperity of the island. They have been struggling with the difficult problem of progressive emancipation. They have come to learn that the ultimate prosperity of the island must depend upon the success of free labor. Great improvements have been introduced in the manufacture of sugar. The evils of absenteeism have been in some measure cured. Vigorous efforts have been made to raise Cuba from the ruins of old methods of social life. But the island is burdened with a debt of $85,000,000, and threatened with a larger one. The smaller plantations are being absorbed by great monopolies, and feudalism is growing up in the new order of things. One of her most eminent publicists has declared that the adoption of the following principles can alone save Cuba:

"All artificial obstacles between Cuba and the United States should be made to disappear immediately, by the integral application of the existing tariff between that republic and the peninsula.

"Declare to be coasting trade (cabotage) the traffic between the Spanish provinces on both sides of the Atlantic.

"Recognize as national the debt, which by an aggravating anomaly weighs exclusively upon Cuba.

"Let the ordinary and extraordinary estimates for the land and naval forces that garrison the island be made a charge upon the nation, as justice loudly demands.

"Let severe measures be adopted which, if they do not suffice to exterminate, will at least restrain the fast-increasing immorality that in Cuba devours a great part of her public resources."

This is the language of Senator Gorrin, a gentleman well-known in commercial circles in the United States. The Spanish Cabinet have at last come to some of the conclusions here advocated. They are prepared to negotiate a commercial treaty with the United States.

Is the United States prepared to enter into such negotiations with Spain? The Indies have done much to create the wealth of Great Britain. The Indies of the United States lie in Cuba, and in the great storehouses of Central and Southern America. It was the trade of the Spanish Antilles which constituted the great bulk of the earlier commerce of the New England ports, which enriched Rhode Island, and laid the foundation for some of the great financial fortunes of Providence and Boston. Owing to oppressive commercial restrictions, the tide of trade no longer tends in those channels. Our imports from the Spanish West Indies, it is true, greatly exceed the imports of all other countries from those islands, but our exports are but a little more than one-fourth of the total exports to Cuba. In many lines of manufactures we do not compare favorably with either France or England. This will appear more clearly from the following table of exports of principal manufactures to the Spanish West Indies:

Articles.	*From England.*	*From France.*	*From the U. S.*
Cotton manufactures	$2,828,000	$153,000	$169,000
Wearing apparel	107,000	213,000	15,000
Beer and ale	331 000	.....	27,000
Earthen, china and glassware	209,000	38,000	79,000
Leather manufactures	.....	1,345,000	46,000
Jewelry	... ..	725,000	4,500
Hardware and cutlery	491,000	118,000	....*

* Not specified. It is more than likely that our exports of hardware to the Spanish West Indies equal those of Great Britain.

Our principal exports to the Spanish West Indies in 1881, the last complete tabulated year, were as follows:

PRINCIPAL EXPORTS FROM THE UNITED STATES TO THE SPANISH WEST INDIES, 1881.

Articles.	*Value.*
Agricultural implements	$50,000
Beer and ale	27,000
Breadstuffs	537,000
Candles	40,000
Carriages and railroad cars	36,000
Coal	373,000
Cordage	112,000
Cotton goods	169,000
Drugs and medicines	28,000
Fruits of all kinds	46,000
Glassware	75,000
Ice	42,000
Rubber goods	29,000
Iron manufactures	1,136,000
Steel manufactures	66,000
Leather manufactures	46,000
Petroleum	200,000
Paints	20,000
Paper and stationery	279,000
Perfumery	49,000
Provisions	1,168,000
Scales and balances	20,000
Sewing machines	76,000
Trunks and valises	35,000
Lumber	893,000
Wood manufactures	1,037,000
All other domestic	5,037,000
Foreign exports	416,000
Total	$13,128,000

In a pleasant day one may pass from Key West to Havana in a skiff. But it takes weeks for a sailing ship to traverse the distance between Cuba and Liverpool. Certainly, the commercial conditions must be abnormal when the mills of Manchester furnish to the Cuban planters more cotton manufactures than the mills of Lowell. Yet Great Britain furnished to Cuba British cottons, piece goods, 31,989,600 yards, of the value of $2,702,000, against American piece goods 1,556,461 yards, valued at $142,000. Yet large as the British cotton goods trade is now with the Spanish West Indies, it is but one-half in value what it was in 1876. In that year the exports of British cottons to Cuba and Porto Rico amounted to 49,802,200 yards, and in value to $5,215,000, against, in 1880, 31,989,600 yards, and $2,828,000—a decrease in five years of 17,812,600 yards, and of $2,387,000 in value. As this lost British trade has not been taken up by any other country, it would appear that the consumption of cotton goods on the islands has decreased to that extent in five years. The average price of British piece goods exported to the islands in 1876, plain and printed, was 9.80c. per yard; in 1880 the average price was 8.45c. per yard.

The average price of American cottons exported to the Spanish West Indies during the year 1881 was 12.29 cents per yard, nearly once and a half the price of the British goods.

These facts speak for themselves. It is unnecessary to indicate in what the obstacles to the commercial supremacy of the United States in Cuba consist. The long list of customs exactions and of discriminating duties is well known. Merchants understand the situation. It remains to be seen whether, in view of the advance which evidently is soon to be made by the Spanish Cabinet in the direction of a commercial treaty, a popular sentiment is to be created in this country which will demand a more liberal commercial policy between the United States and the Spanish Antilles. In any consideration of this subject it is to be observed that the best way to promote American trade and commerce is to improve our exports, and not to adopt a policy which shall restrict our manufacturers to a home market. A proper commercial policy with Spain would make new fortunes in the United States, as it made fortunes here in the earlier part of the century.

AMERICAN GLASS IN EUROPE.

The debate in Congress in connection with the tariff on glass showed that that industry had made rapid progress in this country within a few years. The manufacture of plate glass, which commenced here within a comparatively recent date, has attained considerable proportions, there being six establishments, with a capital of $2,587,000, paying some $300,000 in wages. The total value of plate glass manufactured is about $1,000,000 annually. The State Department, before the discussion in Congress begun, and while the Tariff Commission was making its investigation, sent circulars to all consuls, located in districts in Europe where glass is manufactured, to obtain all possible information as to the method and cost of manufacturing, and especially as to the best means for developing the American glassware trade in those countries. The answers of the consuls have just been published. The information as to the best means for developing the American glassware trade is comprehensive and significant. The answers contain a great many hints of value to exporters. The reports give a good deal more detailed information as to the condition of the glass industry in Europe than was contained in the report of the Tariff Commission.

There is a singular unanimity among the consuls as to the methods which should be adopted for the purpose of increasing the trade of the United States. It appears that American competition has already forced the manufacturers of glass—which has long been one of the chief industries of Europe—to adopt the most rigid economies in manufacture, and to resort to every art and mechanical appliance that can be brought into requisition to reduce the cost. Jealousy of foreign competition, too, induces them to guard with great care every new discovery that will tend in any way to cheapen or improve the product. So jealous are they of American manufactures that the agents of the large European manufacturers buy American samples, and offer to furnish the same in quality for 50 per cent. less. American patterns are much sought, and are often considered more desirable than the European ones. As it is a country where water is not a general beverage, and beer is, one general complaint is that our goblets are too large and our beer mugs too small. The United States consuls in Germany generally are of opinion that there would be a large market for lager-beer glasses in Europe if the size

was increased. One of the greatest drawbacks to the successful importation of American manufactures into Europe is bad packing, especially of the lighter glasswares. Dealers in lamps and lamp chimneys in Belgium, for instance, report that 30 per cent. will scarcely cover the loss by breakage on every load received from the United States. But, possibly, the greatest obstacle to be overcome by American manufacturers is the want of a proper depot for their wares and of intelligent introduction of them. The superior quality of many American manufactures is admitted by many, but it is urged that they are not adapted to the European trade, and that they are too high-priced. The difference in the price of manual labor between Europe and the United States is not enough in itself to exclude American manufactures from European markets. To make this market available there should be better packing, cheaper transportation, better management of the goods in Europe, and the American manufacturers must be content with smaller profits.

In France American glass manufacturers have to overcome greater obstacles than in Germany. There is stronger hostility among French manufacturers and dealers to American wares, and the French tariff is more oppressive. A recent report of the Chamber of Commerce of Hanover, Germany, in speaking of glassware from the United States, says: "This glassware in large quantities has found its way to the German market, where it meets with ready sale, and enjoys the well-earned plaudits of consumers."

OCCASIONAL NOTES.

Among the consequences of reforming the civil service the *Century* looks for rearrangement of parties before many years, and his certainly would not be the least of the benefits which the new departure might bring. It has been truly remarked that, under the spoils system, the idea of party has become somewhat confused, and among those at least who bear the heat and burden of the practical "work" of the political campaign the much-abused word has gradually come to be identified with the conception of an organization for securing and dispensing as property the offices of the government. As was proven by the last elections, the force of the passions which were evoked by the war are now spent, and the only bond of union between the members of the opposing parties is the traditional organization, which must be regarded in some sense as a survival, and the only motive to action is the desire for office on the part of the leaders. There being now no public question upon which the members of either party are agreed, the effect of the destruction of the central idea of the spoils system by the energetic enforcement of reform principles will naturally be the rearrangement of parties and a division upon present and living issues. But before indulging in prospects which may prove illusory it is well to bear in mind that, as the history of the country seems to indicate, the rearrangement of parties is not likely to be fundamental, and the effects of the recent reform legislation are so much in the future that confident prediction at this time is next to impossible.

The cotton trade of Havre, it is said, is threatened with a decline. Havre importers have been complaining that the high rates of inland transportation charged by the railroad companies have seriously handicapped them. Since these complaints were made some slight reductions have been made by the railroad companies in their rates to the manufacturing districts of northern France, but not to an extent sufficient to prevent a diversion of some of the trade which would formerly have gone to Havre. Cotton for Switzerland and Alsace, it is said, is beginning to go by Antwerp, Hamburg and Bremen instead of by Havre. The rates from the German and Belgian ports named to the various manufacturing centers are lower than from Havre. From Havre to Mulhouse, for instance, the transport of a ton of cotton costs 48 francs 25 centimes, while from Antwerp the cost is only 28 francs. There was considerable complaint of the unsatisfactory state of trade last year. The imports of cotton showed a decrease as compared with the year before, though not as compared with previous years. The quantity imported in 1881 was 654,240 bales; in 1882 it was only 640,940 bales. It is said that direct importation by manufacturers is on the increase. There is much less speculation than in former years, and the business of the brokers is diminished in consequence. As a result they have reduced their charges one-half.

Recent official returns of the Spanish navy and merchant marine show that the number of merchant sailing vessels fell off considerably during the year, but that, on the other hand, there was a considerable increase in the number and tonnage of steamers. The number of sailing vessels of fifty tons and upwards on January 1, 1882, was 1,803, and the tonnage was 313,122. On January 1, 1883, the number of sailing vessels had decreased to 1,674, and the tonnage had fallen off to 286,164. There were 341 steamers of fifty tons and upwards on January 1, 1882, and the aggregate capacity then stood at 232,698 tons. The number of steamers had increased to 389 on the first day of 1883, and the tonnage had increased to 304,192 tons. The result is that though there was a decrease of 81 in the number of vessels, the total capacity showed an increase of 44,536 tons.

The *Economist* devotes some space to a consideration of the material condition of Ireland, which leads it to the conclusion that the signs of any widespread distress are wanting. The harvest of 1882, it is admitted, fell short of that of 1881 in certain localities where the potato disease largely prevailed; but it is to be borne in mind that the crop of 1881 was a remarkably good one. The railways in Ireland derive a considerable proportion of their receipts from the carriage of agricultural and cattle traffic, and they would be likely to reflect the diminished prosperity of the agricultural classes. The second half of 1882 showed a considerable increase in traffic over 1881, and the dividends announced during the past few months compare favorably with those declared in the first quarter of 1882. The average dividend of the nine leading Irish companies was ⅝ per cent. higher in 1882 than in 1881. Even as regards the current half year, the Irish railroads are doing better than the English. The banknote circulation in Ireland is now larger than at any time since 1877, and Irish banking profits and dividends are reviving. The decline in the market prices of Irish securities is attributed to the disaffection still prevailing in the country; but even in these there have been signs of a rally within the year. They are, however, far from standing at the level attained in 1877 and 1878. The prices might be raised even to the level of 1877-8 if only frightened capital could be induced to return to them. Trade in Ulster is stagnant, however, and there are districts where the failure of the potato crop has caused distress.

The Irish question is receiving attention in so remote a quarter as Australia. The *Victorian Review* for March opens with "An Attempt to Apply the Canons of Historical Science to the Case of Ireland," in which the writer, Mr. J. Crozier, sets forth again the familiar story of the ill success attending England's administration of Ireland's affairs. He bases the Irish claim for local self-government upon the same principle which guided the action of the revolutionists in England in the seventeenth century, in America in the eighteenth, and in Italy within the memory of men now living, the principle, namely, that government must be satisfactory to the governed. Some considerations upon the "Practical Working of the Licensing System" are presented by Mr. S. C. Aldrich. It seems that the same evils that are incident to the liquor traffic here, and which have led to such ill-advised movements, are in operation in the Australian towns. The writer advises the adoption of the high-license system which is so much advocated in many quarters. That this would be a benefit to the smaller dealers themselves no less that to the community, the writer considers a certainty. He says that it is doubtful whether one-half the licensed houses in Melbourne return a living to the tenants, and also that the competition is so keen that adulteration of liquor is almost universal, a genuine article being hardly procurable anywhere, even in the most pretentious hotels.

It seems that England's experience with Fiji is essentially different from that which it has passed through in many other crown colonies, and that whereas, generally speaking, colonies of that class have been for many years a burden to the exchequer, Fiji, on the other hand, has been self-supporting from its infancy. The London *Daily News* gives some information concerning the little-known colony which is not without interest. The estimates for the ensuing year indicate that, as usual, there will be a surplus, the total revenue being estimated at £158,738, and the expenditure at £155,047. There has been, it appears, a great development of the sugar industry in Fiji. It was recently stated that the largest sugar mill in the world was erected there, and that an order for the erection of another one of the same size had been given. The export of sugar in 1882 was only 1,800 tons, but this quantity, it was expected, would be doubled in 1883 and quadrupled in 1884. It was believed before the islands were annexed that their staple production would be cotton, but now there are indications that sugar will be the leading crop. Among the interesting information disclosed concerning the islands is the remarkable fact that there is not a single English soldier, except the governor's aid-de-camp, in the colony. There are a few inspectors and sergeants of police, but the government's chief reliance for the preservation of order is upon a native constabulary force, maintained at a cost of a little more than £2,000 a year. The further encouraging fact is recorded that five times as much public money is spent in maintaining hospitals and an efficient medical staff as in keeping up jails.

There has been a great deal of wheat-crop talk indulged in during the past fortnight. Many of the speculators and dealers in that grain are, as usual, specially informed by their own correspondents, and are, therefore, prepared to go on 'change and act in exact accord with the outcome of the winter-wheat crop. Superintendents, general managers, and others in authority on western railways have been credited with furnishing "comprehensive reports" on the condition of the growing wheat crop throughout this or that region. Then come the various independent reports in daily papers, quite as likely to be trustworthy as any, and more so than some, that had preceded them. It is a remarkable fact that most of the wheat-crop reports referred to chimed in with the letter as well as the spirit of the Agricultural Department report dated April 1, but issued April 10. They have all exercised a potent influence on the wheat markets of this country and Europe, and are now seen to have been premature, ill-advised, and, in some cases, unwarranted. The last government wheat-crop report, as explained in the commercial columns of BRADSTREET'S a week ago, was practically worthless, in that the Pacific coast rainfall, which insured a full crop, and the discovery that Michigan and Wisconsin were far better off than had been supposed, both took place between the date of its compilation and publication. Telegraphic wheat-crop "summaries" were pushed on to Chicago and New York from California, the northwest, everywhere, all telling tales of serious damage by alternate freezing and thawing, and the other drawbacks which have been rumored so loudly. But, after all, when a few had found time to think, it came to be generally admitted that the California wheat is all right, and that the damage by winter weather, while noticeable in Ohio, and occurring in portions of Illinois and Indiana, is not now known to have seriously curtailed the crop.

SPECIAL CORRESPONDENCE.

THE UNITED STATES AND INDIA IN BRITISH MARKETS.

London, April 11.—The British Board of Trade returns for the past quarter, published this week, afford matter of considerable interest to American merchants. In spite of all the gloomy talk indulged in in Manchester, it is found that cheap American cotton has already begun to stimulate shipments of piece goods to those eastern countries which last year were unable to buy because American cotton was dear. Manchester prices are admittedly very low, but still a fair volume of business has been transacted at current rates. This is one item in which cheap American produce benefits the English manufacturer. Indian cotton is not cheaper to the same extent that American is, and, as a result of this, Lancashire is placed in a better position to compete with the Bombay mills.

But there are yet more important considerations involved in the state of trade between the United States and Great Britain at the present time. Prices are cheaper than they were twelve months ago, yet in the face of this, according to custom-house statistics, the value of the imports into the United Kingdom from America in the first quarter of this year showed an increase of something like 27 per cent. when compared with the first quarter of 1882. A complete statement of American imports into this country for the quarter will not be ready for another month, but, judging by the list of principal items given below, there is not left much room for doubt as to the nature of the figures to be disclosed. The actual value of the imports in the corresponding quarter of last year was £24,866,830, of which there is recorded below £22,825,330, leaving only £2,000,000 unaccounted for. Adding a similar £2,000,000 to the recorded imports of the past quarter, it may be predicted that the total will be not very far removed from £31,000,000—probably it will be rather in excess of that figure, and the total will therefore be on a par with the unprecedented figures recorded in the first three months of 1881.

IMPORTS FROM UNITED STATES.

	First three months 1882.	*First three months* 1883.
Oxen and bulls	£209,988	£433,950
Sheep and lambs	13,316	64,782
Bacon	2,171,289	2,174,691
Beef, salted	160,835	182,349
Beef, fresh	451,291	562,190
Butter and butterine	115,986	151,375
Cheese	427,643	342,527
Wheat, Atlantic ports	1,878,445	1,660,462
Wheat, Pacific ports	1,995,607	2,170,364
Maize	1,191,597	2,558,921
Wheat flour	1,255,394	2,775,181
Cotton, raw	9,663,220	12,531,696
Fish, cured	65,579	262,914
Hams	590,913	543,134
Lard	748,424	611,389
Leather	417,534	326,843
Meat	316,070	244,866
Petroleum	402,098	410,250
Pork, salted	217,866	214,015
Tallow and stearine	235,917	153,632
Tobacco, unmanufactured	182,541	215,205
Timber	113,837	45,368
Totals	£22,825,330	£28,943,544

Increase—£6,118,214, or 26.8 per cent.

It is remarkable that all the most important items upon this list show the principal expansion; cotton coming first, flour and wheat next, then maize, and fourth beef and oxen, lumping those items together. Apart from these items there is really very little expansion to be noted.

But if the increase in this direction for the past quarter may be set down at something over £6,000,000, the exports of British goods to American ports stand in a very different light. In iron and steel alone the drop is over a million, and in almost all other recorded items there is a decided falling off—the textile industries being more particularly affected. Thus, in the face of the great increase in British imports, the exports of the United Kingdom to America will probably be found to have diminished by something approaching £2,000,000—the corresponding total for the first three months of 1882 standing at £8,940,000. There can be no doubt, therefore, in which direction the balance of trade has gone.

When we come to consider the effect of the growing trade from the United States to Great Britain upon India, it at once becomes apparent that, great as has been the percentage of increase in the one case, the percentage of decrease in the other has been even greater. Last year, as we all know, India found it very profitable to supply the deficiencies of the United States crops, and her exports to Great Britain increased with wonderful rapidity, but it is now found, as is always the case with similar stop-gaps, that that increased trade was not a permanency, but only a windfall. As soon as another good season occurred in America Indian shippers were bound to lose their grasp upon British markets, and the result of this is shown in the following table of some of the leading exports from India to Great Britain during the past quarter. The reduction, it will be observed, is as much as £3,231,439, or 27.4 per cent.:

IMPORTS FROM INDIA.

	First three months 1882.	*First three months* 1883.
Wheat	£1,847,868	£689,458
Cotton	2,148,441	871,809
Hides	440,849	439,962
Indigo	2,129,906	1,713,246
Jute	1,584,826	1,402,670
Leather	513,226	512,557
Rice	375,639	354,918
Flax and linseed	557,121	537,546
Silk	18,769	93,66
Sugar	125,648	119,103
Tea	1,178,724	1,107,602
Timber	196,192	192,698
Wool	303,346	237,581
Total	£11,419,955	£8,188,516

These totals are comparatively small beside those of the British trade with America. Strange to say, there is some sort of falling off upon every item, whether suffering from United States competition or otherwise; but this reduction is not so prominent in quantities as it is here shown to be in values, because at the current exchange Indian shippers can afford to accept somewhat lower prices and yet maintain the value of their goods when measured by rupees. But when we look to the items of wheat and cotton, where United States competition has come into force, we find it has operated with most powerful effect, the shipments under both of these heads being barely more than one-third what they were in the corresponding period. It is not that India cannot grow cheaply—more cheaply, in fact, than America can—but the distances from English markets are so much greater, and freights, with the canal dues added, are so much heavier, that India can hardly ever hope seriously to compete with America for the supply of Great Britain with cotton and wheat in years when American crops are ordinarily abundant. In this direction Indian trade must always be of a very spasmodic character, and the reduced railway tariffs about to be tried upon some of the leading Indian lines can hardly be expected to materially affect the result.

AFFAIRS IN MEXICO.

Monterey, Mexico, April 12.—Just a month ago the street railway here, the Ferrocarril Urbano de Monterey, began operations on its first completed division—a line a trifle over three kilometers

in length, between the Mexican National Railway station and the Plaza. The projectors of the road were not by any means lacking in faith as to its power for money-making; indeed, conservative folk were disposed to laugh at the very sanguine view that they took of the future. But the event has shown that they actually erred on the side of prudence. Even in this first month the result altogether surpasses their expectations. Thirty per cent., certainly, is to be counted upon as the return from their investment; the managers blushingly own that forty to forty-five per cent. seems to be very well within the bounds of probability. Of course the fortunes or misfortunes of a street railway company, under ordinary circumstances, are matters of no importance whatever to the public, save in so far as the public always feels a righteous joy when a street railway company is in trouble because it is a sign that some of the hardships which the public suffers from its intimate foe are being balanced a little. But in this case the conditions are not ordinary, since the results of this venture have an important bearing upon a question that at present has much interest to capitalists in the States—whether or not investments in Mexico can be made to pay.

The street-railway system under construction in Monterey comprises three divisions: a belt road, ten kilometers long, around the city, passing the public baths, the Campo Santo, the railway station, the Alameda, the tanneries, the stockyards, the market gardens, the Obispada and the Caja de Agua, all of which places are largely resorted to for business or for pleasure; a line, ten kilometers long, along the Calles Comercio and Dr. Mier, the two principal streets of the city, passing the plaza, the cathedral, the church of San Francisco, the market, all the large mercantile houses, the greater portion of the handsome private residences, the baths, the market gardens and the Obispada; the line now in operation—used also at night as a freight road to bring in goods from the railway station—that passes the cathedral, the church of the Roble, the Ojo de Agua, and that runs within a block or two of the principal hotels. These several lines give access to all the places of interest, and traverse all the business portions of Monterey. Two features of the line that will go into operation upon its completion strike an American as odd. To be included in the rolling-stock of the road is a hearse! This is to be a handsome affair, provided with the various sorts of draperies which the customs of the country prescribe for funerals of various sorts, and is to be so arranged in its running gear that it can be drawn over the street pavements. For funeral purposes the hearse, with as many horse cars as are required, will be chartered; the hearse will go directly to the house, there receive its single silent passenger, and thence be drawn back to the track again. Meanwhile, on the nearest available siding, the cars will be drawn up, to which the mourners will walk. There the whole procession will move off over the rails to the Campo Santo, where a long siding will be provided, so that there will be no interruption in the ordinary traffic of the line. All this seems rather chimerical and wholly absurd; but it is neither the one nor the other. In the City of Mexico the system is in use, and works well. The argument in its favor is a cash consideration of weight. To go to a funeral here in a carriage costs each mourner twenty-five cents, while to go in a horse-car will cost only six cents. It follows, therefore, that four times as many funerals can be enjoyed under the new system as could be enjoyed under the old one; and a funeral, be it known, is an entertainment that is very dear to a Mexican's heart. The other oddity of the road—and this will he peculiar to Monterey—is a sort of drawing-room car that can be chartered by the hour. It is to be arranged in three compartments, each holding eight persons, and each provided with chairs and a table on which lunch can be served. By the opening of sliding doors, the three compartments can be thrown into one and twenty-four passengers accommodated. It is expected that these cars will be in great demand for the carriage of picnic parties to the Alameda, for visits to the Campo Santo, and for drives around the city; and no one will doubt that this expectation is well founded who knows how entirely devoted all classes of Mexicans are to the pasear.

Indeed, it has been the Mexican fondness for going a-pleasuring that has been the chief cause of the success of the division already in operation. The railway station is the great objective point in the afternoon, and hundreds of persons go down daily to see the train come in. On Sundays and feast days the numbers run up into the thousands. On the first Sunday that the street railway was in operation 2,200 passengers were carried between the station and the plaza; on Holy Thursday 1,800; on Easter Sunday 1,900; last Sunday 2,000. But the most direct way of showing how kindly the people of Monterey take to their new institution, and at the same time of bringing out the more important fact that the line has paid well from the start, is to give in tabular form the daily receipts for the month just ended. Under the terms of its concession, the company is permitted to charge 6 cents for each two kilometers. To meet the requirements of the Mexican coinage 6¼ cents has been charged (though, strictly, the distance entitles the company to charge 12 cents) over the division now open. The new coins being now in circulation the fraction will be thrown off. By order of the civic authorities all business was suspended on Good Friday, hence the absence of returns for that date:

March 12	$40.25	March 28	$58.18¾
March 13	45.31¼	March 29	53.93¾
March 14	57.31¼	March 30	51.12½
March 15	51.18¾	March 31	56.62½
March 16	69.81¼	April 1	121.68¾
March 17	73.68¾	April 2	68.12½
March 18	132.06¼	April 3	56.87½
March 19	80.12½	April 4	56.75
March 20	63.75	April 5	54.37½
March 21	50.31¼	April 6	51.37½
March 22	111.81¾	April 7	51.00
March 24	49.06¼	April 8	123.31½
March 25	117.43¾	April 9	60.65¼
March 26	63.18¾	April 10	54.37½
March 27	55.75	April 11	52.31¼

The returns for the past fortnight would have been at least 30 per cent. greater but for the intervention of the city authorities with an order that only twenty-four persons should be permitted to ride on each car, backed by a policeman detailed to mount guard over each conductor and see that the order was enforced. This was the outcome of the irrational doctrine (irrational in New York, at least) that inasmuch as each passenger pays for a seat he is entitled to have one, and that as each car seats but twenty-four people no more than this number shall be allowed to ride on it. However, in the course of a few days the line will be formally approved by the state authorities and will pass from the wardenship of the city into the control of the company, and then we can hope for such proper carloads as would do honor to Fourth avenue itself. For, before the order of limitation was issued, eighty or ninety people frequently were carried on a round trip; and one round trip came out at the handsome figure 103: not bad for a car drawn by a single mule. At present, only six cars are in service, each of which makes about forty trips daily. By a comparison with the above table, it will be observed that nearly every trip counts a full load each way. This evenness in load is brought about by varying the running time and the number of runs per hour with the time of day. Between 6 a.m. and 3 p.m. three cars are run at intervals of twenty minutes; between 3 and 8 p.m. five cars at intervals of twelve minutes. An extra car is put on Sunday afternoons. It is probable that when the line is completely organized, no cars at all will be run between noon and 3 p.m.—during which period the whole city eats its dinner, and thereafter for two hours is lost in sleep. This will result in a very considerable saving in wear and tear of plant, and will induce no appreciable loss.

Perhaps the most important fact that has been demonstrated by the success of this little railway is the adaptability of the Mexicans to American methods of work. The entire working force of the road—conductors, drivers, grooms, stablemen, trackmen, and assistants in the harness, repair and blacksmith shops—has been recruited here; and not one of the lot ever had laid eyes on a horse-car in the whole course of his life. Trouble was expected in breaking in these raw hands, but no serious trouble has been experienced. To be sure, the true American article of conductor has not yet been developed; for these Mexican conductors (regarding the situation again from the Fourth avenue standpoint) are so careless of their own interests that they do not knock down on fares, and they are distressingly and ridiculously polite. But, with these exceptions, they give entire satisfaction; and no doubt, as association with Americans enlarges their ideas, they will learn to steal and to be rude. The conductors are paid $35 (Mexican) a month; the drivers $1 (Mexican) a day, with no allowance—as is usual in Mexico—for board. The company's yard, with stables, shops, storerooms and business offices, is leased at $35 (Mexican) a month. Corn costs from $5 to $5.50 (Mexican) for the cargo of 300 pounds. All of which figures go to show that one reason why profits are heavy is that expenses are light.

This venture in developing Mexico is instructive, and it gives very encouraging results. It proves that American institutions thrive in Mexican soil; that Mexican labor can be adapted to American requirements; that no serious difficulties need to be overcome by the people of the northern nation in founding business enterprises among the people of the southern; and, what is still more to the purpose, it proves that American investments in Mexico can be made to pay. T. A. J.

LETTERS TO THE EDITOR.

LIGHT ON THE PRISON QUESTION.

To the Editor of BRADSTREET'S.

SIR—You have so clearly discerned the issues involved in the discussion of systems of convict punishment that I venture to make these observations in the present aspect of public thought and legislation on convict contract labor.

The New York press and the state legislature have at last become convinced that a system of convict punishment based on the sold toil of the convict, as the measure of his punishment for crime, is a false one. That it fails in its purpose is no longer a matter of doubt. That it injures the state, puts society in peril, and rarely, if ever, benefits the prisoner, has been demonstrated. The "crime-class" in the city of New York is the best evidence of the perils to which society is subjected by the congregation of prisoners during incarceration, subjected to involuntary labor in masses, because their physical endurance is sold by the state to the contractor-manufacturer. To base any practical method of punishment for crime on this plan is simply absurd.

The only theory of punishment is that its infliction is to be preventive and remedial—prevent crimes and remedy the effects by removing the causes. These are the only legitimate aims of crime-punishment. Any system of treatment to which the convict is subjected during his incarceration which has not this primary and principal design is only imprisonment. This in itself is a useless, unintelligent use of force—restraint, incarceration. What result can come of this but the segregation of a class, the constituting of a class, the organization of a class of social enemies—men who have been made criminals because they were left no other resource while in prison?

To force these men to labor for the profit of a contractor who buys their toil-power, their muscular strength, from the authority whose violated law has made it possible for them to be so treated is to consolidate them into a body of individuals over which society has to expend large sums of taxes for oversight and control after these individuals leave the school where they have been trained to be criminals. The recent outbreaks in the state prison of Massachusetts, at Concord, in Sing Sing and in Jefferson City, show what results are possible under this congregate-contract labor system in prisons.

The cost of this system is so great, so far beyond what even you have pointed out, so far in excess of any just computation, that it is wonderful how little effort has ever been made to ascertain it. The public seem satisfied with the vague and blazoned statement that the congregate-contract labor prisons pay. But pay what? pay whom? how pay?—are questions that are never answered. You have invited attention to these questions, but it is only just now that your state legislature and your great daily papers are even looking at these questions, and then only looking at them, and that is all; no replies are made. I assert that the congregate-convict contract labor prisons are the most costly institutions now authorized by law for the punishment of persons who are convicted of crime:

1. By the degradation of the convict.
2. By the creation of a crime-class.
3. By the machinery necessary to protect society from these sources of danger.
4. By the degradation of labor in making it a penalty for crime.
5. By creating an aversion in the young to learn trade knowledge, since labor is a penalty for criminals.

The cost of all this is yet immeasurable, because there are no authoritative statistics by which to ascertain it.

A society or community in which such a proportion of trained or educated individuals exist, who are social enemies, ready for any kind of depredation against persons or property, is a costly class. They produce nothing, and all they consume is made out of crime. Read the journals of large cities near which a prison is situated on this congregate-convict contract labor plan, and see the number and character of the crimes which attract attention, and by whom committed.

But the time is coming, has come, indeed, when these important subjects are exciting more and more notice from thoughtful men. The first question to be determined is, do self-supporting prisons pay, in fact? If not, then how is it that no efforts are made to know why.

You must yet work on this problem. I have been earnestly studying this subject, and I write to encourage you to continue in this most important public service. RICHARD VAUX.

Philadelphia, April 25.

RECENT LEGAL DECISIONS.

[*Prepared expressly for* BRADSTREET'S.]

The U. S. Supreme Court had recently before it the somewhat difficult task of distinguishing between "professional productions of statuary, or of a sculptor," and "manufactures of marble not otherwise provided for." This nice question was presented by the case of Sutton, collector, vs. Vite et al., which was a suit brought by the defendants in error to recover an alleged excess of duty paid by them upon seven marble statues imported from Italy. The importers contended that these statues should pay a duty of only 10 per cent. ad valorem under section 2,504 of the U. S. Revised Statutes, which fixes that rate for "professional productions of statuary or of a sculptor." The collector, who appears to have been a rather severe critic of art, took the view that the statues in controversy were made by men who were not really professional sculptors—though calling themselves such—and that the statues were not really works of art, but mere manufactures of marble made by good artisans, and that therefore they should pay a duty of 50 per cent. ad valorem as "manufactures of marble not otherwise provided for." The Supreme Court held that marble statues executed by professional sculptors in the studio, and under the direction of another professional sculptor, whether from models just made by a professional sculptor or from antique models whose author is unknown, are professional productions of statuary, or of a sculptor within the meaning of the law, and are liable only to a duty of 10 per cent. ad valorem.

The question to what extent legislative authorization can be invoked to justify interference with the use and enjoyment of private property was before the Supreme Court in the case of The Baltimore & Potomac Railroad Company, plaintiff in error, vs. The Fifth Baptist Church. Suit was brought by the trustees of the church against the railroad company for damages on account of alleged injury to the property of the former caused by the erection and maintenance of an engine house and machine shop on land adjoining the church edifice. The chief ground of the defense set up by the railroad company was that it was authorized by an act of Congress to bring its track within the limits of the city of Washington, and to construct such works as were expedient for the completion and maintenance of its road. The Supreme Court, affirming the judgment of the Supreme Court of the District of Columbia in favor of the church, held that the authority conferred by Congress would not justify the railroad company in invading property to an extent that would amount to an entire deprivation of its use and enjoyment without compensation to the owner, nor could such authority be invoked to justify interference with the use and enjoyment of property where different places from those occupied could be used by the railroad company for its purposes without such detriment or annoyance. The acts that a legislature may authorize, which without such authorization would constitute nuisances, are those which affect public highways or public streams, or matters in which the public have an interest. Legislative authorization exempts only from liability to suits civil or criminal at the instance of the state. It does not affect any claim of a private citizen for damages for any special inconvenience or discomfort not experienced by the public at large. The grant of powers and privileges to do certain things does not carry with it any immunity for private injuries which may result in the exercise of these powers and privileges.

Suit was brought by a passenger against a car company for refusing to permit him to occupy a sleeping-berth assigned to him, and for which he offered to pay. It was held in the lower courts in which the case was heard that the plaintiff had no power to force accommodations from the car company, and that it was optional on its part to furnish the same. This doctrine was rejected by the Supreme Court of Illinois, who took the view (in Nevin vs. The Pullman Palace Car Company, decided March 27) that the running of sleeping-cars has become a business and social necessity, and that consequently the law can impose obligations on the company the same as on railways, ferrymen and innkeepers. "When, therefore," the court says, "a passenger who, under the rules of the company, is entitled to a berth on payment of the usual fare, and to whom no personal objection attaches, enters the company's sleeping-car at a proper time with the purpose of procuring accommodations, and in an orderly and respectful manner applies for a berth, offering or tendering the customary price therefor, the company is bound to furnish it, provided it has a vacant one at its disposal." The court held the company liable for the breach of this implied duty.

A broker employed to procure a loan is entitled to his commission when he procures a lender ready, willing and able to lend the money on the terms proposed, according to the opinion of the Supreme Court of Indiana in the case of Vinton vs. Baldwin, decided April 21. The broker's right to his commission does not depend on the contingency of the applicant's acceptance of the loan, but on his performance of his part of the contract, and he cannot be deprived of his commission by the principal's refusing to accept the loan which the negotiations of the former have resulted in securing.

The same court, in the case of The Markland Mining & Manufacturing Company vs. Kimmel et al., on the 18th inst., held that any one of several persons named as sureties in the body of a written instrument may successfully defend on the ground that when he signed the instrument and delivered it to the principal makers it was on the agreement and condition that he should not be liable as such surety, and that the instrument should not be delivered to the payee or obligee until the others so named should also sign as sureties. The fact that the instrument is not executed by all those named in it as obligors is sufficient to put the payee or obligee on inquiry and charge him with notice of the condition. The court added that the same rule which protects a surety will protect guarantors, and that if a guaranty be made for several persons composing a firm, or for a firm composed of several named persons, the guarantor will not be liable for the default of or for credit given to a less number of the persons so named or a firm of the same name composed of a less number of such persons.

A telegraph company cannot, by the use of blanks containing a contract that the company will not be liable for mistakes or delays in sending an unrepeated message, defeat the object of a statute giving damages for failure to transmit, in the opinion of the Supreme Court of Indiana in the case of the Western Union Telegraph Company vs. Adams, decided on the 19th inst.

The assignee of a chose in action which is not assignable under the law of the state where the cause of action arose under the Act of Congress of 1875, cannot sue in the federal courts by reason of his citizenship, according to the opinion of the United States Circuit Court for the Eastern District of Missouri, in the case of the Northern Insurance Company vs. The St. Louis & San Francisco Railway Company, decided March 26, 1883.

In the case of Albright vs. Teas, decided January 22, the Supreme Court of the United States held that an action to recover royalties alleged to be due under a license from plaintiff to defendant to manufacture goods under a patent owned by plaintiff, and in which the defendant claimed that a portion of the goods manufactured were made under other patents for which he also had a license, was not a controversy under the patent laws of the United States depriving a state court of jurisdiction.

BUSINESS NOTES.

The Mexican Transatlantic Steamship Company has been organized and incorporated at the City of Mexico. The Zacatecas Colonization Company have been granted public lands in the central states of Zacatecas, Aguas Calientes, Durango, and San Luis Potosi (of which cities by like names are the capitals respectively), on condition that they bring immigrants from Europe to Mexico by the steamships of the Mexican Transatlantic line—when it begins traffic.

The total number of failures in the United Kingdom and Ireland reported to *Kemp's Mercantile Gazette* during the week ended April 7 was 235, against 247 in the corresponding week in 1882 and 276 in the like week in 1881. Of these England and Wales had 211, against 226 and 261 respectively in the weeks specified in 1882 and 1881. Scotland had 22, against 16 and 15, and Ireland 2, against 5 in the same week in 1882 and none in the corresponding week in 1881.

The following national banks have been organized: The First National Bank of Silverton, Col.; capital $50,000; M. D. Thatcher president, John H. Werkheiser cashier. The Planters' National Bank of Henderson, Ky.; capital $60,000; Montgomery Merritt president, David Banks, Jr., cashier. The Xenia (Ohio) National Bank; capital $120,000; Andrew H. Baughman president, John W. Nichols cashier. The First National Bank of Morris, Minn.; capital $50,000; Robert C. Moore president, Frederick B. Kenna cashier. The Bank of Elizabethtown, Ky., has been incorporated, with an authorized capital of $50,000, of which $10,000 has been paid in. The Home Bank of New York city has been organized, with a paid in capital of $125,000; Edward Stephenson is president and Howard L. Bain cashier. The National Granite State Bank of Exeter, N. H., has elected Charles A. Merrill president in place of B. L. Merrill. The First National Bank of Marion, Ia., has elected L. B. Stephens president in place of R. D. Stephens.

A foreign meat-supply association at Sydney, Australia, has been in communication with the government officials of India to learn the average weekly consumption of meat, with a view to the erection of storage depots at Calcutta, Bombay and Madras, and exporting dressed meat for the consumption of the residents of those cities and elsewhere in India. It is stated that the British garrison alone consumes, at an approximate estimate, some 7,000,000 pounds of mutton and 14,000,000 pounds of beef annually.

A member of the leather trade in New York recently told a reporter that the reason why so many failures had taken place of late in the "swamp" is primarily because of bad business. This unsatisfactory situation was, in turn, explained as due to the price of untanned hides and finished leather being so near together. This is said to be on account of the erection of many new tanneries of late years, and the consequent competition and low prices. Many firms have been weakened by this strain, and are still struggling. Sole leather costs more than formerly, and it is in this line that New York is specially distinguished in the leather business. This is in part due to the growing scarcity of bark.

The committee appointed by the representatives of the various electric light, telegraph, telephone, fire and burglar alarm companies in New York, on Friday of last week, to consider and decide upon some feasible plan for placing the electric wires underground, held a meeting on Wednesday. Subcommittees were appointed to look into the various phases of the project in hand. It was reported that in all probability the bill now before the legislature at Albany, which compels the placing of all electric wires in New York underground, will not be passed. This, it was said, is due to the representations of well-informed parties to members of the legislature that such action would be premature in view of the numerous obstacles to successfully burying the wires. The point was made that the companies are willing to go to any reasonable expense to place the wires underground, but claim the right of obtaining an efficient and economical method of so doing.

The Boston *Popular Science News* announces the discovery in Oregon of nickel ore. It is composed of a silicate of nickel and magnesia, is very valuable, and hitherto has only been known to exist in New Caledonia. It is from this double silicate from the mines in New Caledonia that most of the nickel used in the arts has been obtained. The New Jersey and other nickel mines in this country contain sulphides, difficult and expensive to work. The *News* adds that these nickel (sulphide) ores are in the hands of a monopoly, it believes, "who work them by a secret process." The Oregon deposit, if extensive and easily worked, is considered by the journal named more valuable than an ordinary gold mine. Nickel, so long neglected, "owing to its apparent uselessness," is now of first importance in the arts. It is the only one of the cheaper metals which resists oxydation with great pertinacity, and is not too heavy for carriage. Its use for coinage bids fair to greatly increase.

Since January 1 last, says a dispatch from Portland, Oregon, the two lines of steamships between that point and San Francisco have conveyed 19,800 people from the Golden Gate into Oregon and Washington Territory. During the thirty days ending April 26 nineteen steamers, averaging 1,500 tons of freight each, have entered Columbia river. Eleven carried passengers, averaging 530 each. Of the total immigration by ocean about 50 per cent. seek homes on Puget Sound, while the remainder scatter to the grain districts east of the Cascade mountains. The rapidly growing city of New Tacoma, on Puget's Sound, surrounded by valuable deposits of coal and iron and vast forests of valuable timber, has a capacity for sawing 250,000 feet of lumber per day in its two mills, out of the twenty-two mills on the Sound, with an aggregate daily capacity of 1,131,000 feet. The New Tacoma *Ledger*, in speaking of this, expresses the belief that "Tacoma has made for herself a reputation in the lumber trade which will increase until the Saginaw lumber country will be small in comparison."

The effect of the bounty conceded to the French mercantile marine engaged in foreign trade (in 1880), is pointed out in *L'Economiste Français* in the following record of vessels in the years named:

	Sailers—		Steamers—	
	No.	Tonnage	No.	Tonnage.
1879	831	327,001	81	120,507
1880	757	927,168	95	131,392
1881	693	270,786	119	158,019

The decline thus shown in sailing tonnage amounted in two years to 57,115; the gain in steam tonnage to 37,115 tons. The Glasgow *Herald* thinks that 1882 must have shown better the effects of the bounty stimulus, as time would naturally be required for that purpose. The estimated tonnage constructed in France in 1882 is given at 6,585 of sailers and 156,687 tons of steamers. From the totals, 7,500 tons each are deducted to allow for losses. The total French foreign mercantile tonnage at the close of 1882 thus becomes 269,871 of sailers, and 314,716 of steamers, or a loss of 58,030 tons of sailers as against the total at the close of 1879, and a gain of 186,699 tons of steamers.

An exchange, in discussing English and American railways, finds that the percentage of earnings to capital in the United Kingdom and the United States has a different meaning, for the reason that railroads in Great Britain "are not mortgaged so heavily" as those in this country. The average net earnings of the English roads in 1880 were 4.72 per cent. on the total capital, while in that year in the United States the average was 4.19 per cent. and the dividends on the former were 4.72 per cent., against an average of 4.50 per cent. for the roads of this country. That is to say, the railroad capital of the United States is nearly equally divided between mortgages, bond, and share capital, "the former paying an average of about 6 per cent., and the latter about 3 per cent." The English roads report an average cost of about $196,500 per mile, and roads here a capital averaging about $60,500 per mile. The average working expenses of the English roads are less than the American, the proportion of expenses to receipts being: British, 51.6 per cent., and American, 60 per cent. The average gross income per mile in 1880 was about $17,000 on the British lines, and on the American lines about $5,500.

The increase of the trade in foreign green fruits at the port of New York in 1882, is reported in the *Commercial Bulletin* to have amounted to $1,147,638 in excess of the value of that imported in 1881, and the excess of duty paid was $189,548. The receipts of foreign oranges has not increased, but the domestic supply, principally from Florida, was heavy enough to make the total disposed of at New York considerably in excess of 1881. It is estimated that 200,000 boxes of Florida oranges reached New York in 1882, and 300,000 from the same source were disposed of in the south. Orange culture in Florida is being rapidly extended as is the growing of pineapples. About 250,000 Florida pineapples came to New York last season. The importation of bananas here has doubled. The West India fruit season is said to have disappointed importers. The banana trade resulted in much loss, as did that in West India oranges. The total gain in number of oranges and lemons imported in 1882 over 1881, was 18,049,570 of the former and 63,568,890 lemons. There were 108,797 barrels and 10,667 half barrels of grapes imported, a gain of 61,797 barrels and 667 half barrels over 1881. The loss on these was 25 per cent. The imports of pineapples consisted of thirty cargoes by sailing vessels and 15,033 barrels by steamers, an increase of 1,062 barrels and 499,301 pineapples. The loss on these was 20 per cent. There were 15,041,507 cocoanuts imported, 4,662,678 more than in 1881, of which 8 per cent. spoiled in transit.

A correspondent of the *World* has furnished that journal with a brief account of the Toluca exhibition, which opened on the 2d inst. A trainload of distinguished guests left the City of Mexico on that day via the Mexican National line, and arrived at Toluca in three hours and a half. Then followed a formal reception from the Toluca authorities. A visit to the exhibition was next in order, and in the afternoon a banquet was indulged in, the party returning to the capital at 6 p. m. The exhibition building is 600 feet long and 120 feet wide, and was tastefully decorated. It is lighted by 600 jets, and is in "telegraphic and telephonic communication with the outer world." Among the noteworthy exhibits are mentioned some white and colored calicoes from Almolya, in the state of Mexico; valuable woods and minerals, fringed silk and cotton scarfs from Tenancingo, in the same state, and salt, glass and other products from Texcoco, also, in the state of Mexico. The federal district is represented by the manufactories of San Ildefonso and the Aguila, which have sent their finest cloths and cachemires, and by the national manufactory of arms, which exhibits some fine specimens of fire-arms. The most remarkable things in the exhibition are the woods and minerals. There are also surgical instruments, cereals, wines, liquors and many other articles of native manufacture or growth, and some remarkable paintings by Mexican artists. The correspondent makes no mention of the display of silver and gold ores, in which Mexico is so rich.

INDUSTRIAL INDEPENDENCE IN THE UNITED STATES.

In the current number of the *Princeton Review* Mr. David A. Wells undertakes to point out what would be the effect of a sudden and total repeal of the iron tariff, and in the following words: "The present production of pig iron in the United States is nearly 5,000,000 of tons (4,641,000 tons in 1881), and in Great Britain (our chief competitor in supplying the commerce of the word) a little more than 8,000,000 of tons (8,377,000 in 1881). The immediate effect of a removal of our tariff taxes on iron and steel imports would be a very heavy demand upon iron mines and iron works of Great Britain for a large additional supply. (The American market at present absorbs about 30 per cent. of the English, Belgian and German exports of iron; and of all the iron-producing countries of Europe the net export of none, with the exception of Great Britain, is very considerable. The production of pig iron for the United Kingdom is reported by the 'British Iron Trade Association,' for the half-year ending June 30, 1882, at 4,241,245 tons, and the consumption for the same time at 4,339,392, which was 496,271 tons in excess of the consumption for the corresponding period of 1881. The stock of pig iron on hand in Great Britain on June 30, 1882, was also reported as nearly 100,000 tons less than on December 30, 1881). If we could only maintain our product where it is (which we probably could in virtue of natural protection) without increasing it, and call upon Great Britain to supply the increase which we should need, year in and year out, over and above our present consumption—a consumption which prices made relatively, if not absolutely, cheaper would inevitably increase—it would be impossible for the iron mines and iron works of Great Britain to respond to such a demand without instantly occasioning an effect; first, upon the prices of British iron in the state of pig, bar and rail; second, upon the wages of those who work the British mines, furnaces and rolling-mills; and third, upon the demand of Great Britain on this country for agricultural products, inasmuch as the iron-workers of Great Britain are even now as largely fed from the products of the prairies of the west as are the iron-miners and workers of the United States; and in the case of Pennsylvania to an even greater extent, as the capacity of this latter state to feed her own working people is much greater than the capacity of the iron districts of Great Britain in a like respect. Then in place of an artificial protection—uncertain in its bearing and effect—such as it is claimed that the laborers in the iron mines and iron works of this country now enjoy through our tariff, a natural protection would be established for them through the augmentation of the wages or earnings of their fellow laborers abroad, without decreasing their own; for it would be obviously impossible to diminish the wages which the American iron miners and workers now receive below the level of common labor outside of the works in which they are employed—which wages, as before shown, average only $1.25 per day, or less than the average wages which the farmers of the west pay the labor which successfully competes through its products with the poorest-paid labor of Europe and the world. Furthermore, when this additional demand had thus raised the prices of iron in Great Britain and increased the wages or earnings of the English operatives, the cost of iron to English consumers would be much greater, and the relative advantages which the persons who use iron in Great Britain—the builders of machinery, steamships, etc.—now enjoy would be done away.

"The use of iron in this country would greatly and rapidly increase; we should at once realize and enjoy the enormous natural advantages which we possess, growing out of the circumstance that our iron and coal mines are much more easily worked and at a cost of much less labor, measured by day's or hour's work, than the English mines can possibly be, and through the speedy attainment of larger markets we should for the first time turn to full practical account our acknowledged skill in using iron and converting it into machinery, hardware, agricultural tools and implements, and a vast variety of other metal products which the world

demands, and in which supply we yet have, as a nation, so very little share. Then would follow a transfer of the control of the iron markets of the world from Great Britain to the United States; and the transfer of the control in the working of this imperial metal implies supremacy in the world's commerce, and an industrial aggrandizement of the nation that the most enthusiastic of American orators have as yet scarcely dreamed of. And furthermore, if in the readjustment of duties, as proposed, any laborers engaged in the primary production of iron and steel should temporarily find themselves displaced from employment, and should prefer a continuance of the same kind of work, the ranks of those who are the users of iron and steel as raw materials will be readily opened to receive them, inasmuch as the number of the latter, already far in excess of the former, will not only all be wanted, but will also be largely increased as soon as a full and unobstructed supply of the raw material of their industry is assured to them.

"Is the picture thus presented overdrawn? The majority, not yet sufficiently educated to appreciate our capacity and readiness as a nation for industrial independence, and the strength and development which will inevitably attend and follow the emancipation of our industries from taxes and obstructions, will doubtless answer in the affirmative. But be this as it may, those who indulge in such forecastings of our possible industrial future, to be attained through a revision of our national fiscal policy, are surely not justly liable to the accusation of being the representatives of foreign interests, although they may be to that of being enthusiasts."

THE SCARCITY OF GOLD—A MANCHESTER VIEW.

At a recent meeting of the Manchester Statistical Society, Mr. R. Montgomery read a paper on "The Scarcity of Gold and the Remedy." His conclusion was that there was no dearth of gold for the present wants of the world. There were, he pointed out, a few signs of diminution in the produce of the mines, and the industrial arts were claiming a much greater share, but either out of the new productions or the large existing monetary stock any probable demands for currency could be met. His conclusion depended on two assumptions—that the present rate of supply continued and that no great change occurred in the currency systems of the world to increase the demand for gold. The produce of mines might fall off or the pressure for gold might become severe, and therefore it was safe and wise to be provident in the use of gold. In view of a possible scarcity, two remedies, or, rather, prophylactics, merited attention. The first was the use of silver instead of gold. Silver might often serve the purpose of currency as well as the dearer metal, and might be used with advantage instead of it. By stopping the coinage of small pieces in gold, and by calling them in when this was possible, an economy in the use of gold might safely be effected. In England, from 1872 to 1882, we coined in round numbers £25,000,000 of sovereigns and £8,000,000 of half sovereigns, and probably £15,000,000 of half sovereigns were now in circulation. These small gold coins were intended for domestic and not for international trade, and they rarely traveled beyond the limits of the country which issued them. They were soon worn and easily lost. Even coins of the size of our own half sovereign rapidly lost weight, and most of them were very light. The smallest pieces might, in any event, conveniently be replaced by silver, and if the supplies of gold ran short silver coin might be issued to replace the rest of the gold pieces of ten francs, ten marcs and ten shillings. Further, he had no objection on principle to raise to £4 the limit by which a payment in silver was now restricted to £2, and there might be a small advantage in the change. The second remedy was the use of notes in place of gold. If silver might often be used instead of gold, sometimes an economy of gold might also be judiciously effected by a freer use of notes. Small notes were a popular and therefore a convenient form of currency in the countries which used them. It was fair to suppose that we should find small notes as handy a currency in this country as they were on the continent or in Scotland, while for the purpose of remittance they would be more convenient than gold, and would save the trouble and expense of postal orders. It used to be said that they were specially liable to be forged, but recent statistics did not support this contention, and it was now seldom urged. In England the forger's skill appeared to be spent in other objects, since there were 745 forgeries of £5 notes in 1820, but only 27 in 1874. Small notes of £1 and £2 each would be inexpensive substitutes for gold if coin or bullion were held for the whole emission, just as in the United states certificates were issued on the deposit of gold, saving wear and cost of transit. They would, however, not be worth contending for, nor would they relieve the scarcity of gold unless a fair proportion was issued in securities. Professor Jevons had estimated that by their issue we could dispense with £30,000,000 in gold coins, and Mr. W. Fowler thought that as at least £30,000,000 of notes would always be in circulation, £25,000,000 might safely be issued upon securities and the rest upon gold. The late governor of the Bank of England had expressed his opinion that the amount of small notes might approach £100,000,000. Of course they would only gradually find their way into circulation, but when the convenience of them became apparent they would come to be regarded as necessities of daily life, and take the place of gold in common use. They could be made and printed for ½d. each. Eight millions of notes would support a circulation of £50,000,000 for a year, and their manufacture would cost £16,000. The loss by wear on £50,000,000 of gold coins was at least as great, without allowing for the expenses of mintage.

MEXICO AND THE MEXICANS.

The following is taken from the Boston *Herald:* The northern states of the Mexican republic are very thinly populated. Enormous tracts are owned by single families, many of these properties being as large as the great English ducal estates. Other vast tracts are given over to the roving and savage Indians of the north, who make their homes in the mountain fastnesses. In a word, northern Mexico is quite as sparsely populated as was Texas when Americans began to settle in the then Mexican state. First came, in Texas, American colonization, then independence, and, finally, annexation to the United States. That history may repeat itself in northern Mexico is the fear of the press of that section. "We see," says the Monterey *Revista*, "that the frontier lands are being sold to American companies, that the Yankee monopoly is each day becoming more absolute among us. * * * In fact, the northern frontier, being unpopulated, and the land having passed into the hands of northern speculators, it is but natural that they should promote, on their own responsibility, an exclusively American colonization of their immense properties; each estate will be converted, with the celerity characteristic of Yankee companies, into an American town; finally these towns will become cities, which will seek to become united, and will end by demanding and obtaining annexation, to the country whence their people have come, whose language they speak, whose religion they profess, and whose habits they surely will not have forgotten." To avoid this danger, the *Revista* calls upon the federal government to set about the colonization of northern Mexico with Europeans "who may assimilate with our people, and who may, in a short time, so well love their adopted country as to be willing to defend it against the foreigner." The *Monitor* of the City of Mexico takes issue with the *Revista*, and advocates the colonization of the central states, whence civilization may gradually spread to the extremities of the republic. The *Monitor* argues that the imported colonists, now daily arriving in the country, are strangers to Mexico, to its language and to its customs, and that it is necessary to make these people Mexicans through close contact with the large communities of the centre of the republic before undertaking the work of colonizing the distant north. Evidently the anxious patriot who writes at Monterey fears that, long before the central states have assimilated and Mexicanized the colonists now coming and to come, the Americans will have entered upon complete possession of the land. This patriotic and not wholly uncommendable jealousy of American preponderance might be set at rest by the incorporation, in a treaty of amity such as is now greatly needed, of a clause by which the powerful republic of the north shall solemnly guarantee the inviolability of Mexican soil. We have territory enough, and we can afford to be generous to our weaker neighbor, whose jealous patriotism indicates the existence of a public spirit and virtue which we, as citizens of a free and proud nation, may well rejoice to see exhibited.

THE BRITISH IRON TRADE.

The *Statist* of April 14 says: It is noteworthy that all through the dullness which has been shown lately there has been an almost entire absence of speculation, though prices have receded to so low a point. Some attempt to curtail production has been made, but it has not been generally agreed upon, except just recently in the Cleveland district, and makers, as the statistics show, seem content to go on producing, under the impression that better times will shortly come. The hopes entertained early in the year that the revision of the American tariff would give a stimulus to trade are doomed to disappointment, unless higher prices are to be the case in the United States, and of this there is little probability yet awhile, while we must wait for three months yet before we reap any benefit from the reduction in the tariff. Manufacturers continue to complain that, to secure the same gain as a year ago, they have to turn out larger quantities, and that profits are cut down to a minimum. The chief out-turn has been in ship-plates, the production of which last year formed just one-third of the total iron manufactures of this country. Any falling off, then, in orders for new vessels would have a severe effect on the manufactured-iron trade. To the present as fast as ships have been built fresh orders have been received; but there are indications that the building has for a time reached its maximum; the tonnage of new vessels built, as we recently showed, has been enormous during the last two or three years, and the rate of construction cannot be expected to go on increasing indefinitely. Unless, therefore, some outside demand arises the prospects of the iron trade do not seem very brilliant, and we may have a continuance of the present hand-to-mouth trade, which, though sound, is not the activity which producers like to see.

THE MONETARY CIRCULATION OF SWITZERLAND.

The following information concerning the monetary circulation of Switzerland appeared in a recent number of the Paris *Bourse:* The national coinage consists only of silver and minor coin, but preparations are made to coin in the course of 1883 a sum of 5,000,000 francs in twenty-franc pieces. This will be the first Swiss gold money issued, a former experiment not having proved successful. The coinage of other money was as follows:

	F ancs.
Five-franc pieces	10,478,000
Fractional currency	18,000,000
Nickel and bronze	6,793,102
Total	35,271,102

Of the current silver money 2,500,000 were coined before the year 1865, when Switzerland joined the Latin Union; the remaining 8,000,000 were issued in 1874, and form in fact the total out of a sum of 28,000,000 francs allowed to that country in five-franc pieces. As will be noticeable, a liquidation of the Latin Union will find Switzerland better prepared than any other of the participating nations; it is supposed that even not more than 8,000,000 in five-franc pieces are still in circulation. The total stock of gold is supposed to be 70,000,000, and silver 40,000,000, principally Italian and French pieces, so that the circulation for about 3,000,000 inhabitants would be as follows:

	Francs per head.
In gold	23.00
In silver	13.30
In fractional currency	6.00
In billon	2.40

MANUFACTURE OF COCOANUT FIBRE.

The following is taken from *The Colonies and India:* "Within the last twenty years a vast extension of the economic uses to which this valuable fibre is put has taken place. The term "coir," usually applied to this material, is the Anglicised form of the South Indian "kayaru," cord or twine, and is not applied in India to the raw fibre, which is called in the Tamil language "savuri." The fibrous husk or rind of the cocoanut is easily stripped from the nut while yet green by striking it on the point of an iron spike, and is then steeped in salt or brackish water, where it lies for several months until the softer portions of the husk rot away, and the strong fibre alone remains. This is taken out, beaten with a stick to separate and clean the fibre, and twisted with a simple rope-making machine into the coir yarn; and this, again, is twisted with the required number of strands into rope, or woven into matting, while the stiffer fibres are made into brushes and other articles of domestic utility. The fibre is pressed for shipping into bales weighing 200 pounds each. The attempt has been made to prepare the fibre from the dried husk in England, but without success.

Much of the coir fibre used in England is brought from Ceylon, but a large and increasing quantity is now exported from Bombay and the western coast of India. The supply is not inexhaustible; but as prices rise cultivation is encouraged, and as the growth of this palm is along the seacoast, where other crops cannot be grown, the trade is a profitable one.

Factories for the weaving of coir matting have been opened by English and American firms at Allepy, Quilon, Colachel, Cochin, etc., and turn out a considerable quantity of goods. Spinning is not attempted here, being more cheaply done by hand at the place where the fibre is produced. Along the coasts of the backwaters and canals many people may now be seen busily engaged in scraping and cleaning the fibre and twisting it into yarn. In the factories the yarn is first sorted to its various shades and qualities. The warp is made by boys running backward and forward, then it is flattened and smoothed for weaving by being run through heavy rollers. The weaving is laborious work, performed by men, who earn two or three rupees a week at it. The web is again rolled to give it some finish, wound securely in a roll, and marked.

Large profits have been made in this manufacture in India. But it can now be carried on so much better in England, with the machinery and appliances available there, that large quantities of the yarn are exported. One firm in Lancashire has introduced steam loom weaving of this material. The various shades of fibre—cream-colored, reddish brown, and blackish—which vary greatly according to care and skill in preparation, are first carefully separated, and cocoanut matting is now made of fine quality, with pretty shades of color and in pleasing patterns, so as to be available for higher uses than the very coarse makes, and the material is most durable. The yarn is also plaited by machinery into cinnet or belting.

Cables made of coir bear exposure to salt water better than anything else, the tannin which it contains preventing the fibre from rotting; they are exceedingly light and buoyant, as well as elastic. Coir cordage in Dr. Wight's experiments broke at 224 pounds weight. Even the refuse and broken fibre can be turned to account for stuffing mattresses, and is used in horticulture, etc., as no insect will touch it.

The exports from Travancore of this material form a large proportion of the trade of the district, and amounted in 1879-80 to nearly 150,000 cwt., valued at 13¾ lacs of rupees—say £137,290—and paying to the government a duty of 68,000 rupees. Of the cocoanuts themselves, nearly 9,000,000, valued at 265,400 rupees, and paying customs duty, 13,000 rupees, were sent away. Other products of this palm exported, as oil and copra or dried kernel, were valued, the former at 322,100 rupees, and the latter at no less than 26½ lacs of rupees, making a total value of the export of products of the cocoanut palm from Travancore alone of 46¼ lacs of rupees—nearly £500,000. Some thousands of tons are also exported from Cochin.

Cocoanut fibre is so durable, useful and economical a material that a great future is assured for the industry; and, as prices rise, the natives will pay increasing attention to the collection of the whole amount produced and to its careful preparation. Perhaps when, through increasing demand, the fibre becomes still more expensive, it may be found possible to prepare it of greatly improved quality and appearance by steaming or boiling, so as to avoid the pollution of ponds and backwaters by the decomposing pulp of the husk, and the consequent blackening of the fibre so often observed. The textile ingenuity of the present age of invention may perhaps devise some additional uses for this fibre; hats and bonnets made of this material, it is said, attracted much attention at the Great Exhibition in London.

THE CENSUS OF INDIA.

The work of tabulating the first general census ever taken in India is about completed. In an area of 1,372,583 square miles, or a little over one-third of that of the United States, there is a population of 253,891,821, or over five times the population of the United States. There are nearly as many dwelling-places in India as people in this country. The males exceed the females by about 6,000,000. Much trouble was experienced in getting the natives to answer questions concerning their condition, and the military authority was in some cases called in, but out of a population of over 228,000,000 there were found to be 20,938,626 confessed widows, the percentage to the Hindu population being 19.71 and to the Mohammedan religion 12.93. The percentage of widows in England is 1.22 and in Italy 2.71. The reason of this abundant crop in India is the law that widows cannot marry again. Of this vast horde of people but 13,000,000 can read and write, and but 4,900,000 are under instruction. The doctrine of exclusive salvation, with a dubious probationary provision for the heathen, stands in pretty bold relief in the following table giving the religious status of India:

Hindus	89,937,450
Mohammedans	50,121,585
Nature-worshipers	6,126,511
Buddhists	3,418,884
Christians	1,862,634

Of the Christians over one-half are Catholics. There are beside these several million of minor divisions of oriental religious beliefs.

FINANCIAL.

THE LOAN AND INVESTMENT MARKETS.

The material for a bull market seems to grow less and less with the progress of time, and even those who have been arguing that prices ought to rise say now that no improvement can be looked for before we know something about the winter-wheat crop we are to have, which cannot be before June at the earliest. Between this and then there is time for considerable fluctuation in the market. So far as the past week is concerned there is not much to say, except that business has been as dull as ever, and prices have been weakening. It has been hard times in Wall street for the brokers for many months, and just at present it does not look as if they would be better. The extraordinary drop in the price of iron made quite a sensation in the street, which was, within the past year, been educated to watch the iron market with considerable interest. The leading operators have always done so; but it is only within a short time that the general run of Wall-street men have learned to pay attention to this barometer of industry. Mr. Gould's well-known saying, that it is no time to buy stocks when the price of iron is falling, has been frequently quoted during the week; and it would seem to have been acted upon. Buyers have been few, and sellers many. In the bond market, some classes of bonds have shown a rising tendency, which may be taken as an indication that a limited demand for investment still continues. The cliques and large operators who are loaded up with unsalable stocks are struggling manfully to maintain prices, but it is terribly up-hill work. The most they seem able to do is to keep the market dull, and avert a severe break. The time is now approaching when a great many roads have large interest payments to meet, and if one or two of them should prove unable to do so, there would be a decidedly unpleasant time on the Exchange. It seems useless to expect the outside public to buy. There was a little nibbling at stocks by general buyers during the temporary upward movement of the market two or three weeks ago, but, so far as can be seen, it has ceased with the decline which followed. All business in stocks now is professional, and it has resolved itself into a struggle of the operators who are long of stocks to maintain prices or sell without breaking the market under them, against he operators who are working on the short side and looking for profits from an expected fall.

The street is greatly amusing itself over the latest improvement in corporate borrowing, viz., collateral trust loans. They are put down among the modern improvements which no impecunious corporation should be without. As a great many corporations in these days are impecunious, collateral trust loans have grown to be quite a feature in the financial world. The great advantage of this loan consists in the fact that when every other means for borrowing has been exhausted, when the last piece of real property has been pledged, and when the corporation has gone to the utmost limit its charter will permit in borrowing, a collateral trust loan can still be raised by the exercise of a proper degree of impudence combined with adroit management. These qualities are never wanting among our astute railroad managers, who can give an air of value to mere printed paper quite bewildering to those who see the trick done for the first time. Like all great discoveries the collateral trust loan is a very simple affair. The modus operandi of its creation is as follows: Suppose a company to be deeply in debt, not earning its fixed charges perhaps, and with its mortgage bonds selling a shocking distance below par. It wants more money, of course, and to put out more mortgage bonds is impossible. In its treasury there has been lying for years, possibly, a lot of waste paper which was once the stock of branch roads long before bought up and incorporated with the main line, for which bonds of the purchasing company were issued. If the main system has been largely made up by the absorption of smaller properties, as is the case with some of our large systems of roads, whole reams of such "securities" may be lying in its treasury. In addition, it may organize separate companies to build branches and extensions, issuing stock and bonds. The latter it guarantees and sells, by which the money is raised to pay for the building of the lines; the stock it places in its treasury. Now comes the time when a collateral trust loan is to be raised. Therewith the company issues a report, showing, to the great astonishment of the average investor, that it owns so many millions of unincumbered "assets," said assets being the stocks aforesaid. The directors then meet and authorize the executive committee to raise a loan on the unincumbered assets in the treasury, which are to be deposited as collateral. The machinery is now ready. What remains is to find some one willing to lend money on such security. This is a matter depending mainly on the skill of the managers in persuading people that the collateral is valuable, and more than enough to secure the loan. It may be that bonds so secured can be sold at 50 cents on the dollar in block, the purchaser—some financial house—being willing to take the risk, in the hope of being able to peddle them out to the public at a higher rate—possibly at 70 cents. Of course the original selling price must be kept a profound secret, or the game would be spoiled.

Mr. Gould's western journey was a second time postponed. It is supposed that the Hannibal & St. Joseph transaction, and some trouble about the Wabash collateral trust loan, was the cause. The latter was referred to last Saturday, and on the same day Mr. Gould took the unusual step of publishing a letter, signed by himself, showing the absolute security of the loan, since it was for $10,000,000 only, and was secured by the pledge of $18,000,000 of assets, besides the guarantee of the Iron Mountain company. What these $18,000,000 of assets consist of no one has been able to find out; but since the last report of the Wabash Company showed that about $10,000,000 of valuable stocks and bonds were lying in its treasury—which Wall street then learned for the first time, for no previous report had mentioned them—it is supposed that these securities make up part of the $18,000,000. The allegation that the whole loan has been taken by the Iron Mountain Company at 50 cents on the dollar has been denied, and it has been asserted that a Philadelphia house has taken it at 90. But neither the denial nor the assertion has been made by Mr. Gould, either in his letter or otherwise. A shrewd observer remarked that if these bonds had already been disposed of to a Philadelphia or any other financial house, then Mr. Gould had made a departure from all precedent in hastily coming to their defense in print. If the Philadelphia house had taken the bonds, they took them with all risks, and it was no affair of his what people said about them. The whole matter, however, is still involved in doubt. The general mortgage bonds of the Wabash, it may be mentioned, are selling at about 80, and the price of the stock has had quite a drop this week.

The hitch in the Hannibal & St. Joseph negotiation appears to have been caused by certain dissatisfied stockholders, who seem to have persuaded Mr. Sage to demand a better secured bond than the Chicago, Burlington & Quincy Company offered in payment for the stock. It was a 5 per cent. debenture bond, not mortgage; in fact, a sort of due-bill, or note; but the credit of the Chicago, Burlington & Quincy Company is first class, and the managers insisted that it was enough. Mr. Sage is a very large holder of Hannibal & St. Joseph common, he being one of the syndicate which took the stock off Mr. Duff's hands, and he signed the agreement to sell to the Chicago, Burlington & Quincy on the terms which Mr. Gould made with that company, in which, by the way, it appears that certain privileges for the Western Union were secured from it. The directors of the Hannibal who had been "left" were able to persuade Mr. Sage to retract his agreement to sell; and all too hastily they announced that the deal was "off," and that formal notice to that effect had been given to the Chicago, Burlington & Quincy. This, however, was not the truth; and it is asserted that a majority of the preferred and common stock has been transferred to that company. The dissatisfied minority, who had no interest in the affairs of the Western Union, are extremely chagrined, considering that Mr. Gould has sold them out to protect his own interests. They think the purchaser could have been made to give a higher price.

There has been no movement in the loan market, or in the market for foreign exchange, calling for special note. As the banks are steadily filling up, the movement of money being to this center, loanable funds have been obtainable in abundance through the week at an average rate of 5 per cent., the extreme rates being 3 and 6 per cent. In foreign exchange there has been dullness, but the posted rates were dropped half a point on Monday to $4.83 and $4.86. It was said that it was due to the new Baltimore & Ohio loan, recently negotiated in London. On Thursday the rates rose again to $4.83½ and $4.86½, but no special significance attached to either movement. The government bond market has also been very quiet. The following were the closing quotations yesterday:

	April 20, bid.	April 27, bid.	April 27, asked.
U. S. 5s extended (3½ p. c.)	103	102¾	—
U. S. 4½s 1891, registered	113¼	113¼	113⅜
U. S. coupon	113¼	113¼	113⅜
U. S. 4s 1907, registered	119⅝	119¾	119⅞
U. S. 4s 1907, coupon	119⅝	119¾	119⅞

The bank statement of Saturday showed an expansion in the loans of about $500,000, and an increase in the reserve of $913,625, which brought it above the 25 per cent. line to the amount of $624,275, which, however, is far below what the surplus reserve was at the same time last year. The following are the comparative totals of the statements of April 14 and April 21:

	April 14	April 21.	Differences.	
Loans	$310,222,600	$310,807,000	Inc.	$584,400
Specie	53,062,800	53,869,800	Inc.	807,000
Legal-tenders	17,685,100	18,423,500	Inc.	738,400
Deposits	284,149,000	286,676,100	Inc.	2,527,100
Circulation	16,496,800	16,496,300	Dec	500

The proportion of total reserve to liabilities is now 25.22 per cent., against 28.26 per cent. in the corresponding week of 1882.

By telegraph from Baltimore, Md.: The stock market improved very little the past week, but prices continued steady, and had a tendency to grow firmer. There were some dealings in Virginias; new 3s declined some, and were weak; 10-40s sold at 34, and were wanted at that figure.

By telegraph from New Orleans, La.: Commercial sterling advanced half point. Louisiana 7s dropped quarter point.

THE FOLLOWING WERE THE CLOSING QUOTATIONS FOR STOCKS ON THE DATES NAMED:

COMMERCIAL.

The dispatches to BRADSTREET'S this week from the principal business centers of the country do not reveal any particular change in the general trade situation. Dispatches from the principal western wheat states note a uniform improvement in wheat prospects during the month. This while the belief that winter wheat has received material injury in some states is confirmed. Wheat has changed very little in price in the last week. The more favorable outlook for the next crop has made a considerable decline in the foreign markets, but the American markets have been sustained by diminished receipts at the west, and by speculative holdings which were bought when the crop prospect was less favorable, and of which the holders cannot dispose without causing an important decline. Prices of corn have been maintained during the week, mainly on the view that, notwithstanding the large accumulation at Chicago, it will all be wanted. Provisions have shown an upward tendency, due to speculation and the diminishing receipts of hogs at the west. The reduction of $2 per ton in the price of foundry irons by the Thomas Iron Company on Saturday last, as foreshadowed by BRADSTREET'S, was followed by open sales of 6,000 tons at the lower prices. Previously, however, contracts for season delivery had been made in anticipation of the change for considerable quantities of iron. A result of the change will probably be to cause the blowing out of a number of smaller furnaces. Steel rails are firmer at $39 for ordinary lengths. Reports from various points indicate that quite a quantity have been sold during the week. Bar iron has been weaker and less in demand. The western iron-mill owners and their employés will meet once more on Thursday next to discuss puddlers' wages after June 1. This looks as if manufacturers had decided to concede a little. But there are no known reasons at present for believing that a strike will be averted, as both employers and employed are wide apart and firm. The week has witnessed a bear onslaught in petroleum. Several new wells have come in, been reported big, and have depressed prices of certificates, to the cost of many outsiders who had faith in an early advance in oil. Now that the decline has been caused it is learned that most, if not all, the new wells are only moderate producers, and prices have advanced. There are no special features in the anthracite coal market. Half-time at the mines will be observed next week and week after. The movement of coal is moderate only, and stocks are small. The general opening of inland navigation is expected to stimulate coal shipments. Ocean freights are nominal. Petroleum charters have been in fair request during the week, but at low rates, owing to the full supply of that class of tonnage. The demand for wool has been very light, and values have ruled weak and unsettled. There were 186 failures in the United States during the past week, 26 more than the preceding week, 81 more than the corresponding week of 1882, and 84 more than the same week of 1881.

BREADSTUFFS.

The prospect for crops in western Europe has been greatly improved in the last two weeks by more favorable weather. The *North British Agriculturist* of April 11, referring to the condition in Scotland, says that for ten days the weather had been all that could be desired, that seeding was progressing with unusual rapidity, "and the outlook for the crop splendid." In England also the weather has been much more favorable. In France up to the 12th of April the depression of prices, referred to last week as the result of the competition of American flour with the French in the British markets, continued, though the offers of home-grown wheat in France were less pressing. In Germany the weather was still cold and vegetation was backward, though crop prospects were not discouraging.

Until within a few days the London and Liverpool markets for breadstuffs were strong, as the result of the unfavorable crop reports from the United States, but for the last three days have been declining. On Thursday the decline was quite important, being 6d. per quarter on red winter and Chicago spring, and 1s. 6d. on California wheat.

The most potent influences now in the general breadstuffs markets of the world are the prospective supplies from America. This includes not only the prospect for the next crop in this country but to a considerable extent the surplus yet remaining from the crop of 1882. If we accept the estimate of the Department of Agriculture at 502,000,000 bushels, which was probably somewhat below the actual crop, and deduct first, consumption for food for a year for 55,000,000 of population at four bushels per capita, and 15,000,000 bushels for manufacturing purposes, say 235,000,000 bushels; second, seed for 10,000,000 acres, say 60,000,000 bushels; third, total exports to April 1st 118,155,455 bushels—it makes an aggregate of 413,155,455 bushels, which would leave 88,844,544 bushels yet available for export and consumption for three months before the new crop could be available. The exports in March were in wheat and flour equal to 6,158,652 bushels, against 6,292,343 bushels exported in March, 1882. Estimating the exports to continue for four months at the present rate it would take say 26,000,000 bushels, leaving 62,000,000 to 63,000,000 yet available for export and reserve. The estimate of only 4 bushels per capita for consumption in the United States is certainly the minimum, and in view of the fact that the consumption in England and France is pretty well established at not less than 5 bushels per capita, it is open to question. If the consumption in the United States is 4½ bushels per capita it would reduce the estimated surplus on August 1 to 36,000,000 bushels from the crop of 1882. If the next crop should nearly equal that of 1882, or be say 500,000,000 bushels, the exportable surplus out of it, with an increasing population and increased acreage to be planted, would not exceed 180,000,000 bushels. The total exportable surplus, therefore, of the two crops—1882 and 1883—available in the year from August 1—after deducting a reserve of say 40,000,000 bushels—would be 176,000,000 bushels. It is now believed that the principal importing countries of western Europe will require 25 per cent. more foreign wheat next year, as the result of their diminished supplies of home-grown wheat, and if an equal percentage of this was drawn from the United States as from other countries it would about absorb our present and prospective exportable surplus from the crop of 1882 and a prospective crop of 500,000,000 bushels in 1883. As to the prospects of a 560,000,000 bushel crop in 1883, as remarked last week, it is too early yet to estimate with any reasonable degree of certainty. The most that can be said is that the prospects of the winter-wheat crop have improved greatly in the last two weeks. California being further advanced, by reason of her climate, than any of the other states has a fair prospect for at least a full average crop. In all the winter-wheat states on the Atlantic side of the Rocky mountains the prospect has greatly improved in two weeks. In the furthest northwestern states and territories there will be an increased acreage of spring wheat, an instance in point being Dakota, where the crop of 12,000,000 bushels in 1882 was raised on 857,000 acres, and where the acreage for the present year is now estimated at 930,000 acres. The more southern of the northwestern spring-wheat states, however—notably Iowa—will have a diminished acreage. Minnesota will, it is estimated, have 7 per cent. less than last year in the southern half of the state.

The export of breadstuffs from the United States for the month of March shows an increase in wheat and a decrease in flour, as compared with the previous month. The shipments of wheat were 6,158,652 bushels, valued at $726,087, against 5,666,035 bushels in February and 6,292,343 bushels in March. The flour shipments amounted to 803,200 barrels, of the value of $4,728,043, against 902,633 barrels in February and 499,326 barrels in March. The largest increase of shipments in any kind of breadstuffs during the month of March over the corresponding time last year was in corn, which were 8,199,829 bushels, against 2,586,726 bushels for the corresponding period last year.

THE WHEAT CROP OUTLOOK BY TELEGRAPH.

The following regarding the cereal crop prospects were received yesterday:

From Springfield, Ill.: The condition of winter wheat has improved in nearly all the wheat counties since April 1.

From Louisville, Ky.: The wheat plant was undoubtedly injured during the winter. Estimates of the damage vary widely, with 20 per cent. as medium figure. Previous estimates that the present stand will permit a yield of 70 per cent. of last year's crop and nearly an average crop in comparison with other years, are not changed by recent developments. Fields which survived are making a fair appearance. Weather has been cool and rainy this week, at times nearing the freezing point, but no damage was done to grain. Farm work is about three weeks belated; the prolonged cold and wet preceding having retarded planting.

From St. Louis, Mo.: Low flat lands wheat shows injury, but can yet make very close to, if not fully an average crop on rolling land. Most wheat has recovered from early injury, and appears to be in better than average condition for a late season. Monday night's freeze did not hurt wheat in south Missouri. Oats are sown. Corn is planted, with fair weather. Corn-planting will be general through this section. Excepting the cold, the ground is in good condition.

From Burlington, Ia.: The prospects for crops in Iowa are excellent. Winter wheat is in fine condition, and preparations for other grain are progressing satisfactorily.

From Minneapolis, Minn.: The season is backward in the northwest, with a surplus of rain and snow. For the last few days the weather has been fine, and seeding has been progressing rapidly except on flat land in the Red River valley, where there is too much water. A few days of good weather will put the ground in condition. In central and southern Minnesota and Dakota a large acreage has already been sown, and, with continued good weather, wheat seeding will be completed in ten days. In Minnesota the area planted in wheat will not be much greater than last year, but there will be a large increase in corn, oats and barley. In Dakota the acreage in wheat will be increased from 30 to 50 per cent. There is no cause for apprehension of injury to crops from lateness of the seeding. If good weather continues, all the conditions are favorable to a large crop. The movement of wheat to market has been unusually light for some weeks. The entire receipts at Minneapolis for the week are 156,000 bushels. Farmers are busy with seeding. About 20 per cent. of the crop back for two weeks. Most of the flouring mills have been shut down, but several have just started up.

From Omaha, Neb.: Farmers have thus far experienced a very favorable spring and are still pushing their spring planting. Spring wheat is said to be doing well, although as yet but little advanced. Cold nights still prevail and crops are slow in coming along, but such weather is favorable to strong and healthy plants. Winter wheat in southern counties is reported in better condition than ever before, and the belt of country for such wheat has extended some way north. Seed corn is now being planted and the soil is said to be well watered. It is believed the past winter's heavy snows must greatly benefit the country.

From Topeka, Kan.: Wheat acreage 4 per cent. and condition 15 per cent. below April, 1882. There is 20 per cent. of the old crop on hand. Rye area increased 15 per cent.; condition good; the greater portion sown for pasture. Corn, increase in area 10 per cent.; 20 per cent. of old crop on hand.

AMERICAN WHEAT MARKETS.

The leading wheat markets during the past week have generally been speculatively firm, without much change in prices beyond the daily fluctuations caused by the imaginary or supposed damage to the winter-wheat crop, and from the belief that certain parties were about to manipulate the market with a view of advancing prices. This created a demand for spot wheat from capitalists for the purpose of selling future deliveries at higher prices, and thus secure a fair profit by carrying the cash wheat until the time of delivery. The demand for legitimate purposes has been limited, and but little activity has been manifest in the export line, though inland and ocean freights have been reduced. The prices of wheat ruling at the west and at the seaboard will not allow of shipments except by those who are anticipating an advance in the foreign markets while the wheat is in transit. The demand for milling purposes in this country has been unusually light, many of the mills being closed and waiting for a decline in wheat or an advance in flour.

The outlook for the coming crop has been somewhat improved since our last issue, and the general character of the crop reports favor a large yield of wheat, the indications being that the damage in some localities will be more than compensated by a superior condition in others. The increased acreage devoted to the culture of spring wheat is likely to be an important factor in the year's production.

The movement of wheat from farmers' hands has been light, but the movement toward the seaboard of wheat from St. Louis, Chicago, and especially from Toledo, has largely increased during the week. Interested parties are questioning what effect these shipments will have on prices when they reach tidewater. Undoubtedly a considerable portion of it will be sold for export at best prices obtainable, while the remainder will serve to replenish the stock in store for future shipping requirements.

The future course of the market is entirely dependent on the favorable or unfavorable reports in regard to the condition of the crops in this and other countries, and it would be unwise to predict what will take place while so much uncertainty exists.

The course of the wheat market during the past week is indicated by the following prices in the New York and Chicago markets, for May wheat, at the dates mentioned: New York, 2 p.m. Saturday last, $1.21⅞; Monday, $1.21¾; Tuesday, $1.21⅞; Wednesday, $1.21¼; Thursday, $1.21; Friday, $1.20¾. At Chicago, 1 p.m. Saturday, $1.11⅞; Monday, $1.12; Tuesday, $1.11⅞; Wednesday, $1.10¾; Thursday, $1.11½; Friday, $1.10¾.

The total receipts of wheat at Chicago, Milwaukee, Detroit, Toledo, Indianapolis, Peoria and St. Louis, for the week ending April 20, amounted to 393,078 bushels, against 422,360 the previous week, and the shipments 186,500 bushels, against 336,265 bushels the previous week.

The visible supply of wheat in the United States and Canada, April 21, as compared with the previous week, shows 506,786 bushels decrease.

CORN.

Though there has been but little change in the cash price of corn the past week, the market for future deliveries has been exceedingly sensitive on account of the large accumulated stock at Chicago and the question of its soundness, or, rather, of its keeping qualities. It is claimed to have been inspected with close discrimination on its arrival at Chicago, but as much of it was hard frozen when it arrived it seems quite uncertain as to how it may keep during the trying months of May and June. This distrust has prevented any advance in price that might otherwise have occurred. The export inquiry has been only moderate, and the shipments from the principal Atlantic ports for the week are less than one-half of the week previous. On the other hand, the receipts at the principal western receiving points have fallen off fully one-half from those of the preceding week. The consumption of corn for feeding western hogs at the present time is unquestionably large, pork being relatively higher than corn, which offers an inducement to farmers to feed corn freely. The supply of corn at the Atlantic ports is moderate, and a considerable amount of the corn now at Chicago will meet with a good consumptive, if not an export, demand when it shall have reached the seaboard.

It is not probable that the price of good, sound corn will rule very much lower, and it will be quite eight months before the receipts from another crop can affect the market.

The course of the corn market during the past week is indicated by the following prices of May corn in the New York and Chicago markets at the dates mentioned: New York 2 p.m. Saturday last, 67⅝c.; Monday, 67¾c.; Tuesday, 68c.; Wednesday, 67⅝c.; Thursday, 67⅝c.; Friday, 67½c. At Chicago, 1 p.m., Saturday, 55⅝c.; Monday, 55⅜c.; Tuesday, 55¼c.; Wednesday, 54⅞c.; Thursday, 55¾c.; Friday, 55⅜c.

The aggregate receipts of corn at the seven principal western receiving cities for the week ending April 20 amounted to 781,668 bushels, against 1,594,991 bushels the previous week, and the shipments from the same places 1,124,987 bushels, against 336,265 bushels the previous week.

The visible supply of corn in the United States and Canada, April 21, as compared with the previous week, shows a decrease of 447,986 bushels.

PROVISIONS.

The tendency of the provision markets during the past week has been upward, under the influence of a speculative demand. The inquiry for home consumption has been light, and for export only moderate. The advance in pork in the Chicago market from Monday to Thursday afternoon was about 75c. per barrel. During the same time lard improved about 12½c. per 100 pounds, the advance in pork being relatively the greatest, owing to its having been under sharper manipulation by Armour than was the case with lard under the control of Milwaukee parties.

The receipts of hogs at the principal western packing points continue very light, and reports from Missouri, Iowa and Kansas state that the number of hogs in farmers hands are less than has been supposed.

Provisions are in small supply, and the prospect of lower prices during the next two months does not now look encouraging.

The aggregate receipts of hogs at Chicago, Milwaukee, Cincinnati, St. Louis, Kansas City, Peoria, Indianapolis and Cleveland, for the week ending April 18, amounted to 125,612, against 102,945 the previous week, and 183,355 for the corresponding week last year.

The following shows the export of hog product

from the places mentioned for the week ending April 21, 1883:

	Pork, barrels.	*Bacon, pounds.*	*Lard, pounds*
New York	3,314	4,997,330	4,167,252
Boston	491	1,109,502	79,959
Portland	1,325	105,500	30,000
Montreal		...	
Phil delphia	..	1,717,000	10,000
Baltimore	29	104	392,115
New Orleans	..	....	....
Totals	5,159	7,990,430	4,679,326
Previous week	5,774	7,378,401	2,845,882

The total export of hog product from November 1, 1882, to April 21, 1883, as compared with the corresponding time in 1881–82, was as follows:

	1882–83, pounds.	*1881–82, pounds*
Pork	24,637,100	29,396,200
Bacon	239,237,933	247,305,084
Lard	123,843,729	139,978,799
Totals	387,784,062	416,761,083

THE PROVISIONS MARKETS BY TELEGRAPH.

From Cincinnati, Ohio: Volume of business fair, but without animation. Provisions, under increased consumptive demand, have advanced, with some speculative movement in short-rib sides.

From Chicago, Ill.: Provisions weak and lower; bulls are discouraged by the increasing receipts and improved quality of hogs. Demand from outside small, local dealers indifferent.

From Louisville, Ky.: The provisions market is quiet but stronger, with moderate local stocks.

From St. Louis, Mo.: Provisions are high and firm, but selling slowly. Cattle are inclining upward and active. Hogs downward, with large receipts and brisk sales.

From Des Moines, Iowa: The provisions market is quiet, and prices are weak.

From Lincoln, Neb.: There is very little being done in the provisions market.

From Topeka, Kans.: The provisions market remains the same. Cattle are weaker, but hogs have improved.

From Nashville, Tenn.: The provisions market is active, with strong prices.

From Memphis, Tenn.: Live stock receipts are light; prices on all grades are stronger. Meats and lard steady.

THE NEW YORK DRY GOODS MARKET.

The past week has shown no material change over the previous in respect to the volume of business done; if anything, there seems to be a slight increase. New York state and near-by trade has shown a decided though moderate improvement, which it is thought will continue, as we are likely now to have steady spring weather. There is a steady but moderate call for goods from the west and south. Business has not increased in these sections, but it is believed that it ought shortly to show some briskness, as stocks are light in the hands of interior jobbers, and the demand for goods must come.

THE DRY GOODS MARKETS BY TELEGRAPH.

From Portland, Me.: The dry goods trade is steadily but slowly improving. The spring trade is not up to expectation.

From Boston, Mass.: The dry goods trade continues quiet. Jobbers report that they are receiving some western orders, and that, judging from advices regarding the state of trade from their salesmen, they expect a better trade. The retail trade is good by reason of circumstances noted last week. Commission houses report a fair export trade in cottons. Woolen goods are very quiet.

From Providence, R. I.: The print-cloth market is very dull, the amount of sales being light; 64s are quoted at 3⅝c. less ½ of 1 per cent., and 56x60s at 3⅛c. There are about 130,000 pieces on hand. The cotton market is quiet and firm, the sales being reported moderate. Middling uplands are worth 10¾c., and middling gulfs 11c. There are about 15,000 bales on hand.

From Rochester, N. Y.: Jobbers in dry goods report an excellent trade, which increases each week. Collections are very fair, and no particular complaint is heard. The retail trade in this line was not so good during the past week, owing to a sudden change in the weather, which has been disagreeable.

From Philadelphia, Pa.: The package trade has ruled quiet, buyers operating only for nearest wants. Jobbers have had a fair business in most lines, but the unseasonable weather has prevented the activity generally expected during the past week.

From Pittsburgh, Pa.: There is a continuance of the activity in the dry goods jobbing trade noted last week. Collections are satisfactory.

From Cincinnati, Ohio: The dry goods market has shown more life. The country trade appears to be buying to secure benefit of present prices, which are claimed by sellers to be too low for profits.

From Cleveland, Ohio: The dry goods market continues exceptionally active, and Cleveland jobbers have had and are now experiencing as good a spring business as during any former year.

From Columbus, Ohio: Trade in dry goods still continues very fair, with but little change over last week.

From Toledo, Ohio: The dry goods trade is active.

From Dayton, Ohio: The dry goods trade is reported as improving.

From Indianapolis, Ind.: The dry goods trade is good and satisfactory.

From Chicago, Ill.: Dry goods are rather more active; the week's sales show a satisfactory average; cool weather interrupts sales of light dress goods. Millinery and furnishing goods fairly active. Collections good.

From Peoria, Ill.: In dry goods, sales are made principally on orders, which are full and cover all lines of goods. Prices are steady, with no perceptible change.

From Louisville, Ky.: The dry goods trade shows a well distributed demand for seasonable fabrics.

From St. Louis, Mo.: The dry goods market continues to show heavy sales at well sustained prices.

From Burlington, Iowa: The dry goods trade is steady, and though no special rush is noticed, it is very satisfactory. Collections fair to good. Weather fair and favorable.

From Davenport, Iowa: The dry goods trade rather dull.

From Detroit, Mich.: In dry goods jobbers report a very satisfactory business for week, and an increased volume over that of last week.

From Milwaukee, Wis.: In dry goods the past week has witnessed quite a change; the tendency of country merchants is to buy more freely, and mail orders have been very fair.

From Minneapolis, Minn.: The season of the dry goods trade is late, but for the last week has been active. There is a much larger stock, and 30 to 40 per cent. more trade in the old houses than last year. New houses report a good trade.

From Omaha, Neb.: Trade in dry goods is reported fair, but not increasing.

From Lincoln, Neb.: The dry goods trade partakes of the general inactivity.

From Topeka, Kan.: The dry goods trade is not as active as it was last week.

From Denver, Col.: The dry goods trade is still increasing. Dealers report an increased demand over any previous year.

From San Francisco, Cal. The dry goods trade is steadily increasing. A large business is opening up with the northwest, and orders are coming in freely.

From Baltimore, Md.: The jobbing trade in dry goods the past week was active and sales reached satisfactory proportions. A number of merchants are in town and have been laying in good stocks. Collections are reported fair.

From Richmond, Va.: The dry goods trade is quite active and improving.

From Norfolk, Va.: Dry goods jobbers are doing only a moderate business.

From Wilmington, N. C.: The dry goods trade is dull.

From Savannah, Ga.: The dry goods market shows a better feeling and is fairly active, with a fair demand for domestics.

From Macon, Ga.: The retail trade in summer dry goods is brisk. Jobbers report great activity.

From Selma, Ala.: Trade in dry goods continues fair.

From Memphis, Tenn.: In dry goods dealers report business as good for the season, but a falling off in volume is noted, as country merchants have purchased bulk of spring stock and are now only filling in.

From Halifax, N. S.: In dry goods the trade report no apparent change. There is a moderate amount of business being done. Collections are hardly fair.

COTTON.

The New York cotton market for the week past has been higher for spot middling uplands, the price having advanced to 10 5/16c. The sales for the week have been for export 5,830 bales, for consumption 2,188 bales, and for speculation 321 bales, making a total of 8,339, showing a marked increase over the sales of the preceding week, which footed up only 4,418 bales. The deliveries on contract amount to 1,900 bales.

Below will be found the closing quotations for prompt delivery uplands at New York Friday evening, as compared with last week and the corresponding week last year:

	This week.	*Last week.*	*Last year.*
Ordinary	7 ⅜c.	7 5-16c.	9 9-16c.
Strict ordinary	7 13-16	7¾	10⅛
Good ordinary	8⅜	8 9-16	10 15-16
Low middling	9 13-16	9¾	11 13-16
Middling	10 5-16	10¼	12¼
Good middling	10 11-16	10⅝	12⅝
Middling fair	11 7-16	11⅜	13⅜
Fair	12 3-16	12⅛	14⅛

The market for spot cotton closed firm, with holders asking higher prices.

The future market at New York has been higher, the price having advanced an average of 18 points for near months and 14 points for later months. The sales for the week foot up 519,500 bales, against 420,600 bales for the corresponding week last year.

The following table shows the closing quotations for futures at New York Friday evening, compared with last week and the corresponding week last year:

	This week.	*Last week.*	*Last year.*
April	10.37c.	10.16c.	12.27c.
May	10.37	10.19	12.27
June	10.53	10.35	12.39
July	10 65	10.49	12.53
August	10 76	10.60	12.67
September	10.48	10.34	12 28
October	10.15	10.02	11 68
November	10.06	9.92	11.48

The future market at New York closed firm.

The southern markets during the week past have been firm and quiet. Below will be found the sales for the week and the closing quotations for middling uplands at five leading ports as compared with last year's quotations:

	Week's sales.	*To-day.*	*Last year.*
Galveston	4,449	9⅞	12
New Orleans	23,000	9 13-16	12
Mobile	2,100	9¾	11⅞
Savannah	3,375	9¾	11¾
Charleston	1,700	10¼	12
Norfolk	3,148	10	11 13-16

The total receipts of cotton at the ports since September 1 are 5,594,772 bales, an increase of 1,195,587 bales over the receipts of last year for the same time. The total at each port since September 1 is as follows, compared with the total to the same date last year:

	This year.	*Last year.*
Galveston	781,095	409,976
New Orleans	1,572,819	1,146,136
Mobile	303,752	253,116
Savannah	787,629	704,159
Charleston	554,916	480,064
Wilmington	126,578	131,398
Norfolk	745,028	581,413
Baltimore	60,211	27,404
New York	148,018	162,834
Boston	162,174	201,921
Philadelphia	78,764	60,747

The receipts at the ports for the week were 59,126 bales, against 66,379 last week and 33,254 for the corresponding week last year.

The receipts at the twenty-four interior towns usually reported were 16,860 bales, against 17,841 bales last week and 12,038 bales for the corresponding week last year. The shipments for the week were 39,440 bales, against 43,904 bales last week and 33,638 bales for the corresponding week last year. The stocks for the week were 173,930 bales, against 194,302 last week and 142,528 for the same week last year.

At Liverpool the spot market is reported firm and easier, the quotations remaining unchanged at 5⅝d. for middling uplands and 5 11/16 for middling Orleans.

The Liverpool future market has been quiet, prices having ruled about the same as last week. Below will be found the closing quotations on Friday of low middling uplands for delivery, as compared with last week:

	To-day.	*Last week.*	*Last year.*
April-May	5 42-64	5 40-64	6 41-64d.
May-June	5 43-64	5 42-64	6 41-64
June-July	5 46-64	5 46-64	6 45-64
July-August	5 50-64	5 50-64	6 49-64
August-September	5 53-64	5 53-64	6 54-64
September-October	....	5 50-64	6 45-64

The sales for the week at Liverpool were 52,000 bales (of which 39,000 were American), against 65,000 (of which 40,000 were American) last year. The sales for export were 4,400 bales, against 11,500 bales last year. The sales for speculation were 5,300 bales, against 2,700 bales last year. The amount forwarded was 17,500 bales, against 14,500 bales last year. The stock in port is 992,000 bales (of which 735,000 are American), against 953,000 bales (of which 620,000 were American) last year. The total imports for the week were 43,500 bales (of which 32,000 were American), against 123,000 bales (of which 81,000 were American) last year, and the amount afloat 278,000 bales (of which 158,000 are American), against 440,000 bales (of which 187,000 were American) last year.

The Manchester market closed firm.

WOOL.

Operations in this staple have continued on a very small scale in all the markets during the past week, and the outlook is not particularly encouraging at the close. Manufacturers appear to grow more indifferent every week. The effect of the continued dullness has been to cause a further weakening of values in many cases, and the general market is unsettled and irregular. The February and early March advance has been pretty generally lost. Stocks are so small that there is not much pressure to sell, but dealers are disposed to meet buyers, and concessions are frequently made to influence sales. The apathy of buyers is due to the backward season for woolen goods, and some uncertainty as to the effect of the tariff reductions on the market for yarns and manufactured fabrics. Very few mills are getting their customary quota of orders in advance of production, and manufacturers are reluctant to fill up stocks to meet an uncertain demand. There is nothing new to be said concerning the new clip. Buyers are moving cautiously, and unless growers' ideas of value are considerably modified, the movement from primary points promises to be slower than in former years. There is general expectation of a lower range of values on all grades than last year.

IRON.

On Saturday last, as intimated in these columns, a reduction was made in the price of American pig iron, Nos. 1 and 2 foundry. The previous prices were $24 for No. 1, and $22 for No. 2. On the day mentioned a reduction of $2 on each was made by the Thomas Iron Company, thus making current rates $22 for No. 1, and $20 for No. 2. This move was necessitated by the cutting of current rates by smaller furnaces. Since Saturday other furnaces have sold foundry irons at the same prices, and the less efficient furnaces, which have been the disturbing element, have been practically shut out of the market. About 6,000 tons of Nos. 1 and 2 have been sold here during the week at the quotations named, and about 1,000 tons of fancy brands at somewhat higher figures. As yet, there is no marked change in the tone of the pig iron market. There is considerable inquiry, but no rush of business. The belief is very general that the result of the cut will be to shut down some of the smaller furnaces. The statement is made that just prior to the reduction in prices made on Saturday last, season contracts for pig iron to a considerable amount were taken by the larger concerns doing business in New York. Scotch pig iron prices remain unchanged. The arrivals this week were very small; not over 500 tons, and all has gone into consumption. No sales have been made to arrive. Steel rails are slightly firmer at $39 for future delivery. A considerable quantity has been contracted for during the week here and in Pennsylvania. Bar iron is dull at present. There are no features in other lines worthy of note.

DOMESTIC IRON MARKETS BY TELEGRAPH.

From Philadelphia, Pa.: Pig is dull, as the recent decline of $2 per ton has further unsettled confidence among buyers. All makes have participated in this decline since last Saturday, and some have shaded 25c. more. There is a good inquiry for bar in small lots, but buyers will not handle large blocks. Construction iron is in good demand for large lots. A sale of 2,300 tons iron and steel shapes for the new Niagara bridge is reported this week. Steel rails sell slowly at $39@$40 for small lots, and negotiations are pending for large lots at $38, but makers are not anxious to sell at that price.

From Pittsburgh, Pa.: Pig iron is weaker this week, and transactions are very limited. The 50,000 tons of Marshall metal held by the banks here as collateral seems to be a wet blanket on the market, and will no doubt keep prices low for a considerable time. The manufactured iron market remains in the same unsatisfactory condition heretofore noted. Collections are satisfactory.

From Cincinnati, Ohio: The pig iron market is decidedly unsatisfactory and depressed, with growing accumulation in hands of producers, and, in sympathy with eastern market, prices have de-

clined. Manufactured iron is in good demand; prices are unchanged.

From Cleveland, Ohio: The pig iron market continues much the same as was quoted during the last month; the amount being sold is increasing somewhat, but prices remain unchanged, yet firm. Prospects for the season indicate a reasonably fair one, so far as volume is concerned, but at prices not remunerative or satisfactory. Bar iron in fairly active demand, and sheet orders reasonably brisk.

From Chicago, Ill.: Building hardware and tools are selling freely for the season. Metals and tinners' stock are in fair request. Bar iron and nails are selling freely in job lots. Prices are unsettled. The Western Nail Association is cutting rates. Pig iron quiet; consumers are without stocks and buy in small lots. Jobbers say that the reduction in the east was discounted previously, and decline further concessions.

From Detroit, Mich.: In iron there has been only a fair amount of business doing. Prices and the general situation are unchanged.

From Louisville, Ky.: The pig iron market is sluggish and in buyers favor. Hardware easy and active.

From St. Louis, Mo.: The pig iron market is stationary, with small, slow sales. Manufactured iron in large request, and firmer. Mills take no orders, except conditioned against strikes.

COAL.

There is little that is new to record as affecting the anthracite market. The past week has witnessed full time at the mines. The next week and that following will furnish work during three days each, only. Prices remain nominally at the opening circular rate, but actually a little less. The restricted production has prevented much coal from accumulating, and now that navigation is open in all directions, or that it will be in a few days at the farthest, the movement north, east and west will doubtless be heavy. The western dealers have fixed a schedule of prices. Erie canal will be formally opened May 8. Navigation on the lakes is now open, and activity among western shippers by this route may be looked for soon. Here at New York there is a fair business doing, but the degree of activity is not equal to that looked for prior to fixing the spring rates. Bituminous coal is moving very slowly. Rates are shaved to a bare profit in many cases, and the season with operators and dealers appears to be very slow in opening. At several points in Ohio strikes among the soft-coal miners are announced. These are due to the wages disputes. The most serious labor disturbance among coal miners is in the Pittsburgh region, where they object to having wages cut from 3½c. per bushel for mining to 3c. A strike has been ordered for Tuesday next. The total quantity of Pennsylvania anthracite mined from January 1 to April 14 is 7,199,962 tons, against 6,668,203 tons in a like portion of 1882, a gain this year over last of 531,759 tons.

PETROLEUM.

For a week preceding Friday evening, April 20, the speculative petroleum market drifted idly. During the past week it has encountered high waves, heavy winds and fast-running tides. The general result has been a lowering of prices for certificates of crude. On Monday, Wednesday and Thursday the market was very excited and wide fluctuations were in order. On the day first named the old horseplay at juggling with statements and counter-statements from the producing regions in order to affect prices was successfully repeated. This method of rigging the market, common as it appears to be, ranks rather below than above the three-card game by which so many are taken in over and over again, for the latter requires skill while the former calls only for monumental prevaricators. The Clark well, which was expected to show a connection between the Grandin & Porcupine pools, was reported dry on Monday. Prices strengthened, advanced and then tumbled on receipt of word that it was not dry, but plugged. The fall was ½c. under Saturday's figures. Wednesday's decline was caused by the coming in of a Reed & Brenneman well, one mile and a quarter north of the Cooper tract, in Warren county. It was plugged to await tanking facilities. The market declined, but was checked somewhat owing to the rumor that the Grandin was dry. On Thursday the discovery of a heavy flow from the Porter well in Warren county, and the contradiction of Wednesday's rumor that the Grandin No. 7 was dry, broke prices badly. The amount of trading done at the various exchanges was very heavy, and many gentle investors in oil who have been putting up margins for some time past in firm faith that the boom was at hand, were worn out and stranded by the onslaught of the bears. Thursday's drop amounted to 4 cents.

The news from the various new wells on Friday went to show that all had been overrated. Judging from recent experience, this was to have been expected. In consequence prices became firmer and took an upward turn. At the close the offer was 88⅛c., against 94⅛c. on last week Friday, a decrease of 5⅞c. on the week.

The record of opening, highest, lowest, and closing prices bid for certificates of crude petroleum for the week ending April 27, is as follows:

PRICES OF CERTIFICATES OF CRUDE.

	Opening.	*Highest.*	*Lowest*	*Closing.*
Saturday	94¼	94½	94¼	94½
Monday	94½	94¾	92½	92⅞
Tuesday	92⅞	93¼	92½	92⅞
Wednesday	93⅛	9 ⅞	9 ¼	90⅜
Thursday	89½	90⅜	86	86¼
Friday	86⅛	86½	84⅞	88¼

Down to Wednesday evening there was quite a fair business done in refined oil at prices quoted last week. In crude in barrels the sales were not so heavy. Other varieties nominal. On Wednesday there was no change in prices, but the market was less active, exporters preferring to hold aloof while the speculative market was fluctuating and uncertain. On Thursday there was a drop of ¼c. all around in refined. Hardly any business was done, owing to the unsettled condition of the market.

The quotations for certificates of crude petroleum and of petroleum products last evening as against those of April 6, April 13 and April 20, are as follows:

	April 6.	*April* 13.	*April* 20.	*April* 27.
Certificates, crude..	91	94⅜	94⅛	88¼
Refined, 110°.....	8¼	8⅜	8¼	7⅞
Refined, 70°	8⅜	8½	8⅜	8
Crude, in barrels....	7⅛@7⅜	7⅛@7⅜	7⅛@7⅜	7 @7½
Case, plain	11	11	10¾	10⅝
Naphtha..... ...	6¾	6¼	6	6

The total quantity of petroleum (crude equivalent) exported from the United States from January 1 to April 21 was 156,259,960 gallons, against 165,499,500 gallons in a like period of 1882, a decreased exportation of 9,239,540 gallons, against a decrease of 5,813,917 gallons reported up to April 14. For the week ending April 21 the foreign shipments were 10,184,682 gallons, against 6,312,055 gallons in the preceding week. New York city's exports of petroleum from January 1 to April 21 amounted to 134,840,122 gallons (leaving but 22,419,838 gallons for all other ports), against 137,114,219 gallons in a like period in 1882.

OCEAN FREIGHTS.

There has been little worthy of note in the ocean freights market during the week. The most conspicuous feature has been the fair inquiry for vessels to load with petroleum, and the quite low rates at which they have been obtained, owing to the liberal supply of vessels of this description. During the earlier portion of the week the movement of grain by steamer was limited, but increased Wednesday and Thursday. The coastwise traffic is fair, but foreign ocean freights are quite dull. A few grain charters for French and other European ports were taken on private terms.

SPECIAL TRADE AND INDUSTRIAL REPORTS.

[By Telegraph to BRADSTREET'S.]

Special telegrams from leading cities, given below, include special reference to the condition of the manufacturing industries of the country, the cereal crops, general trade, and the movement of merchandise:

EASTERN STATES.

From Portland, Me.: General trade is fair, but retarded by continued cold, except the grocery trade, which is active.

From Boston, Mass.: The boot and shoe trade is good. Spring business is about over, and all are busy on fall work. Shipments which naturally decrease at this time have been for the week to places outside of New England 34,450 cases, against 34,369 cases the seventeenth week in 1882. Total shipments since January 1, 862,903 cases, against 776,933 cases same week last year.

MIDDLE STATES.

From Rochester, N. Y.: In the tobacco trade we find immense quantities of goods ready for shipment May 1, after rebate has been fixed. Manufacturers of perfumery and taxable goods in that line report a very dull trade, owing to the fact that buyers are holding off until July 1, when the tax on these goods will be abolished.

From Philadelphia, Pa.: The trade situation is much the same as a week ago. Little progress has been made in distributive branches, owing to the unseasonable weather, and the manufacturing position and outlook have not improved. There is continued dullness and weakness in the yarn trade, and the textile mills are working slowly. The soap and glass works are fairly busy, and the paper mills are well employed, but the latter, in common with the cotton-goods mills, complain of scanty profit margins. Chemicals are firm, but quiet. Wool and cotton are dull, and the former is weak and tending downward. The grain trade has been fairly active, with sharp fluctuations in values, particularly for wheat. Exporters have filled a number of orders for corn, and are still bidding freely, but have done very little in wheat. Flour is stronger, owing to the late advance in wheat, and trade has been more active, both on local account and for export. Provisions are active and generally higher in sympathy with the advance in hog products in the west. Groceries and dairy produce are generally quiet. Potatoes are 10@15c. per bushel lower under large receipts from New York state; new southern are still scarce. Southern vegetables keep well sold up. Petroleum is dull, and refined is ¼c. lower for export.

WESTERN STATES.

From Cincinnati, Ohio: Hemp quiet; stocks fair; prices unchanged. The whisky exporting movement appears to be accomplishing its objects; prices steady. The new crop of wool has not yet commenced to arrive; transactions limited. Dealings in new tobacco were limited and lighter than usual, and cheaper stuff predominated, yet prices are unchanged except a little weakening in old leaf, owing possibly to a lighter demand from surrounding localities. Cannot learn that the frosts of the week have materially injured fruits. The strawberry plants have suffered some, however. Wheat in all surrounding sections promises well. The market for flour has been stronger and the volume larger. The demand, however, is confined to orders only. Grain receipts have increased, with an active demand. The volume of receipts of cotton is less to date than last year; sales are confined mostly to domestic wants and prices are unchanged. Country produce receipts large and the demand moderate.

From Cleveland, Ohio: The weather throughout the week has been unseasonably cold, and in some lines has had its influence upon trade. Wholesale business in general, however, is in fair shape, and, with the exception of iron interests, reasonably satisfactory. Country collections are fair.

From Columbus, Ohio: General lines reported healthy, and collections quoted reasonably good.

From Dayton, Ohio: General trade dull. Collections reported very slow.

From Toledo, Ohio: Boot and shoe trade larger than same time last year. Other lines show satisfactory activity. Collections slow.

From Evansville, Ind.: The weather for the past week has been fine and trade has been very good, especially with the wholesale merchants. Manufacturers are running to their full capacity, and still have orders several weeks old.

From Indianapolis, Ind.: Trade is fairly active; prospects are encouraging and prices are well maintained. Collections only fair.

From Chicago, Ill.: There is a trade in clothing, hats, boots and shoes. Groceries active. Sugars and coffees are in moderate supply. Wheat weak, influenced by fine weather; the demand is entirely speculative; manipulators on bull side show a strong resistance to the decline. Corn steady and quiet; prices are sustained by a local bull combination, who are trying to get out of their deal. Oats weak and materially lower, being due to large receipts. There is an indication that May deal is abandoned.

From Peoria, Ill.: In cigars and tobacco the trade during the month has been considerably under the average, but orders sold ahead for May will cover the deficiency. In other lines trade is steady and collections more than fair.

From Louisville, Ky.: Cotton in good request; offerings light and prices very firm. Grain dull and steady. Flour fairly active and firm. Wool firmly held, old stocks being exhausted; country buyers are paying 22@25c. for average fleeces. Whisky quiet, easy and unchanged. The leaf tobacco movement is smaller. Tobacco being now mostly in dealers' hands, the deliveries will be mainly regulated by the course of the market. Prices firmer for all grades, and bidding continues animated. Tobacco manufacturers are crowded with orders for delivery under the reduced tax in May. The spring spurt being over, the jobbing trade is less active, indicating a good between-seasons movement.

From Burlington, Iowa: Business continues to expand with the advance of the season. City trade shows improvement, and most lines are doing a satisfactory trade. Jobbers are filling good country orders in seasonable as well as staple goods.

From Davenport, Iowa: General trade for the past week has been poor compared with the previous week. This dullness is general, and complaints are heard on all sides. The farmers are all busy yet putting in their crops, hence the general depression. There is a big falling off in the wholesale grocery trade.

From Des Moines, Iowa: The retail trade in all lines is improving, and the wholesale trade is still better. The warm weather and the large amount of local improvement is helping trade greatly.

From Detroit, Mich.: General trade has been quite active during the week. Collections are much improved. The market is very active, and the legitimate demand greater than the banks can supply.

From Milwaukee, Wis.: Trade has brightened somewhat during the week, the natural result of a slight improvement of the country roads and pleasanter weather. Still the volume of business has not been quite up to anticipations, and the season has been very backward. The general feeling among business people is that the severest dullness has passed, and the future begins to look much brighter. There is also apparently a fair increase in receipts from collections.

From Minneapolis, Minn.: The lumber market shows an increased activity, and rules firm. Mills are commencing the season's work with a full supply of logs. In groceries, boots and shoes, hardware and drugs a large increase in trade is reported. Collections are much better than in March, and generally good.

From Lincoln, Neb.: General trade is more quiet, but in a healthy condition. Retail dealers are now doing a light business, and only buy of wholesale trade in anticipation of more activity in the future. Wholesale grocers only receive small orders.

From Topeka, Kan.: General trade is still improving.

From Denver, Col.: All branches of business are active, sales being from 20@25 per cent. better than last year.

CALIFORNIA.

From San Francisco, Cal.: The city trade is good. Growing crops are in a satisfactory condition. There is a large increase in the acreage planted. General merchandise prospering. Values firm. There have been large receipts of wool. Business small. Hides lower.

SOUTHERN STATES.

From Baltimore, Md.: General business the past week was good. In some branches of trade, particularly boots and shoes, millinery and straw goods, an unusual amount of activity was noticed. Cotton is quiet and firm, the most inquiry coming from shippers. Local looms are working on full time, and fewer complaints of dullness are heard from spinners. The grain market has been active and prices rule steady. Freights continue dull and nominal. Very little is doing in petroleum, and prices are unchanged. The speculative movement in provisions has been fairly active, and a good jobbing trade is also reported. Prices are firm.

From Richmond, Va.: General business is decidedly improved over last week. Prospects for a continuance good.

From Norfolk, Va.: Trade generally has been somewhat retarded by unsettled weather. Trade is active with the wholesale grocers. All retail departments are doing their ordinary business. The oyster season is about closing; the business this season has not been so lucrative as formerly. Corn, wheat and lumber mills are actively employed. Cotton receipts have fallen off; cotton factory orders largely in excess of the production.

From Wilmington, N. C.: The weather is pleasant after rain and windstorms, which will delay planting. The cotton market is firm and receipts are increasing. Breadstuffs firm. Grain steady. Foreign freights are quiet, coastwise steady. Spirits turpentine and rosins are firm at the decline. Tar easier. Crude steady.

From Savannah, Ga.: The trade situation remains unchanged, with no noticeable features except more inquiries for rice of better grades. The tone of the market continues quiet and firm; naval stores dull. The stock of spirits on hand and ship-

board this day is 4,040 barrels; of rosin 39,830. The lumber market has improved and mills are running on full time, with good demand for future tonnage; for present moving tonnage is in ample supply, but off-shore charters are more difficult to obtain.

From Macon, Ga.: Meats are moving more freely than at this time last month. A cotton-compress association is to be organized to-day, which will increase bales handled in this market 250,000, and will have a capital of $50,000 to $100,000.

From Selma, Ala.: Our grocery merchants report no improvement in their trade since last report. It is still very dull.

From New Orleans, La.: The bears are indisposed to press this week, and the bulls are disinclined to advance. The cotton movement is moderate; low ordinary to middling inclusive 1/16c. higher; futures this year off 3 to 5 points on all months except Aprils, which are 13 points higher, Sugar quiet but firm. Molasses dull and nominal. Rice quiet and easier at 5⅜@6c. Coffee dull; fair 9¾c. In sympathy with western markets and light stocks here, flour is up 25c. Receipts of corn are only 250,000 bushels; exports of corn 400,000 bushels; local corn consumption good at 4c. advance. Wheat movement trifling.

From Dallas, Tex.: The grocery trade reports large sales with fair collections. Retail trade generally quiet. Cotton receipts for past two weeks light.

From Galveston, Tex.: The weather during the past week has been changeable. The general jobbing trade continues only moderate.

From Nashville, Tenn.: The trade here is about the same as last week, with better feeling in some lines. The growing wheat is improving daily. Weather unfavorable for cotton, which in some localities is up. The wheat, corn and flour markets are quiet, but steady. Groceries fair. Cattle market good, with fair prices.

From Memphis, Tenn.: Business during the past week has been fair. Flour stiffening, but the demand is slack and prices are unchanged; meal in light demand.

NOVA SCOTIA.

From Halifax, N. S.: The same steady and reasonably fair amount of business has continued during the week. Groceries rather active at firm prices.

LATE MAILS.

Chicago, April 25.—The demand for discounts at the banks, although less than a fortnight since, is above the customary average at this period during the past few years, and rates steady at 6@7. There is, however, a steady increase in the bank deposits, and a gradual reduction in the discount lines, owing to meagre shipments of grain and other property eastward. Very little exchange is made through the medium of shippers' bills, and the banks have, within the past few days, forwarded large amounts of gold and currency to New York in order to make exchange. Money is also coming from the country in liberal quantities. The jobbing trade in dry goods shows a fair average volume for the season, but the sale of many lines of light and medium fabrics suited to the late spring trade have been curtailed by the low range of temperature during the week. Millinery, furnishing and fancy goods are meeting a fair demand. Ready-made clothing is rather slow. The hardware houses continue to report a highly satisfactory trade from all parts of the interior, and an average mid-spring demand is reported for metals and tinners' supplies. Bar and pig-iron are meeting an average sale for immediate consumption. Nails are jobbing freely, but the large offerings of western manufacturers, who are anxious to keep closely sold up, have unsettled prices. Steel rails are meeting quite as good demand as the mill-owners anticipated, and the outlook for a future demand is fair. Groceries are meeting with a good demand for instant consumption, stocks are closely sold up, and the tone of the market is firm and healthy. Linseed oils are in moderate stock, consumption liberal, and prices steady. Wool is quiet and slow, but stocks light, and contain few desirable lots of any description. Tanners report an average call for leather from manufacturers, but continue to complain that the prices are so low that scarcely any margin is left between the cost of product and the figures at which the goods are distributed. The general tone of the dispatches from the wheat districts indicate an improved condition of the fall-sown plant, and a large increase in the area of spring sowing. Stocks are also large, but the trade is in the hands of a strong combination, who, it is supposed, intend to run a corner provided they can get a sufficient line of contracts for future delivery to justify them in carrying out their plans. The result is that prices are unsettled and fluctuations severe, the quotations being too high to admit of shipments, except in a small way to local points. Corn shows little strength, values being largely controlled by wheat, and, like the latter article, prices are too high to induce free buying for shipment. The distrust in regard to the keeping quality of the corn when the weather becomes warm also has an adverse influence on values, and present prices are chiefly sustained by speculative manipulations. Oats show a weakening tendency, and it is thought that those who have held the stocks here for the past four months are gradually retiring from the deal. The following shows the stock of grain in Chicago on the dates named:

	Wheat, bushels.	*Corn, bushels.*	*Oats, bushels.*	*Rye, bushels.*	*Barley, bushels.*
April 21, 1883	6,079,000	7,556,000	1,263,000	853,000	90,000
April 22, 1882	3,595,000	1,822,000	124,000	288.000	49,000
April 23, 1881	7,676,000	3,134,000	675,000	74,000	139,000
April 24, 1880	8,543,000	2,615,000	372,000	83,000	371,000

In addition to the above, all of which is reported as being in elevators regulated by the state, there are 400,000 bushels of corn in a private elevator, whose receipts are regular on contracts; also 713,000 bushels of wheat, 1,759,000 bushels of corn and 230,000 bushels of oats on vessels in the harbor; total, 6,792,000 bushels of wheat, 9,715,000 bushels of corn, and 1,503,000 bushels of oats.

The following table, giving rates on prime commercial paper and exchange on New York at the cities named, is based on special dispatches to BRADSTREET'S, received yesterday:

	Prime com. paper, per cent.	*Exchange selling on New York.*
Baltimore, Md	@ 5	
Boston, Mass	5½@ 6	10@30c. dis. per $1,000.

TRADE EMBARRASSMENTS.

There were 186 failures reported to BRADSTREET'S during the past week, 26 more than the preceding week, 81 more than the corresponding week of 1882, and 84 more than the same week of 1881. Compared with the previous week the middle states had 47, an increase of 13; New England states 26, a decrease of 5; southern states 44, an increase of 14; western states 52, an increase of 6; Pacific states and territories 19, a decrease of 2; Canada and the Provinces 39, an increase of 7. The important failures were H. Kurzman, manufacturer of trimmed hats and feathers, New York; Handy, Richardson & Co., grain, Chicago; Newburgh, Frenkel & Co., wholesale clothing, Cincinnati; The Bleyer Distilling Company, St. Louis; Marks Brothers & Co., wholesale dry goods, New Orleans; D. A. Jewell, cotton and woolen mills, Jewell's, Ga. In the principal trades they were as follows: Grocers 33; general traders 26; dry goods 12; manufacturers 11; clothing 10; liquors 10; hardware 8; drugs 8; shoes 7; produce and provisions 7; jewelry 5; hotels and restaurants 5; fancy goods 3; millinery 3; books and stationery 3; commission 3; millers 3; leather 3; furniture 2; coal 2; grain 2; hats 2; tobacco and cigars 2.

ALABAMA.

CHULAFINNE.—Stephens & Payne, general store, have assigned.

MIDWAY.—J. M. White, general store, who recently failed, owes about $2,200; preferences $750.

ARKANSAS.

FORT SMITH.—The lumber of Choate & Co., saw mill, has been attached by creditors.

MONTICELLO.—R. A. Rondlebush & Co., general store, have been attached. Liabilities about $6,000; assets about $2,500.

CALIFORNIA.

GRASS VALLEY.—W. H. Sheldon, grocer, has failed.

LOS ANGELES.—William J. Nolte, tailor, has failed.

MERCED.—John O. Toole, grocer, has filed a petition in insolvency.

MURPHYS.—R. Senter, general store, has failed.

OAKLAND.—S. A. Cohn, furniture, is in insolvency.

OAKLAND.—James Frawley, grocer, has filed a petition in insolvency.

REDWOOD CITY.—John Gosch, saloon, has failed.

SAN FRANCISCO.—J. P. Davenport, produce, has filed a petition in insolvency. Liabilities $2,395; nominal assets $1,008.

SAN FRANCISCO.—Albert Eber, dry goods, has assigned, and offers to compromise.

SAN FRANCISCO.—William J. Morrissey, shoes, is advertised to be sold out by the sheriff.

SAN FRANCISCO.—Philip, Speyer & Co., commission and insurance, have suspended. They were attached for $8,091.

SAN FRANCISCO.—The Asphalated Wrought Iron Pipe Company is advertised to be sold out by the sheriff.

SANTA CRUZ.—F. C. Proctor, clothing, has been attached, and compromised.

COLORADO.

BOULDER.—J. W. Lovelace, drugs, gave a bill of sale to his wife, it is said, to evade creditors, and then sold out to H. A. Morgridge.

LEADVILLE.—A. E. Welch, grocer, has given a bill of sale for $2,827 to a creditor.

LONGMONT.—W. T. Boyd & Co., shoes, have been closed by creditors.

PUEBLO.—George Lennon & Co., foundry and machine shop, have assigned to F. J. Lester, and ask an extension of twelve months. Liabilities $40,000; assets $68,000.

CONNECTICUT.

EAST CANAAN.—William Adam (2d), general store, has assigned.

NORTH GROSVENORDALE.—L. B. Austin, meat market, has assigned.

WATERBURY.—Scott R. Atwood, milk, has assigned.

DAKOTA.

GRAND FORKS.—Palmer & Elliott, shoes, who recently sold out, offer to compromise at 30 cents.

DISTRICT OF COLUMBIA.

WASHINGTON.—M. Keegan, grocer, has obtained an extension of one year.

FLORIDA.

JACKSONVILLE.—W. A. Buchanan & Co., bakers, are advertised to be sold out by the sheriff.

GEORGIA.

CARTERSVILLE.—H. H. Mountcastle, books and stationery, has had a mortgage foreclosed.

GRIFFIN.—William Reeves & Co., drugs, have been closed by the sheriff.

JEWELL'S.—D. A. Jewell, cotton and woolen mills, has assigned. He has been in business about twenty-five years, owned considerable real estate, the mills being valued at $50,000 and mortgaged for $30,000.

MACON.—H. L. Cook, grocer, has assigned.

REYNOLDS.—R. C. Paris, grocer, has called a meeting of creditors.

SAVANNAH.—J. H. Ranken, grocer, has been attached.

ILLINOIS.

CENTRALIA.—Isaac Trepp, general store, is reported to have failed.

CHICAGO.—Otto Boll, commission drugs and chemicals, has been closed by the sheriff.

CHICAGO.—John A. Carbon, grocer, has assigned to Thomas F. Burg.

CHICAGO.—James Dale, blank books, has been closed by the sheriff on a claim of $1,906.

CHICAGO.—O. C. Haskell, trading as O. C. Haskell & Co., maps and pictures, has been closed by the sheriff on a claim of $586.

CHICAGO.—George H. Johnson & Co., doing business as the Chicago Ruffling Company, have been closed by the sheriff They were sued on a claim for $1,500 by a New York firm.

CHICAGO.—A. H. Lord, stonecutter and marble dealer, has been closed by the sheriff on claims for $6,400. B. L. Sawyer has been appointed receiver. Liabilities about $14,000, assets $3,500.

CHICAGO.—William E. Lynch, saloon, has had a chattel mortgage foreclosed.

CHICAGO.—Snyder & Winans, produce commission, have failed.

DECATUR.—Butler Brothers & Co., restaurant, have been closed by the sheriff.

ELGIN.—H. & W. D. King, jewelers, have been closed by the sheriff.

EUGENE.—Execution has been issued against S. M. Parker, general store, on judgments for $1,249.

MOUNT PULASKI.—The Mount Pulaski Milling Company has been attached for $1,037.

NIANTIC.—Perry L. Van Cleve, of Van Cleve & Masters, general store, has assigned.

PEORIA.—N. H. Lattin, musical instruments, has confessed judgment for $2,000.

PERU.—Philip Link, liquors, has been attached for $541.

SEYMOUR.—King Brothers, grocers, have assigned, gone out of business and been suceeeded by A. M. King & Co. Liabilities $4,996; assets about $3,200.

INDIANA.

AKRON.—Andrew Strong, general store and hotel, has failed. Liabilities $12,000; assets $8,000; chattel mortgage $3,000.

EVANSVILLE.—The liabilities of Elles & Knauss, millers, are about $65,000, of which $40,000 is secured by a mortgage to William Heilman, to secure him as indorser. They say they have no assets for the unsecured creditors. Mr. Heilman will continue the business, and the firm will act as agents for him.

INDIANAPOLIS.—James M. Huffa, harness, has assigned to A. W. Wishard. Liabilities $4,500; assets about $4,000.

IOWA.

DAVENPORT.—Lambert & Hurto, grocers, have assigned.

HAMBURG.—H. R. Grape, grocer, has been closed by the United States marshal

IOWA FALLS.—Thomas Quillian, blacksmith, has assigned.

ODEBOLT.—M. L. Keck, confectioner, has mortgaged stock for $600, and is reported hard pressed.

ST. ANTHONY.—George L. Whittemore, general store, has assigned to J. P. Donohue.

WHAT CHEER.—Fred. Newhauser, clothing, has been attached and closed up.

KANSAS.

BURLINGAME.—Graham & Co. have failed and gone out of business.

STOCKTON.—McClellan & Guthrie, general store, have assigned to J. S. O'Donnell.

WYANDOTTE.—M. B. Crosby & Co., drugs, have been closed by the sheriff.

KENTUCKY.

ELIZABETHTOWN.—John Rihn, notions, has assigned.

FULTON.—Charles Wolff, dry goods, has assigned to A. Leet. Liabilities $5,000; assets about $2,000.

LOUISVILLE.—Mrs. S. Garbutt, varieties, has assigned to A. Seaton.

LOUISVILLE.—William L. Murphy, miller, who recently assigned, owes about $78,000, of which $60,000 is due the banks on accommodation paper. The assets consist of real estate valued at $85,000, mortgaged for $7,500, and merchandise and accounts $9,000.

OWENSBORO.—A. E. Reese, clothing, has been closed by the sheriff.

WESTON.—Lambert Brothers, mill, have been attached for $800.

LOUISIANA.

ISLE PIQUANT.—Victor Abadie, general store, has been closed by the sheriff. Liabilities $1,500.

NEW ORLEANS.—Marks Brothers & Co., dry goods, have suspended. Liabilities reported at $110,000. Their trade was principally with Mexico, and had stores at Matamoras, Mex., and Camargo. They have been in business since 1875.

NEW ORLEANS.—Turner & Franz, millinery, have been closed by the sheriff. Liabilities $450; assets $150.

VERMILLIONVILLE.—L. Liberman, general store, has failed and assigned. Liabilities $1,400.

MAINE.

AUBURN.—H. B. Pulsifer, sole manufacturer, is in insolvency.

BANGOR.—Benjamin S. Kalish, jeweler, is in insolvency.

CAMDEN.—The creditors of F. H. Calderwood, grocer, have agreed to accept 33 1-3 cents.

PORTLAND.—Edward F. Colby, grocer, is in insolvency.

PORTLAND.—D. Wyer & Co., fish, are reported to have failed.

SKOWHEGAN.—Mitchell & Parlin, grocers, owe about $2,800; nominal assets $1,300; actual assets $500.

WATERVILLE.—The liabilities of L. J. Cote & Co., drugs, are about $8,000; actual assets $2,000. Cote & Delisle, grocers, and Cote & Mechand, grocers, in which Mr. Cote was a partner have been attached.

MARYLAND.

ABERDEEN.—Thomas Slattery, general store, is in the hands of the sheriff.

BALTIMORE.—Robert De Witt Childs, tinware, has assigned.

BALTIMORE.—James McCoy, engineers' supplies, has assigned.

BALTIMORE.—Thomas P. Paul & Son, locomotive works, have assigned to Hollingworth White. The senior partner recently transferred real estate $9,600 to M. Sheehan. Liabilities reported at $35,000; nominal assets $50,000. Creditors have filed a petition to put them into insolvency to be heard on May 1.

CUMBERLAND.—Joseph M. Koener & Son, carriages, have assigned.

MASSACHUSETTS.

BOSTON.—Baker & Cutler, grocers, have increased their offer to 25 cents, which will probably be accepted.

BOSTON.—Finn, Carson & Co., wholesale hats, have failed and gone into insolvency. Liabilities about $10,000.

BOSTON.—George A. Hentz & Co., teas, have failed and are in insolvency. Liabilities $5,483; assets small.

BOSTON.—E. G. Morse, dry goods, who failed and assigned to William H. Long, has compromised at 30 cents. Liabilities $3,700; assets $2,900.

BOSTON.—C. H. & E. A. Ormsby, grocers, have been attached.

BOSTON.—Samuel G. Sanger, leather, is compromising at 25 cents.

BOSTON.—The estate of F. F. Siebert, shoe findings, is compromising at 60 cents.

BOSTON.—At a meeting of the creditors of A. O. Swett, auctioneer, an offer of 40 cents was made, but the ultimate arrangement agreed to by the creditors present was 50 cents cash in thirty days.

BOSTON.—The Boston Machine Company offers 66 2-3 cents, which has been accepted.

BOSTON.—The U. S. Street Lighting Company has been petitioned into insolvency. It was incorporated March 20, 1879, with a capital stock of $50,000.

BOSTON (Highlands).—W. H. Hyde, hardware, has been petitioned into insolvency.

EAST HAMPTON.—Creditors of the Williston & Knight Company, buttons, have filed a petition in insolvency against the concern.

IPSWICH.—The schedules of Maynard & Whittier, provisions, show liabilities $10,431, of which $4,800 is secured; nominal assets $4,800.

LOWELL.—Ellen Cassidy, grocer, has been closed by creditors and left town. Liabilities about $2,000; assets nominal.

LOWELL.—Noblett & Salmon, color printers, are reported to have failed.

NEW BEDFORD.—C. W. Potter, Jr., fruits, who was recently attached, owes about $1,000.

NEWBURYPORT.—Charles W. Kimball, provisions, owes about $1,800; nominal assets $250.

PALMER.—Jesse Pierce, shoes, has left town, and the stock has been taken by creditors.

PEABODY.—John O'Shea & Brother, tanners, have filed a petition in insolvency.

SALEM.—R. M. Copeland, provisions, has failed and gone out of business. Liabilities about $1,000; assets small.

SALEM.—Jeremiah O'Leary, undertaker, is reported to have failed. Liabilities $3,000; assets nominally $1,000.

SHELBURNE FALLS.—John F. Hoyt, butcher, is in insolvency.

WORCESTER.—C. A. Cummings, locksmith, is reported to have assigned.

MICHIGAN.

LUDINGTON.—C. Nelson, grocer, has been closed up under chattel mortgage.

WEST BAY CITY.—J. G. Franke, grocer, has been closed up.

MINNESOTA.

GRANITE FALLS.—C. L. Hardy, jeweler, is in the hands of the sheriff.

KANDIYOHI.—J. B. Flanders, agricultural implements, has assigned.

LAKE CITY.—William Anderson, grocer, has assigned to E. J. McGrath.

MISSISSIPPI.

COLUMBUS.—G. B. Frazee, drugs, has assigned to David P. Blair, giving preferences for $3,938. Assets about $7,000.

MISSOURI.

LANCASTER.—T. H. Dillon, grocer, has sold out and failed.

RICH HILL.—A. Callender, cigar manufacturer, has been attached.

ST. LOUIS.—Gore & Kelsoe, grocery and saloon, have assigned to Richard Bolswetter. Assets $1,825.

ST. LOUIS.—R. M. Rankin, printer, gave a chattel mortgage for $3,047 and failed.

ST. LOUIS.—The Bleyer Distilling Company has assigned to Rudolph D. Kohn. Nominal assets $10,000. The company succeeded to the business of Bowman & Bleyer, who failed January 3, 1881, and compromised at 50 cents. It was incorporated with a capital stock of $50,000.

NEBRASKA.

ALEXANDRIA.—Henry Schultz, billiards, has failed.

NEVADA.

RUBY HILL.—E. Man, general store, has been attached.

NEW HAMPSHIRE.

KEENE.—M. T. Tottingham & Co, furniture, have been attached for $900.

NEW JERSEY.

NEW BRUNSWICK.—L. Opper, liquors, is reported to have been sold out by creditors.

PATERSON.—The liabilities of Frank S. Genung, merchant tailor, are about $5,000. The stock was sold, realizing about $1,200, not enough to satisfy the judgment of $3,314.

PHILLIPSBURG.—R. K. Skinner & Son, millers, have assigned.

STANHOPE.—A. J. Kinincutt, clothing, etc, is reported to have failed.

NEW YORK.

AUSABLE FORKS.—Henry Herron, stoves, has assigned to E. H. McIntyre.

BROOKLYN.—Edmund T. Young, feed, has assigned.

BUFFALO.—Henry Goldstein, millinery, has assigned to Marcus Schwartz.

CONKLINGVILLE.—J. W. Houghton has been appointed receiver of W. & B. Van Vranken, woodenware, in supplementary proceedings. It is claimed by judgment creditors that a true inventory of assets would show $60,000, or about double the liabilities.

CONSTABLEVILLE —William Wiltz, tanner, has failed.

CROWN POINT.—Albert G. De Pontee, general store, has assigned to G. W. Foote. Liabilities reported at $6,000; nominal assets $8,000.

ELLENVILLE.—Munson & Hoornbeck, drugs, have assigned.

FRANKLINVILLE.—The liabilities of Chandler Brothers, general store, who recently assigned, are $28,310; nominal assets $31,000; preferences $7,000.

GLENS FALLS.—D. L. L. Cowles, shoes, is reported to have assigned.

HOMER.—Button, Bois & Co., produce, tin, etc., have assigned to Newell Jones. They claimed March 1 firm assets $11,285; liabilities $6,266.

HORSEHEADS.—H. Mosher, grocer, has assigned. Liabilities about $3,000; assets $600. He previously sold out the stock to his brother to secure him as indorser.

JAMESTOWN.—B. A. Gibson, bottler, has failed, and is advertised to be sold out by the sheriff.

NEW YORK CITY.—The schedules of Lydia A. Camp, grocer, show liabilities $13,230; nominal assets $5,308; actual assets $4,667.

NEW YORK CITY.—Isaac Cohn, manufacturer of boys' clothing, assigned on the 24th inst. to Harris Brown, giving preferences for $5,784, of which the largest were to Hannah Morris $3,000; Ballin, Josephs & Co. 1,651; Hannah Cohn $450. He formed a partnership January 1 with Raphael Keiler, but dissolved on March 22. He asks an extension.

NEW YORK CITY.—Annie Davis, manufacturer of suspenders, assigned on the 25th inst. to Moses L. Rosenfeld, giving three preferences for $995.

NEW YORK CITY.—Isador Dittenhofer, dry goods, assigned on the 23d inst. to Isaac S. Lambert, giving two preferences for $733. Liabilities $3,355; nominal assets $1,579; actual assets $928.

NEW YORK CITY —John Dolan, coal and stevedore, has failed and given a bill of sale for $4,370 to F. A. Potts & Co. He is said to owe about $2,500 additional to others.

NEW YORK CITY.—The schedules of David Forchheimer & Co., wholesale hats, show liabilities $88,659; nominal assets $87,981; actual assets $45,575.

NEW YORK CITY.—Sigmond Friedman, dry goods, assigned on the 21st inst. to Alexander Schwab, with preferences for $176.

NEW YORK CITY.—The schedules of Goldstein Brothers, clothing, show liabilities $30,794; actual assets $18,015.

NEW YORK CITY.—Herman Kurzman, manufacturer of trimmed hats and artificial feathers, has failed, and his two stores were closed by the sheriff, judgments having been obtained on the 21st inst in favor of Hannah Kurzman $1,116; Michael Kurzman $1,516; Herman Joseph $3,868; P. Gilbert $960. The liabilities are reported at about $100,000. Attachments have been obtained against him as follows: C. A. Auffmordt & Co. $1,048; Dreyfuss, Cohn & Co. $6,665; Iselin, Nesser & Co. $1,629; Oberteuffer, Abegg & Co. $668; Passavant & Co. $1,492; Isaac Sickle $707. The following judgments have been entered against him: A. & H. G. Veith $601; Bernard Veith $1,010; Stadecker & Emsheimer $269; S. L. Bayer $1,430.

NEW YORK CITY.—J. Meuer & Son, manufacturers of artificial flowers, assigned on the 23d inst. to Morris Grosner, giving nine preferences for $5,938, of which the largest were to Rachel Goldberg $3,533; William Wulf $600. Liabilities $12,144; nominal assets $7,467; actual assets $3,404.

NEW YORK CITY.—Franklin Overbagh, lamps, assigned on the 27th inst. to E. E. Huber, giving a preference for $381.

NEW YORK CITY.—Louis Schiff, manufacturer of shoes, assigned on the 21st inst. to Julius Einstein, giving preferences for $1,937.

NEW YORK CITY.—The schedules of A. Seelig & Son, clothing, show liabilities $16,322; nominal assets $9,767; actual assets $4,332.

NEW YORK CITY.—Thomas Smith, fish smoker, assigned on the 21st inst. to William Snyder.

NEW YORK CITY.—J. L. Terpenning, commission produce, assigned on the 23d inst. to Edward H. Frost, giving a preference for $200.

NEW YORK CITY.—The schedules of Wiley, Wickes & Wing, fruits, show liabilities $538,791; nominal assets $518,260; actual assets $365,829.

POUGHKEEPSIE.—William L. Gale, commission, is reported to have assigned to William C. Albro, giving preferences for $1,639. Liabilities about $2,000.

TONAWANDA.—J. A. Bliss, manufacturer of lumber, is reported to have failed, and creditors have appointed a committee to investigate. His liabilities are reported from $75,000 to $100,000. He is also of the firm of Bliss & Smith, timber.

NORTH CAROLINA.

TOWNESVILLE.—J. Y. Overby, general store, has assigned.

OHIO.

CINCINNATI.—Handy, Richardson & Co., commission grain, suspended on the 25th inst. Mr. Handy says the failure is not a bad one. It is said that most of the margins were up and the trades had been pretty well evened, as the customers had been requested to close them out. Mr. Handy became a special partner in the firm of S. H. Richardson & Co. March 1, 1882, putting in $10,000, and on January 1, 1883, became a general partner, and the style of the firm was changed as at present.

CINCINNATI.—Newburgh, Frenkel & Co., wholesale clothing, assigned on the 26th inst. to Edgar M. Johnson and Max Mack. Mr. Newburgh has been identified with the clothing trade for over twenty-five years. He retired from the firm of Newburgh, Stern, Lauer & Co. October 1, 1881, and formed the present firm. Jacob Frenkel, who became a partner at the start, retired from the firm February 6, 1882. They owe largely in New York.

LORAIN.—Mrs. C. S. Vorwerk, grocer, is reported to have failed.

MARYSVILLE.—S. L Reed & Son, grocers, have assigned. Liabilities $3,000; assets $1,500.

RUSHSYLVANIA.—D. Hatcher, drugs, is reported to have failed.

SALEM.—H. B. Dole, notions, has assigned to John E. Rogers.

OREGON.

ALKALI.—White & Co., general store, have failed.

PENNSYLVANIA.

BRISTOL.—Execution for $2,335 has been entered against Jacob McBrien, dry goods, etc.

BURLINGTON.—T. F. Lent, wagon maker, is reported to have failed.

CARLISLE.—Execution has been issued against H. J. Good & Brother, grocers, on judgment for $500.

CRESSON.—A. F. & J. A. Parish, grocers, have been sold out by the sheriff.

FARNSWORTH.—J. D. Woodford & Co., general store, have been closed by the sheriff.

FRANKLIN.—B. J. Feldman, jeweler, has been closed by the sheriff.

HARRISBURG.—George W. Fessler, dry goods, offers to compromise at 50 cents cash. Liabilities $6,800; assets about $4,000.

LANCASTER.—George W. Locher, leather and findings, has called a meeting of creditors.

LITITZ.—Elias Buch, clothing, has assigned.

MARION.—Ackerson & Meekins, general store, have failed.

NEATH.—M. Thomas, grocer, has been sold out by the sheriff.

PHILADELPHIA.—G. H. Friend, dry goods, has been sold out by the sheriff. His father obtained a judgment against him for $2,940. The stock was valued at $2,100.

BRADSTREET'S:

A Journal of Trade, Finance, and Public Economy.

PUBLISHED BY THE BRADSTREET COMPANY,
279, 281, 283 BROADWAY, NEW YORK.

Terms, $5.00 per year in advance, including postage.

SINGLE COPIES, TEN CENTS.

SPECIMEN COPIES WILL BE SENT FREE UPON APPLICATION.

As a financial and commercial newspaper the foremost purpose of BRADSTREET'S is to be of practical service to business men.

Its special trade and industrial reports; its weekly epitome of bankruptcies throughout the United States and Canada, and the summaries of assets and liabilities, are alone worth the subscription price.

The synopses of recent legal decisions constitute an exceedingly valuable feature.

As commercial transactions, in the wider sense, are coming to be more and more conducted on a statistical basis, the information contained in BRADSTREET'S is of the first importance both to producers and middle-men.

THE TRADE AND AGRICULTURAL SITUATION THROUGHOUT THE UNITED STATES AND CANADA IS REPORTED BY TELEGRAPH TO BRADSTREET'S UP TO THE HOUR OF PUBLICATION.

BRADSTREET'S

A JOURNAL OF

TRADE, FINANCE, AND PUBLIC ECONOMY.

PUBLISHED WEEKLY BY

THE BRADSTREET COMPANY,

NOS. 279, 281 & 283 BROADWAY, NEW YORK.

London Office, 84 Newgate Street, E. C.

TERMS: $5.00 PER YEAR IN ADVANCE; SINGLE COPIES 10 CENTS.

All communications regarding editorial or literary matters should be addressed to the Editor; all others to the Publishers.

ENTERED AT THE POST OFFICE AT NEW YORK, N. Y., AS SECOND-CLASS MATTER.

SATURDAY, MAY 5, 1883.

NOTES OF THE WEEK.

The aim of the Wall street bears at this juncture is to alarm the country with gloomy forebodings regarding a terrible panic which is to come in the autumn, and the subsequent extreme depression. The slowness with which the New York banks are regaining their surplus is pointed out as the main ground for the prophecy. It is argued that just such a period of extreme stringency in the loan market as that occurring this spring took place in the spring preceding the Jay Cooke failure in the autumn of 1873. It appears, however, that in previous years, when no crisis immediately followed, the stringency in money was quite as great, owing to the lateness of the spring and the halting return of currency from the country. There exist good reasons for believing that trade and finance in the United States have already undergone as much, or more, of a crisis than will be encountered in the immediate future. There may yet be more or less of a panic in the stock market, but it is believed that this in its effects would stop short of the general industry and trade of the country.

Evidence is indeed at hand that the country is already adjusting itself anew for a further period of activity. The letter of our correspondent at St. Paul, published on April 7, set forth the surprising extent of the immigration that is now pouring into the northwest from the eastern states. It is largely in this way that the industrial situation in the east finds relief. It is thought by those in position to know that northern Dakota alone during the season will receive between 50,000 and 75,000 people, and that the entire territory will increase fully 100,000 people by autumn. Montana is also receiving her due share. The thing to be regretted in considering this immigration movement is that the southern states do not appear to be making much headway in attracting new citizens.

Telegraphic dispatches to BRADSTREET'S from leading trade centers throughout the country disclose a fairly satisfactory condition of general trade, with a tendency toward improvement. In the east there has been but little change since our last report. The movement there is hardly up to expectations. In the middle states some improvement is noted, though there are complaints from some sections of a lack of activity. From other districts a decided change for the better is reported. The uncertainty as to the practical effect of the new tariff on textiles appears to have had a retarding influence on trade in those lines. The reports from the west vary somewhat. In some localities there, there is not so much activity as was expected, though a healthy feeling generally prevails. In most districts, however, trade is in the main satisfactory; in some the improvement has been marked. The reports from the south tell of but little change. In most branches no more than the usual business has been done. The general feeling there is one of quietness.

Were it not for the trouble with the New York Central the stock market during the past week would have been destitute of any feature worthy of note. That stock has had a decline which, in view of its usual steadiness, has been serious enough to cause much discussion in Wall street. It is admitted that the approaching completion of the rival West Shore road has had the effect of alarming many holders of Central stock, who fear a reduction of dividends in the future. The railroad situation at this time is considerably mixed in respect to the trunk lines; but the roads are making, and have been for six months, large earnings.

The labor situation has crystalized about as foreshadowed in BRADSTREET'S review of the prospects one week ago. The railroad coal-pit miners in the vicinity of Pittsburgh struck on Tuesday to the number of 8,000, against a reduction of from 3½c. per bushel for mining to 3c. The operators claim they cannot pay the former price, but the men think differently, and have exhibited the courage of their convictions. Last year the same men struck for an advance of from 3½c. to 4c., but failed to get it. They were out from April 1 to August 15, and suffered severe privations. On Thursday the western iron-mill manufacturers met the Amalgamated Association of iron-mill workers, by committee, at Pittsburgh, to decide upon the terms of wages to date from June 1, next. A prolonged session was expected, but fifteen minutes sufficed. The meeting began by a declaration from one of the association that the puddlers could not consent to accept $5 per ton for boiling iron on the 2½c. basis of bar iron, and $4.50 for 2c. These terms mean $5 at the present time for puddling instead of $5.50. The mill owners thereupon arose and left the meeting. The outlook, therefore, is for a strike on June 1. The mill owners present represented nearly $30,000,000 of invested capital, and the association some 100,000 workmen. Last year's enforced stagnation in the iron industries, therefore, appears likely to be repeated in full force. The various smaller labor troubles affecting tobacco manufacturers and others do not promise to be of long duration.

At the annual meeting of the New York Chamber of Commerce on Thursday the conduct of the members of the legislature who have been active in attempting to strangle the bill for the reduction of the Sandy Hook pilotage fees was roundly condemned. Attention was called to the disrespectful manner in which the Chamber and its representative had been treated by some of the Albany Solons. While the discussion was being carried on by the Chamber the debate upon the bill was being brought to a close in the Senate. A count of the votes showed that the bill had been lost by a vote of 14 to 12.

The legislature has finally passed the bill providing for a commission to direct the construction of a new Croton aqueduct. According to the *Times*, reliance for the good conduct of the commission must be upon four members, irrespective of the other two, one of these two being the present Commissioner of Public Works. It must be admitted that the discussion in the public prints regarding the make-up of this commission and the acts of the legislature in relation thereto is well calculated to present to a foreigner the forbidding side of American politics. The daily journals of the city are unanimously of the opinion that the controlling motive at Albany was to see that the construction of the aqueduct shall help to build up political faction. But this has been almost an accepted rule hereabouts for more than a quarter of a century. It is idle to expect anything better until a deep and lasting reform shall have been forged out.

It is perhaps too much to hope that, in providing money for the cost of the aqueduct, a portion at least of the present annual surplus proceeds of taxation will be diverted thereto, instead of borrowing directly the whole amount required, and thus further complicating the city accounts through the sinking fund jugglery. It is a striking commentary on the situation that some far-seeing man, with the courage of his convictions, has not as yet appeared above the surface at Albany to propose a comprehensive reform in the city's accounting, to the end that the city might have but one cash account, and be able to exhibit an intelligible annual balance sheet. Such a reform, however, will only proceed from local influences.

The civil-service people are not well pleased with the latest developments that have transpired in relation to their cause and its prospects. The appointment of Mr. Keim, in particular, has occasioned surprise and disappointment among them. *Harper's Weekly* very frankly declares that the selection of Mr. Keim for the post of chief examiner is a serious disappointment. That gentleman, the editor says, is well known in Washington, but is unknown anywhere as a friend of reform. However many things have to be considered and whatever concessions must be made, one thing, he says, is absolutely indispensable at the outset of the new movement upon the part of all concerned, and that is hearty faith and interest in the necessity and practicability of reform. The editor adds that it will be a cause of sincere regret if the selection shall prove to have been intended as a stroke of mis-called diplomacy—a choice made to conciliate the politicians. Here seems to be another instance of a truth not yet rendered sufficiently familiar to enthusiasts for the efficacy of legislation, that it is one thing to have a measure of reform passed, and another to have it carried out according to its spirit. The administrator has in many ways the advantage of the legislator.

It would be strange, indeed, if the rivalship of France and Germany should be carried as far as Madagascar, and a new scene of contention opened such as that upon which the struggle between France and England was fought out in the latter half of the last century. That France has aspirations for the acquisition of colonial dependencies has been rendered plain by her recent movements in the south and east. The dramatic element would be fittingly introduced by the appearance of Germany as the protector of oppressed states in the remote corners of the world. It was reported some days ago that the Malagasy envoys had asked the protection of Germany against French aggression in Madagascar. Whether Germany is likely to engage in any such enterprise as the invitation of the envoys opens to her may be regarded as doubtful; but the generation now closing has been full of surprises, and the possibilities hinted at in this striking piece of news render it at least worthy of a passing mention.

UNEQUAL TAXATION IN PENNSYLVANIA.

On June 7, 1879, the legislature of Pennsylvania passed an act under one section of which it was provided that no foreign corporation, except foreign insurance companies, which did not invest and use its capital in the commonwealth, should have an office or offices therein for the use of its officers, stockholders, agents or employés, unless it should first have obtained from the Auditor-General an annual license to do so, for which license every such corporation should pay a tax at the rate of one-fourth of a mill on each dollar of capital stock which said company was authorized to have. The revenue derived from this tax has never been large. During the last fiscal year but $10,480.99 was collected by the state under its provisions from twenty-eight corporations. Of this sum a little more than one-half was paid by a single corporation, the Norfolk & Western Railroad Company.

The act has excited a great deal of hostility, and it is now sought to bring about its repeal. The operation of the law has been, indeed, anything but happy. The revenue collected under it is trifling in amount. On the other hand, its unwise provisions have tended to drive away from Pennsylvania much business of a kind which naturally gravitates in that direction. Some of the corporations having offices in Philadelphia, for instance, preferred to give up their offices rather than pay the tax. Others, again, who had been contemplating a settlement in Pennsylvania went elsewhere to establish themselves. In case of the continuance of the present policy it is not to be doubted that many of those still remaining in Pennsylvania will locate themselves somewhere else, where taxation is conducted on intelligent principles. As is naturally to be supposed, the business interests of the state have lost considerably by this law. The railroads found in Philadelphia a convenient market for the purchase of the great bulk of their supplies, and their custom helped to swell the profits of the citizens of the state, particularly of those engaged in manufacturing pursuits. The Texas & Pacific Railroad, for example, which had its general office in Philadelphia, purchased in that city from 1874 to 1880 more than 35,000 tons of rails, together with large quantities of construction and material equipment. Since its removal to New York a much smaller proportion of its purchases are made in Pennsylvania. The Norfolk & Western Railroad, which during last year paid $5,250 as taxes for the privilege of having an office in Philadelphia, together with its related companies purchased $827,395 worth of material in the course of the year. Numerous other instances might be adduced, but these are sufficient to show the imbecility of a policy which would drive the corporations from the state.

It is encouraging to notice that the movement for the repeal of the office license tax is supported by an intelligent public opinion. The Philadelphia Board of Trade have presented a memorial to the legislature in which they represent that the office license tax is so excessive as to prevent many foreign corporations from maintaining offices in the state, and that the effect of such legislation is to drive to other cities corporations which would otherwise make extensive purchases of supplies and materials in the state. They earnestly request the legislature to repeal the law, to the end that business may be retained within the limits of the state which will otherwise be permanently lost to it. The press of Philadelphia has also taken up the subject, and has urged the repeal of the law referred to. The *Press*, of that city, very sensibly says regarding the principles underlying the license tax law: "But it is obvious that such taxation is a penny-wise and pound-foolish policy, as these foreign corporations contribute directly to the wealth of the community. They are our customers, and should be encouraged to pitch their tents among us. What property they have here is very properly taxed, and of this there is no complaint. But they naturally rebel against being taxed under the form of a license on their capital stock invested and taxed elsewhere."

It is to be hoped, in the interests of justice and of sound principles of public economy, that the license-tax law of Pennsylvania will be repealed. The question involved is one which does not concern Pennsylvania alone; it has here, and at the present time, an interest wider than can be bounded by the lines of a state. The law itself is an instance of the desperation of the unskillful tax-gatherer, who in a blind effort to build up a revenue saps the foundations of the wealth of the state. If the principle upon which it is based were unshrinkingly applied in every state corporate capital would be driven, not from Pennsylvania alone, but from the United States. When it is considered to how great an extent the great enterprises of the world are conducted by associated capital the importance of the matter will be understood. The practice, too, of taxing capital beyond the borders of the state is one into which legislators among us are peculiarly likely to fall, partly through ignorance of correct economic principles, in part because of the peculiar relation between our states, and partly because of the growth of an undiscriminating proletarian spirit, marked by a very pronounced hostility to organization of capital. It is well, therefore, to withstand firmly the beginnings of an evil which may grow to very serious dimensions, it being, in economics as in other matters, much easier to apply a remedy than a cure.

MR. GOSCHEN ON THE PURCHASING POWER OF GOLD.

Mr. Goschen has laid a more elaborate statement of his views regarding the present purchasing power of gold before the London Bankers' Institute. We give place elsewhere to the more important portions of his paper. If Mr. Goschen, or any other economist of the day, were to allege that some portion of a given decline in prices is traceable to a falling off in the supply of the standard measure of values (gold), it might be impossible, or at least not worth while, to deny it; but when fluctuation in the supply of gold is alleged to be the one main cause of a decline in prices, there exists sufficient ground for a general denial. The London *Economist* scores a point against Mr. Goschen's evidence by showing that the fall in prices from 1873 to 1877 was much greater than that since 1877, and that up to 1877 Germany only was accumulating gold. Coming to the United States, the *Evening Post* reminds Mr. Goschen that the United States Treasury was in the habit of carrying $100,000,000 of gold independently of the subsequent accumulation for resumption purposes. To our mind, Mr. Goschen is ascribing an important resultant to a cause which at best is only a partial one. Perhaps the only practical result of the endeavor to ascribe the admitted fall in prices to an abiding cause will be a more persistent demand for a reduction of rents in England. It does not appear that Mr. Goschen would prescribe any remedies in the way of legislation. He concludes that a fall in prices does not at all imply a reduction of trade, or even after the transition period is over a diminution of profits. Such a speculation as this of Mr. Goschen can, perhaps, do no harm, save as it may bolster up the hopes of those who would continue the silver coinage in the United States.

CITY DEBT-PAYING AT ELIZABETH.

The city of Elizabeth, New Jersey, is not getting on very well in trying to adjust its debt to its means of paying. For something like a year a settlement of the debt at 50 cents on the dollar has been in progress, but the Singer Sewing Machine Company now declares that unless the city has secured the consent of all the creditors to the scheme by the 15th of May, proceedings by mandamus will be pushed against the city. The claims of the Singer Sewing Machine Company aggregate about $1,000,000. It is plain that the further adjustment of the debt on the basis named will be stopped, and that the city will speedily be in the hands of the courts. It is understood that obligations have already advanced to judgment amounting to some $1,500,000. Were the collection of this sum to be at once enforced against the taxpayers the resulting tax-rate would be 12 or 12½ per cent. on an assessed valuation of $12,500,000. Beyond this a 2 per cent. rate is required to meet the expenses of the local government. This would bring the tax-rate up at the start to 14 or 14½ per cent. It appears that such a rate of taxation would apply to both personal and real property. It is said that through fear on the part of tenants that their furniture may be disturbed by the tax-gatherers, rentals have already decreased 25 per cent. It is evident that the Singer Company, as a principal, is disposed to push to the full whatever virtue there may be in the writ of mandamus unless the whole debt is recognized at a nominal rate of interest. Should the court officers undertake to enforce the collection of any such rate of taxation as 12 or 14 per cent. the outcome of the contest will be awaited with exceeding interest. So far as we have been able to learn no court has been able thus far to make headway in collecting a city tax large enough to threaten the bread and butter of the taxpayers. To set about such collections vigorously is to depopulate a city. The dwellings, stores, etc., of a city, properly understood, have little or no value apart from the people who live in them. If no one is disposed to live at Elizabeth the houses instantly become little more than second-hand building material. It is reported that the objection urged against the plan for forty-year bonds for the face of the debt at 3 per cent. is that it assumes the possibility of collecting the whole of the city tax levy within the year of imposition. "The experience of cities all over the country being that not more than 60 per cent. or so is collected the first year, the receipts in the subsequent eight or nine years bringing it up to a total of only 90 or 95 per cent." This supposition is an outcome of the loose credit system, the results of which such cities as Elizabeth are now burdened. The records show that early in the century, before American cities had entered fully upon the loose borrowing system, the tax levy of a given year was practically collected within the year of imposition. A tax was treated as a debt due from one individual to all the rest of the community. This was treated as a sacred obligation, collection being speedily enforced when necessary. The manner of treating taxes in those days is pointedly illustrated by the collection laws of Philadelphia. Under the Philadelphia city ordinances of 1797 taxes became delinquent after three months, and it was laid down that in the event of delinquency at the end of that time distraint should take place forthwith. Tenants' goods were holding for taxes, the tenant to be repaid out of the first rent afterward accruing. In the absence of goods and chattels the body of the delinquent was to be taken to be treated "in all respects as a debtor under execution." Collectors were responsible for the prompt enforcement of the taxes. Thus: "If any of the taxes shall not be collected and paid to the treasury by said collectors within nine months, each and every of the collectors, and his or their respective securities, shall be answerable for the sums in the respective duplicates mentioned unless the said collector shall make it appear to the satisfaction of the city commissioners that the real estate taxed as aforesaid has been for all the time unoccupied, and the owner thereof out of the city and county of Philadelphia, or the persons charged with personal taxes were not to be found, or were by poverty disabled to pay the same." Instead of reasoning from effects following the inroads of a loose credit system, those who are managing Elizabeth's affairs should go farther back.

THE NEW YORK CHARTER QUESTION.

The Albany legislature is at adjournment without making any radical change in the organic laws of the city of New York. For a period of years the question of a new charter, or of amendments to the present charter, has come up annually in the legislature. It is far from encouraging to find that year after year the legislature is apparently no nearer a solution of this all-important question. The simple truth is that no general scheme of reform will ever be worked out at Albany. It is idle to expect that the source whence the greater part of the present confusion has proceeded will reverse the process and effectively undo the harm that has been done. The reform of the organic law of New York city must of necessity be of local origin. About a quarter of a century ago the attempt was made to guard against the excesses of the city council by transferring the seat of government, for the most part, to Albany. For devising an adequate remedy for the resulting evils no better preparation could be made than a study of the successive steps whereby the balance of power for Manhattan Island was fixed about at Poughkeepsie, say. Had it been entirely removed to Albany or left with the city entirely the gigantic Tweed corruptions would not have been possible. In the confusion which arose Tweed and all else were but a logical outcome. At a meeting the other night in furtherance of a non-partizan construction of the proposed new acqueduct, Dr. Howard Crosby declared that it is about time for New York to begin to take care of herself, as she is old enough and big enough. "The good

sense and intelligence of New York will never allow corruption to succeed long." At one time, as indicated, New York city was taking care of itself. The work in time came to be done not so well as it might have been, when just such men as Dr. Crosby, speaking through such organs of opinion as the New York *Evening Post*, demanded that the legislature and governor largely take the place of the then odious city council. These views were carried out. There will not be much improvement hereabouts until the error of 1857 is understood and acknowledged. New York city can take care of itself if given back the ordinary machinery of local government, but it can do nothing now while such a question as the repaving of Fifth avenue is a matter of ordinary legislation at Albany.

BRITISH AGRICULTURAL STATISTICS.

The latest authoritative information regarding the condition of British agriculture appears in the last *Journal of the Statistical Society*, London, being a paper by Major P. G. Craigie. The document was laid before the Statistical Society on January 16 of this year. The writer first directs attention to the great development in statistical inquiry as compared with twenty years ago. While allowing for the somewhat contradictory accounts of the present agricultural disaster, it is asked what the "Babel of conjectures and explanations" would be but for the institution of the British Board of Trade agricultural returns in 1866. It is pointed out that the early estimates of Mr. McCulloch and Mr. Caird deserve mention for the remarkable approach to the subsequently ascertained facts. It is noteworthy that for years before the regular collection of agricultural statistics was undertaken in England by the government an official record had been made in Ireland. By way of showing the early vagueness of English agricultural statistics the fact is noted that Mr. Pitt, in estimating for the income tax, assumed the acreage for England and Wales a matter of close upon 47,000,000 acres, when it was only some 37,000,000. Various experiments in the gleaning of statistics were made at intervals, with indifferent success. The chief hindrance at first was the prejudice of the farmers. The hope is expressed that the new British agricultural department, which it is expected will be speedily created, will do great things for the development of agricultural statistics. Much attention, says the writer, has been given wheat crop statistics to the neglect of other crops; this while only one-eighteenth of the land returned as cultivated in the United Kingdom is given over to the growth of wheat, while the value of the crop is only from a tenth to an eighth of the aggregate outturn of English farms. After tabulating such statistics as are available the writer finds much that is interesting in the fluctuation of the mean yield of the country at different periods. The yield of 23 bushels of wheat per acre, at which Arthur Young placed the English wheat crop in 1770, was lowered subsequently to 21 bushels, the mean of the figures McCulloch quoted from the Board of Agriculture reports. In 1850 Sir James Caird's careful estimate showed a material advance to an average of 26½ bushels. Eleven years later the decidedly higher estimate of 29 bushels per acre was arrived at by the *Mark Lane Express* inquiry. In 1868 Sir James Caird estimated the yield at a bushel less, or 28 bushels. Returns of 1870 raised the estimate for all England to within a minute fraction of 30 bushels, and the result of the independent inquiries made under the late Royal Agricultural Commission virtually corroborates this high figure, giving as the mean of thirty-six counties a predepression average little under 29½ bushels. The average of the assistant commissioners' statistics of yield in 1879 is somewhat higher than the commonly received version of that most disastrous year for the English wheat-grower, namely, 29.7 bushels per acre. The *Mark Lane Express* estimates of the seven depressed years, 1876–82, appears to be 24.7 bushels. This while the results of inquiry later show the normal wheat yield to be still held to reach 28 bushels, although the crop of 1882 was but 26½ bushels. The fluctuations of English barley are also deserving of attention. According to McCulloch the mean for England was 32 bushels at the beginning of this century. Sir James Caird in 1850, and the *Mark Lane Express* in 1861, raised the average to 38 bushels. The inquiries of the writer we are quoting tend to place the average barley crop of Great Britain at something less than 35 bushels per acre, and the crop of 1882 at no more than 33 bushels; thus the tendency is to conclude that the production of barley, like that of wheat, has received a check. The yield of oats has also fallen, according to Major Craigie, the yield per acre having declined from 44 and 46 bushels to not much over 40 bushels. In contrast with these figures the average yield of wheat per acre in the United States, according to the last national census, was 13.1 bushels, of barley 24.5 bushels, and of oats 25.8 bushels. It is known that thorough cultivation has done much to increase the yield per acre of cereals in England. The current statistics at hand show the extreme difficulty of maintaining a high rate of yield however thorough the cultivation may be.

As regards meat production in England, it is unfortunate that the only statistics relating thereto which can be fully accepted are the figures showing the gradual increase in price. It appears that in England, from 1849 to 1868, beef rose from 4½d. per pound to 7d., and mutton from 5d. per pound to 7½d., or 50 and 55 per cent. respectively. Regarding the decreased production of the soil of Great Britain during the six years of depression, the conclusion is reached that the loss "must be at least 30,000,000 pounds a year under that of happier days." In general, "the former advance in yearly production is unquestionably checked, while the possibility of future increased production is arrested by the risk of unremunerative enterprise." It appears that this last cause is probably the main hindrance to the recovery of British agriculture. There has been so extended a succession of bad harvests that renewed energy on the part of farmers is very difficult by reason of the fear that only further disaster is in store.

Reference is made in Major Craigie's address to the work done by leading countries in collecting agricultural statistics. The palm is given to the United States. The last published statistics of Russian agriculture, so far as received at London, do not appear to come down to a later date than some ten years back. It is announced, however, that a complete system of crop reporting has recently been established in Russia, and that three separate reports on Russian crops will hereafter be rendered—in spring, in summer and in autumn. The French statistics are obtained in separate installments; the breadth of autumn-sown crops being rendered on December 11, yearly, and spring-sown crops on May 15. After the giving out of various reports in November, a final estimate, giving the latest data as to total yield, is given, and a month later the average weights of wheat, barley, oats and rye. The whole of this information is collected through the prefects and their staffs, the mayor of each commune, with the aid of a local council, making local reports. In Germany estimates of the mean produce of corn and other crops are taken yearly, but only in some of the states is the acreage annually verified, a fact which renders inaccurate the total returns of produce. In Austria use is made by the government of the various chambers of agriculture for the collection of produce statistics, these bodies receiving from the government a subvention for this purpose. In Belgium only the estimated mean yields are obtained annually, the final agricultural statistics being compiled at considerable intervals. In Norway all occupiers were required in 1875 to make returns of acreage and live stock. Yearly returns of produce and of the value of stock are obtained by the chief officers of large areas. These are taken from the average of certain specimen forms in each subdivision of these areas, but are only estimates. In Sweden, where a new statistical system has been proposed but not carried out, reports are now made by the central department of statistics from acreage returns obtained by the Economic Society. In Denmark the area under crop is enumerated only every fifth year, the last made public being for 1876. The absence of a yearly record of acreage, as in Germany, must render the figures inaccurate. It appears that the fears of the agriculturists as to the raising of rents operates as a hindrance to effective crop reporting in Great Britain.

THE MOVEMENT OF PRICES SINCE 1879.

A close inspection of the prices of staple commodities during the past five years reveals several distinct and characteristic features. The period covered is one of especial interest, in that it comprehends what is familiarly called the last great business "boom." In 1879 the trade of the country felt the first impulse of revival from the stagnation which for several years followed the excessive activity which culminated in 1873. During 1879 and the two successive years this movement onward and upward gained in velocity and momentum, and may be said to have fairly culminated with the close of 1881. The opening of 1882 was looked upon askance by keen observers of the situation. Predictions were freely made that the enormous investments of home and foreign capital throughout the country would lead to a crisis of some sort. The vast extension of railways had not then been checked, and was an especial source of alarm. Speculation, not alone in stocks but in almost every staple commodity, was indulged in with reckless prodigality. General trade had expanded, and the system of mercantile credits had been extended to almost dangerous limits. But 1882 saw none of the predictions of evil verified. Even the prolonged strike of the Pittsburgh and western iron-mill employés failed to precipitate anything like general disaster. Prices, however, were notably on the wane. Iron, a trusted trade barometer, as early as in May, 1882, began to decline in price on all varieties. In some lines the downward course of quotations of iron had long previously begun. The commercial caldron had been placed over a hot fire for three years, and the question was being discussed on all sides whether it was to boil over. That catastrophe was evidently not to occur, and the high heats of over-trading and extravagant speculation being drawn, a gradual settling process, rather healthful than otherwise, has since been observed. The business community cannot fail to find of interest a retrospective glance at the course of prices of staple articles during the period thus outlined, the result being to form a gauge how far up and down the scale the movement has been.

As might have been expected, iron and steel, after advancing with rapid strides to the highest notch, have since undergone a steady and almost unbroken decline. The cereal products have departed from this course, consequent upon the varying size of the crops, but the steady increase in prices is generally maintained, up to and including 1881 in the leading grains. This is correspondingly true of provisions and dairy products, although special causes have since conspired to prevent a uniform movement in prices thereof since the close of 1881.

Pig iron, perhaps, better than all other staple articles characterizes in its fluctuation of price, the expansion and construction of values taking place in the United States from 1879 to 1883. In July, 1879, No. 1 foundry, anthracite iron, at New York, was sold at $19 per ton. The advance from that time was marked and rapid. In January following it touched $39, and in February, 1880, $40. This was the highest price reached. Importation was stimulated, and likewise home production, and prices declined. In January, 1881, sales were made at $26, as they were again in February, 1882, after having gone as low as $24 in July, 1881. Tabularized, the prices of the variety of pig iron named, at New York, at intervals from July, 1879, to April, 1883, were as follows:

July, 1879	$19.00	November, 1881	$25.00
January, 1880	39.00	February, 1882	26.00
February, 1880	40.00	July, 1882	26.00
April, 1880	34.00	October, 1882	26.50
June, 1880	28.00	December, 1882	26.00
August, 1880	25.00	January, 1883	25.00
September, 1880	28.00	March, 1883	24.00
January, 1881	26.00	April, 1883	22.00
July, 1881	24.00		

The price of bar iron at Pittsburgh fluctuated during the year 1880 as follows: Bar iron, per pound, opening, 3½c.; highest, 4c.; lowest, 2c.; closing, 3¼c. It has been lower since, as might be inferred from the statement that pig iron in general has declined since 1880. The 2½c. card rate for bar iron is used as the basis of the western mills for settling the rates of puddlers' wages. It was the belief on the part of the puddlers in 1882 that bar iron was bringing more than 2½c. average rate, which induced them to demand and hold out for higher wages. And it is the claim on the part of the western iron-mill owners at the present time that the price of bar iron has fallen below 2½c. per pound, which warrants them, by the terms of agreement, in reducing the pay of puddlers from $5.50 to $5. But it is in steel rails that quite as wild flights are observed as in pig iron. The special call for rails, owing to the immense extension of railways during the past few years, found the Bessemer mills hardly prepared to meet the demand. As is well known, however, the proprietors of the Bessemer mills saw that the sun shone, and proceeded to make hay with earnestness and dispatch. Prices of steel rails, ordinary lengths, at Pittsburgh, opened in 1880 at $73 per ton, touched $90 during that year, declined to $60, and closed in December at $62. The enhancement in price was from an average of $40 about January 1, 1879. The boom in prices of iron and steel during 1880 will be best comprehended through the following comparison:

	January.		Per cent.
At Philadelphia.	1879.	1880.	*of inc.*
No. 1. anth. pig iron, per ton	$17.00	$35 00	106
Best refined bar, per ton	42.56	71.68	68
Bessemer steel rails at works, per ton	42.00	70.00	67

At New York the decline in steel rails (ordinary,) has been from $60 per ton in January, 1882, to $39 on the first of January last, or 35 per cent. At the present time steel rails are quoted at $39.50.

The steady increase in the average annual price of wheat at New York (No. 2 red) from 1878 to 1881, inclusive, is striking. The prices, as published in the annual report of the New York Produce Exchange, are: In 1878, $1.18 per bushel; in 1879, $1.21 9/10; in 1880, $1.26¼, and in 1881, $1.31¼. The average annual price of wheat at New York in 1882 will not be available until after the publication of the Produce Exchange reports for last year. But in October last No. 2 red, at this city, went as low as $1.07½, and last week touched $1.23¼. This evident decline, due largely, of course, to an abundant crop, is not explained altogether by that fact, but must in part share in the general shrinkage in prices suffered on all hands. As might be supposed, common extra state flour at New York will furnish quotations following closely in the movement up and down a graduated chart those which would be furnished by the course of wheat prices as shown. The prices of the grade of flour named, per barrel, ranged from $4.57 in 1878 to $4.58 in 1879 (average annually), to $4.78 in 1880, and to $5.19 in 1881. October 20, 1882, the figures had dropped to $4.35, and last week were unchanged. A like investigation with respect to indian corn fails to show a similar movement of prices subsequent to 1881, although prior to the close of that year the average annual price for No.

2 mixed at New York was not unlike that of wheat and of wheat flour. Corn averaged, for 1878, 51c. per bushel. In 1879 the average annual price was 49 3/10c. per bushel, in 1880 it was 54 13/16c., and in 1881 it had risen to 62½c. The falling off in supply, and the greatly increased consumption during the past eighteen months, however, conspired to hold prices up, and in October, 1881, 71c. was quoted, and last week 68c.

The gradual increase in the quotations for mess beef and leading hog products during the past five years hardly calls for extended explanation. The heavy demand at home and the requirements for exportation serve to continually sustain the prices thereof. The growth of supplies furthermore has failed to keep pace with that of production in other lines, both agriculturally and industrially. The range of average annual prices at New York city has been as follows: Mess beef, per barrel, old to new, in 1878 $11.62; in 1879 $11.00; in 1880 $10.52; in 1881 $11.52. Mess pork, per barrel, old to new, in 1878 $9.77; in 1879 $9.54; in 1880 $13.09; in 1881 $16.67. Tallow, per pound, in 1878 7.06c.; in 1879 6 5/16c.; in 1880 6 5/16c.; in 1881 6 15/16c. Bacon, per pound, in 1878 5.68c.; in 1879 5.32c.; in 1880 8 13/16c.; in 1881 9c. The jump in mess pork during later months has been from an annual average in 1881 of $16.67 to $22.25 in October, 1882, and to $19.75 in the last week of April. Tallow appreciated in value from 6 15/16c. (annual average) in 1881 to 8½c. in October, 1882, at which price it was quoted last week. Mess beef went up to $13.50 in October, 1882, from the average of $11.52 in 1881, but was recently quoted at $13. Bacon observed an average of about 9c. in 1881, but had touched 15c. in October last. It has since declined to about 11¼c. The leading dairy products, butter and cheese, have gone steadily forward in the race for higher prices, the latter having doubled its quotation in five years, and the former being nearly 50 per cent. higher than it was four years ago, but only 1⅞c. higher than five years ago. The list is as follows: Butter preserved an annual average in 1878 of 21¼c., in 1879 of but 16 7/16c., in 1880 25⅛c., and in 1881 of 24⅛c. In October, 1882, it was quoted at 23c., and at the same figure quite recently. And this in spite of the havoc which was looked for, consequent upon the advent of that baser rival, oleomargarine. The ascent marked by the average annual price of cheese is from 7⅛c. in 1878 to 7 3/5c. in 1879, 12c. in 1880, and 11 11/16c. in 1881. Six months ago it was quoted at 11¾c., and lately 14c.

The movement of quotations for crude and refined petroleum and naphtha is peculiar. Crude oil in bulk per gallon has gained in price, being now about ¾c. higher per gallon than it was in 1878, while refined oil is about 3c. lower and naphtha 1.1c. lower. Here we find the crude article appreciated in value, while the manufactured products are materially cheaper. An explanation of this may be found in the peculiar nature of our mineral-oil industry. The deposits of the crude article are known to be limited in extent. The continued exploitation of this territory, thus hastening the time when the known supply here will approximate exhaustion, tends to raise the level of prices. Better and cheaper processes for refining and more economical methods of preparing the same for use, the utilization of products, etc., naturally causes a lower range of prices for the same in commercial shape. The average annual quotations for the four years ending with 1881 (the quotations for 1882 and 1883 being actual) are as follows:

Crude petroleum in bulk, per gallon, 1878, 6.4c.; 1879, 3.6c.; 1880, 6¾c.; 1881, 6 11/16c.; October, 1882, 7⅛c.; April, 1883, 7⅛c.

Refined, per gallon, in 1878, 10 7/10c.; 1879, 8.08c.; 1880, 9⅛c.; 1881, 8 1/16c.; October, 1882, 8⅛c.; April, 1883, 7⅞c.

Naphtha, per gallon, in 1878, 7.1c.; 1879, 6.3c.; 1880, 7 1/16c.; 1881, 9½c.; October, 1882, 6½c.; April, 1883, 6c.

The course of cotton prices—middling uplands, at New York, spot—has preserved a remarkably even range during the past four years and a half, while the highest prices touched during each of the calendar years named have varied from 13¾c. per pound in 1879 to 13c. in 1881, and to 10 5/16c. in 1883 (not including the present week, when they have been higher), the lowest prices in each year appear to have rather offset the apparent general decline by advancing in a much more noticeable degree. The exhibit is as follows: 1879, highest 13¾c., lowest 8 13/16c.; 1880, highest 13½c., lowest 10⅜c.; 1881, highest 13c., lowest 10 7/16c.; 1882 (August), highest 13 1/16c., (December) lowest 10¼c.; 1883 (April), highest 10 5/16c., lowest 10c.

The annexed table shows the average prices of fine washed Ohio fleeces at Boston, Philadelphia and New York at the dates named:

	Price per lb.		Price per lb.
July, 1879	39c.	January, 1882	44c.
January, 1880	59	July, 1882	42
July, 1880	46	January, 1883	41
January, 1881	48	May, 1883	41
July, 1881	43		

In January, 1880, the price was run up from 42c. to 52c., and 50c. was paid in January, 1881, but the prices quoted above represent the average for the greater part of the months named. The sharp advance in 1880 was entirely due to speculation based on an anticipated short supply which proved to be unfounded. The same influence caused an advance of 5c. per pound in February this year, but the price has since receded to the rate current at the beginning of the year.

The comparatively high prices for coffee which prevailed for a few years prior to 1882 induced extended cultivation of the berry. The maximum of production, however, was reached in the year named, and while prices have reacted, owing to heavy supplies, they are rather better than otherwise as compared with quotations six months ago. Stocks in Europe and the United States on November 1 last amounted to 168,000 tons, against 159,000 tons in 1881, and 126,000 tons in 1880. The decline in prices in 1882, due to augmented supplies, amounted to about 2c. per pound on Rio, Laguayra and Maracaibo, and 3c. on Java. Although prices have gone off ½c. within the past week, still some members of the trade look for an advance during the year. They base their views on the fact that low prices received by the Brazilian planter have served to check rather than to keep up the heavy growth of coffee, and that the low prices inducing increased consumption will ultimately cause an advance. The lower range has already shown itself in an increased call for the better grades of coffees and a corresponding neglect of the commoner varieties. The course of prices of Rio coffee at New York has been as follows: Best Rio, ordinary lots, per pound, January, 1879, 17c.; 1880, 18c.; 1881, 16c.; 1882, 13¼c.; 1883, 11½c.; April, 1883, 12¼c.

The decline in prices of tea during 1882 and the embarrassments caused thereby among the importers will be easily recalled. Importations have since that time been comparatively restricted, but consumption has been stimulated, and the result is that these have larger stocks of the poor varieties on hand and less of the better. There has been more stability in the tea market since January, and slightly improved prices. The prices of cheaper teas have been stiffened somewhat by the passage of the act prohibiting the importation of trashy goods. The market at present is dull. Heavy offerings at recent auctions favored buyers, and the outlook is for cheap teas during 1883. Sample prices of teas at New York in ordinary lots, cents, per pound, are as follows:

		Opening January					Apr. 26,
		1879.	1880.	1881.	1882.	1883.	1883.
Oolongs	Common	22	22	22	18	18	18
	Best	75	75	75	75	75	75
Japans	Common	22	20	20	22	22	22
	Best	63	60	47	50	50	50
Young Hyson	Common	18	28	28	18	18	18
	Best	80	80	80	80	60	60

The high prices of 1880 flooded the market with common goods, and the natural effect on prices in 1881 is shown in the decline in the list just given.

Refined sugar at New York has maintained a comparatively even price during the past five years. In the early part of 1882 it was quoted at 9¼ @9⅜c. for ordinary lots. Fluctuations were noticeable during the year. The highest figure touched was 9¾c. and the lowest was 8¾c. The price December 31, 1882, was about 9c. The consumption of standard white granulated was very heavy in the year named, but the crops, both at home and abroad, were bountiful. The price at present, about 8⅞c., is considered low, and dealers attribute it in part as due to the reduction in duty on imported sugars. On the day of the passage of the tariff bill, March 3, standard granulated at New York was quoted at 9@9⅛c.; March 27 it had declined to 8⅞c. On April 12 refiners here cut down their production about 20 per cent. This, with the increased consumption which naturally follows lower prices, is expected to result in an advance by June or July. Holders of raw sugars are firm, and refiners are now buying for immediate wants only as the margin between the raw and refined article is very narrow. Standard granulated sugar, per pound: January 6, 1879, 8⅜c.; 1880, 9⅞c.; 1881, 9⅝c.; 1882, 8¾c.; 1883, 8¼c.; April 26, 1883, 8¾c.

These reviews of prices of twenty of the leading staple products entering into intimate relations with almost every individual consumer quite warrants the preference which has been awarded the iron industry by regarding it as the indicator of price movements. The widest fluctuations shown, the highest degree of inflation and the largest decline, have been made by pig iron and Bessemer steel rails. The only exception shown is Indian corn. This has been explained. Cheese, to be sure, is much higher than five years ago, and butter noticeably so. But the latter is somewhat lower, and the former is in turn governed by special influences to prevent its sympathy with the almost universal course of prices. The question which arises next is, how long is this process of returning to normal prices to continue, that is, when will bottom prices be reached? It would be impracticable in an article of the limits of this one to attempt to deal with this point as related to each and all the staple articles mentioned above. The best opinions, which have in the broadest view of the general industrial, commercial and financial situation been offered, incline to the belief that a fair or average crop of wheat and Indian corn this coming season will supply the impulse now lacking to see business go ahead with gathering and gratifying momentum.

THE NATURE OF SOME JAPANESE TEA IMPORTS.

The *Japan Weekly Mail* of March 10, and in the succeeding issue, presents an interesting account of the Japanese tea trade, and the character and volume of the demand for the teas of Japan from the United States, this country furnishing the only foreign market for the Japanese leaf. It is recalled that about twenty years ago China supplied the United States with almost its entire supply of teas, amounting at that time to about 40,000,000 pounds, of all kinds. Soon after 1872 Japanese tea sprang into favor, and succeeded, with the help of Formosa teas, in detracting a large share of the tea trade with this country from China. The price, it is noted, of Japanese teas in the United States was 65c. per pound (20c. duty). In 1872 the price had dropped to 42c., and in 1882 to 20c. The duty had long since been removed. The population's growth from 30,000,000 to 50,000,000, backed by low prices, has not increased the per capita consumption of teas here, which the *Mail* calculates at about 1¾ pounds per annum. The imports in the season 1881–82 included 20.7 million pounds of China green teas, 24.2 million pounds of China black teas, and 34.6 million pounds of Japan green teas, in all 79,500,000 pounds, or from 10,000,000 to 15,000,000 pounds more than the population will consume in a year's time. In view of this, the journal quoted recommends exports of teas to the United States on the basis of consumption here, in order that the drawback of low prices may be overcome. Improvements in the character of the crop are likewise suggested, and the admission is made that Japan teas have not held to the high grade at which they ranked a few years ago. As bearing particularly on the subject of trashy teas, and explanatory of the above, the following extract is of interest:

"As the trade grew, both native producer and foreign buyer began to disregard this distinguishing merit of the Japanese leaf. For the sake of greater or quicker profit the producer no longer confined his pickings to the delicate spring leaves, but tore from his shrubs all through the season everything that could be manufactured into the semblance of tea, and reduced his manipulation to a minimum. On the other hand, the foreign buyer, finding that the greater part of the teas offered to him no longer possessed the fine color and handsome appearance of former times, resorted to factitious methods of making this poor stuff seem better than it was, and by ruthlessly mixing the products of different localities, by breaking up the leaves into small pieces, and by covering the whole with an artificial color, he sought to conceal the inferiority of his purchases and to impose on the unsuspecting consumer in America. Both parties thus did their utmost to spoil a valuable trade, and they were heartily seconded in their wretched work by the New York brokers, who found in these garbled teas a means of preserving their own importance as experts, since it was impossible for any unskilled person to determine the value of an article so utterly denaturalized. By these various means Japanese green teas have gradually lost their former distinctive characteristics and value, and the American market is now surfeited with trash which is no better than the average Chinese green tea, and has little advantage over it in the eyes of any consumer." This manipulation is declared to be true, not only of the inferior grades of Japanese tea, but of the better varieties as well."

It is added that nearly every pound of Japanese tea shipped to America is subjected to the disgusting operations which one may see any day in the tea-firing houses of Yokohama and Kobe. The same journal explains that the Japanese producer delivers the tea in its native state to the foreign merchant, and that it is "to their foreign agents alone that the American people are indebted for the conglomerate of tea leaves and pigments saturated with the sweat of unclean laborers which is thrust upon them under every attractive title unscrupulousness can suggest, and is sold in New York as 'pure Japanese tea.'" As a step ahead in the direction of pure teas of good grade, the *Mail* recommends that the Japanese producer himself cure the leaf and pack for export. All that foreigners at the ports do towards improving the tea could, it is asserted, be better done in the interior. There is no mystery in the operation.

"It consists mainly in equalizing quality by bulking the tea; in thoroughly expelling all moisture by roasting in iron pans; and, finally, in packing, while still warm and dry, in lead-lined air-tight chests of suitable size. Any one of ordinary intelligence can easily perform all these processes. Good faith, loyally observed, tea packed in the country would be equal, and possibly superior, to the tea packed at the ports, and could not fail to find ready sale. Some buyers would even prefer to have their tea thus brought to market ready for shipment, and those who might at first oppose so reasonable a change would finally be compelled to accept it." The confessions contained in the article quoted respecting the very general bad character of the Japanese teas in the United States will surprise many. It would be important to know to how large a proportion of tea the recently passed law against the importation of trashy teas would apply if all that has been alleged of Japanese teas is true.

OCCASIONAL NOTES.

It can scarcely be said that there is much discrimination exercised in the fixing of salaries for public officials in the United States. One of the daily papers of New York city lately gave an account of the ineffectual effort of the Board of Police Justices in the city of New York to secure the election of a clerk of the Court of Special Sessions. The office it appears is a very desirable one, especially in the matter of salary, hence the struggle over the disposition of it. The salary, it is understood, is fixed at $6,000 a year, and the clerk is to hold office for ten years. An intricate system of parliamentary tactics was exhausted in the effort to delay the choice until reinforcements upon one side or the other should be brought up. Conveyances were even hired by friends of the candidates to transport the justices with dispatch to the place of meeting. With other and more responsible offices it is often far otherwise. It is not very long since the United States District Judge, sitting at New York, resigned his office because of the inadequacy of the salary attached thereto. He, an admiralty judge, dealing with the varied and complicated business which naturally comes before such a court in New York city, felt compelled to relinquish a position from which he derived an income of only $4,000, half what is received by a police justice in the city of New York and less than is paid to the civil justices of lowest instance in that city. Comment on the existence of such a state of affairs could only be weak and unsatisfactory. It is to be hoped that the civil service reformers will give the matter attention and do something towards bringing about a sadly needed change in the direction indicated.

Very recently the witty editor of one of the leading legal journals of the country entertained his readers with some characteristic reflections on the law of the state of New York preventing the catching or sale of lobsters less than ten and a half inches long, making merry in particular at the difficulty surrounding the application in every instance of the unyielding measure of the statute. The writer conceived the law in question to be likely to lead to severe infractions of the inner law of conscience; but it appears that it has had effects of a much more palpable character. The law was passed at the instigation of certain dealers in fish and others interested in fish culture, who thought that its passage would be beneficial to all parties concerned. Now, however, on mature reflection they have arrived at the conclusion that the legislation in question has been of no advantage whatever either to the lobster or to the business in which they are interested. They aver that the law referred to has operated to legislate lobsters out of the state. The quantity of lobsters caught in New York is said to be so small that it does not enter into the consumption. Lobsters are mostly caught in Maine, Connecticut, Massachusetts and Rhode Island, and in those states the business is one of some importance. In Connecticut there is no law prohibiting the sale of lobsters of any size. In April and May all the lobsters that find a market come from Maine, and are sold by those who catch them to smacks sent out for that purpose from New York. As the lobster-buyers in Maine, however, are restricted to certain sizes, it happens frequently that no lobsters at all can be had. Many who have

given the subject attention are in favor of abolishing prohibition as to sizes in all the states. The moral of the affair, if it be necessary to append one, is that legislation is a double-edged weapon, and that one who seeks to use it for his own purposes needs to be very cunning of fence to escape an occasional wound.

The bulletin of the South Carolina Department of Agriculture for April has a paper on the cultivation of castor beans, by Mr. C. C. Fuller, of St. Louis, in which the writer gives some statistics as to the yield, price, etc., of these products. It has hitherto been cultivated chiefly for the oil, which is used largely for medicinal purposes. At present it is employed quite extensively for lubricating purposes and also as an oil for the hair. In our climate the plant grows from five to eight feet high. Almost any soil that will produce wheat or corn will answer for the castor bean. The soil, however, should be dry; wet, heavy soils not being adapted to its successful culture. An important fact in relation to the culture of the plant is its fertilizing property. In this respect, it is said, it surpasses even clover. The yield of the crop depends much upon the culture bestowed on the crop, upon the season, and the care exercised in gathering and ripening the seeds. The average yield per acre is from 15 to 25 bushels. Castor beans have, it is said, usually been a profitable crop. The market price, however, has fluctuated considerably. In 1865 prices advanced to $6 per bushel, in 1866 to $4, and since then the highest price has been $3.30, and the lowest $1.40 per bushel; usually from $1.60 to $1.75 per bushel. If used for medicinal purposes alone, the writer says, the demand for castor oil would doubtless be limited, but its value for lubricating purposes, he adds, should give it an almost unlimited demand.

The vote in the British House of Commons upon the grants to the military leaders for their services in the late war in Egypt, reveals clearly enough that some among the English people have come to take a sensible view of the occurrences in Egypt, and also are opposed to the manifestation of the militant spirit in the national councils, of which the recent lauds and toasts have been the accompaniments. The leaders singled out for reward are naturally identified, by people of the class we have referred to, with the events in Egypt itself and with the motives and results of the war, otherwise it is unlikely that there should be so large a showing of a spirit which has been stigmatized as unmannerly and ungenerous. The results of the war have been somewhat disappointing. The situation there is seen to be more complicated than was at first expected. The war itself, though well planned and swiftly carried to a conclusion, was not of great magnitude, and it afforded little opportunity for the display of that heroism with which great rewards are commonly associated. For this reason many of the critics of the war see in the rewards proposed to the commanders a movement toward a resuscitation of the Jingo policy, which was understood to have been unequivocally condemned when the present House of Commons was returned.

Recent events have given fresh point to discussions about the probable durability of the republic in France. Especially have people been led to concern themselves with the interesting problem by reason of the recent "triple alliance" and the utterances of the German press to which that event has given rise. The *Economist* returns to this subject in the last number at hand, and gives a somewhat discouraging view of the situation of affairs in France. It seems that, however matters may be regarded abroad, within France itself there is genuine alarm. The educated classes fear the advancing strength of socialism. The moneyed men deplore the condition of the finances, and are realizing their wealth in forms which will admit of its removal, and finally the priesthood, who mingle with all classes, believe that the republic is about to pass away. The next point of importance, granting the uneasiness and the discontent, is the direction from which the danger is likely to come. The new movement, it appears, is expected to proceed from the army, instead of from the people. The generals are discontented for obvious reasons, but there is room for doubt whether this discontent is in a collective, organized shape. The generals have no candidate whom they care about, they have no immediate and producible grievance, and they are not likely to attack the republic openly as such. The opinion is expressed that the discontent is not likely to become active unless it seizes the people; but that here the grounds for uneasiness are real. The material interests of the people have suffered of late, profits have not been large in any department of work, and in many directions losses have been severe. The remembrance of the Union Générale crash and the current outgivings about finance in general are in no way calculated to increase the confidence of the people in the government, which the French people are prone to hold responsible for nearly everything. At the final analysis, then, the danger is seen to lie in the economic situation. Should this grow worse, or not speedily show signs of improvement, the opportunity of the generals might arrive. The views set forth above are worthy of consideration, but there seems to be in them something more of gloominess than is called for by the indications which appear upon the surface of French affairs.

The Manchester *Guardian* refers to the fact that as a result of the reading of Mr. Inglis Palgrave's paper on the gold coinage before the London Institute of Bankers a representative committee of London bankers was appointed with the object of pushing still further certain inquiries in relation to the subject, and bringing the result before the government, and says that this committee has drawn up a circular on the subject which has been sent to every bank in the United Kingdom. The circular suggests that the progressive deterioration of the gold coinage must be well known to bankers, who may be expected to be desirous of impressing upon the government that the expense of recoinage and the loss by wear and tear should not be charged on the last holder. It is also expected that the bankers will recognize the advantage of having the gold coinage placed on such a footing that the gold in ordinary circulation could be readily paid into the Bank of England. Forms available for making returns have been inclosed with the circulars, with the view of obtaining accurate information for presentation to the government as to how much coin is held by the banks. The provincial banks are invited to return to their London correspondents the aggregate amount of gold held by them at their head office and at their branches at a given date (April 30, 1883), and the London banks are requested to receive and add up such returns from their country correspondents, and to make similar returns on their own account. The collection of figures made cannot fail to be valuable and instructive, whatever view may be taken by the government of the recoinage question. The result of the inquiry will be awaited with interest.

The returns of the British Board of Trade for 1882 show that the total volume of foreign trade of the kingdom increased during the year by a tonnage of over 3,500,000 over the previous year. While the largest part of this falls to the share of English shipping, the proportion claimed by foreign shipping is larger than for any previous period. The total tonnage of sailing and steam vessels entered and cleared at ports in the United Kingdom in 1882 amounted to 61,191,255, as compared with 57,949,545 in 1881. Of this total tonnage, British ships carried 43,670,361, an increase of 2,137,102 over 1881, and foreign ships carried 17,820,894 tons, an increase of 1,414,608 over 1881. The great increase in steam traffic within the last quarter of a century is illustrated by the fact that the tonnage of British steamers has increased nearly ninefold since 1860, the total tonnage for that year being a little over 4,000,000, whereas the total for 1882 was 35,404,015 tons. In this department the advance made by foreign shipping is likewise notable. The total tonnage of the British merchant navy is but little more than 1,000,000 less than the tonnage possessed by the rest of the world. The tonnage of steamers is shared in a different proportion, the British tonnage being 3,571,078 and that of the rest of the world 2,646,408. Nearly one-half of this foreign tonnage is made up of steamers employed on the lakes and rivers of America. The tonnage of vessels built in the United Kingdom in 1882 was 783,051, a large increase over the preceding year, when it reached only 608,878. In the United States the tonnage built in 1882 amounted only to 282,269, a slight decrease as compared with the previous year. In France during 1881, the last year for which statistics are available, the tonnage built was about 20,000 tons, whilst that purchased abroad amounted to 34,909. The comparisons instituted with regard to the passenger traffic show very striking results. The number of British vessels carrying passengers from the United Kingdom to ports out of Europe during 1882 numbered 826 and represented a tonnage of 1,934,519. The foreign ships engaged in the same traffic numbered only 35 and represented a tonnage of 69,650.

According to a recent report by the Spanish ambassador in Paris to his government on the commercial movement between France and Spain, the trade between the two countries is almost double what it was eight years ago. The relative position of Spain in the list of foreign traders with the republic is still maintained; she occupying now as she did in 1875, the seventh place in the list. On the other hand, while her transactions with France in 1875 amounted to only 3½ per cent. of the total foreign trade of the country, in 1881, two years ago, they were over 6 per cent. There appears to be a growing demand for Spanish wines in France. In 1879, 46 per cent. of the total Spanish exports to France were wines. In the next year the proportion rose to 60 per cent., and in 1881 to 67 per cent. The stability of the trade in wines is questioned by many because of the extraordinary increase. The author of the report referred to, however, is of the opinion that a permanent trade in Spanish wines has been created in France; an opinion which, it is said, is shared by many among the French viticulturists. The ambassador attributed the increase partly to the unfortunate condition of the French vineyards, partly to the inherent qualities of the Spanish wines, and in part to the treaties of commerce. The value of the total Spanish exports to France increased from 155,000,000 francs in 1877 to 402,000,000 francs in 1881. During the same period the value of the wine exported increased from 21,000,000 to 270,000,000 francs.

LETTERS TO THE EDITOR.

AMERICAN GRAIN TRADE FROM 1789.

To the Editor of BRADSTREET'S.

SIR—As supplementing my letter of April 21, giving a historical sketch of the British corn trade, I append a history of the grain trade of the United States from the adoption of the Constitution in 1789 to the present time.

The United States have always been, as they were in their colonial time, an exporting country of grain. The only marked exception to this was in 1836, when considerable quantities of wheat were imported. The small importations of 1857 and 1866 are too trivial to take into account. The normal position of this country, whether our crops are abundant or deficient, is that of an exporter of grain. So generally is this fact known that it has been remarked for many years by sea captains that one can purchase a barrel of American flour and pork at any port in the world.

It may be said England is the largest importer of grain and the United States is the largest exporting country. Within the last ten years the United States has completely outranked all other countries, including Russia. Previously to 1878 the latter had been at the head of the list.

Our power of producing grain has increased in a greater ratio than the growth of population during the last forty years. Our exports have been during the years ending June 30 as follows:

EXPORTS BREADSTUFFS.

Annual average of	*Wheat and flour in bushels.*	*Indian corn, bushels.*	*Total grain, wheat & corn, bushels.*	*Bushels expor'd per cap.*
5 years ending 1845.	6,864,009	1,827,571	8,691,640	.48
5 years ending 1850.	14,721,773	11,288,131	25,970,904	1.28
5 years ending 1855.	16,438,919	5,914,495	22,353,414	.89
5 years ending 1860.	23,517,982	6,810,521	30,328,503	1.05
5 years ending 1865.	40,691,314	10,341,591	51,032,995	1.52
5 years ending 1870.	27,863,388	10,682,672	38,553,060	1.00
3 years ending 1873.	47,528,193	28,852,719	76,380,912	1.89
Year 1874	91,510,308	35,985,831	127,496,232	3.03
Year 1875	72,912,817	30,025,036	102,937,843	2.39
Year 1876	74,750,682	50,910,532	125,661,214	2.84
Year 1877	57,043,936	72,652,611	129,696,547	2.81
Year 1878	93,139,296	87,191,900	180,331,196	3.77
Year 1879	148,000,000	80,000,000	228,000,000	4.44
Year 1880	183,300,890	106,000,000	289,300,890	5.78
Year 1881	183,000,000	91,000,000	275,000,000	5.33
Year 1882	118,000,000	43,000,000	161,000,000	3.04

Nothing in the history of the commerce of nations exceeds this enormous increase of exports of breadstuffs during the last forty-two years. It is equal to an aggregate increase of 3,200 per cent., or, when the shipments are compared with population, it is shown to have increased from $^{48}/_{100}$ of a bushel to $5^{78}/_{100}$ bushels per capita, or 1,104 per cent. The causes for this wonderful development of the export of breadstuffs are not difficult to find. The wonderful improvements made in this country in agricultural implements, in the plow, the cradle, etc., early in the century, astonished Europe, and enabled this country to increase the production of grain. These improvements were followed by the opening of the Erie canal, which joined the waters of the ocean with thousands of miles of our great inland lakes. Thus the cost of production was lessened by labor-saving machines, and the cost of distribution was decreased by extended and cheapened water-ways.

Greatly as the above increased the productive and distributive power of this country, it was a mere beginning. The steam railways which were begun about 1830 really did not make much progress until after 1850. Now they are extended over an immense extent of the country, and carry the produce of the farmer to the seaboard summer and winter, unlike canal navigation which is closed five months in the year. To this must be added the improved reaper, the steam thrasher and binder, and lastly the great improvements which have lessened ocean freights, the introduction of ocean steamers using the double-acting steam-engine. To all of these causes must be added the prosperity of England, our best customer, for the British empire is the purchaser of two-thirds of all our exports.

The following will show the increase of crops of wheat and Indian corn:

	Bushels—Wheat.	*Indian corn.*
Census 1840, crop 1839	84,823,272	377,531,875
Census 1850, crop 1849	100,485,944	592,071,104
Census 1860, crop 1859	173,104,924	838,792,740
Census 1870, crop 1869	260,145,900	874,320,000
Census 1880, crop 1879	448,756,630	1,754,861,535
Estimated, crop 1882	505,000,000	1,624,947,800

The increase of the crops of wheat and Indian corn since 1839 was 501 per cent. of the former, and 330 per cent. of the latter. The population has increased in a less degree since 1840, or about 212 per cent. This clearly accounts for the extraordinary exporting power of the country in cereals.

Here let us for a moment stop. Facts like these invite a consideration of the causes that have led to so great an increase in the cultivation of cereals during the last decade. Admitting that the leading interest of the country is agriculture, yet it must be allowed that our commercial and manufacturing interests are also of great importance. The latter pursuits being of a more speculative nature, apt to suit an enterprising and speculative people better than agriculture, yet it happens that in speculative times that the latter is neglected for the former. This has undoubtedly happened three times within fifty years—in 1837, 1857 and in 1873—and it may happen again when similar causes again appear. These causes are speculation and abuse of credit. In 1837 it was principally the abuse of credit in the shape of paper money; in 1857 it was bank discounts, or making credits in bankers' ledgers, falsely called deposits; in 1873 it was the increase of government and bank paper money beyond the amount of metallic money that would have been in circulation if government or bank notes had not been printed.

The sure sign of, and naturally one of the causes of, agriculture being neglected is the price of labor being above what the farmer can afford to pay his employés. The following table illustrative of this shows the price of white wheat in New York May 1, day wages of labor in gold, and its equivalent in bushels of wheat:

Annual average of	*White wheat per bush., gold.*	*Wages common laborer, daily, gold.*	*Equivalent bush. wheat for day's work.*	*Produce of acres wheat.**
9 years end'g May 1, '68	$1.61	$0.96	0.598	12.54
7 years end'g May 1, '75	1.48	1.03	1.117	23.04
4 years end'g May 1, '79	1.51	0.97	0.676	13.69
2 years end'g May 1, '81	1.22	1.10	0.897	18.65
Year end'g April 1, '83	1.25	1.50	1.200	24.00

* Average yield of fifteen bushels per acre required to pay one year's wages of a laborer.

Taking fifteen bushels of wheat as the yield in an average of years of one acre of land and computing the wages of labor in wheat, it made the farmer, at an average during seven years ending 1875, sell the produce of 83 per cent. more land to pay a year's wages of a common laborer than it did in the nine years ending 1868. It will be observed that the total of wages estimated in wheat for the period of four years ending 1879—the year of resumption of specie payments—declined nearly to that of the period ending in 1868. It will also be noticed that although agricultural labor is partly paid in board, that after due allowance for the latter the above quotations for labor are a fair average of what was paid in the state of New York.

I will further state, that like the period ending in 1837 the high wages paid by agriculturists from 1868 to 1873 (which continued to 1875) were the fruits of the abuse of credit and general inflation, causing the diversion of too much labor and capital from agriculture to speculative industries and railways, and that this was the sole cause of the commercial, manufacturing and railway collapse of 1873. It was the low price of labor and the numbers that were unemployed that forced the latter back to the cultivation of the soil during the six years ending 1879, together with a succession of good crops and with good demand for our cereals, owing to four deficient harvests in Europe. This caused the immense surplus of cereals and provisions to be taken at high prices. In other words, redundant labor from 1873 to 1879 caused the area of cultivation to extend at an unprecedented rate, which, with the causes already stated, influenced foreign exchanges in our favor. This enabled the country to retain the produce of its mines of precious metals for six years, say to the amount of $200,000,000, and import a like amount of specie from Europe. There cannot be a doubt that our agricultural progress during the last decade repeated the story told just after 1837, that is, restored the prosperity of the country.

The question to be considered at present is whether we are not traveling the same road over again as during the five years preceding 1873. The

fact that farm labor is high is evident, it requiring the produce of twenty-four acres of wheat to pay a common laborer for one year. This should cause people to reflect whether speculation in city buildings and railways is not drawing off too many hands from the land, as in 1837 and 1873. It is to be hoped that this rise in wages is due to material causes, such as good crops and labor-saving machines. The country is free of a redundant currency at present. Our paper money for three years has been stationary, thanks to the credit of the government enabling it to reduce the interest on its bonds, and making it unprofitable for the banks to issue paper money against them. The issue of $75,000,000 of silver certificates against silver held by the government is only inflation to the extent that that silver is overvalued as coin 15 per cent., or about $11,000,000. I consider the silver bill, compelling the executive to coin not less than $2,000,000 of silver per month, dangerous, and sure, if long persisted in, to land us on a single silver standard. It is a stupid bill, for if it had never been enacted we would have shipped the $135,000,000 of silver as merchandise, and exchanges would have been in our favor to a like amount (less the overvaluation of silver as coin), and, instead of that amount of silver dollars, we would have to-day about $115,000,000 more gold. It is therefore to be hoped that bankers and others will check speculation, and prevent too much capital being transferred from movable to permanent investments, and thereby prevent labor being transferred unwisely from agriculture to a more speculative employment.

With respect to the price of wheat, I find for the twenty-five years ending 1845 the average price of wheat was about $1 per bushel. During this period the prohibitory corn laws of the United Kingdom of Great Britain and Ireland were in full force. During the thirty years ending 1875 the average price of wheat for export was $1.33 per bushel. This advance of one-third in the value of wheat was undoubtedly owing primarily to the freedom of the corn trade inaugurated in England by Sir Robert Peel in 1846. When we consider the great improvement in labor-saving agricultural implements and cheapening of freights by the competition and extension of railways during this period, the great prosperity of our farmers is easily accounted for. The average price of wheat for seven years ending June 30, 1882, was about $1.19 per bushel. This decrease in price of 14c. per bushel is to be attributed largely to the heavy competition in freights between the railways and the lake and canal navigation. This reduced the expense of distribution and forwarding from the west to the seaboard nearly one-half.

As far as Indian corn is concerned, the average price at which it was exported for twenty-five years ending 1845 was 60½c. per bushel, and for the thirty years ending 1875 about 75c. per bushel. The freedom of the grain trade in England not only contributed to the increase in the value of Indian corn, but the great reduction in England in the import duties on provisions had an important effect, as it improved the value of salt and fresh American meats, which is Indian corn in a concentrated state. The export value of Indian corn for seven years ending June 30, 1882, was about 60c.; this reduction, as stated of wheat, was due to lower freights.

The principal reasons for the larger rewards to labor and capital in the United States over those realized in Europe are, in the main, owing to the surplus of fertile land, where none but that which is first-rate is cultivated. Land may be considered as a gift by our creator of so many natural machines for production of food, but land being of different degrees of fertility, may be classed as instruments of first, second, third and fourth rate power of production. The nations therefore which have a surplus of land will only cultivate the best, while nations densely populated will be compelled to use inferior lands. As a natural result, the wages of labor and profits of capital will be less among the latter nations. Hence, in this country, land being redundant, is cheap, and labor dear, while land being limited in proportion to the population in Europe, is dear, and the wages of labor and the profits of capital low. To deny this would be to deny that labor and capital have continually gravitated from Europe to North America for about three hundred years.

It is therefore quite clear that it is our rich inheritance of a superabundance of fertile lands which causes labor to be remunerated better here than in Europe, and it is erroneous to think, as many do, that our prosperity is to be attributed to a high tariff. On the contrary, I think the latter acts in many instances as a bounty to transfer capital and labor from greater to less productive industries. I will therefore conclude by stating that if it is desired that our farmers shall sell their surplus to Europe to advantage, the duties on the goods we import from Europe must be modified, so as to better enable foreigners to purchase our cereals in return.

HENRY KEMP.

41 S. William St., New York, May 3.

RECENT LEGAL DECISIONS.

[*Prepared expressly for* BRADSTREET'S.]

Wharfage rates established by a city are not duties on tonnage, according to the opinion of the Supreme Court of the United States, in the case of The Parkersburg & Ohio River Transportation Company, appellant, vs. The City of Parkersburg (W. Va.) A wharf was built by the city, and certain rates of wharfage were established by it. These were complained of by the transportation company as extortionate, and as being merely a pretext for levying a duty on tonnage. Suit was brought against the company in the State Court for the purpose of collecting the wharfage, whereupon the company filed a bill in the United States Circuit Court to restrain proceedings in the suit and to have the wharfage ordinance declared illegal, null and void. The city had a decree in the court below, and on the 30th ult. the judgment of the Circuit Court was affirmed by the Supreme Court, which held: 1. That as the ordinance on its face imposed charges for wharfage only, though these charges might be unreasonable and exorbitant, the court would not entertain an averment that they were in reality not intended as wharfage but as a duty on tonnage. An inquiry into the secret intent of a body which imposes charges is inadmissible. Whether it is one or the other must be determined by the ordinance or regulation itself. 2. Wharfage is a charge for the use of the wharf made by the owner thereof by way of rent or compensation, while the duty of tonnage is a tax or duty charge for the privilege of entering or trading or lying in port or harbor, and can be imposed only by the government. 3. That whether it be charge of wharfage or a duty of tonnage is a question not of intent, but of fact and law. 4. That although the wharves are related to commerce and navigation as aids and conveniences, yet, being local in their nature, requiring special regulations for particular places, the control of them, in the absence of congressional legislation on the subject, belongs to states in which they are situated. 5. That a suit will not be holden in the Circuit Court of the United States for relief against exorbitant wharfage as a case arising under the Constitution or laws of the United States, even though it be alleged that the wharfage was intended as a duty of tonnage.

An interesting admiralty case, decided by the Supreme Court on the same day, was that of Ellis et al. vs. The Atlantic Mutual Insurance Company of New York et al., which came up on appeal from the Circuit Court of the United States for the District of Louisiana. The suit was brought by the master and owners of the ship Tornado to recover freight money on a cargo which was burned and sunk in the ship before the latter had started on her voyage. The Supreme Court, affirming the decree of the Circuit Court, holds that when a vessel, before she breaks ground for a voyage, is so injured by fire that the cost of her repairs would exceed her value when repaired, and she is rendered unseaworthy and incapable of handling freight, a contract for the transportation of cotton by her to a foreign port, evidenced by a bill of lading containing the usual and customary exceptions and providing for the payment of the freight money on the delivery of the cotton at that port, is thereby dissolved so that the shipper is not liable for any part of the freight money, nor for any of the expenses paid by the vessel for compressing and storing the cotton.

The case of The First National Bank of Xenia, Ohio, vs. Stewart et. al., also decided by the Supreme Court on the 30th ult., was a suit brought by the administrators of one McMillan to recover from the bank the proceeds of thirty shares of the bank's own capital stock deposited by McMillan as collateral security for a loan, and sold by the bank to satisfy McMillan's indebtedness to it. The Supreme Court, reversing the judgment below, held that if the prohibition of the law could be urged against the validity of the transaction by any one except the government, it could only be done before the contract was executed, and while the security was still subsisting in the hands of the bank. It could then, if at all, be invoked to restrain or defeat the enforcement of the security. When the contract has been executed, however, and the security sold and the proceeds applied to the payment of the debt, the courts will not interfere with the matter.

The case of Porcher et al. vs. Manion, decided recently by Judge Barclay, in the Circuit Court at St. Louis, throws some light upon the construction of Sunday laws, and is not without interest in states that have stringent penal codes. The defendant it appeared had arranged for a steamboat excursion last August, and the plaintiffs contracted to furnish the refreshments for the excursion. That event, however, did not take place as arranged, and the plaintiffs having laid in a large stock of perishable refreshments sued to recover the loss sustained by them through the breach of contract. The defendant demurred to the complaint on the ground that the contract was to furnish goods upon Sunday and was prohibited by a statute of the state of Missouri. Judge Barclay, in overruling the demurrer, said that the inhibition of dealings on Sunday depended upon statute alone, no such prohibition being imposed by the common law. Under the statutes "all work of necessity or charity" was permitted. These words, the judge held, protected a contract to furnish articles of food on Sunday.

When the maker of a note promises to pay the sum mentioned in it at twelve or within twelve months after its date, "with interest from date payable annually," it is necessary, in order to give the words "payable annually" any force and effect, to construe the promise as a promise to pay the interest annually until the note is fully paid, and on a note so drawn the interest will continue to be payable annually after as well as before maturity. Such was the opinion expressed by the Supreme Court of South Carolina in the case of Westfield, administrator, vs. Westfield et al., decided March 19. But where the promise is to pay more than twelve months after date, "with interest from date payable annually," no such necessity arises, and therefore the interest does not continue to be payable annually after maturity.

The facts in the somewhat novel and curious case of The Quartz Hill Consolidated Gold Mining Company (limited) vs. Eyre (a note of which appeared in BRADSTREET'S on February 24), were before the English Court of Appeal on the 17th and 18th ultimo. The action was brought to recover damages from the defendant for having maliciously and without reasonable and probable cause presented a petition for the compulsory winding up of the company on the ground that it could not be carried on at a profit, and for having injured the credit of the company by advertising the petition in the newspapers. On the trial of the cause in the Queen's Bench Division, after some hesitation, Mr. Justice Stephen nonsuited the plaintiff. The Court of Appeals granted a new trial. The Master of the Rolls, in giving judgment, said that he agreed with the principle that an action would not lie for a civil action even though brought with malice or without reasonable cause; but the case before the court more resembled bankruptcy proceedings than civil actions. The petition for the winding up of the company was presented while it was a going concern, the defendant being prompted by certain allegations against the company in the public newspapers, into the truth of which he had not inquired before he took action tending to destroy the credit of a trading company. He thought the learned judge at the trial should have to put to the jury the leading question: Was there reasonable and probable cause?

The importance of the jury as a tribunal for the determination of questions of fact in civil cases grows less and less apparent. Its present status in this respect is well illustrated by the case of The Inhabitants of Montclair vs. Ramsdell, decided by the United States Supreme Court on March 5. It was there held the jury may be controlled in their determination of a question by a peremptory instruction, if the testimony is of such a conclusive character as would compel the court in the exercise of a sound legal discretion to set aside a verdict if one were rendered in opposition to such testimony.

In the case of Balbach vs. Frelinghuysen, receiver, Judge Nixon, in the United States Circuit Court for the District of New Jersey, on March 8, 1883, held that where the practice of a bank was to credit a depositor at once with the amount of a check upon another bank deposited by him, and to allow him to draw against it at once, and in case the check was not paid to debit the depositor with the same amount, the check until paid remained the property of the depositor, so that if the bank should fail before the check had passed out of its possession, and the depositor had not drawn against it, or deposited the check to straighten an overdrawn account, a court of equity would order the check to be returned to the depositor.

BUSINESS NOTES.

The Mississippi Valley Cotton Planters' Association has decided through its executive committee to hold a national cotton centennial exposition at New Orleans. The daily papers throughout the south naturally are taking a great deal of interest in this enterprise.

There were 240 failures throughout the United Kingdom and Ireland reported to *Kemp's Mercantile Gazette* during the week ended April 14, against 190 in the corresponding week of 1882, and 290 in 1881. England and Wales had 213, against 143 and 270 respectively in like weeks of 1882 and 1881; Scotland had 22, against 9 and 19, and Ireland 5, against 8 and 1.

The annual meeting of the New York state American Merino Sheep-breeders' Association was held at Avon during the closing week in April. Representatives of the wool industry from Michigan and from Australia were present as well as J. S. Hayes, of Massachusetts, president of the late Tariff Commission. The convention put itself on record as pleased with the tariff changes respecting its interests. The sheep industry of the northern and eastern states, mainly that of breeding stud flocks, wool production being of subordinate interest, was reported to be flourishing.

The new patent bill before the British Parliament provides for the control and management of the Patent Museum by the Department of Science and Art. This department may, at any time, require a patentee to furnish a model of his invention for deposit in the Patent Museum "on payment to the patentee of the cost of the manufacture of the model." It is further provided that the comptroller "shall cause to be issued" an illustrated periodical of patented inventions, as well as reports of patent cases decided by law, and other information "which the comptroller may deem generally useful or important."

The labor situation in Great Britain presents the same features of interest, including the active operations in certain lines, which have been heretofore noted. Building operations are actively conducted, but wages disputes have caused trouble in various quarters. The statement is made by the London *Labour News* of April 18 that the demand for men for the construction of railways and important public works, both skilled and unskilled, now exceeds the supply of the same. Higher wages have been realized by farm hands in some districts. The colliery "output" question still disturbs the coal industry. Manufacturers, engineers and merchants are said to be quite busy throughout the kingdom. There are local strikes among file-cutters, weavers and other trades. Emigration, meanwhile, continued brisk.

The Silk Association of America have completed the report of importations of silk manufactures at the port of New York for April, and have issued the same, with comparisons for the four preceding years. The total value of imports of silk manufactures at this city last month was $1,703,856—less than in any corresponding month for three years preceding. The total value, as described in April, 1879, was $1,632,167; in 1880, in April, it had risen to $2,721,930; in 1881 to $1,900,967, in 1882 to $2,935,210, and last month it had declined to $1,703,856. The principal gains in values of imports last month as against corresponding receipts in April, 1882, were as follows:

	April, 1882.		*April*, 1883.
In gloves, from	$22,486	to	$50,555
In hose, from	19,596	to	30,665
In silk and cotton goods, from	303,517	to	316,115
In velvets, from	44,861	to	53,764

The various declines of any special import were:

	April, 1882.		*April*, 1883.
In silk piece goods, from	$1,740,102	to	$836,778
In crapes, from	56,346	to	30,521
In plushes, from	72,529	to	28,085
In ribbons, from	219,172	to	93,636
In laces, from	357,489	to	181,507

The general tenor of the April exhibit will prove reassuring to those who have argued ill from excessive imports of luxuries.

The following national banks have been organized: The Citizens' National Bank of Fergus Falls, Minn.; capital $75,000; James Compton president, C. C. Warfield cashier. The First National Bank of Watertown, Dakota Ter.; capital $50,000; Homer D. Walrath president, Samuel B. Sheldon cashier. The First National Bank of Corning, Ia.; capital $50,000; Lew E. Darrow president, Charles C. Norton cashier. The First National Bank of Brownwood, Tex.; capital $75,000; Jasper L. Vaughan president, Brooke Smith cashier. The Los Angeles National Bank, Cal.; capital $100,000; George H. Bonebrake president, F. C. Howes cashier. The Ennis National Bank, Tex.; capital $100,000; Joseph Baldridge president, Mark Latimer cashier. The First National Bank of Decatur,

Tex.; capital $50,000; Henry Greathouse president, John W. Walden cashier. The name of the National Bank of Winterset, Ia., has been changed to the First National Bank. The Merchants National Bank of Cedar Rapids, Ia., has elected M. A. Higley president, in place of R. D. Stephens.

In a sharply-expressed editorial article in a recent number of the Chicago *Drovers' Journal* is found voiced a vigorous protest against what is alleged to be the exorbitant elevating and trans-shipment charges made at Buffalo, and again at New York, on bulk grain shipped to the latter city via the lake and canal route from Chicago and the northwest. The allegation is made that grain at Buffalo is taxed for trimming, elevating and cleaning, the charges have been $15.25 per 1,000 bushels, and at New York $19.50 has been charged for the same work. The scalper's fee of $2 at Buffalo makes the charge at both cities $36.75 per 1,000 bushels as the breaking bulk expense to the shipper. The *Journal* objects, furthermore, to the New York Board of Weighers and Measurers, "whose capital consists of a few Fairbanks' scales, with some weights and measures," and who are (or have been) receiving ¾c. for every bushel of grain that arrives in that city. The outcome of this aggregation of objections to the expense to the western shipper of grain, at Buffalo and at New York, is that the Welland canal and St. Lawrence route to the sea is, on examination, alleged to present claims for the consideration of the western shipper of grain which are not likely to remain long ignored. By the St. Lawrence route there is but one breakage of bulk, at Montreal. The charges there are $9 per 1,000 bushels, or $26.75 less than those at Buffalo and New York. Montreal docking facilities have been and are being enlarged and improved, and floating elevators will be on hand to transfer cargoes of grain to ocean steamships.

With respect to the Buffalo "elevator ring," so-called, but little remains to be said. Such a "ring" exists, although dignified by the name "association." Only the more modern and larger elevators are used, the others receiving a share in the season's receipts, according to valuation in proportion to the total value of elevators. When the bill recently before the Albany legislature to restrict the Buffalo elevator charges was under discussion the question was asked, "Why these superfluous elevators, and why must profits be held up to pay them a share in the proceeds?" The answer was that when vessels are detained by headwinds a large grain fleet is caused, later, to come into port at once, and that all the elevators are then necessary. This story has been told for years—ever since the Buffalo Elevating Association was formed. It is a good story. It must be, for it has served its originators' purposes well. The bill to regulate elevating charges could hardly be regarded favorably. It is significant, however, that a floating elevator in Buffalo some time ago found it more profitable to go into the association and do less work. The western grain-shipping trade will sooner or later get at the true inwardness of the Buffalo grain charges if the Erie canal is to continue to carry the bulk of that commodity to the east.

The exports of British iron and steel to the United States during the first quarter of the current year shows a striking falling away as compared with like portions of 1882 and 1881. The total, in gross tons, is less than one-half of that shipped here in the first three months of 1882, and about 14 per cent. less than that received here from the United Kingdom in the first quarter of 1881. The figures, as given in our English exchanges of recent date, are as follows:

FIRST QUARTER'S BRITISH IMPORTS, GROSS TONS.

	1881.	1882.	1883.
Pig iron	66,447	107,625	63,680
Old iron	17,123	29,762	9,708
Steel unwrought	17,019	52,232	11,414
Cast and wrought	1,709	1,895	1,421
Tinplates	41,792	59,477	47,052
Hoops and sheets	2,311	6,970	16,247
Bar, angle, etc.	3,011	8,540	3,475
Iron and steel rails	48,686	73,605	16,580
Total	198,098	331,206	169,577

The receipts for March last, while 13 per cent. in excess of those for February, were but the trifle of 240 tons less than the total for January, when the aggregate importations amounted to 55,308 gross tons, against 70,928 tons in December, 1882. The decline in receipts has therefore been fairly steady. The details of the monthly movement are:

RECEIPTS BRITISH IRON AND STEEL, GROSS TONS.

	Dec., 1882.	*Jan.*, 1883.	*Feb*, 1883.	*Mar.*, 1883.
Pig iron	29,560	21,226	18,907	23,547
Old iron	10,833	5,345	2,190	2,173
Steel unwrought	4,751	2,357	4,349	4,708
Cast and wrought	447	772	235	414
Tinplates	15,026	16,371	11,600	16,021
Hoops and sheets	1,209	1,315	2,646	2,280
Bar, angle, etc.	1,880	1,316	1,197	962
Iron and steel rails	7,222	6,606	8,017	4,957
Total	70,928	55,308	49,201	55,058

From the above it will be seen that increased receipts of pig iron and tin plates in March will account for the net gain over the total for February. The total shipments of iron and steel from Great Britain in March last was less than in March, 1882, but greater than in February, 1883. During the first three months of 1883 the aggregate exports of British iron and steel to all countries was 114,000 tons less than in the first quarter of 1882. In the month of March they amounted in all to 333,189 gross tons, against 376,206 tons in March, 1882; 255,844 tons in February, 1883, and 289,802 tons in January.

The statement concerning the foreign commerce of the United States during the first quarter of the current year, as prepared by the Bureau of Statistics at Washington, shows a fair increase in the value of exports in each month as compared with like months in 1882, but a decrease in importations of merchandise which has been greater as the year progressed. The figures, including those pertaining to December last as against December 1881, are as follows:

Exports.	1882-3.	1881-2.
December	$92,966,026	$77,061,642
January	80,380,253	64,921,051
February	66,855,239	56,606,533
March	77,650,374	62,613,872

The increased exports of merchandise from month to month of late, as compared with those of like months in the preceding year, varied from $15,904,384 in December last to $15,459,202 in January, $10,248,706 in February and $15,036,502 in March. A similar exhibit respecting the importations of merchandise will be found in the following:

Imports.	1882-3.	1881-2.
December	$59,500,349	$57,337,602
January	50,947,514	56,956,224
February	56,300,518	58,826,926
March	60,737,671	68,603,801

From this it appears that the excess of December importations in December last against December, 1881, amounted to $2,162,747. Since then each month's importations have been less than those of like months in 1882. In January the decline was $8,710, in February it was $2,526,408, and in March it was $7,866,130.

MR. GOSCHEN ON THE PURCHASING POWER OF GOLD.

The following are the essential portions of Mr. Goschen's recent address before the London Institute of Bankers:

If you take the amount of gold currency which has been absorbed within the last ten years by Germany, Italy and the United States, you will arrive at the stupendous sum of about £200,000,000. There has been a falling off in the annual supply of gold, and while in 1852, the first year of the gold discoveries, the amount of gold produced was £36,000,000, it is now about £20,000,000 per annum. We have had an extraordinary demand of £200,000,000 coming upon an annual supply of £20,000,000. The consequence is that this extraordinary demand has absorbed the total supply of gold for ten years. But it has absorbed not exactly the total supply, but only the gold intended to supply the needs of circulation in the gold-using countries. Still this additional and extraordinary demand falls upon the supply of £20,000,000, which has to furnish the wear and tear of the coinage, and also the total use of gold for the purposes of arts and manufactures. There are various estimates of the amount of gold annually used in the arts and manufactures. M. de Laveleye puts that use at 250,000,000 francs, or £10,000,000. I have seen an estimate that the amount used in the United States alone is £5,000,000 per annum; but if we take the figure of £10,000,000 required for arts and manufactures, and for purposes other than circulation, and if we subtract it from the £20,000,000, it leaves an annual supply for purposes of circulation of £10,000,000; and in that case the extraordinary demand for the £200,000,000 will absorb the production, not of ten, but of twenty years. That being so, economists will ask themselves what result is a phenomenon of that kind likely to have produced, and I think there is scarcely an economist who would not at once answer that it was almost necessary, in accordance with the laws and principles of currency, that such a phenomenon must be followed by a great fall in commodities generally. But in the same way, as a large amount of gold poured into Europe in 1852 and the subsequent years created a great rise in prices, so the counter-phenomenon must produce a fall in prices.

After making some comparisons of prices Mr. Goschen continued: I will ask you to assume for the rest of my address that there has been a fall in price, and I will now ask you to consider the consequences of that fall. On the one hand I have shown that the amount of gold available for circulation has had a tremendous strain put upon it during the last ten years; and on the other hand I have shown that fall in prices which would naturally follow from that cause. Do you see any connection between the two, or has the necessary gold been found without any strain at all on the stock of gold in the world, and has this fall of prices been produced by causes totally separate from this strain upon gold? I have shown how much has been wanted. We have taken twenty years' consumption to supply Germany, the United States, Italy and Holland. What would have happened supposing that those countries had not taken it? Where would the gold have been? It would have continued to supply those countries which received it before, and it would have been carrying on the normal work which an increased supply of gold always performs in meeting the increased demand for gold which arises from the natural increase of population and from the increase of wealth. Going back for thirty years, you may say that the population has increased 50 per cent., and you have an increase of wealth—not an increase of capital in the hands of large capitalists, but you have an increase in comfort, which means that there are more people who carry one or two sovereigns or half-sovereigns about with them in their pockets. Again, you require more gold for more transactions, and you know that the increased amount of gold required is not in proportion to the increased transactions, but merely in proportion to the increased balance of the transactions. Let us now consider whether the economy in the use of gold has been as great as the increase in the population, and as the increase in the amount of gold required to liquidate the balance of transactions. Mr. Giffen has expressed his belief that the United Kingdom was thoroughly "well banked" twenty years ago, and that there have been no new devices invented during the last twenty years that have much economized the use of gold in the United Kingdom. We have already reduced the use of this gold almost to a minimum. It is a most significant fact that in this country, which is so well banked, £20,000,000 more circulation were required in 1880 than in 1870. What a pull must this £20,000,000 have been on the total supply of gold after and concurrently with those other demands to which I have called your attention. As regards England, I do not see that there has been any economy in gold to counterbalance the increasing demands of the population, nor are we aware that in France, Germany or elsewhere the economies have been such in the use of gold as to counterbalance the increasing demand for gold. But I have been reminded that, as regards international transactions, there is an economy in the use of gold through large transactions being liquidated by what is called international stock, and that the great amounts of stock passing from one country to another to a certain extent economize the use of gold. I mention that explanation for what it is worth. To sum up this part of the question. While wishing to make every allowance for the fact that as little gold is used as it is possible to use, and that every economy in its use is studied by all bankers in England and elsewhere, I do entertain the opinion that the economies effected do not counterbalance the strain put on gold in consequence of the increased demands of the population, and the increased transactions. If the amount of circulation has anything whatever to do with the question of price, then this strain upon the gold circulation must have produced an effect upon the prices in Europe. There is a fall, and there is a cause which ought to have produced a fall. Has it produced the fall, or has the fall been produced by other causes? I am rather inviting inquiry upon all these points than wishing to state a dogmatic opinion. There are other causes which might account for the fall in prices. It has been suggested to me that the fall is partly due to greatly increased facilities of communication both in carrying goods and in ordering goods, and that, in consequence of the Suez canal, quicker steamers and other arrangements there are better lines of communication, and concurrently with these, through the action of the telegraph, goods can be brought cheaper into the producing country than they could be brought a certain number of years ago. I come now to a second cause, and that is, not the disappearance, but the diminution of a class to which, perhaps, many of my hearers may belong—the class of middlemen or agents, whose traditional business it has always been in London to act between the producer and the consumer. There is the business which consists in assisting producers in the most remote countries to place their goods, not only in England, but in most other parts of the world. That, of course, decreases the cost to the consumer, because a number of intermediate profits have vanished in the progress of business. A third cause is alleged to be a great diminution in speculation, and a fourth cause that the crops have been larger, and this accounts in the case of a great many articles for the cheaper price. But with regard to the last consideration, I put this before you on the other hand. If the crops have been larger, so also is the population of the world larger, and it would indeed be a sad thing if the crops were to remain stationary while the inhabitants of this globe who consume those crops were to multiply at that pace at which thriving communities do multiply. I think, therefore, that we must not lay too much stress on the increase of crops. You have to deal, then, with the fact that these prices have fallen, and if that be so it is only another way of saying that the price of gold—the purchasing power of gold—has increased. Whatever causes may have brought about the fall, if prices are so much lower, the purchasing power of gold has increased, and a sovereign goes further than it used to go. That is one way of putting it. Happy it is for those who have sovereigns, but unhappy it is for those who have stocks and produce which they have not sold. Let us see how the fall in prices and the increased purchasing power of sovereigns will affect various classes of the community and the community at large. Does it not account to a certain extent for many rash statements which are continually made with regard to a diminution in our exports and imports and with regard to the depression of trade? If all prices have fallen, naturally the total of our exports has fallen, being calculated in money. But the volume of our exports does not show that decrease which is true of the value. We have a painful transition from the period of one state of things to another, but we have to look to a future when prices will once again be settled down, and when probably in many manufactures things will be precisely as they were before. Therefore, in deploring, if we have to deplore, the difficulties inherent in a transitional state from high to low prices, do not let us lend ourselves to the theory that because there may be less gold in any country, therefore that country will be less well off and less able to thrive. It is the transitions which continually mislead both economists and the public, and we must attempt to put aside the fallacies connected with these transitions. Let me say here that if, as is probable, there should be a continuance of low prices, two classes of persons may be permanently affected. Men who are entitled to receive any amount in sovereigns will be much better off, and debtors who have to pay a certain amount of sovereigns for a long period to come will be worse off. Fundholders will gain, and consols may be so much more valuable that it may occur to some chancellor of the exchequer that the interest ought to be reduced from £3 to £2 15s., or ultimately to £2 10s. I will now take the position of the working classes. According to the law of economic science, as the purchasing power of gold increases the wages of labor ought to fall, but there are many causes which operate upon the regulation of wages of labor independent of political science or political economy. In the case of the agricultural laborer it appears to me that there are few persons who are not glad to see that the wages in that branch of industry have considerably risen. Public sentiment, I contend, counts for a great deal in this matter. In conclusion, I have to say that, having read what has been written by able men on these subjects, I feel that an address of this kind has no value at all for economists, but if I shall have contributed at all to draw men's attention, not to what I have said, but to the facts and the manner in which those facts ought to be investigated, I shall hope to have contributed something to the elucidation of a question so difficult and complicated that he would be a vain man who should venture to pronounce dogmatic opinions upon it.

The following table shows the comparison of prices made by Mr. Goschen:

	1873.	1883.
	s. d.	*s. d.*
Sugar, brown Manilla, cwt.	16 6	12 0
Sugar, good and fine W. Ind., cwt.	29 0	20 0
Tea, sound, common Congou, lb.	0 11½	0 5 to 0 5½
Coffee, middling plantation, Ceylon, cwt.	87 0	70 0
Cocoa, Guayaquil, cwt.	59 to 60 0	59 0
Wheat, qr.	56 0	40 6
Rice, Rangoon, cwt.	9 6	7 0
Pepper, lb.	0 7	0 5½
Iron, Scotch pig, ton	127 0	49 0
Lead, English, ton	£21 10 0	£13 15 0
Copper, ton	£91	£65
Tin, foreign, ton	£142	£93
Wool, English sheep's, half-hog, half-wether, lb.	0 27	0 10¾
Mohair, lb.	3 3	1 8½
Mohair, Australian, average Victoria, washed, lb	0 24	0 22
Alpaca, lb	2 9	1 3
Cotton, midland upland, lb.	0 9	0 5½
Cotton, fair Surat, lb.	0 6¼	0 4¾
Cochineal, lb.	2 5	0 10
Indigo, lb.	7 3 to 7 6	6 6 to 6 10
Hides, River Plate, heavy salted, lb	0 8½	0 7¾
Hides, light, lb.	0 8½	0 6½
Jute, ton	£16	£10 10 to £11
Nitrate of soda, cwt	16 0 to 16 6	12 0
Saltpetre, cwt.	30 6	19 0
Coals, Wallsend, ton	30 0	18 0
		1881.
Paper, for writing and printing	60 9	36 3
Silk, lb.	21 0	17 0
Timber, hewn, load	£3 5 0	£2 12 0
Timber, staves, load	10 0 0	5 0 0
Timber, mahogany, load	11 12 0	9 5 0
Railway carriages	111 15 0	85 0 0
Boots and shoes, per dozen pair	64 9	57 2

FINANCIAL.

THE LOAN AND INVESTMENT MARKETS.

The historian of the stock market in these days has to chronicle small beer. A more uninteresting condition of affairs than Wall street presents now it would be hard to find in that usual center of excitement and energy. The dreary interregnum between the rise and fall of the market continues; and a sort of deadlock between the great operators keeps things in a waiting stage. The actual situation is that several of the largest operators in the street, men of many millions, are loaded to the guards with stocks; the amount of stocks available for street use seems nearly all concentrated in their hands, and their wealth makes it possible for them to carry the load. Unless, therefore, something happens to shake out an extra quantity from the hands of holders who are not classed as speculators, the other large operators on the bear side dare not make a determined attack on the market. If they did their short sales would soon create a scarcity of stock for delivery, it would be difficult to borrow stocks with the limited supply at command, and under such circumstances a sudden "squeeze" would be effected which would cause the too daring bears to net some very handsome losses. Hence there goes on day after day a sort of skirmishing between the two opposing sides, one trying to force the market up so that they can create public buying and unload some of their burden; the other watching keenly every move for the purpose of breaking prices down. There has been no market on which the men who are loaded with stock could sell out since the beginning of the year, and they are holding on in the hope that with the approach of summer and good crops—supposing we have them—the public will come in as buyers. The daily fluctuations of the market now are merely the work of the cliques and of the room traders, who are quite a formidable power, however, and capable of making prices rise or fall as much as 2 per cent. in the day if they all get running one way.

We are now getting into the period where the crop question becomes the all-absorbing topic of the street, the first crop to be discussed being the winter wheat, which is harvested in July. In June we know generally what sort of a crop we are to have; but at this time estimates more or less wide of the mark are in order, and they come from all quarters. Mr. Gould's western trip, in which he is accompanied by Mr. Sage and other members of his cabinet council, has for one of its objects a personal inquiry into the agricultural situation, and already he is telegraphing back that the crops along the line of the Wabash road look splendid, and the acreage planted to corn is larger than ever. The Wabash is one of the corn-carrying roads. He let off one remark, however, in the course of a newspaper interview, which has been the subject of lively comment in the street. Speaking of the trunk lines, he observed that it had been warm between them in the past, but it would be red-hot in the future. This was accepted at once as an intimation that, whatever were the stocks Mr. Gould was long of, the trunk line stocks were not among them. The remark had particular reference to the growth of new roads between here and Chicago, which is really the most ominous feature in the railroad situation at this time. All these roads, new and old, are contending for the same business. The new ones are mainly the outgrowths of the great "boom" years 1879 and 1880; and now, before they are fairly open for business, the boom is out of things, and the business for which so many competitors will be contending this year has shrunk to proportions only sufficient to maintain the old roads. The traffic managers of the various lines running to Chicago from the east have been trying to adjust a new scale of percentages in the east-bound pool, and by the way the trunk line stocks act in the market it does not seem that they found the task an easy one. At present the conference is adjourned to the 15th inst., no agreement having been reached at the last meeting. The difficulties in the way may be seen at a glance. While the old lines have now no more business than they can easily handle, and which must be greatly reduced by the opening of navigation, which is ten days late this year, the Nickel Plate and the Chicago & Atlantic roads are clamoring for an allowance in the east-bound pool, which must, of course, be taken from the allowances of the six roads now in it. Mr. Vanderbilt, it is true, owns the Nickel Plate, but he bought it at a high price, and he naturally demands a percentage of business in the pool which shall go some way toward making his purchase profitable. It is understood that the other companies, viz., the Pennsylvania, Erie, Baltimore & Ohio and Grand Trunk insist that whatever the Nickel Plate is allowed must come off the percentages of the Lake Shore and Michigan Central. The Chicago & Atlantic is the new road which carries the Erie into Chicago, that company in the past having to get there over some other company's lines. Naturally, the Erie people feel themselves strong enough to make stiff demands, and to threaten trouble unless they are complied with. Meanwhile the Grand Trunk is dissatisfied with the percentage which has hitherto been allowed to it; and points to the fact that it has carried an amount of freight weekly far beyond the amount of its percentage, as proof that it ought to be allowed a bigger slice than the beggarly 9 per cent. of the 100 which is now its proportion.

Coming east of Buffalo, we are confronted by the new elements introduced in the railroad problem by the completion of the Lackawanna extension to the lakes, and the approaching completion of the West Shore road, the former of which parallels the Erie and the latter the New York Central, and both being links in the chain extending from this city to Chicago. How or on what terms these newcomers are to work with the old roads is a question which Wall street is all at sea about, and contemplates uneasily. The Lackawanna and the Erie are already at swords' points over the coal carrying in the western part of this state, and the Erie people are bitter at the breaking up of their profitable monopoly in the local coal trade there by the building of the Lackawanna's lines. So serious is the situation between them, that some people see in it the entering wedge for a split in the coal combination; but this seems an extreme view. The West Shore road, as a coming competitor of the New York Central, seems to be exerting a most injurious effect on the stock of the Central; and while West Shore bonds have been rising under an active demand for them, the price of Central stock declined to 123½, and the talk is that it will go lower. A possible reduction of the dividends to 6 per cent. is seriously discussed in the street. Lake Shore has not declined in proportion on account of the stock being so largely concentrated in a few hands. In addition to these disquieting matters, there is apprehension of a coming conflict between the Vanderbilt roads and the Pennsylvania company, owing to the proposed extensions of the former into the Pennsylvania's coal territory. The regular meeting of the Pennsylvania company was held this week, and not only was more stock issued, but a loan of $10,000,000 was provided for in addition, which seemed to confirm the rumors afloat that the company intended aggressive invasions of the New York Central's ground. Were it not for the troubles from excessive railroad building there would be nothing in the situation of the trunk lines but what could lay the foundation for a bull movement in their stocks, since they have had a good business from last October and largely increased their earnings over the same period of the preceding year.

The loan market threatened, or seemed to threaten, trouble at one time this week, but it proved to be only the effect of calling in loans preparatory to payments of May interest and dividends. Rates on call rose to 8 and even 10 per cent. on Tuesday and Wednesday, and commercial paper was quoted higher than it had been; but the market was generally easy again by Thursday and has been since. The average rate on call has been about 5 per cent. for the week. There would have been no fear of trouble had not the bank statement of Saturday last proved such a disappointment in showing so small an increase of the bank reserves. It demonstrated the fact that money is very slow this year in returning to this center, where it ought to accumulate in the spring and summer in readiness for the demand from the interior, which will come later in the season. The bears in the stock market argued that the money had, by reason of last year's railroad building, been too widely distributed to return, and that there would be serious trouble when the banks should be called upon later in the summer.

The government bond market has been somewhat disturbed during the past week by the operations of the "tax dodgers," and such slight fluctuations as it has had have this significance and no more. The following were the closing quotations yesterday:

	April 27, bid.	May 4.—bid.	asked.
U. S. 5s extended (3½ p. c.)	102¾	103	—
U. S. 4½s 1891, registered	113¼	112	112¼

The foreign exchange market has been comparatively quiet. Posted rates rose and fell half a point, but they were merely effects of daily trading. Rates yesterday were $4.83 and $4.86, actual business being done at 1@1¾c. below. The London market is very quiet. The Bank of England reserve was reduced, and it lost some gold, but doubtless this was merely an effect of the May settlements.

The bank statement of Saturday showed an increase in the reserve of only $270,925, making the surplus reserve now $895,200. At the same time last year it was over ten millions, over eleven millions in 1881, but only slightly over three millions in 1880. The following are the comparative totals of the statements of April 21 and April 28:

	April 21.	April 28.	Differences.	
Loans	$310,807,000	$312,895,000	Inc.	$2,088,000
Specie	53,860,800	53,736,800	Dec.	133,000
Legal-tenders	18,423,500	19,669,000	Inc.	1,215,500
Deposits	286,676,100	289,922,400	Inc.	3,246,300
Circulation	16,496,300	16,342,400	Dec.	153,900

The proportion of total reserve to liabilities is now 25.31 per cent., against 28.66 per cent. at the corresponding date of 1881.

By cable from Loudon: The only activity the stock market has shown has been from the movement in New York Central, which declined under free selling, said to be done from New York.

By telegraph from Baltimore, Md.: Transactions at the Stock Exchange were rather limited the past week, and demands for state securities were slow. Old Virginias are still held with confidence, but the new 3s are weaker. Offerings of railroad stock continues light, and the market is steady. Mining stocks were a little active, but the tendency was for lower values. Money is in good supply at 5@6 per cent. for first-class commercial paper, and 4½@5 for demand loans.

By telegraph from New Orleans, La.: The feeling in city securities is depressed by a decision of the United States Supreme Court against the city in favor of Mrs. Myra Clark Gaines, awarding her, in principal and interest, nearly $2,000,000; otherwise the tone of financial circles is good. Louisiana consuls but little changed; sterling unchanged.

THE FOLLOWING WERE THE CLOSING QUOTATIONS FOR STOCKS ON THE DATES NAMED:

COMMERCIAL.

The dispatches to BRADSTREET'S from the principal business centers of the country indicate but little change in the business situation. The condition of general trade is fairly satisfactory, with a tendency to improvement. Wheat has advanced during the week on sales for the most distant deliveries in September and October on the belief in damages to the crops in this country and the certainty of short crops in Europe. Corn has been rather weak, and a decline has been prevented by the strength of the wheat market and the firmness of the provisions market. The American pig-iron market is practically unchanged. No news has been received of the blowing out of any of the smaller furnaces, but the opinion prevails that some must retire in the event of continued low prices, as now seems likely. Scotch pig is dull and unchanged. Arrivals went directly into consumption. Sales to arrive are not of sufficient amount to quote. Steel rails are firmer. Purchases for immediate delivery cannot be made. Even the Philadelphia mills, which have not been reported as heavily filled up with orders as those in the vicinity of Pittsburgh, are now said to have orders fully six months ahead. The representative of one large Phlladelphia steel-rail mill said yesterday that his mills are filled up until the last of October, and another until November. Bar iron is weaker, in sympathy with pig iron. Petroleum is higher, as the mystery wells have proved of no especial value. The anthracite coal situation is practically unchanged; prices are no better, and trade is only fair. Ocean freights are at nominal rates. Petroleum charters have been secured during the week to some extent, but on the whole business in this line is dull. The wool trade has continued dull and prices have ruled weak and unsettled. There were 132 failures in the United States reported during the past week, 54 less than the preceding week, 34 more than the corresponding week of 1882, and 28 more than the same week of 1881.

BREADSTUFFS.

There are two general propositions that seem to have become the leading ideas in the foreign markets for breadstuffs, viz.: First, that the future course of prices will be governed more largely by the outcome of the American wheat crop; second, that even if the American crop should turn out to be a fair average, the current prices of wheat are so much below the average of the past eight or ten years that it is reasonable to expect a return to higher ones before the end of the year. *Beerbohm's Evening Corn Trade List* of the 20th ult. refers to these views at considerable length, and says that "even if the American crop should turn out favorable, future bad weather in England or on the continent might bring a loss to any one who ventured to sell largely at such moderate prices as are now current." The movements of prices in the foreign markets are therefore more largely the reflex of the American markets and of the American crop reports than of any other influences. Several weeks ago, when the report of the Agricultural Department at Washington gave such a misleading statement of the condition of winter wheat in this country by representing it as indicated by 81 on April 1, against 104 on April 1, 1882, the foreign markets were affected by it quite as much as the American. When the error of that statement was explained, the foreign markets declined. But now again that reports of the prospect for the wheat crop in Canada are unfavorable, and the public here are still skeptical about a crop in the United States equal to that of last year, the foreign markets have been advancing again.

The latest mail advices, up to the 20th ult., of the condition of the growing crops in western Europe are generally favorable. In Scotland, says the *North British Agriculturalist* of the 19th, the weather had been favorable and the seeding had been completed satisfactorily for all grain. In England, also, seeding had been about completed under more favorable circumstances than could have been expected a month ago. In France the weather had been too dry and prices of wheat had consequently advanced some. In Germany the weather had been fine for two weeks up to the 20th, but, on the whole, the outlook for the crop was scarcely so good. In Holland, also, the prospect was still unfavorable for an average crop.

In regard to current supplies from other exporting countries than the United States, it may be mentioned that navigation in the Baltic has now been resumed, and advices from Riga indicate an increased movement of wheat. The movement of wheat from India has been less thus far this year than last, the total receipts at Bombay from January 1 to March 30 being 1,524,789 cwts. against 2,127,652 cwts. in the same time last year. The total exports from Odessa from January 1 to March 31 were 1,187,400 chetwerts, or equal to about 7,000,000 bushels.

Inland navigation in the northern states may be considered practically resumed. The straits of Mackinaw were open on April 28, and the Erie canal will be opened on May 7.

AMERICAN WHEAT MARKETS.

The wheat markets during the past week have been generally firm and advancing, particularly for wheat deliverable in the months of July and August. Usually wheat for delivery in those months sells at a discount, but at present a large premium over cash wheat is being paid on account of the prevalent opinion that serious damage has been done to winter wheat, and that the crop is likely to fall much below an average one. On April 2 May wheat was selling in the Chicago market at $1.10¾ per bushel, and on Thursday afternoon at $1.12¾, showing an advance of only 2c. per bushel, while July wheat on speculative purchases during the same time advanced from $1.11 to $1.17, an improvement of 6c. per bushel. Should it prove that the injury to the crop is less than has been estimated, the purchasers of July wheat at present prices would be likely to sustain considerable loss, as any decline in the market would affect the distant months most sensibly.

The demand for wheat for export and home consumption continues only moderate, with prices somewhat higher than last week, as will be seen by reference to the closing prices of wheat in the New York market on May 4 and April 28, as printed in another column.

The deliveries of wheat during the past few days from farmers' hands are increasing, and the movement eastward from the interior points, as is usual on the opening of lake and canal navigation, is heavy. When these larger receipts reach the seaboard it will be determined whether the demand is sufficient to sustain present prices. With the liberal supplies now held in the foreign markets it seems hardly probable that any advance can take place. A portion of this wheat is likely to find its way across the water on owners' account.

The weather throughout the west has generally been rather cool, but on the whole favorable, and the late rains have proved beneficial. Some complaints are made of the backwardness of the season, but the sowing of spring wheat is completed, and there is nothing to prevent, so far as can now be seen, a full average crop of spring wheat, however it may prove with that of winter. The agricultural report of the condition of the crop up to the first of May will be issued by the department at Washington on the 10th inst., and is waited for with much interest, as it is likely to have considerable influence on the price of wheat.

The course of the wheat market during the past week is indicated by the following prices in the New York and Chicago markets, for May wheat, at the dates mentioned: New York, 2 p.m. Saturday last, $1.20¾; Monday, $1.21⅞; Tuesday, $1.22¼; Wednesday, $1.22⅛; Thursday, $1.22¾; Friday, $1.22¾. At Chicago, 1 p.m. Saturday, $1.10⅝; Monday, $1.12; Tuesday, $1.12; Wednesday, $1.12⅝; Thursday, $1.13¼; Friday, $1.13.

The total receipts of wheat at Chicago, Milwaukee, Detroit, Toledo, Indianapolis, Peoria and St. Louis, for the week ending April 27, amounted to 515,688 bushels, against 393,078 the previous week, and the shipments to 1,435,912 bushels, against 186,500 bushels the previous week.

The visible supply of wheat in the United States and Canada, April 28, as compared with the previous week, shows a decrease of 419,633 bushels.

CORN.

There has been but little change in the price of corn during the past week, though the markets have been rather firm and in sympathy with the upward movement of wheat and provisions. The fear of corn becoming out of condition on the approach of warm weather undoubtedly has tended to check any advance that might otherwise have taken place. Already several lots of cornmeal in the New York market have become unsound, and even some that was kiln dried, and it is surmised that more or less of the corn now in transit will hardly stand the trying weather of the month of June. That farmers have marketed or used up the greater portion of their last year's crop of corn in feeding hogs and cattle is unquestionable, and the probabilities are that before another crop can be made ready for market higher prices will prevail. The movement of corn from farmer's hands and from the hands of cribbers is only moderate, but shows somewhat larger than during the previous week. The shipments eastward from St. Louis, Chicago, Toledo and other western points have been unusually heavy and are quite likely to depress the seaboard markets for a time. The demand for home consumption is fair, but for export quite moderate.

The course of the corn market during the past week is indicated by the following prices for May corn in the New York and Chicago markets at the dates mentioned: New York 2 p.m. Saturday last, 67½c.; Monday, 67½c.; Tuesday, 67½c.; Wednesday, 67¼c.; Thursday, 67c.; Friday, 65¾c. At Chicago, 1 p.m., Saturday, 55⅝c.; Monday, 55½c.; Tuesday, 55½c.; Wednesday, 55⅝c.; Thursday, 55¾c.; Friday, 55⅛c.

The total receipts of corn at Chicago, Milwaukee, Detroit, Toledo, Indianapolis, Peoria and St. Louis, for the week ending April 27, amounted to 1,020,582 bushels, against 781,608 bushels the previous week, and the shipments 2,129,385 bushels, against 1,124,987 bushels the preceding week.

The visible supply of corn in the United States and Canada, April 28, as compared with the previous week, shows a decrease of 787,714 bushels.

PROVISIONS.

Provisions have moved upward in price—more by a manipulation of the markets than by any legitimate demand for home consumption or for export, both having been quite light. The bulk of the stock of provisions is held by two or three strong parties, who appear to act in concert in forcing prices to a higher level. Outside operators are pretty generally leaving the market severely alone, not caring to take the almost positive certainty of being squeezed. Notwithstanding the light demand, increased supplies of hogs, and unexpectedly large stock of provisions in the Chicago market May 1, prices have moved upward by artificial causes. The price of lard for July delivery in the Chicago market has been nearly as high as has been the price in New York. The advance in July pork in the Chicago market from the close on Saturday last to the close of Thursday of the present week was about 30c. per barrel.

Mr. Sargent writes to the Department of State from Berlin, under date of April 13, that, in consequence of reports published in the continental press that an alarming outbreak of trichinosis caused by eating American pork had occurred among the garrison at Tilsit, Germany, he had instructed the nearest consular officer to make an investigation and report the facts. The published statements were positive as to the source of the disease, and stated 13 deaths had already occurred. On examination it was found that 14 cases of trichinosis had occurred among the soldiers of the garrison at Tilsit, all very slight, and that all the persons attacked had been restored to health. The meat which had produced the disease was not issued to the soldiers in their garrison rations, and, beyond that, there was no evidence whatever as to its origin. The General-Surgeon of the First Army corps and the mayor of Tilsit said that it was impossible to obtain any proof as to whether the pork was of native or foreign origin. All that was known was that the soldiers attacked had obtained the meat outside the garrison, and probably from their relatives in the town. It is probable that the meat was the native raw product, so largely consumed among the lower classes in Germany.

The aggregate receipts of hogs at Chicago, Milwaukee, Cincinnati, St. Louis, Kansas City, Peoria, Indianapolis and Cleveland, for the week ending May 3, amounted to 170,609, against 125,612 the previous week and 207,530 for the corresponding week last year.

The following shows the export of hog product from the places mentioned for the week ending April 28, 1883:

	Pork, barrels.	*Bacon, pounds.*	*Lard, pounds.*
New York	4,154	4,430,453	4,327,087
Boston	550	726,175	168,037
Portland	130	71,200	15,000
Montreal	..	....	....
Philadelphia	..	586,000	18,000
Baltimore	76	225	114,221
New Orleans	30	2,400	1,160
Totals	4,940	5,816,453	4,640,505
Previous week	5,159	7,990,430	4,679,326

The total export of hog product from November 1, 1882, to April 28, 1883, as compared with the corresponding time in 1881–82, was as follows:

	1882–83, pounds.	*1881–82, pounds.*
Pork	25,685,400	30,341,200
Bacon	245,054,386	251,772,677
Lard	128,489,234	143,640,010
Totals	399,229,020	425,753,887

THE PROVISIONS MARKETS BY TELEGRAPH.

From Buffalo, N. Y.: Provisions are more active. Prices are firm and steady. Receipts of hogs light, and prices high.

From Cincinnati, Ohio: Transactions in provisions opened strong under a speculative demand, but closed weaker, with only a consumptive demand.

From Chicago, Ill.: Pork dull and a little speculative, with no shipping demand. Lard steady; trade exclusively local. Meats quiet; small inquiry. Hogs active and firm.

From Louisville, Ky.: Provisions quiet and irregular. Live stock dull and lower.

From St. Louis, Mo.: Provisions firm, with small offerings. Hogs in large supply and of good quality; the movement is active on a declining market. Cattle in fair receipt and selling freely at good prices, which tend downward.

From Kansas City, Mo.: The provisions market is active on jobbing accounts; prices are firm. Live stock somewhat weaker, and a decline of 10c. has been sustained in cattle and hogs.

From Des Moines, Iowa: Provisions market quiet; supply good; prices weak.

From Topeka, Kan.: The provisions market is firm, with no change in prices.

From Nashville, Tenn.: Cattle receipts have been light; demand good, and prices steady.

From Memphis, Tenn.: Meats are unsettled, and the demand is light. Receipts of live stock are not increasing, and prices hold steady at good figures.

THE NEW YORK DRY GOODS MARKET.

Another quiet week has prevailed with first hands, who seem to have become accustomed to the situation. It is somewhat incidental to the season for trade to be rather quiet at present, but as spring business was backward it was expected that the reassortment request would be of good proportions about this time.

The jobbing trade also report quiet business, though a steady call from city and local retailers yields a fair proportion of sales.

The retail trade report a very fair volume of business for the week, which will no doubt steadily improve with continued warm weather.

THE BRITISH COTTON GOODS MARKET.

[By Cable to BRADSTREET'S.]

London, May 4.—At Manchester the readiness to sell checks rise in cloth, but yarns are fully ⅛d. higher on the week's demand from the continent and China.

THE DRY GOODS MARKETS BY TELEGRAPH.

From Portland, Me.: The dry goods trade has steadily improved, and has been heavy for the week.

From Boston, Mass.: There is some improvement in the dry goods trade. There are more New England buyers in the market, and there is a steady, though not a large, trade for the west. Commission houses report the trade in cottons fair only. Woolen goods are quiet. Collections are very fair.

From Providence, R. I.: The print cloths market is very dull, the amount of sales being small. Sixty-fours are quoted at 3⅝c., less 1 per cent., and 56x60s at 3⅛c. The stock on hand is about the same as last week. The cotton market is steadily advancing, offerings being light. Sales are reported moderate. Middling uplands are quoted at 11@11⅛c., and middling gulfs at 11⅜@11½c. There are about 9,000 or 10,000 bales on hand.

From Buffalo, N. Y.: The jobbing dry goods trade is of very liberal proportions and continues to show a steady increase over the corresponding weeks of last year. Retail lines are now fairly busy.

From Rochester, N. Y.: Jobbers in dry goods report a perceptible falling off in sales as compared with preceding weeks, doubtless owing to the weather. However, this trade will compare favorably with corresponding week last year. Collections are reported excellent.

From Philadelphia, Pa.: The general jobbing trade has been fairly active, but the package movement, as a rule, has continued light and unsatisfactory, particularly in woolens. Concessions have been made on low grades of cotton goods, but the better qualities are steadily held.

From Pittsburgh, Pa.: The dry goods trade is active, and if it continues as good as now for the balance of the season, jobbers will be satisfied. No complaint as to collections.

From Cincinnati, Ohio: The dry goods trade is fairly liberal with good sales in some lines of staples, more particularly cotton fabrics; woolens, aside from flannels and jeans, are slow.

From Cleveland, Ohio: The dry goods trade continues as brisk as has been previously reported throughout the spring.

From Columbus, Ohio: Trade in dry goods still continues fair, and in excess of last year.

From Chicago, Ill.: Dry goods jobbing freely for the season. Sales are larger than at this date last year. Stocks are closely trimmed. Millinery, notions and furnishing goods are in fairly active request. Clothing rather quiet, with only average sales.

From Peoria, Ill.: In dry goods there is no change; sales still made on orders.

From Indianapolis, Ind.: In dry goods trade is very fair. Collections said fair.

From Detroit, Mich.: In dry goods business has continued quite active, and sales are 15 to 20 per cent. greater than during the same week last year.

From St. Louis, Mo.: The dry goods trade continues excellent. The tone of the market is stronger. Cotton goods are especially firm, as it is rumored that some southern mills will advance prices on new manufactures.

From Kansas City, Mo.: The dry goods trade continues satisfactory. Sales keep beyond expectations. Outlook is excellent.

From Topeka, Kan.: The dry goods trade is steady and unchanged.

From Burlington, Iowa: The dry goods movement is fair.

From Davenport, Iowa: The wholesale dry goods trade is much better than last week, but the retail trade is still rather dull. Collections are few and hard to make.

From Milwaukee, Wis.: The weather has unquestionably continued too cool for dry goods, especially for seasonable goods; but in the staple fabrics a better trade has been experienced, and dealers regard the future prospects as quite encouraging. Collections seem not to have offered any particular cause for complaint, still it is very freely admitted that they have evidenced no decided improvement.

From St. Paul, Minn.: The dry goods trade opened dull this week, but is now decidedly better. Many country merchants are seemingly averse to loading up heavily at risk of carrying surplus stock to harvest, and all kinds of goods are selling. The demand is mostly for better styles of fancy prints and dress styles of ginghams. Clothing shows lessened sales because of backward weather and farmers seeding. Country stocks not yet much reduced. April sales about even with those of last year. Hats and caps 30 to 40 per cent. increase over last year.

From San Francisco, Cal. The dry goods trade has been well sustained. Jobbers report a good inquiry of large orders. The city trade is active.

From Baltimore, Md.: The dry goods market the past week continued in a healthy state, and a fair spring trade is doing. Jobbers and commission men both think the outlook favorable, and prices remain firm.

From Richmond, Va.: The dry goods trade is about the same as last week.

From Norfolk, Va.: The dry goods trade has improved a little, with fair prospects for a continuance.

From Wilmington, N. C.: The dry goods jobbing trade shows more inquiry, and a fair business is doing.

From Savannah, Ga.: There is no change in the situation of the dry goods market.

From Memphis, Tenn.: Business in wholesale dry goods is falling off somewhat in volume of sales compared with the previous two or three weeks, though above the average, considering the season.

From Halifax, N. S.: The dry goods trade has not changed in any essential way.

COTTON.

The market for spot cotton at New York for the week past has been strong, while prices for middling upland have ruled considerably higher, having steadily advanced from 10 5/16c. on Friday, last week to 10¾c., the closing price last night. The amount of business transacted, however, is considerably less than that of the preceding week. The sales for the week foot up as follows: For export, 1,948 bales; for consumption, 1,823 bales, and for speculation 735 bales, making a total of 5,106 bales, against 8,339 bales last week. Included in the above are 300 bales to arrive. The deliveries on contract amount to 3,200 bales, against 1,900 last week.

Below will be found the closing quotations for prompt delivery uplands at New York on Friday evening, as compared with last week and the corresponding week last year:

	This week.	*Last week.*	*Last year.*
Ordinary	7 13-16c.	7 5/8c.	9 9-16c.
Strict ordinary	8¼	7 13-16	10⅛
Good ordinary	9 1-16	8⅝	10 15-16
Strict good ordinary	9¾	9 5-16	11⅜
Low middling	10¼	9 13-16	11 13-16
Strict low middling	10 9-16	10⅛	12 1-16
Middling	10¾	10 5-16	12¼
Good middling	11⅛	10 11-16	12⅝
Strict good middling	11⅜	10 15 16	12⅞
Middling fair	11⅞	11 7-16	13⅜
Fair	12⅝	12 3-16	14⅛

The market for spot cotton closed quiet and firm.

The future market at New York has been higher and the amount of business transactions unusually large, the price having advanced an average of 39 points for near months and 20 points for later months. The sales for the week foot up 1,111,100 bales, against 315,100 bales for the corresponding week last year.

The following table shows the closing quotations for futures at New York Friday evening, compared with last week and the corresponding week last year:

	This week.	*Last week.*	*Last year.*
May	10.83	10.37	12.24
June	10.94	10.53	12.35
July	11 01	10.65	12.49
August	11 08	10.76	12.63
September	10.72	10.48	12 24
October	10.35	10.15	11 64
November	10.25	10.06	11 41
December	10.27	10.09	11.45
January	10 34	10.18	11.56
February	10.39	...	11.69

The southern markets during the week past have been quiet and firm. Below will be found the sales for the week and the closing quotations for middling uplands at five leading ports as compared with last year's quotations:

	Week's sales.	*To-day.*	*Last year.*
Galveston	5,515	10¼	12
New Orleans	18,850	10	12
Mobile	2,800	10⅛	11⅞
Savannah	2,100	10	11¾
Charleston	2,400	10⅛	11⅞
Norfolk	4,121	10⅜	11⅞

Below will be found the receipts for the week ending Friday, May 4, at eleven leading ports:

	Sat.	*S & M.*	*Tues.*	*Wed.*	*Thurs.*	*Fri.*
Galveston	1,494	2,881	414	1,418	2,173	1,210
New Orleans	2,608	2,603	3,184	1,321	1,107	1,777
Mobile	249	336	77	105	52	463
Savannah	512	614	386	624	812	668
Charleston	387	807	280	250	634	741
Wilmington	89	56	74	33	134	208
Norfolk	961	1,208	1,261	811	890	2,668
New York	120	250	140	1,174	....	200
Boston	112	182	....	39	60	....
Philadelphia	421	1,071	654	862	1,383	888
	....	....	304	68	118	294
Totals	6,953	10,008	6,774	6,705	7,363	9,120
This day last week	9,862	10,933	10,517	8,170	7,087	8,503
This day last year	4,338	5,084	6,020	3,235	3,963	4,076

The total receipts of cotton at the ports since September 1 are 5,642,944 bales, an increase of 1,215,434 bales over the receipts of last year for the same time. The total at each port since September 1 is as follows, compared with the total to the same date last year:

	This year.	*Last year.*
Galveston	790,685	413,014
New Orleans	1,585,149	1,150,130
Mobile	305,004	254,621
Savannah	791,275	707,770
Charleston	555,018	482,077
Wilmington	127,172	131,776
Norfolk	755,827	585,322
Baltimore	62,095	27,491
New York	148,411	163,827
Boston	107,453	206,237
Philadelphia	79,548	63,751

The total receipts at the ports for the week were 48,172 bales, against 59,126 last week and 27,651 for the corresponding week last year.

The receipts at the twenty-four interior towns usually reported were 13,754 bales, against 16,849 bales last week and 7,751 bales for the corresponding week last year. The shipments for the week were 39,632 bales, against 39,413 bales last week and 24,425 bales for the corresponding week last year. The stocks for the week were 150,942 bales, against 174,394 last week and 129,679 for the same week last year.

At Liverpool the spot market is reported firmer, the price having advanced to 5¾d. for middling uplands and 5⅞ for middling Orleans.

The Liverpool future market has been firm, prices having ruled higher. Below will be found the closing quotations on Friday of low middling uplands for delivery, as compared with last week:

	This week.	*Last week.*	*Last year.*
May	5 53-64	....	6 37-64d.
May-June	5 54-64	5 43-64	6 37-64
June-July	5 57-64	5 46-64	6 40-64
July-August	5 61-64	5 50-64	6 44-64
August-September	5 63-64	5 55-64	6 48-64
September-October	5 60-64	....	6 41-64
October-November	5 52-64	5 47-64	....
November-December	5 55-64	5.44-64	....

The sales for the week at Liverpool were 80,000 bales (of which 62,000 were American), against 53,000 (of which 40,000 were American) last year. The sales for export were 4,500 bales, against 8,800 bales last year. The sales for speculation were 5,500 bales, against 3,700 bales last year. The amount forwarded was 13,000 bales, against 15,500 bales last year. The stock in port is 933,000 bales (of which 693,000 are American), against 990,000 bales (of which 632,000 were American) last year. The total imports for the week were 37,000 bales (of which 30,500 were American), against 105,000 bales (of which 59,000 were American) last year, and the amount afloat 331,000 bales (of which 183,000 are American), against 446,000 bales (of which 181,000 were American) last year.

The Manchester market closed firm, and tending downward.

COTTON REPORTS BY TELEGRAPH.

From New Orleans, La.: It is believed that, as spots at home and abroad are held strongly by few parties, it is naturally forcing up the position, and accounts for the advance this week. Spot movement fair. Low ordinary to low middling inclusive and middling fair and up, ¼c. Middling and good middling have advanced 3/16c. The business in futures has been large at an advance of: May, 39 points; June and July, 44; August, 45; September, 23; October, November and December, 19.

WOOL.

This has been another quiet week in the general wool trade. Transactions have been chiefly in small lots, proportioned to the immediate wants of buyers; and while, owing to the small supplies, there has been no general decline in values, a good many odds and ends have been cleaned up at sharp concessions. The situation and outlook are unsatisfactory. Manufactured goods are selling slowly, and here and there the mills are curtailing production in order to guard against an undue accumulation of stocks. While this is the case manufacturers are naturally indifferent about operating in wool, particularly at this time, when the largest clip ever raised in this country is near at hand, and the future of prices, both for the raw staple and its products, is rendered doubtful by the change in the tariff, which will go into effect on the 1st of July. The new clip of California is piling up at San Francisco, and few eastern buyers are operating as yet at any point where shearing is in progress in the south and southwest. A good deal of foreign wool is arriving every week that is accumulating in bond, where a large amount of it will be held until the revised tariff schedule becomes operative.

IRON.

There has been no material change in the pig iron market during the past week. Prices are unchanged, and sales have been moderate, in spite of the reduction. The tone of the market is described as dull. No furnaces have blown out since the cut in prices, but the opinion prevails that, sooner or later, a number of stocks of the smaller and older furnaces must suspend production. The arrivals of Scotch pig this week will aggregate about 2,000 tons, but there are no sales to arrive worth mentioning. The receipts have mostly gone into consumption immediately upon arrival. The Scotch pig market is quiet and dull. Bar iron is quiet, owing to the effect of the cut in American pig iron, though no reduction in quotations are recorded. Steel rails are firmer. The mills are well filled up with orders, and there are scarcely any of them which are not supplied with work for six months ahead. Other varieties of iron dealt in extensively at New York are featureless.

THE BRITISH IRON MARKET.

[By Cable to BRADSTREET'S.]

London, May 4.—The iron market is quiet. Prices have changed but little. Shipbuilding remains brisk. Midland coal is cheaper.

DOMESTIC IRON MARKETS BY TELEGRAPH.

From Philadelphia, Pa.: Pig is more active in small lots at the recent decline, and there is some speculative inquiry for large lots at about 50c. below lowest asking prices. Muck bars are firm. Merchant bar is selling fairly for immediate delivery. Nails are firm and active. The demand for structural iron is stronger, and negotiations are pending for several large lots at concessions for summer delivery. Fair sales of steel rails are reported at current prices. Sheet and plate are quiet, buyers waiting for a decline.

From Pittsburgh, Pa.: The pig iron situation has not materially changed since last week. For special purposes there is a fair demand for choice brands of metal, but prices are declining. Market for common grades of mill foundry is very dull, and a change for the better before fall is not probable. In manufactured iron the demand is light and not what it should be.

From Cincinnati, Ohio: There is scarcely any inquiry for pig iron, and the most marked activity prevails. Prices are nominally unchanged. Manufactured iron and nails are in good demand under liberal offerings.

From Cleveland, Ohio: The iron trade is virtually unchanged. Low prices continue the principal feature, with little that is definite expressed as regards the market in the immediate future.

From Chicago, Ill.: Hardware in steady order demand from the interior, and sales are up to those of same date last year. Bar and structural iron are scarcely so active, but the trade is fair; prices are irregular. Pig iron quiet, with a fair demand for immediate consumption and at unchanged prices. There has been a fair business in steel rails. Nails are in fair request and manufacturers selling freely, but prices are unsettled.

From Detroit, Mich.: Pig iron is weaker than at any time during last year. Manufactured iron is firmer and somewhat excited in anticipation of the strike expected on June 1, but no advances in price have occurred as yet.

From St. Louis, Mo.: Merchant iron is in fair demand at unchanged prices. Pig iron is dull and weak.

From St. Paul, Minn.: In April hardware was very active. Heavy iron was in fair demand, but prices were unsettled under the strike fears. Nails lower.

COAL.

About the only new feature in the anthracite coal trade is the stimulation observed in some quarters in the expectation that the opening of the canals next Monday will permit shipments west, and thus facilitate the spring movement, which has been delayed a month longer than usual. Business continues dull in the vicinity of New York. Boston reports some little activity, and in the west preparations are making for a busy season. There is no improvement in prices, they being still considerably below circular rates. Half time at the mines this week and next will therefore prove eminently satisfactory to operators if not to employés. The total output of anthracite from January 1 to April 21, 1883, was 7,938,543 tons, against 7,265,391 tons in a like portion of 1882, a gain in production this year of 673,152 tons. There is no noteworthy feature in the bituminous coal market to record. Prices are quite low and business only fair.

PETROLEUM.

After the crash in the petroleum speculative markets last week, after hundreds of foolish lambs had been shorn of their superfluous cash for margins which went down never to come up again, the market put on a new face as if to mock at the misery caused, and pipe-line certificates have since soared well into the nineties. On Saturday last no special activity was noted, but the markets gathered strength. On Monday, reports from the oil regions being of a bullish nature, certificates responded with an advance of 2½c. over the opening, which was at 87c. The new wells which have had so much significance during the week are said to base their importance on their location. Some of them, if turning out to be heavy producers, it is stated, will indicate an extension of the oil field hitherto unknown. The operators know this quite as well as anybody, and seldom if ever fail to make the most of an opportunity to saw prices, whether the wells are to amount to anything or not. Hence we have heard much of the Reed & Brenneman "mystery" well in Warren county during the week. Its mysterious attributes became generally known on Monday. It has been boarded up, guarded, and been made the target for numbers of oil scouts, who have left no stone unturned and no resource common to their class, the most fertile in expedients, to get at bottom facts respecting the new well. Tuesday's scout reports made this well a small one (prospectively), and the market advanced 2¾c. during the day. Wednesday saw the strong tone and advancing prices continue until late in the afternoon, when as 95c. had been touched and passed the lucky holders seeing a good profit in the foreground preferred to realize to betting on still higher prices. Free sales knocked prices down nearly 3c., but the tone was strong at the close. Thursday the market fluctuated violently in response to all sorts of telegrams respecting the progress of work in the regions. The closing price, however, was that of the night before.

On Friday the speculative market for certificates was higher, opening at 94c. and closing at noon at 93⅛c. The news from the producing regions indicated that the Reed & Brennan well is but a moderate producer, and is not likely to have any

bearing on the question of increased production. None of the other wells spoken of during the past fortnight as yet are likely to have any bearing on the situation. At the close last evening the price of certificates was 92⅛c. against 88¼c. last week Friday, an increase of 3⅞c. in the week.

The report of operations for April was made public on Monday. It shows that 214 wells were completed in April, with a new production of 4,556 barrels—an average per well of 21⅓ barrels—against 146 wells completed in March, with a new production of 4,113 barrels—an average per well of 28⅛ barrels. There were 207 wells drilling April 30, against 211 at the close of March, and 205 rigs up and building against 212 on the last day of March.

The record of opening, highest, lowest and closing prices for certificates of crude petroleum for the week ending May 4, is as follows:

	Opening.	*Highest.*	*Lowest.*	*Closing.*
Saturday	89	89	87	87
Monday	87	90½	87	89¼
Tuesday	90	92¾	89⅝	92½
Wednesday	93¼	95¾	92¼	92½
Thursday	93	93¼	89½	92⅜
Friday	94	94	92	92⅜

Refined oil was quiet on Saturday last. Exporters did not appear anxious to buy on Monday, and prices were dropped ⅛c. at the close. There was only a moderate business in crude in bulk and naphtha. This loss in price on refined was recovered on Tuesday and the market became firm.

An advance of ⅛c. all around on refined petroleum was made on Wednesday, and there was an active business done. The close of Wednesday's market was affected by the decline in the speculative market, and the ⅛c. last gained was dropped. Case oil was quoted at 10c. for plain brands, Crude in bulk was quiet, but naphtha was reduced ¼c.

The quotations for certificates of crude petroleum and of petroleum products last evening as against those of April 13, April 20 and April 27, are as follows:

	April 13.	*April 20.*	*April 27.*	*May 4.*
Certificates, crude	94⅜	94⅛	88¼	92⅛
Refined, 110°	8⅜	8¼	7⅞	7¾
Refined, 70°	8½	8⅜	8	7⅞
Crude, in barrels	7⅛@7⅜	7⅛@7⅜	7 @7½	7 @7½
Case, plain	11	10¾	10⅛	10
Naphtha	6¼	6	6	5¾

The total quantity of petroleum (crude equivalent) exported from the United States from January 1 to April 28 was 164,115,659 gallons, against 178,539,292 gallons in a like period of 1882, a decreased exportation of 14,423,633 gallons, against a decrease of 9,239,540 gallons reported up to April 21. For the week ending April 28 the foreign shipments were 7,855,699 gallons, against 10,184,682 gallons in the preceding week. New York city's exports of petroleum from January 1 to April 28 amounted to 141,661,256 gallons (leaving but 22,454,403 gallons for all other ports), against 147,082,180 gallons in a like period in 1882.

OCEAN FREIGHTS.

The week has been characterized by a fair business only in petroleum charters. At intervals it appeared as if the demand for petroleum charters would aggregate something large, but the uncertain nature of the oil market during the past seven days has checked the impulse of exporters. There has been some grain shipped per steamer, but not in special quantity. Rates for oil and grain have been generally nominal, supplies of tonnage and berth room being in excess of demand therefor. There have been noted, however, some improved prices for vessels to load with petroleum. Philadelphia and Baltimore furnish no animation to the ocean freights market.

SPECIAL TRADE AND INDUSTRIAL REPORTS.

[By Telegraph to BRADSTREET'S.]

Special telegrams from leading cities, given below, include special reference to the condition of the manufacturing industries of the country, the cereal crops, general trade, and the movement of merchandise:

EASTERN STATES.

From Portland, Me.: Groceries rather dull; many other branches not up to expectations. The shipping interest still languishes.

From Boston, Mass.: The boot and shoe trade is quite active, and the season seems to be opening early. There are sixty or seventy buyers in town, mostly from large houses, and they are giving orders freely. Shipments for the week to places outside of New England 34,481 cases, against 33,948 cases for the eighteenth week in 1882; total shipments since January 1 897,384 cases, against 810,881 cases for the same time last year.

MIDDLE STATES.

From Troy, N. Y.: For the week past the wholesale grocers have reported business rather quiet on account of moving-day. The stove business is fairly active, though some concerns are employing only a part of their usual force. Most of the collar and shirt manufactories are busy.

From Buffalo, N. Y.: Under the influence of more seasonable weather, trade in general lines, with but few exceptions, shows a decided change for the better, and a much more satisfactory feeling exists regarding the near future. Groceries and other staples are moving freely. The lumber and building trades are well occupied; no receipts of lumber yet; shippers, as a rule, are holding off for lower rates. Leather is quiet but firm; stocks of good quality are accumulating in first hands, with no uneasiness on the part of holders, as the feeling is that with light stocks in hands of manufacturers and dealers, the high price of green hides and restricted production will cause prices to go higher. Shipments of coal opened with prices 30c. higher than last year, which is partially offset by the increased cost of mining. Opening rates were 60c., but have fallen off to 50c., with a probability that charters will be made next week at 40c., without the disadvantages of the sliding scale of last year. Prices, it is believed, will be well maintained. Western stocks in both port and rail towns are very slow, and shippers anticipate a free movement for the next sixty days. Stocks here for shipment are comparatively light.

From Rochester, N. Y.: Millers report trade quite dull. The combined capacity of Rochester mills is 3,000 barrels per diem. Last year at this season mills were running to full capacity, while at present but 1,500 barrels are being manufactured per day. A boom in wheat in January caused millers to make heavy purchases and dealers to lay in heavy stocks. A hesitating market followed, hence the falling off in the manufacture at present, dealers being over-stocked.

From Philadelphia, Pa.: Trade has improved in some departments during the past week, but there is still general complaint of a lack of vim and activity in comparison with former years at this time. The uncertainty as to the practical effect of the new tariff on some lines of textiles is retarding trade to some extent; and the general conservatism of buyers of manufactured goods unfavorably influences the market for wool and other staples of manufacturing supply, as some of the mills are curtailing production. All kinds of yarns are dull—even worsteds being less active than a short time ago. The local cotton and mixed goods mills are still working cautiously, and in most cases on part time. Other branches of manufacture are moderately active. There is a better export inquiry for grain and some business has been done, but orders are mostly below market rates, especially for wheat. Speculation in grain is not active. Larger receipts are anticipated this month. Upwards of 1,000,000 bushels of corn are now on the lakes en route to this port, but a large part of this is already sold for export. Flour shippers have been buying moderately, both for South America and Europe. The general jobbing trade in groceries and provisions has been more active. Fresh arrivals of butter are in good request. New cheese is coming forward more freely and sells fairly at declining prices. Southern vegetables are in good demand. Old potatoes are plentiful and lower. Petroleum continues quiet.

From Pittsburgh, Pa.: General trade is only fair, but with a continuance of settled and seasonable weather it is expected to improve somewhat. Collections generally reported fair.

WESTERN STATES.

From Cincinnati, Ohio: The volume of general trade is not satisfactory, possibly because farmers are so busily engaged in planting that they buy nothing from country stores. There is a healthy feeling, though prices have weakened. Flour has declined 10c., with family at $4.75. Wheat opened fair under a good milling demand, but closed dull with large receipts. Corn quiet. Cotton manifests more animation, with an advance of ⅜c. Receipts of country produce liberal and demand steady. Hemp, under moderate offerings, rules higher. Advices from Kentucky growing districts inform us that the acreage this year will largely exceed last. Whisky steady and unchanged. Tobacco unchanged, with possibly better grade of offerings and more active sales.

From Cleveland, Ohio: The condition of general wholesale business has changed but little during the past week. The millinery and straw goods trade is reasonably good, and the shipments of boots and shoes and clothing fair. Groceries are in active demand, and in building materials of all kinds the business continues fairly brisk. Lake navigation is fairly opened for the season, and outfitters and dealers in vessel supplies have been reasonably busy. Lumber is already beginning to arrive, and at city yards the demand is fair.

From Evansville, Ind.: Since the advent of good weather trade has improved wonderfully. The general tone is now healthy and vigorous. Farming interests are also in good shape, and the prospects are good for a successful business year.

From Indianapolis, Ind.: Trade in most lines is very fair and satisfactory, and prices are uniform. The weather is more seasonable, and trade for the season will correspond favorably with former years, although goods are sold on a small margin. Prices of wheat are higher.

From Chicago, Ill.: Boots and shoes are in fair request; leather moderately active. General trade fairly good. Groceries in fair demand from country. Wool weaker. Linseed oils active and steady. Wheat weak and unsettled; values contracted by combination who recently put up prices and now shaking out followers; no shipping demand, and little confidence felt in intrinsic values; general character of reports favorable for fair crop. Corn weak, depressed by drain in wheat; little speculative or shipping demand. Oats weak and declining; light demand from shippers and speculators.

From Peoria, Ill.: There has been no perceptible change in the trades to note. Travelers report stocks in country unbroken, owing to farmers being busy at home and unfavorable weather.

From Detroit, Mich.: General lines of business are doing a satisfactory trade. Cigar and tobacco manufacturers are making very heavy shipments this week. Collections are very fair. Lumbermen are anticipating lower prices for coarse lumber, but claim that stock will be unchanged.

From Louisville, Ky.: There is an average merchandise movement in jobbing circles. Reports regarding the wheat outlook indicate that, although the acreage is as large as last year, the stand has been impaired, perhaps, one-quarter to one-third by winter killing. The warm, forcing weather of late is developing the extent of the injury to be more general throughout this state than was heretofore supposed. Flour steady, firm, and in good demand. The grain trade is light. Wool firm. Whisky slow and easy. Exportations in bond have so far been small. Cotton is very strong; an active demand upon small offerings has advanced prices ¼@⅜c. Revenue collections in this city from manufactured tobacco for the first day under the reduced tax were $126,000. Shipments by local manufacturers are unprecedentedly large. Leaf tobacco receipts are light, prices weaker on nondescript shipping grades and stationary on good brown export grades. Lugs firm and fairly active. Manufacturing goods active and somewhat higher. A good proportion of the offerings are on soft order.

From St. Louis, Mo.: Flour quiet but firm. Wheat unsettled and fairly active. Corn a little weak and rather dull. Oats sharply upward, but offerings are small. General trade continues good. Railroad and river transportation is in good shape and nothing impedes movement of goods. Collections not quite so easy as previously.

From Kansas City, Mo.: General trade has been quite active. All leading lines report an increased business and better collections than at the same period last year.

From Burlington, Iowa: Business continues satisfactory in all branches. April sales generally show an improvement on last season's output.

From Davenport, Iowa: General trade is improving, with still better prospects ahead. The wholesale grocery trade is good, although it has been retarded on account of the necessary delay connected with the rebate in cigars and tobacco, it being necessary to take account of stock on hand May 1.

From Des Moines, Iowa: Retail trade in clothing and boots and shoes dull. In groceries it is fair. Wholesale trade in all lines is fair.

From Milwaukee, Wis.: The demand for money from mercantile borrowers has continued good during the past week. The movement of currency has been rather light. Seeding and attendant agricultural operations, which had been somewhat retarded on account of the backwardness of the season, have now fully commenced, and farmers pay little attention to anything else, which necessarily makes the trade among country dealers dull, and in turn has its effect upon the jobbers of the city. Trade delayed, arising from such causes, of course is understood to be only temporary, and merchants generally are inclined to look forward to a speedy and sure revival.

From St. Paul, Minn.: Lumber in fair demand. Boots and shoes, steady trade. Groceries, selling better. Drugs, lessened sales. Collections good.

From Lincoln, Neb.: Retail dealers now find a dull period of the year. Farmers are busy, and buy only as their necessities require. Jobbers find it difficult to dispose of goods only in small lots. The implement trade, that has been active, partakes of the general depression. Prospects of good crops the coming season are excellent, and all mercantile lines are consequently hopeful.

From Topeka, Kan.: General trade is fair at present. It was quiet during the early part of the week, owing to unfavorable weather. Prospects of a good wheat crop are much improved by recent rains. The leather and harness trades are active.

From Lawrence, Kan.: General trade remains unchanged. The prospects for a large crop of wheat are excellent. Rains have placed it beyond danger of a drouth.

CALIFORNIA.

From San Francisco, Cal.: General business quieter. Large importations check sales. There have been free arrivals of the new crop Hawaiian sugar. Tea dull. Tobacco active; internal revenue receipts for May over $100,000, principally tobacco. Hides inactive. Wool, no new business. Stocks large.

SOUTHERN STATES.

From Baltimore, Md.: General trade the past week was a little inanimate, but no complaints of dullness were heard. Transactions in tobacco since the first of the month have been exceedingly large and at present the demand exceeds the supply. The new crop of Maryland is mainly composed of good leaf and finds ready sales. Confidence in values is strengthening. The grain market has been fairly active and prices rule firm. A better inquiry prevailed for flour, but offerings were ample. Speculation in cotton was larger; holders are firm in their views and buyers are not disposed to meet them. The market, however, rules firm at the late advance. The market for crude petroleum has been unsettled, though higher; refined cargoes remain unchanged. Some little demand is reported in the freight market, but there are no signs of any permanent improvement for several weeks to come. A number of local strikes took place during the week, but did not amount to much. A new line of steamships have been established between this port and Amsterdam, and is known as the "Netherlands American Line." The first steamer cleared here on the 1st instant, and the second is expected to arrive on the 20th.

From Norfolk, Va.: Very little change has been reported in the general outlook since last report. All branches are doing their usual business. Receipts of cotton shorten every week; market firmer, factors holding up. Collections moderate.

From Richmond, Va.: General business is a shade quieter than last week.

From Wilmington, N. C.: The weather is changeable, with heavy rainstorms. Planting is a month late. The cotton market is firm; receipts fair. Grain and breadstuffs firm, with good demand. Freights quiet. Spirits turpentine easier. Rosins wanted. Tar and crude steady.

From Savannah, Ga.: The end of the cotton season is nearly over. The stock on hand is small, with light receipts coming in. Tone of market firm. The weather through the spring being cool, has lessened the sales of light fabrics. Merchants are now offering special inducements to lighten stocks rather than carry them over, and the money market

being easier has brightened trade in a manner. Heavy groceries have been in good demand, and full sales have been made for leading articles. Receipts of naval stores heavy for the season, and held firm with an advance for some grades.

From Macon, Ga.: General trade is but little better than last week. There is great activity in building and builders' supplies.

From New Orleans, La.: Louisiana products dull and unchanged. There are fair stocks of flour and grain for the demand, which is moderate; prices, however, are firmly maintained. Quarantine has stopped the export movement. Cottonseed products show little change, except for crude oil, which is 1c. lower. Coffee dull and unchanged.

From Galveston, Tex.: The weather throughout the week has been warm and pleasant. The annual manifest was largely attended, and as a consequence the general jobbing trade was considerably enlivened.

From Nashville, Tenn.: Trade for the week has been quiet. Flour and grain quiet. Wheat firm. Corn dull.

From Memphis, Tenn.: Trade during the past week shows very little if any increase. Corn firm. Oats scarce. Cornmeal is improving in feeling and the demand is stiffening. Flour is quiet but firm.

NOVA SCOTIA.

From Halifax, N. S.: Quite a fair amount of country trade seems to be doing this week. Weather is good, remittances have improved, and more confidence is felt throughout.

LATE MAILS.

Chicago, Ill., May 2.—Money is quoted easy at 6@7 per cent., 6 being the prevailing figure to large borrowers on grain and provision collaterals. A large grain fleet has cleared for the lower lakes within the past few days; but as bills had previously been drawn against a majority of the shipments, they have failed to materially increase the supply of bills on New York, and bankers' bills closed firm at 50c. premium per $1,000. The jobbing trade in dry goods is rather quiet, the sales being mainly on orders received by mail, yet the volume of goods distributed in this way is fully up to the corresponding time in 1882. Millinery and fancy goods meet a good demand, and the sales for the past four months show a gain on any corresponding period. Hats, clothing, boots and shoes meet an average sale, but are not called active. Hardware is selling more freely than at this date last year, and a good business is reported in farm machinery. Bar and all classes of structural iron is selling fairly on orders, the sales of railroad bridge material being very satisfactory, but all goods are sold on close margins, and the buying is on a basis of immediate wants. Pig iron is quiet, yet there is a steady demand for small lots for immediate conversion, workers being without stock and compelled to buy from day to day. Steel rails sell fairly, and as the outlook for the railroads is improving, rail-mill managers are hopeful of better times in the not distant future. Groceries are in fair request, and stocks of sugars and coffees very moderate. The wheat market is feverish and values unsettled by reports regarding the growing crops, which, by the way, are exceedingly complicating. The most reliable advices direct from the wheat fields, as a rule, justify the opinion that without further disaster the yield will be fair, while statements emanating from a trio having their headquarters at Columbus, Ohio, Milwaukee and St. Louis give most gloomy accounts of the situation, and the latter are largely believed by local speculators, or at least they are handled by them to increase buying. Corn shows little animation or individuality, and follows wheat up and down. The falling off in the receipts of oats the past few days has contributed to strengthen the market, but the large stocks and anticipation of increased receipts at an early day checks buying for an advance. Provisions are less active, and tone of market weaker. Operators are also discouraged at the large stocks and increasing receipts of hogs at a time when a diminution both in hogs and cured products was expected to be most marked, the stock of short-ribbed sides being far in excess of the expectations of all classes of dealers. The consumptive demand from domestic markets has also decreased, and just now the great mass of operators are more inclined to watch the movement of a few strong concerns than buy and sell on a basis of intrinsic values.

The following table exhibits the stocks of hog products on hand in Chicago on the dates named, as reported to the Board of Trade:

Articles.	*May 1, 1883.*	*Apr. 1, 1883.*	*Apr. 30, 1882.*	*Apr. 15, 1881.*

THE MONETARY CIRCULATION OF MEXICO.

The following appeared recently in the Paris *Bourse:*

It is extremely difficult to get at the real figures of the present stock of gold and silver in Mexico. The first metal plays a very inferior part indeed in the circulation, which consists almost entirely of silver; a careful study of the coinage and export lists leads, in fact, to the conclusion that at the utmost gold does not form more than 5 per cent. of the circulating medium of the country.

As regards silver, Mexico stands, as is generally known, prominent in its production, and since hundreds of years the whole world has, so to say, been provided with it in the form of bars and coins. The latter predominate, and it is even a most remarkable fact that the coinage of this metal during the last fifteen years represents within a very small limit its production. The export figures in connection herewith show for the same space of time about nine-tenths of the coinage, which from 1869 to 1881 was about 20,000,000 piasters per year.

It is most interesting to follow the coinage of silver and gold from the establishment of the mints in Mexico to the end of June, 1879, which was as follows:

GOLD.

	Period.	*Piasters.*
Macuquina or cob	1537–1731	8,407,950
Columnaria or pillar	1732–1771	19,889,014
Busto or head	1772–1821	40,391,447
Busto of Iturbide	1822–1823	557,392
Republic, eagle	1824–1874	45,907,372
July 1	1874–1879	3,717,974
Total		118,961,149

SILVER.

	Period.	*Piasters.*
Macuquina or cob	1537–1731	752,667,456
Columnaria or pillar	1732–1771	411,629,211
Busto or head	1772–1821	888,563,089
Busto of Iturbide	1822–1823	18,575,569
Republic, eagle	1824–1874	759,092,552
July 1	1874 1879	104,503,332
Total		2,964,432,109

Of this enormous amount only a very small fraction is now left in the country. According to the best estimates, the circulation consisted at the end of 1882 of 65,000,000 piasters in silver and only 3,000,000 to 5,000,000 in gold. To this we add another 4,000,000 as the amount to be provided for in copper and nickel money according to the law of December 16, 1881, so that we arrive at the said period, for a population of about 9,500,000 inhabitants, at the following figures as the probable circulation of the country:

	Piasters per head.
Gold money	0.50
Silver money	6.00
Billon	0.40

FACTS FROM THE NEW YORK CHAMBER OF COMMERCE REPORT.

The twenty-fifth annual report of the New York Chamber of Commerce is out. It consists of two parts, the first presenting an analysis of the proceedings of the Chamber at its several meetings during the year, and the second containing special reports of the several trades, with statistical tables of the transactions in each, and tables of exports and imports. The trade reports form a résumé of the entire commercial business of the country, and especially of this port, for the year, and will prove invaluable to merchants. The consumption of foreign sugar in 1882 was only 2½ per cent. over that of 1881, the sum of the increase being 24,500 tons, and the total consumption 943,000 tons, against 918,000 tons in 1881. Of the consumption only 7,600 tons was of native produce. "The decline of this crop in Louisiana since the war," says the report, "and the increase of the cotton crop of that state are conclusive evidences that it is not correct policy to continue the duty upon foreign sugar on any theory of protection. The present crop, it is said, will be the largest produced since the war, and promises to reach 230,000 hogsheads; but even this is not worth the protection it costs to the consumers." The changes in the price of sugar for the year were small, fair refining ranging 6⅞@7½c., the average being 7.29¼c., against 7.62c. in 1881. In the molasses trade the decline noticed in 1881 has been recovered, and there has been an important consumption of this product of the cane, notwithstanding the falling off in the southern crop. The total receipts of foreign molasses in 1882 were 39,000,000 gallons, against 26,000,000 in 1881, an increase of 13,000,000 gallons. The total consumption in this country amounted to 49,000,000 gallons, against 42,000,000 in 1881, and of this amount New York delivered for consumption 16,000,000 gallons. The price of Cuba molasses averaged 34½c. per gallon in 1882, against $33^{47}/_{100}$c. in 1881, and 35c. in 1880. The coffee trade has suffered somewhat from over-production. The total receipts from all sources for 1882 were 222,000 tons, against 205,000 tons in 1881, while the total consumption was but 219,000 tons, against 191,000 tons in 1881. Of this New York received in 1882 175,000 tons, against 154,000 in 1881. The average price of fair to prime cargoes of Brazil has been $9.77 per 100 pounds in 1882, against $12.30 in 1881 and $15.12 in 1880. The prospects of the present year are still uncertain, but there is promise of abundant crops. The tea market also suffered from over-production in 1882, and prices, though low, were not sustained. In the tobacco trade production and sale were on a large scale, but prices were not remunerative. The wool market for the year was dull and declining. The domestic crop was estimated at 300,000,000, the foreign imported at 72,000,000, and the consumption at 375,000,000 pounds. Of the 72,000,000 pounds imported, 36,000,000, or 50 per cent., came to this port.

The exports which, in consequence of the moderate crops of 1881, showed a marked falling off, have again, with the bountiful harvests of 1882, been on a large and profitable scale. Of the cotton crop of 1882, 3,595,031 bales were exported, a decrease of 1,000,000 bales as compared with 1881. The exports of cotton manufactures have not increased at the rate anticipated. Rising from the value of $9,981,418 in 1880 to $13,571,387 in 1881, they fell in 1882 to $13,222,979. The range in prices was higher than in 1881, middling upland ranging in the New York market from $11^{9}/_{16}$c. to $13^{1}/_{16}$c. The enormous figures of the breadstuff export have not been maintained. The value of our export of wheat and wheat flour in 1882 was $149,000,000, against $213,000,000 in 1881, a falling off in a single year of $64,000,000. Of this shipment New York had $59,000,000, against $94,000,000 the previous year. The entire value of grain exported from the country was $182,000,000, against $288,000,000 in 1881. There was also a noticeable falling off in the exports of provisions and live animals. Of the latter, 448,000 were sent to Europe in 1881, and their value reached nearly $10,000,000. In 1882 but 300,000 were exported. The total value of foreign imports into the United States, including specie and bullion, for the fiscal year ending June 30, 1882, was $767,111,964, an increase of $13,871,839 over the imports of the previous year. The share of New York of this import trade was 68 per cent. The total value of the domestic exports, including specie and bullion, for the same period was $776,720,003, against $898,152,891 the previous year, and of this export trade New York absorbed 47½ per cent. The balance of trade, or the excess of the value of exports over imports of merchandise, for the calendar year of 1882 was $15,138,439. The carrying trade of the country is still depressed, less than 19 per cent. of our whole business being done by American ships. The amount of gold and silver in the country on January 1 last is estimated at $712,216,444, and from present appearances the importations will exceed the exportations during the present calendar year. The report concludes by predicting a year of "quiet prosperity for the entire country, of which New York will, as in the past, receive her ample share."

MEXICAN DEVELOPMENT.

The substance of the forthcoming annual report of Consul-General Strother, of Mexico, is as follows: The close of the year 1882 finds the Mexican republic in the enjoyment of continued peace and a degree of national prosperity heretofore unknown in her history. The extensive system of railroad communication, which will connect her capital city with those of all the different states of the union, the principal seaport of the Pacific ocean and the gulf, and the whole at several different points with the railroad system of the United States, is advancing rapidly to completion. The successful initiation of these important enterprises has given a stimulus to all branches of industry, to the government and to society, the results of which it would be difficult to estimate. Mining, which has hitherto been the chief productive industry of the country, is now increasing to an extraordinary degree both in extent and variety, while the old established works, generally of silver and gold, are introducing new methods and machinery, and actively developing their capacities for production. We hear of the discovery of new veins, the reopening of old and abandoned mines, the discovery of iron, coal and petroleum, and all the elements of material wealth, with a rapidity that baffles statistics. The stimulus given to the agricultural interest has been equally notable. The culture of the cereals—corn, wheat and barley—has been greatly increased, as has been likewise the planting of sugar-cane, cotton, tobacco and coffee. In those districts adapted to their culture, companies have been formed and charters granted by the government to promote the cultivation of the Maguey hemp and other of the valuable textile plants which flourish peculiarly in Mexican soil. The government is also actively exerting itself to extend the cultivation of the vine, the olive and the silk mulberry, introducing large quantities of those plants from Europe and elsewhere, and distributing them among the most intelligent native planters, and Italian, French, Swiss and German colonists now locating in different sections of the republic. The increased demand for American agricultural implements and machinery is the natural result of the revival in agriculture throughout the country. With new seeds and plants, improved methods and machinery, steps are also being taken to introduce better breeds of cattle, horses, sheep and poultry from all parts of the world where they may be obtained. The government is also especially solicitous and liberal in its efforts to establish and cherish home manufactures of all kinds, and the facilities of transportation afforded by the new railroad lines and new lines of steamships recently started have greatly encouraged the investment of domestic and foreign capital in new manufacturing enterprises. A number of patents have already been granted by the government to American citizens for new machines and improved methods for making available the numerous and varied natural products of the soil and climate, which have hitherto grown useless and neglected for lack of knowledge and scientific methods for their treatment. In brief, there is no branch of the natural wealth of this country which is not at this period attracting more or less interest and practical attention. It may be noted, however, that cotton and woolen factories, which are the most numerous and important manufacturing establishments in the country, are yet obliged to import from foreign countries the greater portion of the raw material used. As a significant illustration of the present drift of public sentiment, I was told by an extensive dealer in American arms and agricultural implements that, while formerly he sold $100 worth of warlike arms and ammunition to $10 of agricultural tools, the proportions were now reversed; and not long before, a certain local notoriety of the mountain districts, who had acquired a formidable reputation as an independent guerilla leader in past wars, and as a frank highwayman in the intervals of peace, had made a descent upon the city, unarmed and unattended, and purchased two plows. An examination of the custom house returns from both coasts, and recent railroad reports, will show that both the internal and external commerce of Mexico is developing responsively and in due proportion to its industrial activity. To provide for the requirements of this increased commercial activity a notable change is taking place in the currency. A number of banks have been chartered in the capital, which are locating their branches in the seaports and different commercial centers, issuing notes of denominations from $1 to $1,000, which paper currency is rapidly supplanting the time-honored, but cumbersome and embarrassing, silver dollar.

TRADE EMBARRASSMENTS.

There were 132 failures in the United States reported to BRADSTREET'S during the past week, 54 less than the preceding week, 36 more than the corresponding week of 1882, and 28 more than the same week of 1881. Compared with the previous week the middle states had 36, a decrease of 11; New England states 19, a decrease of 7; southern states 20, a decrease of 24; western states 39, a decrease of 13; Pacific states and territories 18, an increase of 1; Canada and the Provinces 25, a decrease of 14. The prominent failures were The St. Albans Iron & Steel Company; Foster & McKay, engine manufacturers, Titusville, Pa. In the principal trades they were as follows: Grocers 24; general store 22; liquors 17; manufacturers 6; shoes 5; hardware 5; hotels and restaurants 5; dry goods 4; jewelry 4; millinery 3; produce and provisions 3; bakers and confectioners 3; iron 2; crockery 2; paper 2; tobacco and cigars 2; books and stationery 2; clothing 2. During the past ten days there has been a marked decrease in the number of failures as compared with the large number reported from week to week heretofore during the present year.

ARKANSAS.

SEARCY.—W. A. B. Jones & Son, grocers, have had judgments and attachments issued against them, but are still doing business.

CALIFORNIA.

BUTTE CITY.—Lawson Brothers, general store, are reported to have left town.

INDIANA.

FRANKLIN.—W. H. Thompson & Co., dry goods, have assigned. They carried a large stock.

NORTH MANCHESTER.—Abersohn & Weiner, clothing, have been closed by the sheriff.

IOWA.

IOWA CITY.—Inglert & Rittenmeyer, brewers, have been closed on a chattel mortgage.

MADRID.—F. A. Alvine, shoes, has assigned. Liabilities $4,463; assets $3,830.

SIGOURNEY.—Welker & Wilson, millinery, have failed.

WEST GROVE.—M. S. Mink, general store, has failed.

KANSAS.

HAVENSVILLE.—John C. Pitman, saloon, has failed and gone out of business.

KENTUCKY.

GLASGOW.—Henry Raubold, confectionery, has assigned.

OWENSBURGH.—E. A. Seelin & Co., tinware, have assigned. Liabilities $800; assets $500. They offer 50 cents.

LOUISIANA.

NEW ORLEANS.—Charles G. Johnson, president of the New Orleans Foundry & Machine Company, is reported to be offering to compromise individually liabilities of $50,000 at 33 1-3 cents, which is being generally accepted. The company, it is said, is paying up in full.

PAINCOURTVILLE.—A. V. Pintads, general store, is reported to have sold out and left town without settling with his creditors.

MAINE.

AUBURN.—H. B. Pulsifer, sole manufacturer, owes $12,000; assets $1,500. It is said he will pay 15 cents.

BANGOR.—W. H. Edmunds, jewelry, has failed. Liabilities about $6,000; assets estimated at $3,000 in stock.

BANGOR.—B. S. Kalish, jeweler, owes about $9,000; nomina assets $7,000; actual assets $5,000.

FREEPORT.—Paul C. Pinkham, general store, has turned over all property to creditors, and paid 28 cents. He has gone out of business.

LISBON.—Littlefield & Co., grocers, are reported offering 25 cents. Liabilities about $6,000.

RUMFORD CENTRE.—N. S. Farnham, general store, is reported offering to compromise at 50 cents.

MARYLAND.

BALTIMORE.—Jacob Myers, paper hangings, has filed a petition in insolvency.

MASSACHUSETTS.

BOSTON.—E. L. Arnold, leather, has failed, and negotiations are in progress for a compromise at 50 cents. Liabilities about $22,000, the greater part of which is due in New York, as he owes only $1,200 in Boston. He shows assets $16,000. He met with losses by bad debts.

BOSTON.—The total liabilities of Finn, Carson & Co., hats, are $12,696, of which $5,000 is for borrowed money, $7,213 for merchandise, and the balance personal debts. The assets consist of stock $3,000; accounts $2,600; cash $664; sundries $165. They have filed a petition in insolvency.

FAIRHAVEN.—W. H. Dwelly, nursery, is in insolvency.

HAVERHILL.—A. H. Herring & Son., shoe manufacturers, have assigned. Liabilities reported at $10,000.

LAWRENCE.—N. H. Banfield, hotel, has been attached.

LEOMINSTER.—E. M. Rockwell, woolen manufacturer, has been attached.

LOWELL.—Maguire Brothers, grocers, have failed. Liabilities about $2,000; assets small.

PALMER.—The liabilities of Jesse Pierce, shoes, are about $3,500; nominal assets $2,500; actual assets $1,800. The stock is mortgaged for $1,550.

WATERTOWN.—George W. Savin, hotel, is reported to have failed. Liabilities about $4,700; assets $1,120.

WORCESTER.—Henry F. Cole, fruit, has been attached.

MICHIGAN.

HESPERIA.—Millard & Cook, grocers, have been closed up under chattel mortgage.

LANSING.—T. B. Thrift, hardware, has assigned to L. H. Cochrane.

MINNESOTA.

BRANDON.—Molden Brothers, saloon, have been closed by the sheriff.

HASTINGS.—H. Gillette, dry goods and clothing, has assigned to L. S. Follett.

MINNEAPOLIS.—Barthe & Lampe, manufacturers of cigars, have assigned.

MISSISSIPPI.

CANTON.—H. C. Page & Co., saloon, have assigned.

TCHULA.—B. Y. Alverson, general store, has failed and been attached.

MISSOURI.

BELTON.—Holloway & Walton, general store, have assigned. Liabilities about $5,000.

GUTHRIE.—C. D. Wells, drugs, has failed.

HUMANSVILLE.—G. P. Hendricks, general store, has assigned.

ST. LOUIS.—The St. Louis Distilling Company was advertised to be sold out under foreclosure of a trust deed executed November 21, 1882, for $40,000. Most of the liabilities are said to be secured.

ST. LOUIS.—S. A. Todd, dry goods, has assigned to Charles Hamilton.

NEBRASKA.

FRIEND.—Eli Yelter, dry goods, has sold out to creditors.

GARNER.—George F. Mason, general store, is reported financially embarrassed.

LINCOLN.—C. W. Chambers, ladies' goods, has been sold out by the marshal.

REPUBLICAN CITY.—Frank A. Kirk, jeweler, has failed.

WAHOO.—Lanik & Urban, hardware, have assigned.

YORK.—Miller Brothers, agricultural implements, have failed.

NEVADA.

LOVELOCKS.—J. W. Kitchen has filed a petition in insolvency.

NEW HAMPSHIRE.

ENFIELD.—J. F. Bryant, general store, is reported to have been attached.

PORTSMOUTH.—F. H. Newman, liquors, has been attached, and will be sold out by the sheriff. Actual assets about $500.

NEW MEXICO.

ALBUQUERQUE.—Max Stein, grocer, has been attached.

NEW YORK.

ALBANY.—G. W. Clark, teas, has assigned to Myron F. Smith.

ALBANY.—J. K. Reynolds, grocer, has assigned to Walter E. Wood.

BROOKLYN.—Caroline Davis, jewelry, has assigned to Max Olendorff, giving preferences for $1,335.

BUFFALO.—George & Thomas Farthing, distillers, have had paper for a large amount protested on the 30th ult., which has not yet been provided for. The books are now being examined, and the result will decide whether they will go on or not. They are thought to have a large amount of paper out, but also sufficient assets to cover liabilities if granted an extension. It is said they had $150,000 invested in the business, and as much more in good available property.

BUFFALO.—The firm of H. T. Gillett & Son, wholesale liquors, is reported embarrassed through G. & T. Farthing.

BUFFALO.—Sherman Brothers & Co., cement, are reported embarrassed through G. & T. Farthing, whose paper they are said to hold to a large extent. This is the same firm as Sherman, Howe & Co., commission flour, of New York city. It is said that the Buffalo house sold grain to T. & G. Farthing, took notes for it, indorsed them, and that some of these have gone to protest by the Messrs. Farthing.

BUFFALO.—The schedules of Elmore Welsh, lumber, show liabilities $1,803; nominal assets $2,511; actual assets $1,508.

CARLISLE.—John E. Brown, produce, has assigned to his brother, and is reported offering to compromise at 75 cents.

CAYUGA.—R. R. Candee, grocer, has assigned.

KNAPP'S CREEK.—J. E. Hazard & Co., general store, have assigned. Liabilities over $3,500; assets about $1,500.

NEW YORK CITY.—Moses T. Buchanan, paper stock, assigned on the 3d inst. to James Elliott, giving a preference to Dorcas Davis for $1,000.

NEW YORK CITY.—The schedules of Crowder & McGarvey, furs, show liabilities $14,839; nominal assets $10,084; actual assets $5,259.

NEW YORK CITY.—Frederick Kloechner, oil broker, suspended on the 3d inst., having been caught short of oil.

NEW YORK CITY.—Benjamin Levene, crockery, assigned on the 1st inst. to Jacob J. Goodman, giving preferences to Joseph Heron $2,500; Isaac Angel $370; total $2,870. This is said to be his third failure.

NEW YORK CITY.—The schedules of George Palen & Co., leather, show: Firm debts $598,021; individual debts $26,000; nominal assets $487,799; actual assets $279,785. The principal items in the actual assets are: Accounts $41,628; notes, etc., $45,913; tannery at Limestone, N. Y., $36,321; land in McKean county, Pa., $11,557; equity in real estate $15,000; hides $47,512.

NEW YORK CITY.—David Pontreniola, Italian grocer, assigned on the 30th ult. to Wm. A. Benjamin, giving preferences for $2,346, of which $1,700 was to Frances Pontrenio

NEW YORK CITY.—The schedules of Isaac Sipp dry goods agent, show liabilities $236,579; nominal assets $572,533, of which $460,153 is in mining stocks at par value, the actual value being $927; actual assets $14,768.

NEW YORK CITY.—Orrin F. Smith, paper manufacturers' agent, has failed and is reported to have left town nearly a week ago. His liabilities are about $20,000, and he has left very little assets. Most of the debts are to out-of-town creditors.

NEW YORK CITY.—The schedules of R. J. Spethman, importer of white goods, show liabilities $87,381; nominal assets $25,969; actual assets $14,395.

NEW YORK CITY.—The schedules of Frank R. Van Ness, saddlery hardware, show liabilities $23,683; nominal assets $24,207; actual assets $2,868.

NEW YORK CITY.—William Wagler, suspender web manufacturer, assigned on the 2d inst. to Ora Howard, giving preferences to E. Oelbermann & Co. $1,884; Richard Young $80. Mr. Wagler was also the capitalist of F. C. Wright & Co., suspender manufacturers. They dissolved April 21, Mr. Wagler taking the assets and assuming the liabilities. Oelbermann & Co. attached him on the ground of an unexplained deficiency of $7,000 since January 1. The liabilities are about $6,000; the assets are nominally larger.

NORWICH.—Brooks & Rice, general store, have assigned.

SAVANNAH.—A. J. Conroe, general store, has assigned to Arthur A. Cook, giving preferences for $1,077.

SING SING.—Chas. E. Yoemans, feed, has assigned to Allen C. Yoemans, with preferences for about $700; assets about $1,000.

TONAWANDA.—I. J. Romer, planing mill, has assigned.

TROY.—John A. Ferris' Son, agent, crockery, has assigned. It is thought the preferences will absorb the greater part of the assets.

NORTH CAROLINA.

CHERRYVILLE.—G. W. Bess, general store, is reported to have failed.

INDIAN TOWN.—Griggs & Forbes, general store, have dissolved, and Mr. Forbes assigned individually.

RALEIGH.—D. I. Fort & Co., general store, are reported to have failed. Liabilities about $3,000; assets $500; preferred claims $2,800.

OHIO.

CLEVELAND.—F. H. Kaufman, hats and caps, has assigned to W. H. Kees.

COLUMBUS.—L. M. Bloomberg, clothing, has assigned to Casper Lowenstein.

DELTA.—Rupp & Co., grocers, have failed.

FREMONT—E. L. Cross & Brothers, jewelers, have assigned to H. S. Buckland.

MIDDLETOWN.—Fountain & Son, grocers, have assigned.

TIFFIN.—C. H. Baumgardner & Co., grocers, have been closed by the sheriff.

OREGON.

COQUILLE CITY.—J. F. Moulton, general store, has failed.

PORTLAND.—L. Glennon, grocer, has been attached for $516.

PORTLAND.—D. D. Lavin, saloon, has been sold out by the sheriff.

PENNSYLVANIA.

ALLEGHENY CITY.—J. G Stand & Son, soap, are advertised to be sold out by the sheriff on the 8th inst. on execution for $5,500.

ERIE.—Brum Wieland, liquors, has been closed by the sheriff.

JOHNSTOWN.—F. W. Clark, wholesale produce, has assigned.

LANCASTER.—The liabilities of Hess & Flinn, furniture, are estimated at $20,000; preferred claims $12,500; nominal assets $8,000; actual assets $5,170.

LONG SWAMP.—J. L. Brensinger, blacksmith, has assigned.

NEW HOLLAND.—Laban Raezer, grocer, has assigned.

PHILADELPHIA.—The household goods of Simon A. Gartland, undertaker, are advertised to be sold out by the sheriff on the 9th inst.

PHILADELPHIA.—E. P. Glenn, hotel, has been sold out by the constable for rent.

PHILADELPHIA.—Moss & Co., wholesale stationers, have suspended. Judgments for $39,588 have been entered against them. The business was established in 1812 by the father of the senior partner.

PHILADELPHIA.—Matthew O'Brien, liquors, was advertised to be sold out by the sheriff.

PHILADELPHIA.—William Schnitzer, beer saloon, was sold out by the constable recently, sale realizing very little.

PHILADELPHIA.—Judgments for $10,352 have been entered against F. W. Simpers & Co., flavoring extracts. They owe about $10,000 for merchandise, and the stock is valued at about $5,000.

PHILADELPHIA.—Thomas C. Sites, hosiery manufacturer, was sold out by the sheriff on the 28th ult. Judgments to the amount of $1,268 were entered against him recently, and effects bought in by one of the judgment creditors. The amount of sale is believed to have been insufficient to satisfy preferred claims.

PHILADELPHIA.—The assignee of John G. Staggers, manufacturer of soaps and perfumery, thinks he can pay about 35 cents. Liabilities about $5,600.

PHILLIPSBURG.—The liabilities of William D. A. Naugle, jeweler, who has been sold out by the sheriff, are about $2,500; nominal assets $1,500; actual assets $900; preferred claims $1,200.

PITTSBURGH.—Execution has been issued against William McKenney & Son, scrap iron, for $11,900 in favor of William J. McKenney, J. Miles and M. Sunkil.

SALUNGA.—Joseph S. Stigler, general store, has been sold out by the sheriff.

SHAMOKIN.—O. E. Gehres, shoes, owes about $4,500; nominal assets $5,000; actual assets $3,000; preferred claims $3,142.

TITUSVILLE.—Frank Marks, shoes, has confessed judgment for $3,000, and is in the hands of the sheriff.

TITUSVILLE.—Foster & McKay, manufacturers of engines, have confessed judgments for $92,000, and are in the hands of the sheriff.

TOPTON.—James Butz, hotel, has assigned.

ZION'S STATION.—O. F. Haas, general store, has been sold out by the sheriff.

RHODE ISLAND.

PROVIDENCE.—I. D. Chase, grocer, has assigned.

PROVIDENCE.—The Davenport Arms Company has assigned.

PROVIDENCE.—W. F. Gladding, grocer, has assigned to B. B. Hammond.

SOUTH CAROLINA.

ORANGEBURG.—P. G. Cannon, hardware, owes $4,000; nominal assets $1,400; preferences $490.

TENNESSEE.

GREENVILLE.—H. G. Arrowood & Co., general store, are reported to have left town.

NASHVILLE.—Rose & Rice, grocers, have failed and assigned.

UNION CITY.—Mrs. Rachel Moore, milliner, has failed.

WAVERLY.—A. P. White, general store, has failed.

TEXAS.

DENISON.—Isaac Yeidel, saloon, has assigned.

WACO.—C. S. Robinson, plumber, has assigned.

VERMONT.

ST. ALBANS.—The St. Albans Iron & Steel Company has gone into insolvency. The schedules show liabilities $505,000; assets $497,000. A meeting of creditors will be held on the 11th inst. to choose an assignee The works have not been running for two months past, as working could not be made profitable in view of the changes in tariff. The company was organized with a capital of $300,000; the property cost $360,000. It became embarrassed in the fall of 1878, but resumed in the spring of 1879 by issuing $120,000 notes, running five years, to take up the floating debt and other obligations.

VIRGINIA.

CHINCOTEAGUE ISLAND.—S. E. Matthews & Co, general store, have assigned.

WISCONSIN.

MADISON.—Sturm & Heine, shoes, have been attached.

WAUSAU.—Max Krembs, hardware, has assigned to H. A. Fluth.

MANITOBA.

WINNIPEG.—The stock of W. A. Fowler & Co., jewelers, is advertised to be sold out by the trustee.

NOVA SCOTIA.

HALIFAX.—J. W. Belcher, auctioneer, is reported to have left town.

HALIFAX.—John N. Grant, commission, has assigned.

HALIFAX.—Joseph E. Hamilton, hats, has assigned.

HALIFAX.—George W. Jones, commission agent, has called a meeting of creditors.

HALIFAX.—A. L. Slipp, livery, has assigned.

HALIFAX.—The liabilities of Thomas & Co., hats, are about $25,000; nominal assets $28,000.

TORBROOK.—S. E. Sparr, general store, has assigned.

PRINCE EDWARD ISLAND.

CHESTERTOWN.—John McLeod & Co., tailors, have assigned.

PROVINCE OF ONTARIO.

FONTHILL.—A. B. Rice, general store, is in the hands of the sheriff.

GUELPH.—Charles Humphries, teas, has obtained an extension.

HAMILTON.—J. C. McKeand, house furnishings, is reported financially embarrassed.

HENDERSON.—The stock of J. B. Dupuis, general store, is advertised for sale by trustee.

MARTINTON.—N. C. Smith, general store, is financially embarrassed.

ORILLIA.—George Tipping, brewer, is reported financially embarrassed.

H. M. HOXIE, TRAFFIC MANAGER,
GEO. OLDS, GENERAL FREIGHT AGENT,
F. CHANDLER, GENERAL PASSENGER AGENT, } ST. LOUIS.

EASTERN AGENCY:

No. 243 BROADWAY, NEW YORK.

THE GREAT

Northern Pacific Route

IS NOW OPEN

FROM ST. PAUL AND DULUTH TO LIVINGSTON, AT THE HEAD OF THE YELLOWSTONE VALLEY, AND FROM PORTLAND AND PUGET SOUND TO A POINT NEAR MISSOULA.

THE GAP IS NOW ONLY 240 MILES
and will be closed early in the working season of 1883.

The Northern Pacific Railroad

IS THE DIRECT LINE

To the famous Wheat Fields of Dakota.
To the beautiful Yellowstone Valley.
To the wonderful National Park.
To the great Montana Cattle Ranges.
To the new Gold and Silver Mines.
To the new Grain Belt of Washington.
To the Rich Valleys of Oregon.
To the magnificent Puget Sound Region.

It runs through the Growing Towns of the New Northwest.

IT PASSES THROUGH SCENERY OF UNSURPASSED BEAUTY.

IT IS THE BEST ROUTE

For Settlers, Travelers and Sportsmen.

Fast Trains and Pullman Cars.

H. HAUPT, General Manager,
ST. PAUL, MINN.

G. K. BARNES, Gen. Passenger and Ticket Agt.,

BRADSTREET'S:

A Journal of Trade, Finance, and Public Economy.

PUBLISHED BY THE BRADSTREET COMPANY,

279, 281, 283 BROADWAY, NEW YORK.

Terms, $5.00 per year in advance, including postage.

SINGLE COPIES, TEN CENTS.

SPECIMEN COPIES WILL BE SENT FREE UPON APPLICATION.

As a financial and commercial newspaper the foremost purpose of BRADSTREET'S is to be of practical service to business men.

Its special trade and industrial reports; its weekly epitome of bankruptcies throughout the United States and Canada, and the summaries of assets and liabilities, are alone worth the subscription price.

The synopses of recent legal decisions constitute an exceedingly valuable feature.

As commercial transactions, in the wider sense, are coming to be more and more conducted on a statistical basis, the information contained in BRADSTREET'S is of the first importance both to producers and middle-men.

THE TRADE AND AGRICULTURAL SITUATION THROUGHOUT THE UNITED STATES AND CANADA IS REPORTED BY TELEGRAPH TO BRADSTREET'S UP TO THE HOUR OF PUBLICATION.

Fine Worsted Yarns, suitable for Cassimeres, Coatings, Dress Goods, etc.; also Knitting and fine Zephyr Yarns, for hand and machine work.

MAVERICK NATIONAL BANK
COR. WATER AND CONGRESS STS.,
BOSTON.

CAPITAL, - - - -	$400,000
SURPLUS, - - - -	400,000

Transacts a general Banking business. Receives the accounts of Banks, Bankers and others. Draws Foreign Exchange and makes Cable Transfers in Europe and Telegraphic Transfers of money throughout the United States. Buys and sells Government and other Investment Securities, and executes any business for its Correspondents in the line of Banking.
ASA P. POTTER, PRESIDENT.
J. J. EDDY, CASHIER.
J. W. WORK, ASS'T CASHIER.

J. R. LEESON & CO.,
LINEN THREAD IMPORTERS.
Selling Agents in U. S. A. for FINLAYSON, BOUSFIELD & CO., Johnstone, Scotland; and THE FLAX MILLS, Grafton, Mass.
298 DEVONSHIRE STREET, - - BOSTON.
The only Prize Medal of the London Exhibition, 1851; at Northampton Exhibition of Leather Work, 1873; at Cincinnati Exposition, 1879-'80; The Gold Medal Leather Exhibition at Frankfort-on-Main, Germany, 1881, etc., etc. Adopted by every machine on exhibition at New England Manufacturers' and Mechanics' Institute Fair, 1881 (Boston), to show the quality of work the machines would do. Did not exhibit at Paris, Philadelphia, or Charitable Mechanics' Fair, Boston, 1881.

JOHN P. SQUIRE & CO.
Packers of
PORK, LARD, HAMS,
AND MANUFACTURERS OF EXTRA LARD OIL,
21, 23 & 25 FANEUIL HALL MARKET, AND 39 NORTH MARKET STREET, } BOSTON.
JOHN P. SQUIRE. [*Established in* 1842.] FRANK O. SQUIRE.
Slaughtering and Curing Establishment, Gore Street, East Cambridge.

FORBES LITHOGRAPH MANUFACTURING CO.
PRINTING
EXECUTED BY ALL KNOWN METHODS AT SHORT NOTICE.
Albertypes, Tickets, Tags, Color-work and Embossing.
181 DEVONSHIRE STREET, BOSTON.

THE
PLUME & ATWOOD MFG. CO.
MANUFACTURERS OF
BRASS & GERMAN SILVER, SHEET AND ROLLS,
BRASS, COPPER AND GERMAN SILVER WIRE,
KEROSENE LAMP-BURNER GOODS,
COPPER RIVETS AND BURS,
BRASS JACK-CHAIN, Etc., Etc.
Warehouses: 13 FEDERAL ST., BOSTON. 18 MURRAY ST., NEW YORK. 115 LAKE ST., CHICAGO, ILL.
Factories: WATERBURY, CONN. *Rolling Mills:* THOMASTON, CONN.

EDWARD J. HAMMOND & CO.
Wholesale Commission Dealers in
WESTERN PINE AND HARDWOOD
LUMBER,
No. 55 KILBY STREET, BOSTON, MASS.
TERMS: Cash less 2 per cent. and 5 per cent. commission; 75 per cent. advanced on Bills of Lading, if desired.
Refer to FREEMAN'S NATIONAL BANK, Boston.

BROWN, WOOD & KINGMAN,
SELLING AGENTS FOR
RENFREW MANUFACTURING CO.,
RENFREW MILLS,
FREEMAN MANUFACTURING CO.,
ARLINGTON MILLS,
GEO. H. GILBERT MANUFACTURING CO.

BRADSTREET'S

A JOURNAL OF

TRADE, FINANCE, AND PUBLIC ECONOMY.

PUBLISHED WEEKLY BY

THE BRADSTREET COMPANY,

NOS. 279, 281 & 283 BROADWAY, NEW YORK.

London Office, 84 Newgate Street, E. C.

TERMS: $5.00 PER YEAR IN ADVANCE; SINGLE COPIES 10 CENTS.

All communications regarding editorial or literary matters should be addressed to the Editor; all others to the Publishers.

ENTERED AT THE POST OFFICE AT NEW YORK, N. Y., AS SECOND-CLASS MATTER.

SATURDAY, MAY 12, 1883.

NOTES OF THE WEEK.

The *Evening Post* closes an article on the last deal in New York city politics as follows: "Although the latest results of municipal government by bargain are not so scandalous as some others, there is nothing in them to relieve the state legislature from the duty of giving the city some better system of local administration." Evidently the *Post* has yet to learn that the legislature is not a gift enterprise, and will never "give" a better form of government to New York city save as an intelligent, well-defined and unmistakable demand therefor goes up from the city. Just here it is worth noting that in all likelihood the true remedy for local ills will first be formulated in the columns of New York journalism. The day of the pamphleteer has gone by, and in his place there exists the daily journal, with the cumulative power of iteration. It is time for the press of New York city to cease scolding in relation to local evils, and instead to set about studying with a view to thoroughly understanding the subject. To-day there are no intelligible reports of the condition of the city's finances or the work of the various departments. This should be done by the daily journals of position by way of a partial return for the great revenues they draw from the city. To illustrate: Such a defalcation as that of the late Ed. Gale, tax receiver, would not have been possible had New York journalism been doing its duty. The press should speak advisedly regarding the direction of city business or not at all. Here are the *Times*, *Tribune*, *Sun* and *Herald* all calling upon the legislature for better government, while not one of them undertakes to discuss the subject from knowledge, as the affairs of a private corporation would be discussed by these same editors as directors. Regarding the conduct of city business, the daily newspaper is a professional adviser or nothing. The journalism of the future must analyze and inform, instead of merely scolding. Dogmatic journalism in the United States ended with the settlement of the war questions. The journalism which is to do the work of the specialist in relation to so important a question as the administration of a great city has yet to be brought forth.

In connection with the municipal problem it is noteworthy that the *World* newspaper has changed hands, being now under the editorial direction of Mr. Joseph Pulitzer, who brings to the work the prestige of acknowledged success in the difficult field of newspaper publishing. The new *World* will find abundant work at hand in the necessity for a better administration of New York city's business. The Municipal Society, which was to look after things, has gone out of business, as might have been anticipated from its methods and manners.

Telegraphic dispatches to BRADSTREET'S from leading trade centers throughout the country reveal no new features of importance in the condition of general trade. The business situation continues to be in the main fairly satisfactory. In the east there is some activity in special lines, but collections are somewhat slow. In the middle states the trade movement has been one of moderate proportions, purchasers adhering to a conservative policy, and, as a rule, buying only for immediate wants. In the west the state of trade is, on the whole, reasonably good, though there are complaints in some sections that the spring trade is light and not up to expectations. Trade is not so good in retail as in wholesale lines, partly on account of the farmers being busy with spring work and partly owing to the weather and the bad state of the roads. The general feeling, however, is healthy, and there are signs of improvement. The trade situation on the Pacific coast offers no features of interest, general business there being quiet. In the south very little change is noted. The volume of trade there has been only moderate, though some sections report an improvement, which is attributed to more seasonable weather. Special dispatches regarding the condition of the growing cotton crop are to the effect that, although the season is backward, and the crop consequently late, yet the weather is in the main favorable at present, and the prospects of the crop are good.

Since the publication of the April report on the winter-wheat crop by the Agricultural Department, at Washington, BRADSTREET'S has commented thereon in a manner to call forth criticism at certain quarters. This journal said that the April report did not represent the condition at the time it was made public (April 10), inasmuch as information was at hand from California at total variance with the report made by the Agricultural Department. It may have been strictly true that the condition on April 1 was worse than on April 10, but the fact of the favorable change was known to the public at the time the department report came out, and there should have been at least some notice with the report to that effect. In another comment mention was made of the improvement that had been reported in Wisconsin and Michigan at or about the time the department crop advices appeared. It has been pointed out to us that Wisconsin raises but a comparatively small quantity of winter wheat, and that that state had not been considered in the report. This granted, it renders the reminder of no less significance, as originally made in these columns. The reports which we quoted as to a gain in Michigan, according to the May report of the Agricultural Department, must have been erroneous, for we note that winter wheat in that state has declined as to condition from 93 to 83, as compared to a fair average of 100. The May report places the condition lower in New York, Michigan, Ohio, Illinois and Missouri, but fully as good, or higher, in most other states. The general average of condition on May 1 against that on April 1 is given at 83½ as compared with 80. As to the loss from replowed wheat area and planting with other crops, the department makes the assumption that it represents a reduction from that of April 1.

The decline in the stock market during the past week is attributable solely to the free selling of New York Central stock by both home and foreign holders, the fear being general that there is trouble ahead for all the trunk lines this summer. Other leading investment stocks have also been conspicuous sufferers, showing a marked decline in price. The estimates of the next wheat crop have not helped to sustain prices of stocks. The public is now in the market more than it was, but it is to sell stock. However, there is a brisk business doing, or has been doing the past three weeks, in bonds, chiefly the cheaper kinds; and this may indicate the beginning of a turn for the better.

We give place elsewhere to a statement from Mr. David A. Wells regarding the charge that British gold has in times past been an important factor in tariff contests in the United States, and of course on the side of free trade. Our desire is simply to give both sides a full hearing regarding this most important question, the future of tariff legislation. It is clear that the question must be decided without attending to the claims of this or that interest, beyond the equities of the situation. Sooner or later the United States must seek foreign markets for its industrial products. It is to be hoped that the next election in the United States will turn upon the tariff question. The question has not been popularly discussed since the ante-war period. The protectionists will do well to furnish some specifications in reply to Mr. Wells' explicit denial that British gold has had to do directly with the tariff question in the United States. It is, indeed, one of those charges which should have been based on specifications or not made at all.

Elsewhere in this issue will be found set forth some points from a recent English volume on gold, present and future production. As will be seen, the writer concludes that not much can be expected for the future of the gold mines in India. The poor returns on the shares of the numerous gold-mining companies which have been floated in London go to bear out this conclusion. This writer's investigations go to show that there is little ground to hope for an increased yield of gold for use as bank reserves and for currency. The remedy then is to economize the use of gold, as we have already pointed out, in every way possible.

The difficulty which the savings banks of New York city encounter in finding securities for investment under existing legal limitations has led to the passage of a bill at Albany widening a good deal the limits of investment. It should not have the Governor's approval. For the time being the banks are well enough as they are. They can enlarge their investments in first mortgages on real estate. The first mortgage bonds of dividend-paying railways have been mentioned as a proper investment for savings banks. Their purchase should not be permitted until a more honest direction of American railways shall have been brought about. One of the highest duties of the modern state is to secure an absolutely safe method of accumulation for the wage-receiving classes.

The cable brings news this week of the attack of certain Annamite or Chinese troops upon Ha-noi, the capital of Tonquin, and of their repulse by the French. It is also reported that President Grevy has addressed a letter to the King of Annam which informs that potentate that his inability to assure the security of Tonquin compels France to establish herself definitely there. The letter further advises the King not to resist, invites him to recognize the protectorate of France, and guarantees the integrity of his dominions.

THE CIVIL SERVICE RULES.

The President and Cabinet made very few changes in the rules submitted by the Civil Service Commission. In their amended form these have been approved and have been promulgated over the signature of the President as his executive act. It is, of course, too early to judge of the practical value of the system established by these regulations, that being a matter to be determined by experience; but they seem in the main well adapted to the end in view. If they are weak in any point it is in the absence of a sufficient sanction, a violation of the rules amounting only to "good cause for removal." This leaves the energetic execution of the rules largely dependent upon the temper of the executive. But the attitude of the executive, unless in very exceptional instances, is governed by the tone of public opinion, so that at the last analysis it will be seen that the question whether civil service reform is or is not to be a successful movement rests mainly with the citizens themselves.

The tenor of most of the general prohibitive regulations has been made known by the expressed demands and criticisms of the reform leaders in the time preceding the passage of the civil service act. It is provided, for instance, at the outset, that no person in the service shall use his official authority or influence either to coerce the political action of any person or body or to interfere with any election, and that no person in the public service shall for that reason be under any obligation to contribute to any political fund, or to render any political service, or be removed or otherwise prejudiced for refusing to to so. In order to expedite the work of the Commission, all officials connected with any office where or for which any examination is to take place are to give the Commission and the chief examiner such information as may be reasonably required to enable the Commission to select competent and trustworthy examiners; and the examination by those selected as examiners, and the work incident thereto, is to be regarded as a part of the public business to be performed at that office. Open competitive examinations are to be held to ascertain the fitness of applicants for admission to the service, and also for testing the fitness of persons for promotion therein. These examinations are to be practical in character, and so far as may be, are to relate to matters which will fairly test the relative capacity and fitness of the persons examined to discharge the duties of the branch of the service which they seek to enter. To avoid the evils of the introduction of political or other undue influences it is provided that no question in any examination by or under the Commission shall call for the disclosure of any political or religious opinion or affiliation, and that no discrimination shall be made by reason thereof if known. Registers are to be kept of all persons examined, and from these names are to be certified by the commissioner or the proper examining board upon the request of officers having the power of appointment or employment. Certain classes of officers are excepted from examination, among whom are mentioned chief clerks, superintendents and chiefs of bureaus, confidential clerks of heads of departments, cashiers and other custodians of money, persons employed in the secret service, and those whose employment is wholly professional.

The reform movement may now be said to have passed through its initial stage. The success which attended the efforts of its promoters during the past year has been somewhat of a surprise, even to the most enthusiastic of them. The force of the popular impulse which rendered that success possible is apparently by no means spent. The commissioners have learned within the last ten days that it is quite unnecessary for them to pursue any tortuous or occult policy in order to gather the fruits of the struggle won in the halls of legislation, and that in the selection of instruments to carry the movement to its ultimate end it is of much more importance to pay heed to the qualifications of candidates and to their belief in and zeal for the cause of reform than to seek to curry favor with the politicians. In one direction the civil service rules mark a distinct departure, and, without doubt, an advance. They proceed upon the principle that offices are trusts, not property, and that in filling them regard is to be had to the fitness of the candidate rather than to his "claims." Some speak of the establishment of this principle as the recognition of the right of every citizen to hold office. Rather do the rules of the Commission result in a practical denial of this theoretical "right," since for the future, if the reform principles are carried out in their true spirit, the duty of serving the public is to be intrusted only to the competent.

SOME PHASES OF TARIFF DISCUSSION.

The recent tariff agitation has revived two claims for the perpetuation of a high rate of duties on manufactured articles. They are: "protection to young industries" and "protection from the competition of less highly paid foreign labor." The connection of the two is not intimate enough to explain the *raison d'etre* of both, and calls for comment. This is more especially the case inasmuch as the past year has given birth to a general interest in tariff questions which, judging from the results of the legislation thereon in the last Congress, has not yet exhausted its usefulness. In a study of economic history as applied to the United States, by F. W. Taussig (Moses King, Cambridge), we find this subject handled in a particularly lucid manner. This writer divides the early economic history of the United States into two periods, the first of which, a continuation of the colonial period, lasted until 1808, and the second through the succeeding generation. It was during the second period that the most decided attempt was made to apply protection to the infant industries of the country. Prior to 1808 the industries were confined to those lines the products whereof could not be imported, and were local in their character. The country was agricultural and paid for its importations with the products of the soil. The only exceptions to this rule were to be found in the shipbuilding interest in New England and in the production of pig and bar iron. In this way the country came to be dependent for a large variety of articles from abroad, and the importations rapidly increased. This state of things increased until 1808, when the complications with France and England resulted in measures which marked a turning point in the industrial history of the country. The embargo was ordered in 1807, the non-intercourse act followed in 1809, and war with England followed in 1812. At the latter date commercial intercourse with England was prohibited, and all impost duties were doubled. The consequence was that all those branches of industry whose products had previously been imported received an enormous stimulus, and works for the manufacture of woolen goods, iron, glass, pottery and other articles "sprang up with a mushroom growth." The restrictive legislation of this period, then, amounted to extreme protection. In this way certain lines of manufactures grew up during the war which, at its close, earnest efforts were made to succor. Inasmuch as they had thrived under a hot-house state of affairs they objected to being taken into the open air, and the general feeling at the time was consonant therewith. Numbers of people had been withdrawn from agriculture and other lines to the unduly stimulated industries, and in this manner was fostered a sentiment, that artificial as the act might be, props, by means of duties, should be placed under them. In this way are the concessions of the tariff act of 1816 to be explained. This is the origin of the cry for protection for young industries. But at that time the idea was not held that these outside aids were to be permanent, and the general average of 25 per cent. duties were limited to 1819, after which they were to be reduced to 20 per cent. This action, however, was not so much based on the necessity for protection as in order to raise a revenue to pay off the indebtedness contracted by the war, and was not considered to be in any way permanent. The crisis of 1819 marks another turning point in the history of the industrial progress of the country, and brought prominently before the public the necessity for further sustaining the then new industries which had been specially fostered. The high rates of duty were prolonged in 1824, and were, in 1828, again exaggerated. These were not, to any special degree, overcome until 1836, when the compromise act of 1832 and 1833 had begun to take effect. This period, then, and the arguments advanced during it for a protective tariff, account for the origin of the cry for protection to young industries. There are those, however, who, while admitting that conditions do exist under which it is most likely that protection to young industries may be advantageously applied, will still claim that little, if anything, was gained by the expensive protection which the United States maintained in the earlier part of the present century. And this for the reason that the character of the people rendered the transition of productive forces to manufactures comparatively easy, and that the shock to economic habits during the restrictive period from 1808 to 1815 quite prepared the way for such transition. About 1840, when a renewed argument for high protective duties was heard, the plea was based on the necessity of protecting American labor from less highly paid foreign labor. The plea was full-fledged in the tariff debates of 1842. This may be observed by reference to Webster's speech at Saratoga in August, 1840, and in Calhoun's speeches of the same year. It will thus be seen that forty-three years ago our leading congressional debaters thought it was too late to argue for protective duties on the ground that our young industries needed them.

This suggests an inquiry into the present status of the tariff question, which will be found to be ably handled by Hon. David A. Wells, in the May number of the *Princeton Review*. He brings out strongly a point which has been called to mind with considerable emphasis in BRADSTREET'S of late. After noting that the tariff debates and legislation of the last Congress mark a transition period of permanence and importance in the sentiment of the country, it is called to mind that the United States has at present more active capital, machinery and labor engaged in manufacturing than is necessary to supply any present or immediately prospective demand for domestic consumption. The evidence which is adduced in support of this statement it is not necessary to rehearse, for the fact is apparent. While "over-production" may not be exactly the proper term to use, ill-adjusted distribution of products will explain it. There are three leading evidences of this disturbance in industrial lines. The first is the increase of exchanges at manufacturing centers, and the decrease of the same at distributing points. The second is found in the very patent interruptions of industries, notably in the Philadelphia cotton-fabric manufactories, india-rubber and gunny-bag manufactures, and the iron-furnace and rolling-mill disturbances. In addition to these, the shoe manufacturers can now cover the feet of the country in six months, where it formerly required nine months for the task, and the paper manufacturing industry is in many instances running on part time in order not to accumulate stock. In the way of corroborative evidence, it may be noted that the Massachusetts legislature last winter granted a respectful hearing, extending over several weeks, to arguments advanced in support of a resolution urging on the representatives in Congress of that state "the importance of reducing the national taxes and the propriety of abolishing as fast as possible (without too great injury to vested interests) the taxes upon imports, except so far as may be necessary for a revenue to meet the prudent and economical expenses of the government." Ten years ago such a resolution would have been received with almost as much surprise as a resolution in favor of the reëstablishment of domestic slavery, and would undoubtedly have been as unceremoniously treated.

The position thus presented is the necessity for an extension of markets, and the question of the hour is how shall they be obtained. With an excess plant—without discussing how such plant was fostered into being—an outlet for our products is necessary, or a large amount of capital will inevitably be jeopardized. This means but one thing: How can the American manufacturer produce as cheaply as his foreign competitor? As is pointed out, there are but two ways. Either we must have cheaper raw materials, metals, coals, fibers, dye-stuffs and chemicals, or he must have cheaper labor. But the tariff as at present enacted ordains that the American manufacturer shall not have cheaper raw materials. The alternative is suspension of business or a reduction of the wages of labor. This conclusion gathers meaning from the fact that it brings us face to face with the present situation in leading industries. The inference is that our country is already too large to suffer commercial restrictions such as it has heretofore, except insomuch as is necessary to supply needed governmental revenue. The vital character of the points as presented rests on the surface. It is a problem of the hour, and awaits a decision. Without cheap raw materials American manufacturers cannot enlarge their markets,

and with a highly protective tariff they cannot have cheap materials. In the meantime, the leading industries are, or have been, working in excess of the requirements of the country.

CANADIAN ANNEXATION.

In the *North American Review* for April appears an article from a Canadian point of view on the question of annexing Canada to the United States. The writer would have it that the question will not down, and that many of the far-seeing public men of Canada believe that union will be brought about within the present generation. The larger portion of the older population, it is claimed, set slight value on the connection with England. Beyond this, a majority of the present generation of native Canadians have gradually come to regard the United States as an extension of Canada. To them the Republic affords the most profitable field for their energies, and as the immigration returns of the United States show, great numbers of Canadians annually come to the United States to push their fortunes. There is, indeed, scarcely a family in the Dominion but what has members or kins-people living in the United States, and this operates as a mighty force in the interest of peace and closer communion. The writer, Dr. P. Bender, further argues that the trading classes would like free access to the larger markets which political and social union would afford. A widespread distrust of the future of Canada is said to exist under the present isolated constitutional and commercial system. The great misfortune of the country is the enormous price it has had to pay for the union of the old provinces and the acquisition of the northwest. Thus to satisfy New Brunswick and Nova Scotia the Inter-colonial Railway, costing $35,000,000, had to be constructed, entailing for several years after completion a heavy annual loss to the country. Again, after paying the old Hudson's Bay Company several millions for Manitoba and the regions further north and west, British Columbia was only enticed into the confederacy by the promise of building a railway to the Pacific, through what is still described as "a sea of mountains." At the time of making this agreement not one of the ministers had set foot on the prairies or had seen the Pacific. As a matter of fact, only a few Hudson's Bay officials, adventurous sportsmen, zealous missionaries and some of the half-breed population of the Red river had any knowledge of the soil, climate and general characteristics of the Canadian northwest. While admitting the incalculable value of much of this northern region, from an agricultural point of view, the writer regrets its great cost and the perilous obligations connected therewith. It is estimated that the Canadian Pacific Railway will cost to Canada, in money, land and completed railway, $110,000,000, and in return for this the syndicate is to refund not more than $48,500,000. The construction of the road is now progressing at the rate of two or three miles a day, and there is good prospect for its reaching the Rocky mountains by the end of 1884. Fine progress has been made in British Columbia, but the most difficult and expensive sections through the mountains across the Rockies and north of Lake Superior must subtract heavily from the future enormous profits of the company on the prairie sections and the lands utilized in speculation. The writer finds additional cause for alarm in the rapid increase of government expenditure and the public debt. It appears that the disbursements for all purposes rose from $13,687,000 in 1868 to $24,205,000 in 1874, and thence to $31,810,000 in 1882. There was no proportionate increase of population, the taxes having been $4.07 per head in 1868, against some $7.02 now. The gross debt at conversion in 1867 was $93,046,000, and in 1881, $191,861,000, an increase of 115 per cent.; this with a prospect of additional burdens in the next decade, with a remote prospect for any substantial return on the gigantic outlays. Other facts are cited, going to show that the situation is against the Dominion and in favor of the United States as regards the conditions of prosperity, and that, therefore, the tendency is to migrate to the United States to such an extent as to in the end bring about annexation as a matter of course.

The writer appears to take for granted the readiness of the people of the United States to welcome annexation. It does not appear that there exists on this side the St. Lawrence any well-developed sentiment in favor of annexing Canada. Neither is it able to give any substantial reason in favor thereof. The only advantage to be gained relates to the extension and the building up of trade between the two countries. But this could be sufficiently brought about through a reciprocity treaty. Both the laws of the United States and of Canada have been officially framed to interdict trade. Canada especially is just now engaged in trying a policy of national aggrandizement, in relation to which a high tariff is a principal factor. Beyond this it is very clear that sound public policy in the United States does not involve the extension of territory through annexation or otherwise. The country is big enough. So far as human foresight can determine the best interests of both Canada and the United States will be best conserved by remaining apart politically, while endeavoring to bring about the most intimate trade relations.

NEW YORK AND BROOKLYN.

At the dinner of the New York Chamber of Commerce the other evening, the view that New York and Brooklyn should be one city was given prominence. The proposition has been favorably received by the press. While the practical effect of the suspension bridge to Brooklyn will be to bring the two cities into much closer relationship, their consolidation should not be thought of until the way has been made clear to a thorough reform of the government of New York city. We are satisfied that this will never be brought about save through a movement of local origin which shall end in the submission of a new charter to the legislature with such a backing of public opinion that its passage could not be refused. Such a movement must necessarily start with the general idea of bringing back the seat of government to the city. If New York city cannot govern itself it cannot be governed under the representative principle at all. There is no escape save by the acceptance of one or the other of these alternatives. It is to be hoped that no further charter tinkering will be attempted save at the end of a prolonged propagandizing movement. New York city is to-day a fit place for a home-rule agitation. The thing to do is simply to return to the city the ordinary forms of local government: a responsible mayor with a proper number of executive departments, and an elective body distinct from the executive to levy taxes and appropriate the proceeds thereof. When such a reform shall be brought about it will be time enough to consider the wisdom of uniting New York and Brooklyn under one government. A good many arguments could be urged in favor of such a scheme, but they must all wait upon the return of home rule to New York city.

AMENDING THE ENGLISH PATENT LAWS.

A bill has been laid before Parliament for the amendment of the English patent laws. The bill is designed to amend and consolidate in a single measure the provisions of the numerous laws relating to patents, designs and trade-marks, while simplifying procedure, lessening the cost and increasing the protection afforded. Under English patent laws as at present existing the fee for obtaining a patent is $100, with further payments of $250 before the expiration of the third year, and $500 before the expiration of the seventh year of the patent. Under the proposed law a patent will be obtainable for $20. While the amount of the further payments remain unaltered the payment of the $250 is postponed to the fourth year, so that a four years' patent will cost only $20. Again, under the existing acts, an intending patentee or his agent has to apply personally at the patent office at least seven times, making four separate payments and using four documents for the application. By the pending bill this procedure is much simplified.

The following are the other principal new provisions:

1. Limitation of patent to one invention made statutory; with a proviso that it shall not be competent in an action or other proceeding to object to a patent on the ground that it comprises more than one invention.

2. Extension of provisional protection from six to fifteen months, or from application to sealing of patent.

3. Extension of first term of a patent from three to four years. The duration of patents will continue to be fourteen years.

4. The specification is to contain distinct statement of claims. This will be of great service for the purposes of indexing and reference.

5. Deposit of complete specification before the grant of the patent. This must be made within nine months from date of application, with a provisional specification for patent.

6. Appointment of examiners to examine applications for the purpose of seeing that the invention is subject-matter for a patent, and that its nature has been fairly described; to compare complete with provisional specifications, for the purpose of seeing that they correspond, and to examine amendments and disclaimers.

7. Appeal to law officer from examiners.

8. Enlargement of time for payment of fees and renewal.

9. Publication of an illustrated journal of patented inventions.

10. Discontinuance of register of proprietors; copies of deeds, etc., hitherto copied therein to be supplied by the parties interested at their own cost.

11. Discontinuance of sending to Edinburgh and Dublin transcripts of letters patent and deeds, and certified copies of specifications and disclaimers, but printed copies of the Patent Office publications will be sent to these cities.

12. Transfer of Patent Museum to Department of Science and Art, with power to require models on payment.

13. The provisions of the separate acts relating to the protection of unpatented inventions exhibited at industrial and international exhibitions are repealed and reënacted in the bill.

The distinguishing feature of the bill is to facilitate the applications of inventors, and in general to hold out greater rewards to inventive skill. It is admitted that British industry might have derived much greater advantage from invention had the premium thereon been greater. The history of the United States in this regard must ever be a strong argument in favor of most liberal protection of inventors.

AMERICAN IRON AND STEEL REPORT.

The Philadelphia American Iron and Steel Association distributed among its members on May 1 the last annual report of the secretary, James W. Swank, which contains statistics of the domestic iron industry to January 1, 1883, and a review of the condition of the iron industry in foreign countries of late. It is a well printed pamphlet of one hundred pages, and is of exceptional interest to the trade. It will also aid the student of our industrial progress and the investigator of the variations in the prices of iron through a series of years. The characterization of the condition of the home industry by Mr. Swank was reviewed at some length in BRADSTREET'S, from advance sheets, two weeks ago. Even a glance at the various features of the volume will impress one with the fact that the Iron and Steel Association, through its secretary, is doing a work for the leading metal industries of the country which cannot be overestimated. It may be fitly remarked that this is another instance of the triumph of private enterprise over national bureau endeavor, for we look in vain for as complete and satisfactory a collation of information respecting any other of our leading industries.

As if the dry facts of production, importation, prices, consumption and stocks on hand were not enough, in detail, the indefatigable author of the volume has issued a companion brochure of about fifty pages on "The Iron and Steel Industries of Pennsylvania." This is a contribution to the Tenth Annual Report of the Pennsylvania Bureau of Industrial Statistics, published separately as well. In it is discussed the manufacture of iron in the early ages of the world's history, and in later times, and in those countries to which we owe our familiarity with the iron industry. This is succeeded by a description of the growth of the American iron industry, which naturally calls forth some reference to the state of Pennsylvania. Of this commonwealth's importance as regards the production of iron and steel, no doubt is left after examining the percentages of each variety of the total production of iron and steel with which Pennsylvania is credited. It is shown that in 1882 the total production of anthracite pig iron in the United States was 2,042,138 net tons. Of this amount, 1,453,646 tons, or 71 per cent., was the product of Pennsylvania furnaces. The share of the latter in the aggregate of bituminous pig iron was 945,635 tons out of a total of 2,438,078 tons, or 39 per cent., and of charcoal iron 49,975 tons out of 697,906 tons, or 7 per cent. Or, out of a grand total of 5,178,122 net tons of pig iron of all varieties manufactured in the United States in 1882, Pennsylvania produced 2,449,256 tons, or 48 per cent., nearly one-half the entire raw iron product of the entire country. In the manufacture of rails the Keystone state makes even a better record, turning out 82,764 tons of iron rails, against an aggregate for the country of 227,874 tons, or 36 per cent.; 759,524 tons of Bessemer steel rails, out of a total of 1,438,155 tons, or 53 per cent., and 8,620 tons of open hearth steel rails, out of 22,765 tons in all, or 38 per cent. The Pennsylvania manufactured rails in 1882, therefore, aggregated 850,908 net tons out of the total production of 1,688,794 tons, or 50 per cent.

In rolled iron, other than rails, the state still maintains a notable prominence. While the total output of the country of bar, hooped and shaped iron was 1,545,788 net tons, of plate and sheet iron was 412,814 tons, and cut rails and spikes was 307,355 tons, Pennsylvania's proportion thereof was 685,049 tons, or 44 per cent of bar, hoop and shaped iron; 258,603 tons of plate and sheet iron, or 63 per cent., and 97,470 tons of cut rails and spikes, or 32 per cent. In the aggregate, 46 per cent. on this class, with a total of 1,041,122 tons out of 2,265,957 tons.

The state's product of Bessemer steel ingots was 55 per cent., or 933,631 tons, out of 1,696,450 tons in the country; of open hearth steel ingots was 42 per cent., or 67,822 tons net, out of a total of 160,542 tons; of crucible steel ingots was 77 per cent., or 65,139 tons, out of 85,089 tons; of blister and other steel it was 70 per cent., or 2,114 tons, out of 3,014 tons, or in all 1,068,706 tons of steel, out of an aggregate of 1,945,095 tons, or 55 per cent. Including 68 per cent. of pig and scrap blooms, from forges manufactured in Pennsylvania, or 29,408 tons out of 42,939 tons, the above shows a grand total of 11,120,857 tons of iron and steel produced in the United States in 1882, of which Pennsylvania turned out 48 per cent., or 5,439,400 tons. Supplementing the above, it is interesting to note that while producing 48 per cent. of all the pig iron manufactured in the United States, Pennsylvania

possessed in 1882 but 41 per cent. of the total number of furnaces, divided as follows: charcoal, 15 per cent., anthracite 71 per cent., and bituminous (and coke) 39 per cent. Her proportion of iron rolling mills to the whole number in the country last year was 43 per cent.; of Bessemer steel works was 50 per cent.; of open hearth steel works was 52 per cent.; of crucible steel works, 50 per cent.; of miscellaneous steel works, the same; of pig and scrap forges 58 per cent., but of ore bloomeries, of which there were 69 in the country, she had none. While producing 48 and a fraction per cent. of the total output of iron and steel in the United States in 1882, the memoranda last given indicate that it was done with but 43 per cent. of the number of establishments, which speaks well for the capacity and methods of the furnaces, mills and forges of the state under consideration. It is to be regretted that like exhibits for each of the states where the iron and steel industry takes rank are not available. If prepared ten years ago, with data for 1882, a comparison of exceeding interest might have been furnished, and in ten years hence a like review of the relative development of iron and steel manufactured in various states would be of peculiar interest owing to changes now going on. It is a matter of extreme doubt whether the preëminence of Pennsylvania in 1892 will be what it now is. Still, this industry of the great coal and iron state bids fair to decline relatively rather than actually, for some time to come.

THE SPONTANEOUS COMBUSTION OF COAL.

Mr. T. Rowan, C. E., London, has issued a pamphlet entitled "Some Facts connected with the Spontaneous Combustion of Coal in Cargoes, and their Practical Application to prevent Loss of Lives and Vessels." The author says: "The cause of spontaneous combustion arising in cargoes may be a matter of theory; the results which are connected with and accompany it are now well established facts. It is to these latter I now purpose directing attention, and showing how, by a proper apprehension of their character, it is possible to devise such means that the severe and ultimate results of spontaneous combustion can be avoided, and that, therefore, the loss of vessels and of life from this cause need never take place.

"First. The first fact to be observed is that spontaneous combustion has always its origin or commencement at some spot in the cargo. The locality of this starting point is capricious; *i. e.*, it has been observed to commence at all parts of the cargo, from the keelson to near the surface. But wherever this may be, the fact stands prominently out that spontaneous combustion always commences at some spot in the cargo, and that this spot forms a nucleus from which the action extends.

"Second. The next fact to be remembered is, that spontaneous combustion in coal cargoes is always a slow process, especially in its initial stages. That is to say: Before spontaneous combustion assumes its final and most active stage, it is inaugurated by chemical actions extending over a considerable time, during which heat is slowly evolved and gradually accumulated; but as this progresses, the rate of acceleration is augmented in a rapidly increasing ratio. The average time has been found to be sixty days from leaving port before spontaneous combustion takes place. What we have, however, to note is, that although in its latter stages spontaneous combustion is rapid, during its initial or incipient stages the action is a very slow one.

"Third. It has also to be remembered that the larger the cargo the greater is the liability of spontaneous combustion taking place. Thus, while cargoes of 500 tons and under have shown an average of casualties under ¼ per cent., those cargoes which are over 2,000 tons show an average of 9 per cent.

"From a consideration of these facts it is evident that bulk is required, so that the heat set up by chemical action may be retained; and time is necessary, so that the heat so generated may accumulate until temperatures are developed requisite to reach the point of inflammability."

OCCASIONAL NOTES.

The latest manifesto of Prince Bismarck is an appeal to the German people to take the part of the government against the Reichstag—to trust to a beneficent autocracy rather than to their chosen representatives. The government, as the prince would have it understood, is solely desirous of alleviating the sufferings of the poorer classes. Parliament, on the other hand, is solely concerned with constitutional quibbles and partisan disputes. As the *Pall Mall Gazette* puts it, there is a good deal of truth in both assertions, notably in the former one. No one doubts the sincerity of the Emperor, and the Chancellor is undoubtedly acting in good faith in proposing schemes for improving the condition of the poor. The poverty of the lower classes of Germany is declared to be really appalling. It is daily becoming more clear that Prince Bismarck is endeavoring to take full account of the fact that the problem of bettering the lives of the struggling majority of mankind is the great political question of the future. He is, however, seeking a solution in the wrong way, namely, by thinking that it can be solved for the people and not by them. Beyond this Bismarck is evidently of the opinion that the problem can be solved "without the sacrifice of many things which he holds very dear and the acceptance of many of those which he thinks hateful." In fact, the evidence accumulates as to the impotence of authority to effect social reforms by its own unaided strength. The various schemes of the government to effect in part the purpose indicated are coming to nought. The Sick Fund bill, the Accident Insurance bill and the Pension Fund scheme promise to all come to nought. The government needs to encourage workmen to combine for mutual help and protection, which it constantly suppresses, and to reduce its military expenditure, which it continues to increase. Between the fear of foreign and of domestic sedition progress toward social reforms is effectually blocked.

The English Foreign Minister, Earl Granville, was recently interviewed by deputations representing the chambers of commerce and of shipping in relation to a proposal for the construction of an additional canal to meet the requirements of British trade with the East, it appearing that the facilities at present afforded by the Suez canal are inadequate. The representatives of the chambers of commerce said that those bodies were not desirous of assuming an attitude of hostility to the Suez Canal Company, but that the frequent delays of vessels showed that the present canal was quite inadequate to the requirements of trade. The canal company itself had admitted the necessity for improvement by proposing to extend the accommodation by means of sidings and other works. It was questionable, however, whether the improvements suggested by the company would be in any sense sufficient. What was wanted was a new canal. The tonnage of shipping passing through the canal had increased from 4,300,000 tons in 1880 to 7,100,000 tons in 1882. With such a rapid increase the making of sidings would be mere tinkering. A searching inquiry was recommended, and a statement of the course to be pursued by the government was asked. Earl Granville said that the subject had been carefully considered by the Cabinet and a preliminary decision arrived at. The government, he said, was of the opinion that its present responsibilities connected with Egypt afforded no reasons why it should commit itself now more than it otherwise would do to general industrial enterprise. They thought that the project proposed should be matured in a manner to be submitted to their opinion, and that they should not be asked for their views as a basis for making applications either to shareholders or to the Egyptian government. The British government, while apparently not disposed to discourage the scheme proposed by the chambers, are anxious to occupy a conservative position in the matter, and rightly enough demand that some form and substance be given to the project before their opinion is asked upon it. As regards the improvements proposed, it would seem that they must be brought about sooner or later if England would accommodate her growing trade with the East. There are, as Lord Granville pointed out, international and other difficulties in the way, but there can be little doubt as to the ability of England to bring about a prudent settlement of these.

Even the Ishmael among the nations cannot shut itself out from the humanizing influences of the age. In Turkey, it seems, a movement for the development of the agriculture of the country is on foot. The Turkish Imperial Department of Agriculture is about to organize a series of agricultural exhibitions. These exhibitions are to be held in the provincial capitals of the empire. The Sultan takes a keen interest in the success of the movement, and is urging its vigorous prosecution. Inspectors of agriculture are to be appointed, and in order to secure qualified persons for the posts, six young men are to be selected from among the students at the Imperial Civil School and the Imperial Lyceum at Galata, Serai, and sent to study in the agricultural schools of Germany. Another announcement indicating the progress being made is to the effect that a series of new regulations regarding custom-house storage have been drawn up and sanctioned. Under these new rules certain descriptions of merchandise, such as opium, gall-nuts, cocoons, wan, hides, hempseed, linseed and dye wares, will be allowed to remain in store for twelve months. Hitherto the time limited has been six months, no extra time having been allowed for the operations of cleansing, sifting, purifying, etc., which the products mentioned have to undergo before being transferred to the purchaser. It was said of old times that commerce was the handmaid of civilization. It would be not a little singular if Turkey, so recently and deservedly banned by Europe, should give fresh point to the well-worn saying.

The Chicago *Inter-Ocean* warns the legislators of Michigan of a deep pitfall concealed within Jackson House bill No. 35, now pending, entitled "A bill to secure to minority stockholders in corporations the power of electing representative membership in boards of directors." This title has seemed so fair on its face that until the *Inter-Ocean* explained the situation for the benefit of the assemblymen at Michigan's capital it is doubtful if they even suspected that all was not right. The state of Illinois has long since been enjoying the fruits of minority stockholder representation, and it is explained that the outcome of it is very unsatisfactory. The authority for it in Illinois is found in Article XI., section 3, of the Constitution of the state, which declares:

> The general assembly shall provide by law that in all elections for directors or managers of incorporated companies every stockholder shall have a right to vote, in person or by proxy, for the number of shares of stock owned by him, for as many persons as there are directors or managers to be elected, or to cumulate said shares and give one candidate as many votes as the number of directors multiplied by the number of his shares of stock shall equal, or to distribute them on the same principle among as many candidates as he shall think fit; and such directors or managers shall not be elected in any other manner.

The fact is that no effort to repeal this does not mean approval, but rather acquiescence in the organic law of the state. The section is attributed to Joseph Medill, who, it is said, hoped by means of it to secure an advantage over Mr. Horace White, then the majority stockholder in the Chicago Tribune Association. In that hope he was disappointed. It is further pointed out that while courts of equity furnish all the representation minority stockholders really need, that their representation against the will of the majority would result often in a "divided house," which generally has to suffer the traditional consequences. Many Illinois corporations are formed under Michigan and other state laws purposely to avoid coming under the obnoxious constitutional provision quoted, as they would if incorporated in their own state. As the journal quoted well says, that, while in many corporations doubtless the methods of voting would in reality have no effect on their welfare at all, "it is none the less true that a system productive of no good and constantly liable to work disaster ought to be shunned."

From figures given in official statements it would seem that the trade of Spain is experiencing a very gratifying increase. An opportunity for comparison is afforded by the publication of the figures for February of this year and those for the same month of 1882. When compared with February of last year the figures show an increase of £434,000 in the exports and £646,000 in the imports. The imports include a large proportion of cereals. A decline in the exports of sherry is noted, but the exports of other classes of wine and of oils have increased somewhat. Among the most noticeable features disclosed by the figures, however, is the growth in the imports of raw cotton, the value of which rose from £256,804 in February, 1882, to £436,584 in the same month of 1883. A considerable increase is also apparent in the quantity of iron ore exported. In February, 1882, 280,839 tons were exported. The exports for the same month of 1883 reached 511,694 tons.

In an address before the Thomas Jefferson Club, of Brooklyn, April 16, Mr. F. B. Thurber, the well-known advocate of what has been styled the anti-monopoly movement in politics, delivered an address upon "Democracy and Anti-Monopoly." As might be inferred from the title, the speech contained an outline of the origin and growth of the anti-monopoly party, so called, and on the whole, discussed its being with reference to both the Republican and Democratic parties. The address began with a reference to the rapid growth of corporate power and influence exerted upon the government of late years, dating back, perhaps, to the days of the Credit Mobilier. In view of this it was remarked that the National Board of Trade, composed of delegates from commercial bodies throughout the country, in convention at Washington two years ago, agreed, as per report, to the effect that "the degree to which the great powers of steam and electricity have been allowed to pass into corporate hands, which employ them as a means to tax the public unduly for their use, is at this time forcing itself upon the attention of our statesmen, and there is a widespread feeling that the public welfare demands that the power and privileges of corporate grants shall be limited in the future." The final clause in this report expresses in brief the excuse for, and the mission of, what is termed the anti-monopoly party. The genesis of that body, as outlined by Mr. Thurber, may be of interest. It is based on the alleged abuse of power over legislators, judges, juries and newspapers by the railroads in New York state, and the persistent refusal of the legislature to grant remedial legislation in several cases where asked by representative bodies of agriculturists, commercial men, and others. An investigation into the grievances complained of was demanded, but refused. Another year it was granted, and the charges were declared to be sustained in the report made to the legislature. But even then no redress could be obtained. Those most affected called on the then chairman of the Republican State Committee, and requested that the question at stake be made a party issue. This Mr. Arthur refused to do, although admitting the party was pledged to such action in its platform, inasmuch as (so Mr. Thurber states) "the party relied upon prominent railroad men to carry their districts, and that therefore the issue could not be made a party issue." It was then determined to bring the force of public opinion to bear in the shape of votes, and an anti-monopoly league was formed.

An address was issued blacklisting nineteen state senators as "subservient to corporate interests," and at the succeeding election it is remarked but three were returned, and these by reduced majorities. But one anti-monopoly nomination was made, in the fifth district, a Democratic stronghold, and it was triumphant. The death of the incumbent from the eighteenth district furnished another opportunity, and the anti-monopoly candidate overcame a heavy Republican majority. The league approached both political parties in the last campaign in New York. As can easily be recalled, they were coolly treated by the Republicans and welcomed by the Democrats. To the latter they, of course, gave their support, in explanation of which it is mentioned that the league has 50,000 names on its state list of voters in sympathy with it, to each of whom five sets of Democratic and free canal tickets were forwarded with appropriate literature and injunctions to vote one slip himself and get four friends to use the others. The league thus formed a skeleton of a political organization, as it extends to a limited extent into other states. The grievances which have been indicated appear to the members thereof to warrant the formation of a political party to act as a sort of lever for the oppressed portion of the people to use in self-defense when the monopolists are too oppressive, and both the Democrats and Republicans prove recreant to the public interests. The anti-monopoly league, therefore, instead of standing, conceives that the people have already mentioned its name, and with a special programme for deliverance, proposes to act the part of big brother in behalf of the victims of corporations against either of the two great political parties, or both, as future events shall determine.

A parliamentary return has recently been issued exhibiting the condition of the coöperative societies of the United Kingdom at the close of 1881. From this return it appears that the coöperative principle has made little progress in Scotland and Wales, and that in Ireland scarcely anything has been done in the way of coöperative distribution. England, as might be expected, takes the lead in the comparative importance and number of the coöperative societies. There were in the latter country 1,028 of these societies, of which 842 had sent in statements of their accounts. The capital employed by these societies was £7,025,801, of which £5,894,000 had been raised by shares and £1,131,801 by loans. Of the whole capital, £3,655,333 was returned as being invested otherwise than in trade. These figures include balances in banks beside large sums of money lent to joint-stock companies. The figures given show that the coöperative societies have a much larger amount of capital at their command than they require. It is, perhaps, open to question, in view of these disclosures, whether the coöperative societies are agencies for the development of the coöperative principle pure and simple. In many cases, it is clear, they afford opportunity for the convenient aggregation of capital to be used in furthering objects apart from that of their institution.

In answer to a letter from a Baltimore firm asking light upon the construction of the new law governing the inspection of foreign steam vessels (act of

August 7th, 1882), Secretary Folger has written a note stating that freight steamers carrying no persons from an American port except the necessary crew of the steamers, and whose names appear upon the ship's articles as such, are not liable to inspection under the new law. Persons carried out as attendants on cattle, however, are considered by the department as passengers, entitled to the protection of the law, and steamers carrying such persons are to be inspected. Unless the persons referred to are regularly shipped, and on the ship's articles, the Secretary says, the department can consider them in no other light than as passengers entitled to the protection given to any other class of passengers. The fact that such persons are carried free can have no weight against the decision of the department, since, as the Secretary points out, persons transported free have been held to be passengers in the sense contemplated by the law. In conclusion, the Secretary informs the firm that the penalties will be enacted in the cases of all passenger steamers that shall leave port carrying any persons other than those regularly upon the ship's articles as a part of the crew.

The decision of the Downton and Deuchfield milling suits in favor of the defendants is welcome news to the millers of the United States. It appears that the patent on which the Deuchfield suits were based was obtained in April, 1858, by John Deuchfield, of Oswego, N. Y., for a useful improvement in cooling and drying meal. It consists in the peculiar arrangement of a suction-fan conveyor or conveyors, suction spout, and elevator, by means of which the meal is subjected to the action of a current of cool air in its passage from the grinding-stones to the bolting-reels, cooling and drying it in a simple and economical manner. It is commonly called a "sucker." In April, 1872, for some cause, the letters patent were reissued for seven years, but the millers throughout the country introduced the "sucker" in their establishments without consulting the wishes or interests of the holders of the patent. Consequently, in 1874, ten suits for infringement were brought against New York millers, two of which were constituted test cases, and defended by the Millers' Association of that state. The decisions in these cases were in favor of the owners of the patent, whereupon the National Association took the defense in hand and appealed to the United States Supreme Court. There the cases have been pending until now, or for a period of over three years. In the spring of 1881 additional suits for infringement were brought against all of the leading millers of Minneapolis and Milwaukee, and on the 20th of December in the same year, a sub-committee of the executive committee of the National Association met the owners of the Deuchfield patent and their attorney in Chicago, and offered terms of compromise, which were not accepted. The owners of the patent demanded $80 per run of stone, and the millers expressed a willingness to pay $25 per run. The decision puts an end to all litigation past and pending. Had it been favorable to the holders of the patent, the pockets of the millers of this country would have been drained of fully $1,000,000. The Downton suit covered a patent known as the Downton process of manufacturing middlings flour by passing the middlings after their discharge from a purifier through or between rolls, and subsequently bolting or grinding them. The patent, which was granted in 1875, was defeated on the ground of want of novelty. Downton was beaten in St. Louis and took an appeal to the United States Supreme Court. He was confronted there by F. W. Von Cotzhausen, of Milwaukee, on behalf of the interest of one Wegman, a builder of smooth porcelain rolls at Buda Pesth, Hungary, and by Parkinson & Parkinson, of Cincinnati, on behalf of the National Association of Millers. Downton valued his patent at $3,000,000, and the decision consequently saves the milling interest of the country that amount of money.

The enormous increase in the production of copper in the Lake Superior mines, together with somewhat active competition of late years between them and the gradually increasing output of the western copper mines, has tended to bear down on prices of copper to such an extent that owners of and stockholders in copper-mine properties are beginning to be alarmed. The climax has been reached quite recently when a syndicate of European copper consumers arranged with Lake Superior region managers to take 10,000,000 pounds of copper off their hands at 16 cents. Since doing this the same managers have been offering the metal to domestic consumers at the same figures. The result will make a difference of over $1,500,000 in the aggregate value of the lake production of copper this year. Some good judges go so far as to claim it will reduce the value of the season's sales $2,500,000. The opinion has been expressed that unless there shall be a heavy demand for copper for cartridges in the near future, that the surplus which was over at the close of 1882 will continue to grow. Curtailment of production means loss to the owners of the mines. It is said only one-fifth of the Lake Superior mines pay dividends and that the tariff is of "no avail after production begins to exceed home consumption by enormous quantities." It would be of interest to know what other protected interests would say on the latter point.

Regarding the dullness of European stock markets the *Pall Mall Gazette* says: "There is, besides the trouble of absence of business among stockbrokers, the further trouble that in order to accomplish buying or selling commissions the market has to be created even in the case of securities in which usually there has been a ready market. Dealers have now so little to do in the stocks they are accustomed to buy and sell as to be little anxious to accept stock which they may have to hold a long while without finding a buyer; or, on the other hand, to undertake the delivery of stock which they are not sure of readily getting in the course of business. To adopt one of the sporting phrases which are so numerously borrowed from the turf by members of the Stock Exchange, the dealers have now no book open where they have been used to do several buying and selling bargains in the day. The complaint in the House is that speculation is dead, because the public will not come in. It is useless, further, to run up the price of this or that speculative stock if there is no retail demand for it afterward; the public, similarly, do not sell readily. Several astute operators have found the present a good opportunity to circulate pamphlets attacking Brighton A and London and Northwestern stocks, the effect being to frighten holders into the surrender of their property. When the public cannot be induced to buy, the next best thing is thought by those who want a market movement of some kind to get them to sell. Anything but this dreadful inaction, is the cry. Abroad speculative inaction is also generally apparent. Singularly enough, although it was accounted a fortunate thing a year or so ago that the Union Générale crash in Paris was not more severe, regrets have since been felt that the full effects of that crash were not permitted to spend themselves at once. The stronger French banking classes, it will be remembered, came in and arrested an indiscriminate fall, but seem to be still overloaded with the 'stuff' they then took up. Had the fall then been allowed to be more severe and general, it is argued, there would since have been more room for recovery and more speculative power in the French markets, which remained so long dull. We are disposed to think, however, that the French markets have more inherent power of recovery than is generally conceded by current opinion. The leading *banquiers* there could give a better tone to the Bourse if they chose."

A new illustrated literary magazine, called *The Manhattan*, has appeared in New York. It is published in Temple Court, but its publishers modestly keep their names out of sight. The editor, it is learned, is a capable gentleman, who formerly had charge of the dramatic department of the New York *Evening Mail*. The articles printed reveal considerable unevenness, but some of them are excellent. The initial article, "A Study of Hamlet," is hackneyed, and contributes practically nothing to the already crowded literature of that subject. Julian Hawthorne's romance, "Set Not thy Foot on Graves," will attract the attention of all who read the periodical. Miss Spofford's story is strong and good. Some of the poetry is execrable. The illustrations are not up to the literary and typographical aim of the publication.

RECENT LEGAL DECISIONS.

[*Prepared expressly for* BRADSTREET'S.]

It would be a curious and interesting inquiry to discover to what extent the spirit of the earlier opinions of the Supreme Court of the United States in relation to the inviolability of contracts has been departed from in later decisions. This reflection is suggested by the decision reached by the Supreme Court in the case of Ruggles vs. The State of Illinois, decided on the 7th inst. It appears that one Lewis, a passenger on a train of the Chicago, Burlington & Quincy Railroad, tendered Ruggles, a conductor of the company, eighteen cents as fare for his transportation for a distance of six miles. This was at the maximum rate of three cents per mile, prescribed by the statute of Illinois, in force at the time (1873). The conductor demanded twenty cents, the fare fixed by the railroad company, and upon Lewis' refusal to pay attempted to eject him from the car. For this attempt the conductor was prosecuted before a justice of the peace upon a charge of assault and battery and was fined $10 and costs. The case was carried up through the state courts by successive appeals, the railroad company sustaining the conductor, and raising the question of the right of the state to interfere with its business by fixing rates of fare and transportation. The state court of last resort rendered a decision in favor of the state, and the railroad company thereupon appealed to the Supreme Court, basing its appeal upon the ground that the Act of the General Assembly of Illinois of April 15, 1871, fixing a maximum rate of charges for the transportation of passengers on railroads in the state, was unconstitutional and void, because it impaired the obligation of the contract contained in the charters of the various companies which were merged in the Chicago, Burlington & Quincy Railroad Company by consolidation. The Supreme Court holds that grants of immunity from legitimate governmental control are never to be presumed, but that on the contrary the presumptions are all the other way. Unless an exemption is clearly established, the legislature is free to act on all subjects within its general jurisdiction as public interests may seem to require. A state may limit the amount of charges by railroad companies for fares unless restrained by some contract in the charter. The court was of opinion that in the case before it no such restraint existed. The state had given the Board of Directors of the railroad company the "power to establish such rates of tolls for the conveyance of persons or property as they shall from time to time by their by-laws determine," but such by-laws must not be repugnant to the constitution and laws of the state. If the state had not the legislative power to regulate the charges of carriers for hire, the case would have been different, but that question had been settled, and the amended charter which the company secured from the legislature must be construed in the light of that established power. The judgment of the Supreme Court of Illinois was affirmed.

A case of considerable interest, decided by the United States Supreme Court on Monday last, was that of Clark, general treasurer, and the State of Rhode Island, appellants, vs. Barnard et al., assignees in bankruptcy of the Boston, Hartford & Erie Railroad Company. This was a suit brought by the assignees of the railroad company to recover a certain certificate of indebtedness of the city of Boston for the sum of $100,000, with interest, given by the railroad company to the general treasurer of the state of Rhode Island as security for the company's bond, conditioned upon the completion of a branch of its road from Providence to Valley Falls, in that state. The company, originally a corporation of Connecticut and Massachusetts, applied to the General Assembly of Rhode Island in 1864 for authority to build a branch railroad within the limits of the latter state. The Assembly granted the authority requested, but with the proviso that the act should not go into operation unless within a time named the company should deposit a bond, with satisfactory sureties, guaranteeing the completion of the road within a certain time. The certificate of indebtedness was deposited with the bond of the company as security. No part of the railroad was ever built under the act referred to. In 1870 the railroad company was adjudged bankrupt, and its assignees filed a bill against the city of Boston and the state treasurer of Rhode Island, alleging that the directors of the company had no power to give the bond, that the company had no power to accept the act, and that the plaintiffs, as assignees, had a right to redeem the pledge, and praying that the certificate be returned to them. The certificate was paid into court to await judgment, and the state of Rhode Island came in as intervenor. Upon the rendering of a decision in the United States Circuit Court in favor of the assignees, an appeal was taken to the Supreme Court of the United States. That court has just decided that the contract made was a valid one and not beyond the powers of the company, for the reason that the company was the assignee of the road and rights of a Rhode Island corporation (The Hartford, Providence & Fishkill Railroad Company), and that it was not necessary for the state of Rhode Island, in order to establish its right to the certificate in question, to prove that it (the state) had been actually damaged to the extent of $100,000 by the failure of the railroad company to finish its road in accordance with the condition of the bond. The conclusion of the court was that the intention of the parties to the transaction was that the sum named in the Rhode Island statute was a statutory penalty for the performance of a statutory duty. The state, the court added, was dealing with one of its own corporations, and it had a perfect right to act upon its own policy and to prescribe its own terms as conditions of the powers and privileges sought from its authority. The decision of the Circuit Court was reversed.

An important point was raised and decided by the United States Supreme Court in the cases of ex parte Tom Tong and ex parte Hung Hang, in both of which petitions were made for the granting of writs of habeas. The first of these cases came before the court upon a certificate of division of opinion between the judges of the United States Circuit Court for the District of California. The petitioner, a Chinese subject, was arrested and imprisoned in San Francisco for refusing to obey an ordinance of the Board of Supervisors regulating the licensing and maintenance of public laundries in that city. He thereupon petitioned the Circuit Court for a writ of habeas corpus on the ground that he was unlawfully arrested, and was deprived of his liberty in contravention of the Constitution of the United States and of the Burlingame treaty. The judges of the Circuit Court were unable to come to an agreement upon the questions raised, and therefore certified the questions to the Supreme Court for its judgment. That court held that the only questions which might be certified to it on a division of opinion before judgment were those which grew out of the trial on hearing of a criminal proceeding before a Circuit Court. In the case before the court the prisoner was held under a criminal process, and the proceeding against him was a criminal proceeding. The writ of habeas corpus, however, was not a proceeding in that prosecution, but was, on the contrary, a new suit brought by the petitioner to enforce a civil right which he claimed as against those who were holding him in custody under the criminal process. The court declared that it had no jurisdiction of the case in its present form, and remanded it to the Circuit Court for further proceedings.

In the similar case ex parte Hung Hang, which was founded upon a petition for a writ of habeas corpus and was filed as an original action in the Supreme Court, that tribunal decided that except in cases affecting ambassadors, other public ministers, or consuls, and those in which a state is a party, it can issue the writ only for the purpose of reviewing the decision of some superior court or officer.

The case of Downton vs. The Yeager Milling Company, decided by the Supreme Court of the United States on the 7th inst., involved the validity of a patent granted to Downton in 1875 upon "an improvement in the process of manufacturing middlings flour," the main feature of the improvement consisting in the use of rollers instead of millstones for grinding the grain. The court held the patent void for want of novelty, the improvement set forth in the patent having been described in detail in printed publications many years before the date of appellant's alleged invention. One of these publications, it seems, was printed as early as 1847, and contained, in the opinion of the court, a much fuller and clearer exposition of the essential features of the appellant's "improved process" than was to be found in the specifications upon which appellant obtained his patent.

An interesting decision bearing upon the rule of liability applicable to the relations between telegraph companies and their patrons was decided by the Supreme Court of South Carolina on the 19th of March. The conclusion arrived at by the court did not vary widely from that reached by Vice-Chancellor Simrall, of Kentucky, in a case previously commented on in BRADSTREET'S (January 20, 1883). In the South Carolina case, Pinckney et. al. vs. The Western Union Telegraph Company, it appeared that the plaintiffs, citizens of Charleston, sent a night message from that city over defendants' wires to their agent in New York, directing the purchase of a certain number of bales of cotton. The message was in cipher, and a mistake was made in its transmission, on account of which several hundred more bales were bought than plaintiffs ordered. Cotton fell in price, and the plaintiffs incurred considerable loss, to recover damages for which the action was brought. The message, being a night message, was transmitted at lower rates than day messages, and upon different conditions, which were specified in a special contract printed as a heading on the paper on which the dispatch was written. This contract contained the provision that the sender should agree not to claim damages, for errors or delays, or for the non-delivery of such messages happening from any cause, beyond a certain sum. The defendants had a verdict below, and the plaintiffs appealed upon exceptions assigning

error. The question presented for the consideration of the court was whether, a *prima facie* case having been made for the plaintiffs by proof that the message had been received and transmitted by the company with a mistake in its terms which resulted in loss to plaintiffs, the company could be relieved from liability except by showing that the mistake occurred from some uncontrollable cause or causes. The court was of the opinion that telegraph companies were not embraced in the class of common carriers, and were not subject to the stringent rules of liability governing that class. They were responsible only for reasonable and due care and skill, and in order to exempt themselves from liability they were bound to show the presence of that care and skill, or, what amounts to the same thing, the absence of negligence and inexcusable carelessness. The court said that in its opinion companies were not bound to explain how mistakes like the one complained of occurred, and hence refused to disturb the judgment below.

A sheriff's sale of a machine covered by a patent carries with it a right to use the machine sold to the full extent that it could have been used by the execution debtor. This was the view taken in the case of Wilder vs. Kent, decided by the United States Circuit Court for the Western District of Pennsylvania, on February 2. The plaintiff alleged that he had received from certain persons who had obtained a patent for a graining machine a grant of the exclusive territorial right to the patent for certain counties in Pennsylvania. He had placed two such machines in a woodenware factory. A judgment was obtained against him, and the factory and the machines were sold under execution. Suit was brought to enjoin the use of the machines by the defendants who had purchased the premises and were operating the factory. Judge Acheson, in dismissing complainant's bill, said that the lawful sale of a patented machine takes it out of the monopoly either absolutely or pro tanto according to the nature of the contract. The purchaser of a machine from the patentee acquires no rights in the patent itself and needs none to enable him to enjoy his acquisition. By implication he is invested with a license to use that particular machine, and in the absence of express provision to the contrary such license passes with the machine to successive owners as an incident of proprietorship. That such is the law in the case of a voluntary sale is incontrovertible. The rule is that the purchaser at a sheriff's sale succeeds to the beneficial rights of the defendant to the property sold. To deny the vendee the right to use such machine would in effect prevent its sale upon an execution as an operative apparatus, and practically withdraw it from the reach of an owner's execution creditors. The conclusion arrived at by the court was that whatever rights to use a patented machine a defendant may have passes with the machine when sold by the sheriff to his vendee.

BUSINESS NOTES.

The interest taken in silk culture in California has resulted in an appropriation of $5,000 per annum for two years to the State Board of Silk Culture, recently created for the establishment of a school for silk reeling.

The Logan National Bank of West Liberty, Ohio, has been organized with a capital of $50,000; Samuel Taylor president, Frank P. Taylor cashier. The First National Bank of Pierre, Dakota, has been organized with a capital of $50,000; George L. Ordway president, Wm. G. Nixon cashier. The First National Bank of Nunda, N. Y., has elected Michael Dowling president in place of J. F. Barber. The First National Bank of Tucson, Arizona, has elected J. C. Handy president in place of P. R. Tully. The first National Bank of Cadiz, Ohio, has elected D. A. Hollingsworth president in place of A. Henderson.

Not long since Mr. Henry Villard, president of the Northern Pacific Railway, crossed the continent to San Francisco, proceeded to Portland, Oregon, and has since been traveling eastward over the completed and uncompleted portions of the rapidly-finishing railway named. He has made several elaborate speeches at important towns in the northwest, wherein he has outlined the future prospects of those urban centers, and the advantages they may be expected to enjoy upon the completion of the great northern transcontinental route. At Portland he addressed, according to the *Northwest News*, the new and sprightly daily of that city, a large audience of the best citizens of Portland and vicinity, on the Northern Pacific, Oregon, and heir future, his plans and expectations. The gathering was held at the Opera House, and was succeeded by a reception at the house of a distinguished citizen, a senator, at which Mr. Villard was kept busy while the "brave men and fair women" danced, by receiving, receipting for and answering telegrams. The gentleman's exposition of his projects as affecting Portland were exceedingly roseate-hued, and fairly captivated the residents thereof. But Mr. Villard has made other speeches at other towns along the line of the Northern Pacific on his tour east, and it appears that his account of his intentions when compared will not dovetail together with that exactness which is necessary in order to please all concerned.

He told the people of Walla Walla, according to the San Francisco *Chronicle*, that they shall not only have cheap transportation down the Columbia river, but that they shall have their expected railway through the Cascade mountains to Puget Sound, although it will be a costly road. He said, moreover, that he did not care whether the produce of the Walla Walla country went to Portland or by the Cascades all-rail route to the sound. This will be disagreeable news to Portland. The Cascades railway route starts near the mouth of Snake river, and passes through the mountains at an altitude of not over 3,000 feet, terminating at Tacoma. It is the hypothenuse of a triangle, the Portland route being on the subtending sides and therefore much longer. Ultimately, adds the *Chronicle*, this hypothenuse route must become the main railway route for the entire country east of the mountains in both Washington Territory and eastern Oregon, as it is the shortest and the sound is more convenient to commerce than Portland. Besides it traverses a great coal and lumber region, which must supply a vast local traffic to the road. This announcement will scatter immigration to the favored locality, but it will require several years to get a 17,000 foot tunnel through the mountains.

There were 211 failures in the United Kingdom and Ireland reported to *Kemp's Mercantile Gazette*, London, during the week ending April 21. The corresponding week last year recorded 256, and in 1881 but 164. England and Wales report 190 during the week specified above, against 234 and 138 in corresponding weeks respectively in 1882 and 1881; Scotland had 19, against 22 and 15, and Ireland had 2, against 9 reported in the third week of April, 1882, and 11 in the same week, 1881.

Most of the rubber factories which have been closed during the past three months have resumed operations. A rubber broker recently told a reporter that they were closed primarily because of the surplus of manufactured goods in the market, but that the high prices asked for crude rubber by the pool of importers naturally had something to do with it. Not much demand has been created as yet by the opening of the factories, as manufacturers had long since bought large supplies of crude here. A recent dispatch stated that 1,000,000 pounds has arrived at London. This is expected to act on prices here, which were to within a day or two still quoted at $1.12@$1.14 per pound.

The Chicago *Railway Age*, which is exhibiting commendable enterprise in the gathering and publishing of fresh facts about railways, states, in its issue of May 9, that "during the first four months of the present year there were 1,450 miles of main track laid, against 2,300 miles during the corresponding period last year." This, it is explained, is a greater mileage than for the same period of any preceding year except 1882, which will be unexpected intelligence to a majority of people. The decrease is ascribed to the delays caused by the cold winter and backward spring. The work was done on 75 different lines in 31 states and territories. Those which lead in the construction are: California 170 miles, Utah 156, New York 115, Pennsylvania 93, Montana 86, Idaho 85, Arizona 84, and Missouri 73. The estimated railway building for the year is placed by the *Age* at 8,000 miles.

M. de Lesseps appears to have time enough on his hands to discuss the feasibility of the creation of a vast inland sea in north Africa, whether he eventually secures capital enough "to begin operations" or not. At a lunch recently held at Biskra, at which a canal from the Mediterranean to the Desert of Sahara was discussed, the advantage which would accrue to Tunis from a southern water front, which would also protect the country from the ravages of the desert tribes, were pointed out and declared to be one of the strongest motives for the interest France takes in the project. M. de Lesseps has consulted six Algerine engineers on the feasibility and cost of the canal. Their collective opinion inclines to the belief that the cutting could be made within five years at a cost of 150,000,000 francs. An average width of 25 to 30 metres would be sufficient, as the current would widen the canal; and since it would be nearly in a straight line the navigation would be devoid of difficulty. A vast tract of country, lacking only moisture to become productive, would thus be brought under cultivation, which, added to fishery and navigation dues, would insure the provision of a liberal interest on the capital engaged.

The inference to be drawn from a prepared slip of "National Railway Exposition Notes," referring to the forthcoming exposition of railway plant and appliances at Chicago, is that the effort making will prove an unqualified success. BRADSTREET'S has previously given the general outlines of this great railway fair as projected, including the statement that the expected profits are to be applied to the erection and maintenance of a national railway hospital in the interest of the army of railway employés in this country. The work of completing the various annexes to the main building is going rapidly forward. The display of locomotives, old styles and modern, will be as complete as the most enthusiastic well-wisher could desire, as nearly all the railway builders in the country, and some from abroad, will send specimens of their best work, and some of the locomotives of the early days of railroading here and abroad will be on hand to mark the contrast with those of to-day. The latter will be fitly represented, among other exhibits, by one of the largest engines ever built, weighing over seventy tons, and fitly called "The Mastadon." Recent devices in the way of electric, automatic and other systems of signal service will be exhibited, several thousand feet of track having been secured for the purpose. The electric features of the exhibition, if as described, will be the most complete of anything yet attempted in this country. It is announced that displays will be made by nearly all the arc and incandescent systems of illumination in use in the United States, and several will be on a very elaborate scale. That "most remarkable recent invention," the electric storage battery, will likewise be shown and its efficacy tested. It is added that the English commissioner is now on his way here, bringing many interesting contributions.

The general tone of the British labor market, as reported by the London *Labour News* on April 25, had not changed materially from that last noted. In various lines reports of the unsettled condition of industries are made due to disagreements between employés and employers as to wages, hours of labor, etc. The building trade in London and the provinces, however, continued to be brisk, and skilled and unskilled labor were in demand. The question of the output of coal had not been decided, and work at the mines was going on at a moderate rate only. Iron, hardware and machinery manufacturers at Birmingham and vicinity were busy, the last named having large orders "from the east" and the colonies. A strike, involving 1,400 dock constructors at Hull, was in progress, and a dispute between the Northampton boot manufacturers and their men was interfering with work in that line. Makers of railway material and heavy steel forgings at Sunderland were busy, as were also the rail and hoop makers at Wolverhampton. Little was doing in the line of textile manufactures, Bradford being notably dull. The Huddersfield weavers' strike had not terminated, and Manchester industries were said to be quiet. Emigration continued to be brisk, especially of agricultural laborers, which fact will be received on this side with interest.

The labor situation in the United States during the past week has excited less attention than for a month previously, but rather on account of matters having taken definite shape than from any improvement. The resumption of work on the part of the rubber factories is a favorable item to chronicle, and is due rather to the public having absorbed a surplus manufactured product rather than to any actual weakening of those who engineered the corner in crude rubber. The prospects, however, as elsewhere shown, are for an early decline in the price of crude rubber, owing to heavy arrivals at London. There is no special change in the attitude of the western iron-mill owners and their men. It has been reported and denied that the latter have offered to compromise. The Pittsburgh railroad coal miners are still out and exhibit no signs of weakening. For that matter, neither do their late employers. A large proportion of the strikes among various lines of manufacturers of tobacco have resulted in a victory for the employés. Some are still holding out for the advances demanded with varying prospects of success. There is no significant improvement in the situation of the cheap cotton goods fabric mills at Philadelphia, and southern mills continue to turn out like goods and ship them west with activity. There is, if anything, a slightly improved tone in the manufactured-iron market. But the paper mills, many of them, find their capacity in excess of demand, as do some boot and shoe makers and others. On the whole the labor situation, while not being worse, can scarcely be characterized as any more favorable.

STEEL PRODUCTION IN EUROPE.

The *Pall Mall Gazette* has the following:

Some of the largest manufacturers of steel in the world met at Middlesbrough at the recent meeting of the Iron Trades Foremen's Association. As usual, they differed as to the prospects of their trade. One of them, pointing to the production last year of 2,100,000 tons of steel in this country, and a make increasing at the rate of 30 per cent., foreshadowed a still larger increase arising from the coming substitution of steel sleepers for wooden ones. This process has begun with great success in Germany, and, said the speaker, the world would wake up some fine morning and determine to replace the existing wooden sleepers with steel ones, when it would take the whole of the world, working at the rate of last year, four and one-half to five years to supply that demand—a pleasant prospect truly for all interested in coal, iron and steel.

A shadow, however, was promptly cast over the charming vision by Mr. Richards, the manager of Bolckow, Vaughan & Co., the largest steel-makers in the north. "Do not forget," said he, "the existence of foreign competition. One part of my business in Italy a week ago was to sell some puddled bars. I was unable to sell those bars because the Germans can deliver in Italy bars at a price that cannot be made without loss in Cleveland. During the past six months a grand communication had been made between Italy and Germany by means of the St. Gothard Railway. The Germans put puddled bars into wagons, and delivered them in Italy at 80 francs per ton. The St. Gothard Railway had been constructed principally by German money, and it gave them a great advantage."

The extent to which the St. Gothard is likely to revolutionize the trade of central and southern Europe is but imperfectly appreciated as yet, but such incidents as the above will point in one direction.

THE FRENCH DEBT CONVERSION.

The *Pall Mall Gazette* calls to mind that the financial resources of a great nation are being exhibited by the efforts now making toward the conversion of the 5 per cent. French rentes. The government, it appears, has gone as far as it cares to in shouldering debts at the existing rates of interest with a budget which barely balances. Of course, the rather excessive and ill-judged public works projects of the past five years are responsible to a large extent for the state of the treasury and the ledger. Twelve years ago France borrowed £280,000,000 at 5 per cent. to buy the absence of the German invader. The credit of the nation is now such that it can borrow at 3½ and 4 per cent. The public works are not all finished, and more money is wanted. But the last loan, issued two years hence, has not been placed, and successive ministries are loth to call for more money to pay interest. It is therefore desired to convert the 5 per cents, and with the money so saved pay interest on a new loan to be contracted. It would readily appear that, this being the case, all there is to do is to convert; but not so. The French peasantry are heavy holders of these 5 per cents, and have threatened with a very loud and menacing outcry if their income is disturbed. This it is which stands in the way, frowning upon the scheme to convert the debt to one bearing 4 or 3½ per cent. Even ½ per cent. reduction would pay the annual interest on a new loan of £35,000,000 at 4 per cent. It is thus easy to see that "apart from politics there is no real difficulty of any sort." The *Gazette* states:

"Of course, the financial strength of France is even greater than the bare facts as to debt conversion would show. The government has a reversionary interest in the railway system of the country which yields no immediate income, but which it can sell for a capital sum that would be applicable to the reduction of the floating debt. Of such an operation there is also some talk at the present time, and there are no doubt other resources. It is necessary, however, to add that the political causes which have led to the present embarrassment of an unmanageable floating debt are not removed by expedients like those we have described, and they may in course of time produce grave economic dangers, if they have not already done so. It is easy enough now,

and it may be easy enough for some years to come, to meet the huge expense which grandiose schemes of public works involve, even if they cost twenty to thirty millions sterling a year. The real danger of this vast expenditure lies in the fact that along with the huge military and naval expenditure, and the expenditure for civil services in France, it makes the government the distributor of an unduly large part of the income of the French people; and this part of the income, it is to be feared, is not very wisely or profitably spent. The more widely a government extends its functions, the more danger there is of extravagance, always a very serious danger with any government, whatever may be the objects of its outlay. Apart from the expense, it is, moreover, a serious matter that every seventh adult in France, if not a larger proportion, must be in the employ of the state directly or indirectly, as a soldier, or as a revenue collector, or as a workman on some grandiose building that will never pay, or some railway to no place in particular, or in some such 'service.' A government which pretends to direct so much of the national labor cannot do so satisfactorily, while it is almost impossible for it, once engaged, to abandon any material part of the task and leave individuals more largely, as it would be wise to do, to their own resources. The political difficulties involved in such a condition of things are most serious, and the financial embarrassment which is now to be got rid of so easily by a debt conversion or the like expedient is unfortunately only the smallest part of the mischiefs that will from time to time be produced."

SMELTING LOW-GRADE ORES.

The Denver *News* of May 2 contains an account of the new "McNair reverberatory gas furnace" at Golden, which, it is claimed, is to permit the working of low-grade ores—an end long sought. The *News* says: The furnace, which has now been in use for nearly a month, gives the most entire satisfaction. It is employed at this place in the reduction of gold, silver and copper ores, but is adapted to almost any manufacturing industry requiring a steady and intense degree of heat. During the little time since it has been fired up, its saving in the cost of fuel has been $260. With the present capacity of the Miners' Smelting and Reduction Works, the yearly saving at that point alone will be some $35,000. Of course this saving will be just as apparent whether the metal operated upon be gold or its unpretentious relative—iron. This means an annual saving in Colorado of millions of dollars as soon as the furnace comes into general use, which is simply a matter of time. The one great point was to see the difference between the new furnace and the old, but incidentally the whole process of reduction was inspected. In the calcining room the sulphur is roasted out of the ore, the per cent. of this deleterious ingredient often being reduced from 40 to 2, as the most refractory ore produced is treated. The roasted ore is then put into a furnace and smelted. As fast as it becomes liquid the gold, silver and copper settle under a slag, the latter being skimmed off and allowed to run into molds of sand from which, while still hot, it is taken out in iron wheelbarrows and cast over the dump. After the slag had been removed the matte was taken out by a tap at the side, forming in molds very similar to its baser companion in the furnace, but not being thrown away in the same manner. It is reduced to a powder as fine as flour and again heated. From this on the processes are secret. By one of them the silver is precipitated on copper plates, by another the copper settles on old scrap iron, and finally the three ingredients, gold, silver and copper, separate and shining, are ready for shipment. But this does not bear directly on the working of the furnace that is in use in the building on iron. Looking into one of the huge chimneys through an aperture in the side left for air, it is seen that the heat is intense, and is carried upward with a draft that is strong enough to take a good many of the minute particles with it, these, of course, being lost. It is the utilizing of this heat and the mineral that is with it that is one feature of the McNair gas furnace. The shaft does not run directly up but is cut off, and runs horizontally for a little way and then pitches to the ground, the heat being carried back to the rear instead of into the upper air, the metal that may be in it is being deposited on the way so that it can all be saved. This in itself is quite an item, as 1 per cent. of silver is generally lost. The heat at the rear comes directly under a bed of coal and a gas is generated which creates the steady and intense heat desired. The saving of fuel is the great advantageous feature of the furnace as applied to the working of iron. The gas that is created by the coking of coal, through the application of what is generally waste heat, surpasses in saving capacity anything ever invented heretofore. Tests have been made in Pittsburgh which clearly established this fact. The distillation takes place in retorts, around which the waste heat passes, and thereby the products are converted into a fixed gas before leaving the retorts. All the moisture in the fuel is decomposed by being forced through a mass of heated carbon; the oxygen dissolving the heated carbon, at the mouth of the retorts, into carbonic-oxide, the hydrogen is set free; and as the gases, at about 1,400° Fahrenheit, pass along to the smelting, or furnace chamber, they are met by currents of air, also heated by the waste heat of the furnace to about 900° Fahrenheit, a perfect combustion at the moment of contact is secured if so desired. Besides, this furnace is under such manipulative control that the chemical condition of the flame can be changed at pleasure by admitting air or gas, as may be required.

The coal which is used does not have to be of a good quality, but slack, such as would be of no use in the ordinary furnace, answers every purpose. The other furnaces in the building consume seven tons every twenty-four hours, this new one a little less than four, and the saving can be made easily 50 per cent. in quantity. In cost it is already that. The visiting committee, several of them practical iron men, made a very minute examination of the workings of the furnace and were also highly pleased. It will so reduce the cost of manufacturing iron that the difficulty in the way of the establishment of a rolling mill is greatly lessened. The savings of half a dozen furnaces alone would be a handsome dividend on a considerable investment.

There is little doubt but that the McNair furnace will shortly be operating in Denver in a huge establishment. It is not claimed that it is adapted for making pig iron, but it can take the metal at that stage and carry it to any degree of finish. This fact was apparent to the men who for years had been connected with rolling mills or iron-working manufactories on some large scale.

THE CONSUMPTION OF THE PRECIOUS METALS IN THE ARTS.

The Paris *Bourse* gives the following interesting figures, as collected by Professor Soetbeer. According to him the annual consumption is as follows:

	Net gold consumption.	*Net silver consumption.*
United States	13,500 kilos.	102,000 kilos.
Great Britain	17,000	72,000
France	16,900	75,000
Germany	11,760	75,000
Switzerland	11,250	24,000
Austro-Hungary	2,465	32,000
Italy	4,500	19,000
Russia	2,400	32,000
Other countries	4,000	40,000
Totals	83,775 kilos.	471,000 kilos.

This would, at 3,440 francs per kilo. for gold and 185 francs—say 51d. per ounce—for silver, give an annual consumption of 292,000,000 in gold and 87,000,000 in silver. These estimates appear, however, too low; other authorities, among whom is Mr. Burchard, go to at least 400,000,000 in gold and 180,000,000 in silver. The difference is too marked to be ignored, and it will no doubt be necessary to admit of a consumption of say 340,000,000 francs, or 100,000 kilos. gold, and 130,000,000 francs, or 700,000 kilos. silver, as coming most likely near truth.

France figures in the above statement for say 58,000,000 in gold and 14,000,000 in silver, against 43,000,000 and 17,000,000 respectively, as found by M. Lardy, delegate to the last Monetary Conference.

THE FISHERIES EXHIBITION AT LONDON.

London *Iron* has the following regarding the fish exhibition which is to open at London to-day: "The endeavor has been made to include in the scheme every detail which is at all related to the subject of the exhibition. The result ought to be a collection of objects, specimens and material which there is not much danger in saying will be unique. In the section devoted to sea fishing will be brought together appliances of every description used for the capture of fish, oysters, lobsters, etc., and the visitor will be able to compare the various merits of the several methods and implements employed by different nations. An opportunity also will be given for studying the different varieties of craft used, and the points wherein their equipment differs from or corresponds with that of those in vogue on our own coasts, while the welfare of the fishermen has not been forgotten, as is shown by the attention to be given to systems of signaling at night for fishing fleets and vessels, the employment of luminous paint or the electric light, improved models of harbors, and appliances and methods for breaking the force of the sea at the entrances of harbors. Apart from any consideration of the industrial aspect of the matter, the amateur angler will be certain to find in the section reserved for fresh-water fishing much that will interest him. Another division is to be devoted to things referring to the economic condition of fishermen, and so complete has it been the endeavor to render the whole affair that there will be dealt with here such minutiæ as contracts of partnership; insurances of lives, boats and gear, and benefit societies for fishermen. The general public may be expected to find much to engage its attention in the department which is to be appropriated to the commercial and economic aspects of the question, and which will represent the preparation, preservation and utilization of fish, both for edible and other purposes. In addition to these different matters of interest, the important subject of fish culture will be represented by models or drawings of fish hatching, breeding and rearing establishments, while the more purely scientific branch of this section is to embrace the diseases of fish, and their origin and cure, and the processes for rendering harmless to fish-life streams polluted by sewage or chemicals. The history and literature of fish and fishing will not be forgotten; and last, but by no means least, the natural history of the inhabitants of our rivers and seas may be studied by means of the aquaria it is proposed to have, and which promise to be no less instructive than interesting on account of their variety."

THE OCCURRENCE AND EXTRACTION OF GOLD.

The following interesting points regarding future gold production are taken from *Iron* of London:

The yearly production of gold at the present time is estimated at about £22,000,000, which, when everything is considered, cannot be looked upon as a very abundant supply. To the practical man, therefore, the necessity of the hour appears to be to increase the annual supply of gold to the world; and as there is seemingly no immediate prospect of such an increase from the discovery of new gold-fields, the only alternative is to improve the yield of existing fields by closer attention to economical working and by the introduction of the best appliances that experience has devised for the treatment of the auriferous material. In view of these considerations, therefore, the publication of a work of the character and scope of "Gold," by Alfred G. Lock, is especially opportune. The account of gold-mining in India possesses the greatest amount of interest at the present time. A shareholder, however, in any of the Indian gold-mining companies who searches these pages with the hope of receiving encouragement in the expectation of their ultimate success will, in all probability, be disappointed. Mr. Lock ventures no opinion of his own as to the capabilities of the Indian gold-fields being worked to advantage. That immense quantities of gold have, during long past years, been derived from India admits of no question, and that the country is still comparatively rich is also as certain; but whether the precious metal exists in a sufficiently concentrated form in any part of the empire to pay for its extraction appears more than doubtful. At any rate, the failure of so many companies to make any returns, notwithstanding the amount of capital with which they have been backed up, and the scientific appliances at their disposal, justifies the entertainment of the doubt.

It is noteworthy that the two most memorable discoveries of gold in recent years have been made in what may be termed virgin ground. After the cream has been taken off in the first rush, and when gold-mining returns to what may be termed its normal state, it becomes almost one of the most precarious industries pursued by mankind. According to the mineral statistics of Victoria for 1881, the average takings of the miners in that colony for the year named were only £95 11s. 10d. per man. The present appearance of the Wynaad district in India has been compared, by one who holds no pessimist opinions as to Indian mining, to an abandoned Australian washing. The fact is that the natives in former years have practically exhausted the alluvial deposits in India, and have left only the quartz-gold for the workers of the present day. Now, it was in the alluvial accumulations both in the Californian and Australian gold-fields that the enormous yields of the precious metal were obtained; and Mr. Lock states that, until the recent improvement in quartz mining, at least two-thirds of the gold produced in English-speaking countries were procured from such sources. Our meaning will be rendered more plain by a brief description of the manner in which these alluvial deposits of gold have been formed. The miner of the present day, working on quartz, is but slowly and laboriously performing what nature, with all her varied forces at command, and operating through a vast series of years, had done for the natives of India in early times, and the fortunate pioneers on the Californian and Australian fields. Water has been the great factor in the accumulation of the alluvial formations. Acting first as rain, it has laid bare the auriferous quartz, and exposed it to the abrading influence of the weather; then it has carried the debris down into the valleys, whence the winter floods have washed them into the rivers. Here the process has been continued with increased energy, the action of the running water completing the disintegration of the lumps of rocks, and carrying off and dispersing the valueless matter, while the gold thus set free, being heavier than all the rest, drifts along the bed of the river, until arrested by a ledge or fissure in the river bed, where it accumulates and forms a pocket of gold more or less pure. It is thus that the "deep leads" have been formed which are found at considerable depths from the surface, and often covered by beds of lava or basalt, hundreds and even thousands of feet in thickness. These have been the work of a river system entirely different from that now existing, and belonging to a perfectly distinct geological epoch. The modern "placers," as the shallow alluvial deposits are technically called, have mostly originated from the redistribution by the rivers of to-day of the golden sands and gravels gathered in these "deep leads," although there are a few instances occurring of their formation direct from the mineral veins. By such mechanical agencies, and not by chemical processes, have been produced the rich alluvial deposits which contained the great prizes in the palmy days of gold-mining. But nature had unlimited time at her disposal to perform what man now desires to do in a few years. Is it to be wondered at, then, that even with the most improved modern appliances at his disposal, and with the aid of science, he is able to accomplish so little? When we consider the enormous mass of material which may have been "treated" by nature to produce a small deposit, it is possible to understand the poor results shown in many instances by modern gold-mining.

But while the difficulties surrounding quartz-mining are thus seen to be of no light nature, it is pleasant to note that in Mr. Lock's opinion, even supposing no new fields are discovered, there is yet hope of a return of prosperity to alluvial mining. To quote Mr. Lock's own words, "Wherever shallow placers have been worked, experience has shown that there are frequently two or three 'bottoms,' and corresponding strata of maximum richness alternating with others comparatively barren. Many old diggings in all parts of the world, supposed to have been quite exhausted, will yet be worked, and yield as great riches as before, when this fact is thoroughly appreciated and acted upon.

STORAGE OF TEA.

The London *Grocer's Gazette* says: Since the era of steamers the fact is undoubted that cargoes do not arrive in nearly as good condition as in the old clipper days. 'Steam' is about the commonest form of damage known, and it is surprising how small an escape will taint a large quantity of tea. On the other hand, damage which is attributed to steam often has nothing to do with it. Many teas do not keep, and they commence to ferment almost from the day they are packed, and in proportion as the style of make of the article falls off year by year, so does its power of keeping. The tight-rolled, hard Ningchows of years ago went off very little, and the merchants of the last generation almost classed tea with wine and cigars, and considered it rather the better for age; whereas, now-a-days it is looked upon, and very properly, as a perishable article, like butter. Considering that tea is packed in wooden cases, with close joints, and almost hermetically sealed in lead, it is astonishing how it will get tainted. A case was recently seen where a whole warehouse caught the smell and flavor of oranges, merely, it is said, from oranges having been carried through part of the building. We have also heard it stated that in one or two warehouses where wine is stored all the teas run more or less "winey." This flavor, when natural to the tea, is not considered objectionable, but when caused by any foreign contact prices are heavily affected.

In household cupboards tea may often be seen stowed next to cheese, apples, lemons and other highly-scented articles of consumption; and then the lady housekeeper is surprised at the various flavors combined in a single cup of "unrivaled early picked." It may be argued that a flavor even of cheese is preferable to none at all, but as "good wine needs no bush," so does good tea require no flavoring; and good tea can still be bought if the British public will only pay a fair price for it.

The experiences gained by the case in point should impress on all retailers the necessity of carefully selecting the place for stowing tea, removing it from any stock likely to exercise an injurious effect, a precaution neglected by many grocers, to their own no small detriment.

FINANCIAL.

THE LOAN AND INVESTMENT MARKETS.

The stock market has not wanted for activity this week. The event which was needed to break the deadlock referred to last week was found in the retirement of Mr. Vanderbilt from the control of his roads, which was first made known to the public last Saturday morning. Its operation has been "to shake out an extra quantity (of stocks) from the hands of holders who are not classed as speculators," which was spoken of before as the possible event which would encourage the bear operators to make a determined attack on the market. New York Central has declined under a steady pressure of sales both for the long and short account, and London has contributed its full quota to the decline. The sales of stock made on foreign account have been heavy enough to affect the exchanges. As the stock closed each day at nearly, if not quite, the lowest quotation of the day, it was evident that its decline was due to the actual sales of stock, and not to the short sales of the bears. Lake shore has been but slightly affected, for it is very strongly held, and the leading operators on the bear side apparently have not cared to seriously attack it until the rest of the market should have so far declined as to weaken its position by isolation. Naturally the West Shore road, the growing competitor of the New York Central, has been as much talked about as the latter; and the large bids for the block o West Shore bonds, advertised by Winslow, Lanier & Co., have been a leading topic in the street. Only a trifle over $4,000,000 were offered for sale (the last of a lot of $20,000,000), and the bids aggregated over $10,000,000, and at fair prices. The awards were made from $78.25 to $82. The number of bids showed a wide scattering, and the distribution made has carried the bonds pretty well over the country. As the road will get well into operation between New York and Albany this summer, in time, it is said, for the Saratoga travel, there is much speculation as to the amount of inroad it will make on the earnings of the New York Central.

Meantime the other question comes up as to how the old road will act toward its young rival. Wall street thinks it will fight. President Rutter is said to have been steadfastly opposed to the policy o buying up competitors, as was done in the purchase of the Nickel Plate by the Lake Shore. He is cred ited with having all along opposed the purchase o that and of the Omaha road by the Northwest (which is also a Vanderbilt property); but it is s rised that Mr. Vanderbilt's position as a heavy hold of stock made him averse to adopting a policy which, while it would crush competition, could not do it without seriously hurting the victor, and of course, depressing the price of the stocks he was loaded with. Mr. Vanderbilt is now supposed to have sold out. All Wall street believes that he has. It argues that he has left the fighting to be done by a strong man, which President Rutter is acknowledged to be. That he did not put members of his own family into the positions he vacated, as was generally expected he would, was considered to be most significant. It is true, a new position of supervision—the English system of chairman of the Board of Directors—was created for his sons; but the street has paid next to no attention to it, considering that the future policy of the Vanderbilt roads is in the hands of Mr. Rutter, and that it was intended it should be.

It is very certain that Mr. Gould thought the situation serious, for immediately after Mr. Vanderbilt's action was made known, it was stated that he would return this week to New York, somewhat shortening the trip he intended to make. He has, in fact, been flying back as fast as the train could carry him; but the amusing circumstance of the affair was, that the important news reached him when he was in the most remote parts of Texas, and not until he reached St. Louis could his special train get on to a railway upon which great speed could be made without the certainty of ditching the whole concern. His progress, therefore, was of necessity comparatively slow until he reached that point; but he did not waste much time after it. Mr. Sage also, who accompanied him, was food for amusement to the street, for it seemed to be regarded as a certainty that he would have been utterly dismayed at getting such important news when so remote from Wall street as southern Texas. Mr. Gould's remark made on his journey out that it would be red-hot between the trunk lines in the future, was considered to have referred to a much nearer future than he had anticipated when he made it, and Mr. Vanderbilt is credited with having completely fooled the men who were most interested in keeping well informed as to his intentions. A bad break took place in the market on Thursday, in which the stocks of the Lackawanna and the Cleveland, Columbus, Cincinnati & Indianapolis road (generally known as the Bee Line) was conspicuous, for it was announced that the latter had refused to haul the cars of the recently established Lackawanna Dispatch Line over its road, and that line in consequence had withdrawn from St. Louis business. The Bee Line is a Vanderbilt property. The Lackawanna, with its extension to Buffalo, had established friendly relations with the Nickel Plate and Bee Line and had started in with great flourish to do a direct St. Louis and Chicago business. Mr. Gould went out over it and could not say enough in its praise. The street argued that it was with the Lackawanna he was going to make things "red-hot." When the action of the Vanderbilt road was announced, it was accepted as a sign that the moment had come when the Vanderbilt interests threw off the friendly mask they have been wearing and declared for fight. The action of the Bee Line cuts the Lackawanna off short at Buffalo. Wall street awaits with interest the return move of Mr. Gould. Altogether the railroad situation is in a beautiful tangle, and what will be the outcome no one seems to know. By the way prices have been declining, the prospect is evidently not viewed as encouraging, and it does not help matters at all to get discouraging estimates of the growing winter-wheat crop. The one cheering feature of business in the street has been the large demand for bonds, chiefly of the cheaper and speculative kinds. There have been large transactions in these, and the Nickel Plate 6 per cents., in particular, rose as high as 103 on large purchases.

The loan market has been easy. Commercial paper has been done at unchanged rates, but call loans have ruled at about 3½ to 4 per cent., which would indicate that the banks are filling up, and a good bank statement will be forthcoming to-day. On the other hand, foreign exchange has been rising, and the posted rates rose on Thursday to $4.84 and $4.87½. The gold exporting point is $4.88.48. Any rise above that figure shows the profit in exporting gold. Thursday's rise was made in consequence of the Bank of England raising its discount, or loan, rate that day from 3 to 4 per cent. The latest London papers predicted that such a rise was possible, and it was not made until the open market rate had risen ½ per cent. above the bank rate. The bank lost considerable specie through the week, and its bullion reserve is now down to a fraction over 33 per cent. of liabilities, which seems to be considered low for this time of the year.

In the government bond market there was a slight temporary depression early in the week, which was, with more or less truth, attributed to the prospect of the much-discussed Page bill becoming a law by the Governor's signature. As a law it would operate to diminish the market for governments by allowing savings banks to put funds into railroad bonds and *stocks*, which must now be invested in government securities. Later, this cause of apprehension, if it existed at all, was removed by the growing conviction that the Governor would never give his consent to so pernicious a measure. The following were the closing prices of bonds yesterday:

	May 4, bid.	*—May 11,— bid.*	*asked.*
U. S. 5s extended (3½ p. c.)	103	102¼	—
U. S. 4½s 1891, registered	112	111⅞	112⅛
U. S. coupon	113⅛	113	113¼
U. S. 4s 1907, registered	119¼	119	119¼
U. S. 4s 1907, coupon	119¼	119	119¼

Saturday's bank statement was again a disappointment, the greater because very confident expectations had been indulged in up to the time of its issue that it would make a good showing. The meagre surplus reserve was increased only $708,925, bringing it up to $1,604,125, against a surplus above the 25 per cent. line at the same date last year of $9,650,350. The following are the comparative totals of the statements of April 28 and May 5:

	April 28.	*May 5.*	*Differences.*
Loans	$312,895,000	$315,567,400	Inc. $2,612,400
Specie	53,736,800	55,769,100	Inc. 2,032,300
Legal-tenders	19,669,000	20,077,600	Inc. 438,600
Deposits	289,922,400	296,970,300	Inc. 7,047,900
Circulation	16,342,400	16,233,600	Dec. 108,800

The proportion of total reserve to liabilities is now 25.54 per cent., against 28.14 per cent. in the corresponding week of 1882.

By telegraph from Baltimore, Md.: The stock market became a little more cheerful late in the week and a fair amount of business was done. The demand, however, was limited, and not sufficient to bring about any material change in prices. The greatest inquiry was for railroad stocks, but holders continued firm, and business remained quiet.

From New Orleans, La.: The feeling in financial circles was greatly improved by the state Supreme Court's deciding the non-taxability of bonds. Today, however, rumors of an application for a rehearing of the case has again unsettled bonds, which had taken a sharp upward turn. Stocks continue quiet, and money easy.

THE FOLLOWING WERE THE CLOSING QUOTATIONS FOR STOCKS ON THE DATES NAMED:

COMMERCIAL.

The dispatches to BRADSTREET'S from the principal business centers of the country disclose no marked change in the trade situation, which continues in the main fairly satisfactory. Dispatches from the cotton-growing regions are to the effect that while the season is late the weather is at present good and the prospects of the growing crop are favorable. Wheat has been pretty firm during the week, being maintained by speculative holding in this country which has made prices relatively higher than in the foreign markets, and has checked the export movement. Corn has also been maintained by speculation, the buyers believing that July will show so small an amount in first hands that it will command higher prices in that month. Pig iron is weaker, and the efforts to talk producers into accepting lower prices look as if a partial success might be obtained. Outsiders are loud in their expressions of belief that No. 1 foundry should sell for $20. Sales have been very light during the week. Scotch iron at this city has experienced a like fate, and a good share of arrivals have gone into store, while sales to arrive have been insignificant. Steel rails are about as last reported. Anthracite stocks at seaboard are comparatively light, while production is nearly 1,000,000 tons ahead of the record at this time last year. No special effect on the anthracite market has been observed thus far by the opening of navigation, and operators are discussing the advisability of working on half time during the entire month. The petroleum speculative market has been steady and generally higher during the week. This is entirely warranted by the statistical position of the product, which is all the more conspicuous inasmuch as, judging by experience, that forms no basis to expect higher or better prices. The ocean freights market is stronger and higher. Considerable petroleum has been exported of late, and it is highly probable that the aggregate to date will equal if not exceed the heavy total shipped at the corresponding time in 1882. Berth-rates have likewise been higher Full grain charters have not been frequent, but the ocean-freights market has experienced a decided improvement. Trade in wool has continued on a small scale in all the seaboard markets, but prices as a rule have undergone no important change. There were 149 failures in the United States reported during the past week, 17 more than the preceding week, 31 more than the corresponding week of 1882, and 65 more than the same week of 1881.

BREADSTUFFS.

The attention of operators in the foreign breadstuffs markets is now directed to three principal factors in the future course of prices, viz.: First, to the progress and prospects of the crops in the principal importing countries of western Europe; second, to the probable supplies in the immediate future from other countries than the United States; and third, to the crop prospect in the United States, which is very properly regarded as having the most important bearing upon the general range of prices throughout the world next autumn.

On the first of these points, viz., the prospective crops in western Europe, there has been but little change in the last two weeks. The spring seeding in the greater portion of the United Kingdom and France was completed under very favorable circumstances, though recently the weather in those countries has not been very favorable. In Germany, however, where there had been much less apprehension of damage to the autumn-sown wheat than in France and England, it is now claimed that very much greater damage was done by frosts, and especially on the large area of wheat-fields that had at times been submerged, than was heretofore believed, and on the whole there is no reason to doubt that the deficiency in the wheat crops of all the countries will be fully as great as estimated at any time in the last month. The unusually large imports of wheat into Germany in the last year were due to the loss of the potato crop last summer; but whether this will again be the case to any extent cannot now be even surmised. It is, however, probable that the area planted in this important edible will be less than last year, and that the seed potatoes will not be so good as last year.

In regard to the supplies of wheat in the immediate future, from other countries than the United States, it may be said that they are increasing, while the movement from the United States is diminishing. In the week from April 17 to the 26th, there was an increase in exports of wheat from the Azov sea of 600,000 bushels; from Egypt and India of about 500,000 bushels; from Chili about 700,000 bushels, and from Australia and New Zealand of about 200,000, making an aggregate increase of about 2,000,000 bushels, while in the same week there was a decrease in the movement from the United States of about 600,000 bushels. The Baltic ports are also now open, and a further important increase from that quarter is to be expected at once. It will thus be seen that however much the more distant future of the foreign markets may depend on the crop of the United States, there is an abundant supply from other countries in motion for the present.

The gist of the United States government report for the month ending April 30 is that the average condition of the winter-wheat crop has improved 3½ per cent., while the loss in acreage by the plowing up of winter-killed wheat will offset the improvement in condition. The estimated deficiency of the winter wheat crop, as compared with last year, represents a loss of 77,000,000 bushels.

AMERICAN WHEAT MARKETS.

The condition of the coming wheat crop has been the absorbing topic of discussion in the leading grain centers during the past week. The reports issued by the different State Boards of Agriculture and by the Department at Washington have apparently had more influence on the opinions of grain operators than on market prices. In addition to these official reports the country has been flooded with reports from private sources, many of which were highly exaggerated, and not altogether of a disinterested character. Fair and candid parties concede that serious and irreparable injury has been done to the winter-wheat crop, but are unable to decide at this early period of the season as to the extent of the damage, or what is likely to be the final outcome of the crop of 1883. The tide of immigration which for the past year has been sweeping into the northwestern states cannot but largely swell the production of spring wheat, and the roughly estimated increase of 1,000,000 acres under cultivation of spring wheat does not seem at all improbable.

With opinions as to the present condition of the crop at much variance, it is remarkable that the wheat markets should continue day after day to be steady and show but little change in prices.

The movement of wheat from farmers' hands, though only moderate during the past week, shows an increase over any of the three previous weeks, and as farmers are now more at leisure than they have been, the receipts are not likely to decrease at present. The large amount of wheat in transit to the seaboard is now well on its way, and another week will show heavy receipts at tide-water. The export demand continues light, and consequently the outward movement from the seaboard has been small. A hardening tendency in the rates of ocean freights has interfered with the execution of a few orders that might otherwise have been executed. The American markets for wheat being relatively higher than the markets of Europe, exportation cannot be large until some change in this respect occurs.

The receipts of wheat at New York during the next two weeks will be unusually large, and it becomes a matter of much interest to know what effect these receipts will have on the market price.

The course of the wheat market during the past week is indicated by the following prices in the New York and Chicago markets, for June wheat, at the dates mentioned: New York, 2 p.m. Saturday last, $1.24¼; Monday, $1.24⅜; Tuesday, $1.23⅞; Wednesday, $1.23½; Thursday, $1.23¼; Friday, $1.23⅜. At Chicago, 1 p.m. Saturday, $1.14¼; Monday, $1.14½; Tuesday, $1.14⅜; Wednesday, $1.14⅜; Thursday, $1.14½; Friday, $1.14⅛.

The total receipts of wheat at Chicago, Milwaukee, Detroit, Toledo, Indianapolis, Peoria and St. Louis, for the week ending May 4, amounted to 689,329 bushels, against 515,688 bushels the previous week, and the shipments 1,744,523 bushels, against 1,435,912 bushels the preceding week.

The visible supply of wheat in the United States and Canada, May 5, as compared with the previous week, shows a decrease of 74,662 bushels.

CORN.

The corn markets during the past week have generally been without much activity, though prices have ruled steady, being somewhat influenced by the firmness in the wheat and provision markets. The more deferred options have commanded a large premium over the near futures on account of the doubt existing in regard to the ability of a large portion of corn to resist the warm weather of June without becoming heated. The inspectors at Chicago report that the No. 2 and high mixed corn that has been withdrawn from the elevators is in better condition than was expected.

Corn planting is well advanced in Kansas, Nebraska, southern Iowa and Illinois, and so far favorable reports have been received. The amount under cultivation this year promises to exceed that of any previous season.

The movement of corn from the interior to the leading western receiving points shows an increase over the preceding week. The shipments from the west to the seaboard have been on a liberal scale, and the stocks at tide-water will soon be amply replenished. The export movement this week, as compared with the previous week, shows an increase of 90,333 bushels.

The visible supply of corn in the United States and Canada, May 5, as compared with the preceding week, shows a decrease of 725,823 bushels.

The course of the corn market during the past week is indicated by the following prices for May corn in the New York and Chicago markets at the dates mentioned: New York, 2 p.m., Saturday last, 64¼c.; Monday, 64⅜c.; Tuesday, 64⅜c.; Wednesday, 64¼c.; Thursday, 64⅛c.; Friday, 64⅛c. At Chicago, 1 p.m., Saturday, 54c.; Monday, 54⅛c.; Tuesday, 54c.; Wednesday, 53⅞c.; Thursday, 53⅜c.; Friday, 54c.

The total receipts of corn at Chicago, Milwaukee, Detroit, Toledo, Indianapolis, Peoria and St. Louis, for the week ending May 4, amounted to 1,314,615 bushels, against 1,020,582 bushels the previous week, and the shipments 3,569,367 bushels, against 2,129,385 bushels the preceding week.

PROVISIONS.

For legitimate purposes there has been but little done in the provisions market during the week under review, but in speculative option trading the Chicago market has been active at advancing prices. The purchases have been mainly by the shorts for covering sales made at lower figures, and both pork and lard are cornered at present, the former by Armour and the latter by McGeoch. It is reported that, in order to fully control the market, they have been buying up hogs at country points, in order to diminish the receipts at Chicago for the time being. The receipts of hogs for the week ending May 10 at the principal western packing points, as compared with the previous week, shows a decrease of 27,816. The export movement for the week ending May 5 shows a falling off in the shipments of pork of 2,051 barrels and in lard of 2,085,132 pounds, as compared with the previous week. The foreign demand for hog product has been quite light, and cable advices from abroad indicate quiet markets, with prices in buyers' favor. Stocks abroad are moderate and trade of a restricted character. The demand for home consumption has been light, and, with the exception of sales of pork in the Chicago market for the lumber districts and for Canada, there has been but little activity outside of option trading.

The aggregate receipts of hogs at Chicago, Milwaukee, Cincinnati, St. Louis, Kansas City, Peoria, Indianapolis and Cleveland, for the week ending May 10, amounted to 142,793, against 170,609 the previous week and 172,793 for the corresponding time last year.

The following shows the export of hog product from the places mentioned below for the week ending May 5, 1883:

	Pork, barrels.	*Bacon, pounds.*	*Lard, pounds.*
New York	2,401	3,576,874	2,069,772
Boston	408	959,398	474,714
Portland	..	82,800	....
Montreal	..	....	....
Philadelphia	..	1,275,000	....
Baltimore	15	452	20,877
New Orleans	65	2,500	....
Totals	2,889	5,897,024	2,555,363
Previous week	4,940	5,810,453	4,640,505

The total export of hog product from November 1, 1882, to May 5, 1883, as compared with the corresponding time in 1881–82, was as follows:

	1882–83, pounds.	*1881–82, pounds*
Pork	26,263,200	31,476,800
Bacon	250,951,410	256,559,822
Lard	131,041,607	146,066,993
Totals	408,259,217	434,103,615

THE PROVISIONS MARKETS BY TELEGRAPH.

From Cincinnati, Ohio: Provisions are firmer, with a slight advance under a strong consumptive demand.

From Louisville, Ky.: The provisions prices and movement are slowly improving.

From St. Louis, Mo.: Provisions are fairly active and some brands are advancing. Hogs are higher and brisk with good supplies and everything marketable selling. Cattle receipts are excellent for the season and the market is active and upward.

From Baltimore, Md.: The provisions market is quite firm, and higher prices are anticipated.

AMERICAN GRAIN REPORTS BY TELEGRAPH.

From Louisville, Ky.: The weather has been clear, warm and dry during the past two weeks, causing the ground to become hard, checking the growth of wheat, and preventing the germination of corn and garden seeds. At the close, however, much-needed showers are prevailing, and the general farming outlook is thereby placed on a favorable basis again. Regarding the stand of wheat, the reports are still conflicting, but mainly confirm short-crop estimates.

From St. Louis, Mo.: Wheat is nervous, in sympathy with other markets, and transactions are rather light. Corn has been downward, but is now steady, and its outward movement, both by rail and river, has slackened. Oats are sharply upward and in demand, with reduced receipts. The crop situation is very favorable all around. Corn is mostly planted throughout two-thirds of Missouri.

From Lincoln, Neb.: Wheat has advanced 2c. Corn is slightly on the rise. Oats are bringing 35c. on the local markets. The prospects are good for a large production of butter this season.

From San Francisco, Cal.: The crop prospects are steadily improving, and wheat and barley are lower.

From Baltimore, Md.: Transactions in wheat have only been fair, but prices are firm.

From Houston, Tex.: The general crop prospects are excellent, much better than at the same time last year.

THE NEW YORK DRY GOODS MARKET.

The weather during the past week has not been favorable to an increased activity of trade, and there is no apparent improvement over the previous week. Importing and domestic commission houses alike report dull business for the week. Jobbers are not over busy either, though a fair request is kept up by city and near-by trade. It has been a quiet season in dry goods and a very dull one for those in the woolen business; this latter branch has apparently suffered most, and a large decrease in prices is commencing to show itself; some makes of spring goods that sold two months ago at steady figures can now be purchased at from 20 to 35 per cent. less. The retail trade for the week has fluctuated. We may early hope for warm and steady weather, however, which will be productive of good business.

THE BRITISH COTTON GOODS MARKET.

[By Cable to BRADSTREET'S.]

London, May 11.—There is a fair inquiry for cloths at Manchester, but any advance is hard to get after last week's activity in yarns. Prices are steady and trade is less active. April shipments to India and China were small.

THE DRY GOODS MARKETS BY TELEGRAPH.

From Portland, Me.: The trade is steadily improving, but country dealers complain that money is hard to get and goods move slowly.

From Boston, Mass.: There has been a fair trade in dry goods, mostly with New England. Outside orders have been light, but jobbers report trade, generally, as being more satisfactory, with a tendency to improve. Woolen goods are very quiet. Collections are fair.

From Providence, R. I.: The print cloth market is very firm, and sales are reported moderate; 64s are quoted at $3\frac{11}{16}$c., and 56x60s at 3⅛c. There are 120,000 to 125,000 pieces on hand.

From Rochester, N. Y.: The jobbing dry goods business during the past week has fallen off perceptibly as compared with the preceding week, but will compare favorably with the corresponding

period last year. Retailers in this line generally complain of dull trade, owing entirely to the unpropitious state of the weather. Collections are fair.

From Philadelphia, Pa.: Trade is quiet with the package houses, although a better inquiry is reported, in some cases, for cotton goods, as a result of the recent sharp advance in the raw staple. The jobbing trade continues moderarcly active, but, as a whole, is not equal to expectations. Collections are represented as reasonably satisfactory by most houses.

From Pittsburgh, Pa.: The demand for dry goods if anything has not been quite so active as last week, but nevertheless satisfactory, and jobbers have no reason to complain.

From Cincinnati, Ohio: Dry goods continue to find a fair market. Transactions appear to be, however, for sorts and cotton goods.

From Cleveland, Ohio: The dry goods trade continues exceptionally good, and a comparison with former springs is quite favorable.

From Columbus, Ohio: Jobbers in dry goods report a good trade for the past week, and say business for the season is ahead of the preceding year. Collections are quoted good.

From Chicago, Ill.: Dry goods selling fairly on orders, with an average attendance from the interior. Merchants' sales compare well with those of previous week, and better than for same time last year. Warmer weather would improve trade in light goods. Millinery notions and fancy goods in fair request. Trade in clothing is rather slow, but is equal to last year.

From Peoria, Ill.: In dry goods trade is up to the average, with fair collections.

From Detroit, Mich.: In dry goods jobbers have had a satisfactory trade during the week; retail trade has suffered somewhat on account of rainy weather.

From Grand Rapids, Mich.: Dry goods trade for past week has been fairly active.

From Louisville, Ky.: Dry goods are seasonably quiet.

From St. Louis, Mo.: Dry goods are in heavy sale, with a marked increase in the demand for summer fabrics. There is no special change in values of cotton staples yet. Millinery is in good request, and clothing is fairly active.

From Burlington, Iowa: No new features in dry goods business. A fair steady demand. Collections are fair.

From Milwaukee, Wis.: For general assortments of dry goods the demand is light, but trade is perhaps a shade better than a week previous. Collections are probably a little easier.

From Topeka, Kan.: The dry goods trade is very satisfactory, and is reported by most of the merchants as better than at corresponding time last year.

From Denver, Col.: The dry goods trade continues good, and is much more satisfactory than last year.

From San Francisco, Cal.: The jobbing dry goods trade continues steady with sales large, principally for Oregon's export. The city trade is improving.

From Baltimore, Md.: The dry goods market has been fairly active, and jobbers express themselves well satisfied with sales. Prices are steady. No complaints are heard against collections.

From Richmond, Va.: The dry goods trade is a shade quieter than last week. Other lines show no noteworthy feature.

From Norfolk, Va.: The dry goods jobbers are doing a fair business, and all retail departments are more active.

From Wilmington, N. C.: Dry goods jobbing trade fair, but without special feature.

From Savannah, Ga.: Dry goods markets more steady and active, with fair demand for leading lines. Shipments more than previous weeks.

From Selma, Ala.: The dry goods trade is still good.

From Galveston, Tex.: The dry goods and general jobbing trade is dull.

From Houston, Tex.: The dry goods trade is dull here, and merchants are buying for immediate wants only.

From San Antonio, Tex.: Dry goods are moderately active.

From Waco, Tex.: The wholesale dry goods trade is reported rather inactive just now, notwithstanding the sales since January are much larger than for the corresponding time of 1882.

From Memphis, Tenn.: Dry goods dealers report sales as being good considering the time of the year, but the volume is decreasing as the summer approaches.

From Halifax, N. S.: In dry goods the spring trade is considered over. A better estimate can now be made of the amount, and the trade unhesitatingly compare it unfavorably with the past two corresponding seasons.

COTTON.

The market for spot cotton at New York for the week past has been quiet and firm, higher with quotations. The closing price last evening ($10^{15}/_{16}$c.) shows an advance of $^3/_{16}$c. over the closing price one week ago. The sales for the week foot up as follows: For export, 1,025 bales; for consumption, 1,991 bales, and for speculation 480 bales. Included in the above are 300 bales to arrive. The deliveries on contract amount to 2,500 bales, against 3,200 last week. The volume of business continues to grow less, the total sales only reaching 3,496 bales, against 5,106 last week, and 8,339 the week previous.

Below will be found the closing quotations for prompt delivery uplands at New York on Friday evening, as compared with last week and the corresponding week last year:

	This week.	*Last week.*	*Last year.*
Ordinary	8c	7 13-16c.	9⅝c.
Strict ordinary	8 7-16	8¼	10 3-16
Good ordinary	9¼	8 1-16	11
Strict good ordinary	9 15-16	9¾	11 7-16
Low middling	10 7-16	10¼	11⅞
Strict low middling	10¾	10 9-16	12⅛
Middling	10 15-16	10¾	12 5-16
Good middling	11 5-16	11⅛	12 11-16
Strict good middling	11 9-16	11⅜	12 15-16
Middling fair	12 1 16	11⅞	13 7-16
Fair	12 13-16	12⅝	14 3-16

The market for spot cotton closed firm.

The future market at New York for the week past has been steady and easy. Quotations show an average advance of 13 points for near months, but a decline of 11 points for later months. The sales have been heavy, although less than those of the preceding week. They foot up 833,006 bales, against 1,111,100 bales last week, and 269,100 for the corresponding week last year.

The following table shows the closing quotations for futures at New York Friday evening, compared with last week and the corresponding week last year:

	This week.	*Last week.*	*Last year.*
May	11.00	10.83	12.32
June	11.00	10.94	12.41
July	10.98	11 01	12.54
August	11.04	11.08	12.68
September	10.57	10.72	12 30
October	10.26	10.35	11.70
November	10.14	10.25	11 51
December	10. 16	10.27	12.52
January	10.25	10.34	11.64
February	...	10.39	11.75

The market for futures closed dull but steady.

The southern markets have been quiet and steady. Below will be found the sales for the week and the closing quotations for middling uplands at five leading ports as compared with last year's quotations:

	Week's sales.	*To-day.*	*Last year.*
Galveston	6,927	10¼	12
New Orleans	12,850	10 3-16	12⅛
Mobile	2,400	10¼	12
Savannah	1,559	10 3-16	11¾
Charleston	650	10¾	12⅛
Norfolk	3,195	10½	12
Baltimore	3,832	10⅞	12¼

The total receipts of cotton at the ports since September 1 are 5,693,470 bales, an increase of 1,240,946 bales over the receipts of last year for the same time. The total at each port since September 1 is as follows, compared with the total to the same date last year:

	This year.	*Last year.*
Galveston	798,807	415,917
New Orleans	1,599,783	1,153,121
Mobile	306,712	250,075
Savannah	794,738	710,065
Charleston	502,699	483,411
Wilmington	127,673	132,061
Norfolk	704,681	587,238
Baltimore	64,623	27,535
New York	148,943	165,062
Boston	.....	212,023
Philadelphia	81,413	67,416

Below will be found the receipts for each day in the week ending Friday, May 11, at eleven leading ports:

	Sat.	*S. & M.*	*Tues.*	*Wed.*	*Thurs.*	*Fri.*
Galveston	1,370	1,406	615	2,890	667	1,174
New Orleans	2,157	1,951	4,311	1,661	1,240	3,014
Mobile	93	347	1,012	78	10	168
Savannah	803	731	430	546	589	284
Charleston	548	890	643	546	1,246	208
Wilmington	41	61	135	144	89	31
Norfolk	1,929	1,603	1,076	705	1,023	1,853
Baltimore	...	40	316	757	318	491
New York	70	..	69	252	141	....
Boston	326	1,188	748	1,014	811	612
Philadelphia	87	....	398	360	633	387
Totals	7,504	8,283	9,753	8,953	6,767	8,222
This day last week	6,963	10,008	6,774	6,705	7,363	9,120
This day last year	3,759	5,102	5,678	3,349	2,125	3,889

The total receipts at the ports for the week were 50,526 bales, against 48,172 last week and 24,871 for the corresponding week last year.

The receipts at the twenty-four interior towns usually reported were 14,815 bales, against 13,563 bales last week and 7,233 bales for the corresponding week last year. The shipments for the week were 31,298 bales, against 38,303 bales last week and 20,081 bales for the corresponding week last year. The stocks for the week were 136,969 bales, against 150,225 last week and 116,844 for the same week last year.

At Liverpool the spot market is reported easier, with a moderate inquiry which has been freely supplied. Middling uplands have been higher, the price having advanced to $5^{13}/_{16}$d. from 5¾d. last week.

The Liverpool future market was irregular in the early portion of the week, but became firm and easy in the latter, and closed steady last evening.

Below will be found the closing quotations on Friday of low middling uplands for delivery, as compared with last week and the corresponding week last year:

	This week	*Last week.*	*Last year.*
May	...	5 53-64d.	6 39-64d.
May-June	5 56-64	5 54-64	6 39-64
June-July	5 59-64	5 57-64	6 42-64
July-August	5 63-64	5 61 64	6 45-64
August-September	5 62-64	5 63-64	6 51-64
September-October	5 61-64	5 62-64	6 42-64
October-November	...	5 52-64	6 28-64
November-December	5 47-64	5 55-64	....

The sales for the week at Liverpool were 60,000 bales (of which 45,000 were American), against 75,000 (of which 47,000 were American) last year. The sales for export were 5,100 bales, against 13,000 bales last year. The sales for speculation were 4,200 bales, against 11,000 bales last year. The amount forwarded was 19,500 bales, against 13,500 bales last year. The stock in port is 914,000 bales (of which 677,000 are American), against 986,000 bales (of which 622,000 were American last year. The total imports for the week were 56,000 bales (of which 36,000 were American), against 79,000 bales (of which 40,000 were American) last year, and the amount afloat 343,000 bales (of which 193,000 are American), against 436,000 bales (of which 183,000 were American) last year.

The Manchester market closed quiet.

THE COTTON MARKET BY TELEGRAPH.

From Providence, R. I.: The cotton market is very firm, sales being moderate. Middling uplands are quoted at 11¼c. and middling gulfs at 11½c. There are about 10,000 or 12,000 bales on hand.

From Cincinnati, Ohio: Cotton continues strong, and manifests sympathy with the seaboard cities. Receipts this week have been liberal, and prices have advanced ¼c.

From Baltimore, Md.: There is no pressure to sell in the cotton market. Small demands are freely supplied and prices quote steady.

From Norfolk, Va.: Cotton receipts continue about as last reported.

From New Orleans, La.: The spot movement this week was moderate; low ordinary to low middling declined $^1/_{16}$c., middling and good middling ⅛c., middling fair ¼c. The sales of futures were fair. Mays declined seven points, summer months about twenty-five, and fall months sixteen, though the market is believed to be strongly held, particularly in Liverpool. Apprehension prevails that it may go up or down at any time by manipulation. This checks activity and causes a feeling of apprehension. The pressure here is principally on Julys. The weight of cotton is considered heavy in the aggregate, but so widely and generally distributed as not to be fully appreciated.

THE GROWING COTTON CROP, BY TELEGRAPH.

From Charlotte, N. C.: Previous to 1st inst, generally too wet for cotton, retarding planting. Since then favorable, and planting about completed.

From Raleigh, N. C.: Spring has been backward. May weather has been fine and planting progressing rapidly; will be completed in ten days.

From Wilmington, N. C.: Weather pleasant and favorable for planting, which is nearly completed. Cotton receipts increasing and market firm.

From Charleston, S. C.: Too much rain heretofore. Three weeks backward. Much replanting in low places. Present weather fine.

From Columbia, S. C.: Weather fine for cotton; good stands; prospects good; acreage 5 per cent. larger than last year.

From Atlanta, Ga.: Rainy, warm weather. Crop progressing finely. Prospects excellent.

From Montezuma, Ga.: The weather is warm and dry, and stands of cotton are good. The plant is healthy and growing rapidly. A few farmers have finished chopping, but the larger number are now in the midst of the work.

From Montgomery, Ala.: Weather for cotton crop unfavorable until two weeks ago. Crop two weeks late. Stands generally good, and plant vigorous. Prospects good.

From Eufaula, Ala.: Weather fine; condition of crop moderately good.

From Prattsville, Ala.: The weather to-night is warm, dry and cloudy. The general condition of the cotton crop is backward, the plants being small and unhealthy in appearance from continuous cool nights. Cotton chopping has progressed rapidly in the last week.

From Columbus, Miss.: Weather favorable. Cotton small but good stands. Had a good rain to-day.

From Meridian, Miss.: The weather has been good; it rained to-day, which was needed. The general condition of the crop is good.

From Meridian, Miss.: A correspondent, just returned from an extended tour, reports the cotton very small and three weeks late.

From Natchez, Miss.: We have had too much rain lately. Farmers could not work, and are all of two weeks behind last season. Condition of all crops very good.

From Baton Rouge, La.: Cotton three weeks late. The weather has been showery, with hail during last few days. The crop has a good stand, and looks well. The acreage is ten per cent. less than last year.

From Shreveport, La.: Weather, general condition and prospects only fair. Stand good. Crop one week late.

From Dallas, Tex.: Reports from the country indicate that crops are in good condition. Cotton planting well under way, but with diminished acreage.

From Galveston, Tex.: We have had warm weather during the past week, with occasional showers. The crop prospects are reported good.

From Houston, Tex.: But little cotton is coming in, which finds ready sale at full prices. The cotton prospect is good, much better than at same date last year.

From Terrell, Tex.: The weather is very favorable, and the condition of the crops is good. The stand of cotton is excellent—never better.

From Waco, Tex.: Although the season is backward fully one month, the present condition of the weather is favorable to crops. While the cotton crop is backward, planters report the acreage much larger, and they entertain the idea that the crop will be fair if not good.

From Waco, Tex.: The cotton crop is from two to three weeks later than last year; weather very dry. Many fields are too hard to plow, and planting will not be finished before the 25th inst. A large part of the Brazos bottom is lying out.

From Murfreesboro, Tenn.: Needing rain badly to insure good stand. Acreage about same as last year. General condition fair.

From Helena, Ark.: The prospect for the new cotton crop has not been good, but the warm showers Wednesday will probably improve the situation. The crop is less than last year.

From Van Buren, Ark.: There is 25 per cent. increase in the cotton acreage, with favoring rains and weather.

WOOL.

There is continued dullness and depression in the seaboard wool trade. The slow movement of woolen goods from the hands of agents and distributors promotes general caution among manufacturers, and their purchases are seldom in excess of the nearest wants of the looms. A considerable percentage of the woolen goods machinery in the eastern and middle states has been stopped during the past sixty days, and will remain idle until the distributive trade improves. The decrease in production is chiefly of staple clothing, woolens and carpets. Worsted products have sold comparatively well, and are still doing better than any other class of goods. The uncertainties of the new tariff are a stumbling block in the way of a free movement of wool and its products. Indications point to comparative steadiness if not to greater firmness in prices of desirable washed wools, for a few weeks, pending the marketing of northern clips, but after that it is expected that lower prices will prevail. The earlier shorn wools are not selling freely at primary points in the south and southwest. Growers' ideas of value are generally represented as above a parity with seaboard prices, and are likely to be modified considerably before active operations will be commenced by the eastern trade.

AMERICAN WOOL MARKETS BY TELEGRAPH.

From Cincinnati, Ohio: Wools and woolens are dull and prices are unchanged.

From Louisville, Ky.: Wool receipts are large, sales active and prices well supported. The deliveries are of excellent quality.

From San Francisco, Cal.: Wool has experienced more inquiry from eastern buyers.

From San Antonio, Tex.: The wool market here is dull.

IRON.

The American pig iron market is weak, and consumers are looking for lower prices, notwithstanding the reduction of $2 per ton recently made. Sales during the week have been small. Some cutting of prices is reported, and there are those who talk about $20 for No. 1. Scotch iron in this market is no better off. The arrivals during the week will not aggregate over one thousand tons, and a part of this was stored. The sales to arrive were very meagre. The market for mill iron in the east is somewhat firmer, owing to the prospect for a strike among the

puddlers and other workers in the western mill district on June 1. The efforts at a compromise are reported to have fallen through, and a strike on the 1st proximo is considered almost certain. There is also more firmness in the prices of manufactured iron, dependent upon the same causes, but no improvement in prices has been recorded. The steel-rail mills are reasonably well employed, and the products thereof are firmly held at $38@$39. Old rails are quiet, and scrap iron is not marked by features worthy of note. The various features of the leading iron markets throughout the country will be found in the special telegrams printed below.

THE BRITISH IRON MARKET.

[By Cable to BRADSTREET'S.]

London, May 11.—Iron is quiet. The finished trade, if anything, is weaker in Cleveland and Scotland. Machinery shipments are very active; also railroad supplies for the colonies. The exports to America for April were very small, except tin-plates.

DOMESTIC IRON MARKETS BY TELEGRAPH.

From Philadelphia, Pa.: Forge iron is weak and declining, and foundry iron is dull at the recent reduction. There is very little doing, except for immediate requirements. The supply of refined iron is light, and prices are firmer. Steel rails are firm at $39@$40. Nails are active. Old material continues dull. Eastern bar mills anticipate a better business in the event of the general stoppage of western mills, now regarded as certain to occur on June 1.

From Pittsburgh Pa.: There has been an improved demand for manufactured iron this week, orders being sent in in anticipation of a strike June 1. Prices are no better than for sixty days past. From present indications it seems improbable that the differences can be adjusted without a strike, the wage-workers having apparently forgotten their past experience. Nails are in fairly active demand, but not more so than is usual at this time of the year.

From Cincinnati, Ohio: Pig iron continues without life under a moderate consumptive demand. Manufactured iron is in good demand under firmer prices. The determination of makers to reduce wages June next—recently expressed—may cause a stoppage of the mills, as workmen say they will not accept the terms offered.

From Cleveland, Ohio: There is virtually no change in the condition of the iron market. Considerable pig iron is being sold, but in small lots only, and for immediate delivery. Prices continue low and weak, with no present indications of improvement, the general features of the trade being unchanged.

From Chicago, Ill.: Jobbing fairly unchanged. Bar and angle iron in steady demand. Anticipated trouble with workmen causes a stronger feeling, and prices are more closely adhered to. Pig unchanged. Stocks moderate. Jobbing trade fair. Steel rails moderate.

From Detroit, Mich.: In iron the situation remains practically unchanged. The mills have a fair amount of orders, but these are mostly orders on account. A strike is expected in all western mills June 1.

From Louisville, Ky.: Iron is dull and in buyers' favor, with stocks reasonable and consumption on an average scale.

From St. Louis, Mo.: Merchant iron continues in satisfactory demand. Stocks are running down somewhat, and dealers are firm as to prices. The mills promise deliveries only for May. Pig iron is in better request, but values are still weak, and concessions are made on big orders.

COAL.

The most noticeable feature of the anthracite coal trade, if it has such a one, is the absence of heavy stocks at tide-water, in the face of an excess of nearly 1,000,000 tons of coal already produced in 1883, as against four months of 1882, and this, too, while trade has not been brisk and the inland navigation movement is not under full headway. Notwithstanding this, however, the coal operators are discussing the advisability of continuing on half time through the entire month of May. Chicago, Detroit, Buffalo and Boston, all report no special activity yet discernable in anthracite. At all these points, however, the prospect for putting out a full proportion of the season's product is of course all that it ever has been. The total output of anthracite from January 1 to April 28, was 8,643,490 tons, against 7,652,500 tons in a like portion of 1882. This shows an increased production during the current year amounting to 990,996 tons. The only danger to the spirits of those who have been counting probable profits is based on the possible stoppage of iron mills and furnaces. Bituminous coals are unchanged.

PETROLEUM.

The past week in the speculative petroleum market has witnessed a gradual but steady advance in prices, beginning on Monday and continuing until Wednesday evening. Last Saturday's market was inconspicuous, the variations not amounting to more than one cent. The gains during the earlier portion of the week were quite noticeable, but were built, of course, upon the poor quality of divers and sundry reports of wells from day to day with no special prospect for exerting any influence on producers. The report of the United Pipe Line Company was published Thursday. This was offset by rumors respecting "new wells," and caused prices of certificates of crude to react some. The gain was about 2c. on Monday, ¼c. on Tuesday, 1½c. on Wednesday, and the decline on Thursday amounted to about 1¼c. The United Pipe Line stocks of accumulated oil gained but 11,715 barrels in April over the total reported at the end of March. On April 30 the outstanding certificates amounted to 25,393,241 barrels, or 460,051 barrels less than on March 30. The credit balances were 7,730,485, an increase during the month of 471,766 barrels. The increase of net stocks is the smallest shown in any month for nearly eighteen months. A comparison of the April statement of the United Pipe Line Company this year and last is of interest, and is given as follows:

	April, 1882.	*April*, 1883.	*Changes.*
	Barrels.		
Net stocks	25,526,101	33,123,726	Inc. 7,597,625
Certificates issued	19,663,183	25,393,241	Inc. 5,430,058
Credit balances	5,562,918	7,730,485	Inc 2,167,567
Receipts	2,145,966	1,856,793	Dec. 289,173
Deliveries	1,381,093	1,581,047	Inc. 202,954
Excess receipts	764,873	272,746	Dec. 492,127

The speculative market for certificates of crude on Friday opened steady at 93⅛@93¼c., from which point it advanced to 93¾c., and closed at 93⅝c. at noon. Word was received from the producing regions that the Balltown Oil Company's No. 6 had flowed nearly 500 in the first twenty-four hours, but that it is rapidly declining. The Manhattan well, on lot No. 741, in the Cherry Grove district, has struck a vein of gas which caught fire last night and burned down the rig. This well was considered an important venture. At the close of the afternoon session the market closed at 92¾c., against 92⅛c. at the close on Friday night of last week, an increase of ⅝c. on the week.

The record of the prices of certificates of crude on the floor of the New York Exchange during the week ended May 11, is as follows:

	Opening.	*Highest.*	*Lowest.*	*Closing*
Saturday	91¾	92	91	91⅜
Monday	91¼	93¼	91⅜	92⅞
Tuesday	93½	94⅜	93	93
Wednesday	93½	94½	92¾	94⅜
Thursday	95	95	92⅞	93⅛
Friday	93¼	93⅝	92½	92¾

Refined oil was still further reduced on Saturday last. There was only a fair trade in the various commercial brands of petroleum. Rather more firmness was exhibited by Tuesday, but otherwise there was no improvement.

The quotations for certificates of crude petroleum and of petroleum products last evening, as against those of April 20, April 27, and May 4, are as follows:

	April 20.	*April* 27.	*May* 4.	*May* 11.
Certificates, crude	94⅛	88¼	92⅛	92¾
Refined, 110°	8¼	7⅞	7¾	7½
Refined, 70°	8⅜	8	7⅞	7⅝
Crude, in barrels	7⅛@7⅜	7 @7½	7 @7½	6⅞@7⅛
Case, plain	10¾	10⅛	10	9¾
Naphtha	6	6	5¾	5¾

The total quantity of petroleum (crude equivalent) exported from the United States from January 1 to May 5 was 189,883,455 gallons, against 196,416,344 gallons in a like period of 1882, a decreased exportation of but 6,532,889 gallons, against a decrease of 14,423,633 gallons reported up to April 28. For the week ending May 5, the foreign shipments were 25,767,796 gallons—the largest in any one week thus far this year—against 7,855,699 gallons in the preceding week. New York city's exports of petroleum from January 1 to May 5 amounted to 162,781,359 gallons (leaving but 27,102,096 gallons for all other ports), against 160,473,196 gallons in a like period in 1882. The first week in May thus records a spurt in petroleum exports which is very gratifying, or will be if maintained.

The total value of the exports of petroleum and petroleum products from the United States during March last, as reported by the National Bureau of Statistics, was $3,423,163, against $3,753,706, the value of like exports in March, 1882. The decline in the third month of 1883 as against that of 1882 is therefore $330,570. The decline in aggregate gallons (all varieties) was from 40,378,457 gallons exported in March, 1882, to 36,309,101 gallons last March. For nine months ended March 31 last the total number of gallons of petroleum and petroleum products exported was 362,326,158, against 414,162,339 gallons in a like portion of 1881-82. The value of the former was $32,023,373, and of the latter was $38,207,257. The loss in number of gallons is thus seen to be (in the nine months' exhibit) 51,836,181 gallons, and in value $6,183,884.

OCEAN FREIGHTS.

The ocean freights market ruled very dull on Saturday last, which fact was probably due to the brisk chartering of petroleum vessels which had been going on during the week ending with that day. On Monday rates for oil vessels were firmer and held higher. Vessels were not so easily obtained as for some time previous, as the export movement had been steady, if slow. Grain charters did not show the same animation that petroleum has during the week, although berth rates for grain have been quoted to many shippers and considerable has gone on board. Tuesday and Wednesday the market was most active, and rates at times were advanced and firmly held. They were quite as stiff on Thursday as for some days preceding, but not so much business was done. The higher range of wheat, due largely to speculation, has served to check exports some.

SPECIAL TRADE AND INDUSTRIAL REPORTS.

[By Telegraph to BRADSTREET'S.]

Special telegrams from leading cities, given below, include special reference to the condition of the manufacturing industries of the country, the cereal crops, general trade, and the movement of merchandise:

EASTERN STATES.

From Portland, Me.: Collections are slow. Groceries, though not up to expectations, are better than last year. The fish market is dull and prices are drooping. More fishermen are now fitting out than ever before on this coast.

From Boston, Mass.: The boot and shoe trade continues active. The western and southwestern jobbers have been buying freely, and a large trade is still expected. Shipments for the week to places outside of New England 30,125 cases, against 33,859 cases the nineteenth week in 1882. Total shipments since January 1 927,509 cases, against 844,740 cases same time last year.

MIDDLE STATES.

From Rochester, N. Y.: General jobbing business in this section has been more or less affected by the prevailing bad weather, but with the advent of seasonable weather a good business is anticipated. The millers report an increasing demand for flour, though the mills are still running at but about one-half capacity. Wholesale liquor dealers report that more goods have been disposed of this season than during same season last year, but owing to the recent tax and extension of bonded period agitation, cash receipts have been no larger, straight whiskies being lower in price. Collections are generally reported satisfactory.

From Philadelphia, Pa.: The general trade movement has continued of moderate proportions during the past week. Buyers adhere to a very conservative policy, and, as a rule, buy only for immediate wants. The textile mills are still running slowly; very few are working full capacity, and some are entirely idle. There is a trifle better feeling in the yarn trade, in sympathy with the late advance in cotton, but the demand continues slow and unsatisfactory. Wool is dull, owing to the backward trade in its products. Other staples of manufacturing supply are quiet and unchanged. Flour is dull, both for export and home consumption, and concessions would have to be made to move large lots. Shippers' grades are not plentiful. There is a good export demand for corn, but very little stock here at the moment to admit of business. Liberal arrivals are anticipated shortly by way of the lakes from Chicago. Foreign orders for wheat continue small. There is not much speculative activity in grain. Petroleum has ruled dull at a further slight decline. Provisions are jobbing freely at firm prices. Sugars are firmer. Importers are offering stocks indifferently pending the reduction in duty. Old potatoes have again declined, as some varieties, notably early rose, are sprouting. New are still scarce. Vegetables are in good demand, and well sold up. Arrivals of apples are unusually large for the time of year, but all good lots meet with ready sale.

WESTERN STATES.

From Cincinnati, Ohio: There is no activity in any line. Spring trade has been light and has not equaled the expectations of the community. The distribution of goods has been delayed by the backward season, and consumption, as a result, is diminished. There is no evidence of panicky feeling. On the contrary, all realize the cause of the limited volume of trade, and cheerfully accept it. Flour has been without animation, with light stocks; should there arise a fair consumptive demand, prices will advance. Receipts of grain have been small, and transactions are not noteworthy. The drouth has affected the small fruits in the neighborhood, but, unless it continues, it will not be thought serious. Hemp is in fair demand under a fair market. The reduction of production of whisky to one-fifth appears to have a beneficial effect in sustaining prices. Tobaccos are unchanged; the volume of sales large, especially in manufactured goods. The factories in all lines are very busy. The volume of loans has slightly increased, but rates are unchanged. The demand for eastern exchange is equal to the supply, and prices for it are firm, though unchanged.

From Cleveland, Ohio: The weather has been favorable, and a fair week's business has been experienced in most lines of the jobbing trade. The backward season, however, has reduced the volume of spring merchandise business, which, excepting in a few lines, will be behind last year.

From Indianapolis, Ind.: Trade in most lines is good, but not brisk. While the conditions of trade as a rule are favorable, yet for some reason it lacks animation. Prices are without much change. Considerable interest is manifested in the coming wheat crop, and, while it is admitted that the crop will be short and fall below an average, yet the prospects have been improving, and the crop, it is thought, will be a very fair one.

From Evansville, Ind.: Trade the past week has been good in wholesale lines, though farmers are now so busy with spring work that the retail trade is rather dull. Weather fine for grass and grain.

From Chicago, Ill.: Money active and easy. Collections satisfactory. Boots and shoes are jobbing fairly; leather quiet; manufacturers buying fairly for current wants. Hardware selling fairly; jobbers generally say that the spring sales have met their anticipations; stocks of leading goods are closely sold up. Groceries in better demand; sales slightly increased on last week. Wheat active and nervous. Government crop report had little influence; values largely controlled by local manipulations; receipts small; scarcely any shipping demand. Corn steadier; some uneasiness regarding condition for May and June. Oats quiet; receipts large. Pork moderately active; speculative demand; no demand for consumption. Lard quiet; small local speculation. Meats firmly held; shipping demand small. Receipts of hogs 14,000; weak and declining.

From Peoria, Ill.: Business reported fair in all lines. Some of the agricultural-implement factories are preparing to shut down, as their season is about over.

From Detroit, Mich.: In general lines of merchandise there is a very fair business doing. Collections average good, unusually so in some lines of business. In lumber and building materials of all kinds there is a good active demand.

From Grand Rapids, Mich.: General trade showing signs of improvement. Collections reported better.

From Louisville, Ky.: Money is in comfortable supply and demand at 7 per cent. Whiskies are very quiet and stationary. Leaf tobacco receipts are small and market is stronger; manufactured tobaccos continue very active and firm; an increased acreage of white burley tobacco is being set out; there are an abundance of good plants. The business situation in general is described as quiet and steady. The jobbing trade this week was principally on small reassortment orders. Grain is dull. Flour is firm and the demand moderate.

From St. Louis, Mo.: General trade is reasonably good, although some lines are quieter than previously. Tobacco is declining with offerings of poor quality and sales small. The money market is quiet.

From Davenport, Iowa: General trade has not been good for the past week, owing to bad weather. The wholesale grocery and dry goods trade has been good, there being no perceptible change from last week.

From Burlington, Iowa: Trade continues satisfactory, with no new features. Wholesale trade is steady, and retailers report a brisk demand for a variety of seasonable goods. Interest and exchange unchanged.

From Milwaukee, Wis.: The local money market has undergone no change of moment, and there is the usual demand for loans from all classes of bor-

rowers. Exchange on New York is not liberal in supply. The movement of currency, if anything, is in favor of Milwaukee. The weather has been very unfavorable to business in all lines, and the roads being in bad condition interfere seriously with trade.

From Lincoln, Neb.: This is the busy season with farmers, and trade is dull, but it compares favorably with the trade of previous years at the corresponding time. Eggs are scarce. Oranges have been selling at New York prices. Vegetable produce is becoming plenty. There is a large trade in agricultural implements.

From Topeka, Kan.: General trade is healthy, and has been fairly active through the week. Collections are reported fair. Groceries are in a normal condition. There is a slight decline in the prices of produce. Lumber and building supplies are active.

From Denver, Col.: Hardware, boots and shoes and groceries claim from 15 to 20 per cent. heavier demand than last season.

CALIFORNIA.

From San Francisco, Cal. General business is rather quiet. Railway freights are firm. Hides are dull.

SOUTHERN STATES.

From Baltimore, Md.: There has been some little improvement in general trade during the week, which is attributed to more seasonale weather. Dealers in straw goods, boots and shoes, and similar branches of trade report a very fair volume of business. Manufacturers appear to be holding their own. Flour is in moderate demand, but stocks are held with confidence, and the market though quiet is steady. Little is doing in the coffee market, but a better feeling prevails, and tendencies are for an improvement in the near future. Butter is in brisk demand, and New York choice lots are scarce and bring good prices.

From Norfolk, Va.: There is very little change in the general outlook. The weather is remarkably good, farming operations now progressing finely. The truckers are busy. Collections moderate and money easy.

From Wilmington, N. C.: Freights—foreign, steady; coastwise, tonnage wanted. Provisions firm; stocks generally held for an advance. Grain stocks light; demand fair. General trade dull. Exchange and discount unchanged.

From Savannah, Ga.: Trade continues steady with more shipments to country buyers. Collections improved. Tobacco trade very fair and stocks lighter than in previous seasons.

From Selma, Ala.: General trade for the week fair. The grocery trade has been better since the first day of the month than for two or three months.

From New Orleans, La.: There is more movement in sugar with the tone better. Molasses is entirely nominal. Rice is steady; inquiry fair; mills stopped pounding; fair to prime 5⅜ to 6. Foodstuffs in moderate request, and fairly supplied at little change in prices. Corn movement nearly all transit. Business receipts light. Exports fair.

From Dallas, Tex.: In the city there is a general upward movement, and all wholesale dealers report large and increasing sales, with fair collections for this season. Stocks are large, and retailers readily supplied. City retail trade fairly active.

From Houston, Tex.: The grocery trade is dull. Country merchants are buying only to supply immediate wants. Money is easy, at 8 per cent.

From San Antonio, Tex.: General trade is good. Money is easy and deposits are large. Money here brings 10 to 12 per cent.

From Waco, Tex.: Breadstuffs and staple groceries find ready sale at good prices. Collections are tardy, which is, however, compensated in some degree by the tendency on the part of merchants to sell for cash. Money continues to demand 12 and in some cases 15 per cent. per annum.

From Nashville, Tenn.: Trade with the grocerymen here has been good this week. Drugs fair. Flour steady. Corn steady. Cattle trade good, with fair prices. Weather very favorable for all growing crops.

From Memphis, Tenn.: Business of the past week moderate. Meats and lard are tending to higher prices. Flour firm and higher. Meal steady.

NOVA SCOTIA.

From Halifax, N. S.: Business generally has continued without much apparent change during the week. Weather fine, and agricultural prospects good. New York funds weak. The high rate is evidently breaking.

LATE MAILS.

Chicago, May 9.—The daily bank clearings indicate more than the customary activity in business for the advanced period of spring. Money is also finding a larger demand than is customary in May. This is partly attributable to the fact that the quantity of grain held here is twice as large as at this date last year, and the average receipts compare well with the same time in previous years. But the supply of good paper on the market is not equal to the funds seeking employment in loans, and discounts are easily obtained at 6 per cent. The movement of produce to the seaboard is fair, but the supply of shippers' bills drawn against such consignments is not sufficient to supply the banks with exchange on New York, hence rates are firm at 75@80c. premium per $1000, and during the past few days money has been shipped to New York to cover drafts made for customers. The general trade is scarcely so active as at the middle of last week, yet it is better than at the corresponding period last year. Dry goods are meeting a good demand for the season, personal selections and mail orders being fair, but jobbers, while appearing satisfied with the volume of sales, admit that they would be much better were it not for the continued low range of temperature which restricts the consumption of light and medium fabrics suited to the late spring trade. Millinery is meeting a liberal distribution, and a fairly-good business is reported in notions and furnishing goods. Clothing sells slow, the weather being unfavorable for the interior retail trade; but while jobbers complain of a light movement of goods, they, as a rule, admit that their sales are larger than during the first ten days in May last year. Boots, shoes and miscellaneous leather goods are in moderate request. All leading lines of hardware are meeting a fairly satisfactory order sale, and the volume of goods distributed is greater than last season. Bar and structural iron is jobbing freely, as dealers anticipated, but prices are low, and in many instances unsatisfactory. Nails are in fair request, but business is done at small profits. Pig iron is in moderate supply, and orders for job lots fair. Steel rails sell fairly, and the progress being made in railroad construction justifies the conclusion that the rail mills are likely to find fair employment during the next few months. The wheat market is nervous, and values greatly disturbed by conflicting reports regarding the condition of the fall-sown grain in the great central winter-wheat belt. The statements emanating from the secretaries of the various state agricultural societies generally report the prospect poor for more than one-half to two-thirds of an average crop, while many private and equally reliable reports say the outlook is good for at least 85 per cent. of a yield of winter wheat and a large increase in spring sowing. The consumption is also small and no reduction is being made in stocks here. Corn sympathizes with wheat, yet there is a liberal shipping movement, and as examination shows the condition to be good there is less fear in regard to its keeping qualities. Provisions are held with confidence, and the small receipts of hogs compared with this date last year, in connection with the moderate character of stocks, seems to justify the faith with which holders regard the property, yet the present consumptive demand is small.

GRAIN IN CHICAGO ON DATES NAMED.

	Wheat, bushels.	*Corn, bushels.*	*Oats, bushels.*	*Rye, bushels.*	*Barley, bushels.*
May 5, 1883....	6,121,000	6,630,000	898,000	465,000	42,000
May 6, 1882....	3,312,000	1,047,000	147,000	296,000	50,000
May 7, 1881....	6,396,000	3,100,000	1,075,000	56,000	99,000
May 7, 1880....	7,968,000	2,910,000	467,000	63,000	280,000

BRITISH GOLD.

In the *Princeton Review* for May Mr. David A. Wells discusses the charge made by protectionists that the American advocates of revenue reform are paid for their services in "British gold." The following extract is of interest:

"The business of dissent from the tariff policy of the Federal government since the war has therefore been mainly relegated (one meaning of which term is 'to banish') to a comparatively few persons, and those mainly clear-headed and enthusiastic young men, who, as has always been the case in every other movement in the world's history for the extension of human liberty, have had but the minimum of personal grievance to complain of, but whose motive and inspiration, impelling to work and sacrifice for the cause they advocated, was simply the love of truth and right, for the truth and right's sake. But to men whose opinions about the tariff are controlled mainly by their pocket interests, and indeed to all who have been educated to believe that government—which never has anything in the way of money or property but what it has previously taken from the people—can create national prosperity by arbitrarily taking the result of accumulated labor from one man and arbitrarily giving it to another, such motives appear absurd and incredible; and in default of any other motives that would seem reasonable to those thus reasoning, the hypothesis of organized corruption and thorough disloyalty to American institutions has been resorted to, proclaimed, and extensively accepted. Hence the statements first made, it is believed, by Horace Greeley and H. C. Carey, and since positively repeated and enlarged upon by such men as W. D. Kelley, Cyrus Hamlin, president of Middlebury College, Vermont; John L. Hayes, late president of the Tariff Commission, and many other lesser lights, that the leaders of the cause of 'free trade,' 'tariff for revenue only' and 'free ships,' and the repeal of our navigation laws, receive their inspiration and were bought up to do their work through 'British gold,' and that organizations for the purpose of raising and disbursing funds for such purposes in the United States—as, for example, the Cobden Club—regularly existed and were successfully operated in Great Britain. Such statements and assertions up to the present time have seemed too silly to require anything in the way of positive challenge and denial, but when a recurrence to and a general use of them still constitute a marked phase of the current tariff discussion, and seem likely to continue, it may be well to here state, for the special benefit of those whose character and self-respect, in spite of most decided opinions and prejudices, will not allow them to deliberately falsify, first:

"That the transmission on the part of any organization or individual in Great Britain or Europe to the United States of money or credit to the extent of a single dollar for the purpose of aiding any free trade or anti-protection movement in the latter country is not known to any American representative of such movement to have ever occurred; and the receipt of any such aid by any journal or organization advocating free trade in the United States, or by any person officially connected with such organization, is not only here unqualifiedly denied, but the ability on the part of any one to furnish a scintilla of evidence to the contrary is also here positively challenged and disputed. And, secondly, as respects the Cobden Club, which is declared, and extensively believed by protectionists to be, a foreign propaganda of free trade of wonderful activity, and the organization through which large sums of money are constantly raised and disbursed for influencing public opinion in the United States, the following statements are further submitted: This club was founded in 1866 with the object of encouraging the growth and diffusion of those economic and political principles with which the name of Richard Cobden is associated, and which are also briefly but comprehensively expressed in the motto which the club has adopted and caused to be engraved upon its seal, namely: 'Free Trade, Peace, and Good-will Among Nations.' Although the headquarters of the Cobden Club are in London, it enrolls among its members nearly all the leading economists and statesmen of Europe, as, for example, Gladstone, Bright, the Duke of Argyle, Sir John Lubbock, Sir Charles Dilke, Robert Giffen, Thomas Brassey, and James Caird, of England; Léon Say, Leroy Beaulieu, Jules Simon, Henri Cernuschi, and Maurice Block, of France; Schulze-Delitsch and Karl Blind, of Germany; Emilio Castelar, of Spain; Frère Orbar, and M. Laveleye, of Belgium; Professor Cossa, Quintine Sella and Marco Minghetti, of Italy; and in the United States, Presidents Woolsey, Anderson, Gilman and General Walker; George Bancroft, Edward Atkinson, C. F. Adams, Jacob D. Cox, H. W. Beecher, E. N. Horsford, E. P. Whipple and Hugh McCulloch; while on the roll of deceased members are found the names of Baron Bunsen, Count Corsi, Léon Gambetta, Michel Chevalier, James A. Garfield, John Stuart Mill, L. F. S. Foster, Charles Sumner, H. W. Longfellow, R. W. Emerson, Samuel Bowles, W. C. Bryant, Francis Lieber, Isaac Sherman, Amasa Walker, Samuel Ruggles, William Lloyd Garrison, and others, the name of any one of whom is sufficient proof that no organization in which it was voluntarily, continuously and sympathetically enrolled could be anything not in the highest degree honorable and open in all its transactions to public inspection. The receipts and expenditures of the Cobden Club are annually audited and published in detail in the leading journals of England, and its total income for the carrying out of its plans has never been as much in any one year as $15,000, with the single exception of 1881, when a special publication fund of $8,860 was contributed, and of which $5,140 was appropriated for the publication and distribution of works on 'Systems of Land Tenure.' From the regular receipts are defrayed the expenses of an annual dinner of the members, the salaries of a secretary and clerk, the expense of medals which the club annually awards for the best essays on any subject connected with political economy by the students of various leading colleges in the world (Harvard, Yale and Williams in the United States), and the publication and distribution of a great variety of books and tracts on many subjects additional to those pertaining specially to free trade. When, therefore, the Hon. W. D. Kelley, member of Congress, declared in the political campaign of 1880, that the Cobden Club had raised and transmitted to the United States more than $1,000,000 for influencing the national election of that year; and the Rev. Cyrus Hamlin, a minister of the gospel and president of a New England college, writes in the *Journal of the American Agricultural Association* for November, 1882, that the Cobden Club 'has expended vast sums during the last twelve or fifteen years to incite our (American) farmers against the government and our manufacturers;' and that 'millions of copies of an appeal to American farmers were issued' (by it) 'and distributed all over the land,' it is certain that these gentlemen, if they claim to be men of honor, have placed themselves in a position not a little embarrassing and dishonorable. For they either knew or did not know whereof they affirmed. If they knew, then they were guilty of uttering unqualified and intentional falsehoods; and if they did not know, they used words without meaning, and recklessly, if not intentionally, deceived their hearers or readers.

"The following is a more detailed exhibit of the income of the Cobden Club since its organization, as derived from its official reports: For the seven years from 1866 to 1873 the total income was £8,204 ($41,020), or at the rate of $5,857 per annum; 1878, £1,529; 1879, £1,825; 1880 (the year of the United States presidential election), £2,557, and for 1881, £4,163, of which £1,028 were appropriated to the publication of works on the subject of land tenure. Among other works published or distributed by the club during this same year, when, according to Judge Kelley, $1,000,000 was appropriated to the United States, were Caird's 'Land Interest,' 'Maclehose's 'Value of Political Economy,' Watterson's 'British Commerce,' 'The Financial Reform Almanac,' Apjohn's 'Cobden and Bright,' Potter's 'Workman's Views of Free Trade,' Krebs's 'Workingman on Reciprocity,' together with reports of meetings, lists of members, accounts, etc."

TRADE EMBARRASSMENTS.

There were 149 failures in the United States reported to BRADSTREET'S during the past week, 17 more than the preceding week, 31 more than the corresponding week of 1882, and 65 more than the same week of 1881. Compared with the previous week the middle states had 37, an increase of 1; New England states 29, an increase of 10; southern states 33, an increase of 13; western states 40, an increase of 1; Pacific states and territories 10, a decrease of 8; Canada and the Provinces 20, a decrease of 5. The important failures were Louis Rosenstein & Co., wholesale fruits, Henry K. White, manufacturer of straw goods, Aaron W. Haines, wholesale cloths, New York city, and Samuel G. Levis & Son, manufacturers of cotton goods, at Clifton Heights, Pa. In the principal trades they were as follows: General trades 28; grocers 17; liquors 14; manufacturers 10; clothing 8; shoes 6; dry goods 5; drugs 5; hotels 4; grain and flour 4; millinery 4; hardware 3; tobacco and cigars 3; commission 3; bankers and brokers 3; fruit 3; leather 2; coal 2; stationers 2; fancy goods 2; bakers and confectioners 2.

ALABAMA.

EVERGREEN.—Hector M. Rumbley, general store, has assigned.

GADSDEN.—Sitz & Gilliland, general store, have failed.

ARKANSAS.

JUDSONIA.—J. W. Arnold, general store, is reported to have been closed by the marshal. Liabilities about $15,000; assets $5,000 at Judsonia and $1,200 at Denmark, where he had a branch as Arnold & Winn.

CALIFORNIA.

BODIE.—Kirschbraun & Son, grocers, are advertised to be sold out by the sheriff.

COLUSA.—P. L. Washburn, insurance agent, has filed a petition in insolvency.

DELANO.—A. Mancis, hotel, has failed.

FINE GOLD.—N. Smith, general store, has failed.

LOS ANGELES.—A. J. Hechtman, hotel, has failed.

MURPHY'S.—R. Seuter, general store, has compromised. His liabilities were about $18,000; assets $5,000.

SAN FRANCISCO.—J. Abenheimer, calfskins, has assigned.
SAN FRANCISCO.—Dickie Brothers, shipbuilders, have failed.
SAN FRANCISCO.—D. A. Healey, shoes, has failed.
SONOMA.—W. Jones, general store, has failed.

COLORADO.

DENVER —L. O. Wood & Co., grocers, have assigned.
FORT COLLINS.—A mortgage of $20,000 by Mrs. Ella B. Yount, carrying on the business of A. K. & E. B. Yount, bankers, is being foreclosed. She conveyed realty last month to the amount of $13,000, and also sold out her dry goods and flour and feed business.
SOUTH PUEBLO.—Crawford & Co., liquors, have been attached for $1,000.

CONNECTICUT.

NEW HAVEN —Louis J. Cross, confectioner, has assigned to Louis E. Ryder.
NEW HAVEN.—Henry Rogowski, tobacconist, assigned on the 8th inst. to Louis Steinart. Liabilities $3,039; assets small.
STAMFORD.—Henry K. White, manufacturer of straw goods, has failed. For particulars see New York city.
WALLINGFORD.—Thomas W. Fair, dry goods, has assigned.

GEORGIA.

ATLANTA.—C. G. Grosse, merchant tailor, has assigned. Liabilities $12,400; nominal assets $10,800.
BIG SHANTY.—J. G. Tanner, general store, has been closed by the sheriff.
BROOKFIELD.—W. S. Bussey, turpentine, has failed and gone out of business.
BROOKVILLE.—Hall & Huff, saloon, have failed and gone out of business.
BROOKVILLE.—J. M. Hanell, turpentine, has failed and gone out of business.
SAVANNAH.—J. H. Kemps, grocer, has assigned.
SAVANNAH.—Jacob Sternberg, jeweler, has been closed out under a mortgage.

ILLINOIS.

CHICAGO.—H. A. Anderson, formerly Anderson & Stevens, junk, has been closed by the sheriff on a judgment for $1,345.
CHICAGO.—J. Sievers, groceries and liquors, has been closed by the sheriff.
DORCHESTER.—James Feeney, general store, has failed.
MENDEN.—William Eckert, grain, has been attached for $3,421.
MOUNT CARMEL.—C. S. Russell, general store, has failed.
OREANA.—W. H. Gantz, general store, has been attached and sold out.
PEARL DEPOT.—M. Fisher, general store, has been closed by the sheriff.

INDIANA.

FORT WAYNE.—Egan & Son, grocers, have assigned.
RALEIGH.—Cahn & Priest, general store, have given a bill of sale to two creditors. Liabilities about $900; no assets.
SYRACUSE.—F. T. Hoon, general store, has assigned.

IOWA.

ALTON.—Veach Brothers, agricultural implements, have failed.
CLARINDA.—A. G. Dixon, marble, has failed.
COUNCIL BLUFFS.—M. C. Felker, saloon, has given a bill of sale on stock and fixtures for $1,500.
CRESTON.—E. T. Kingsbury, shoes, has assigned.
DAVENPORT.—The total liabilities of Paige, Dixon & Co., lumber, are reported to be from $250,000 to $300,000; preferred claims $104,000, of which $80,000 is secured by chattel mortgage and $24,000 by confession of judgment. They claim that the assets will cover the liabilities.
EARLING.—Byers & Eggers, general store, have had a mortgage foreclosed.
IOWA FALLS.—G. A. Winslow, clothing, has assigned to H. C. Miller. Liabilities about $3,000.
MEADEVILLE.—Brinkhaus Brothers, dry goods and groceries, have been closed by the sheriff.
MONTEZUMA.—Funk Brothers, shoes, have given four chattel mortgages for $2,015, and are reported to have failed.
NORA SPRINGS.—Mrs. S. Powers, millinery, is advertised to be sold out on a chattel mortgage.
ROCKWELL CITY.—Alex. Campbell, general store, has failed.

KANSAS.

OLATHE.—John Harris & Co., bankers, have suspended.

KENTUCKY.

GLASGOW.—Henry Ranbold, confectioner, has assigned.
KUTTAWA.—C. M. Whitney, groceries and saloon, is reported to have assigned.
LOUISVILLE.—I. B. Johnson, grain and feed, has been attached.
LOUISVILLE.—F. F. Lutz, malt, has assigned to H. Justi.
LOUISVILLE.—J. B. Mathers, cigars and tobacco, has assigned to H. Stucky.
OWENSBORO.—J. T. De Vylon, saloon, is reported to have been closed by the sheriff.
PRYORSBURG.—Jones & Short, tobacco, are reported to have failed.

LOUISIANA.

NEW ORLEANS.—Downey, Foucher & Co., contractors, have assigned. Liabilities $11,772; assets $3,762. Andrew G. Downey, of the firm, who was also a builder, has assigned individually. Liabilities $10,857; assets $11,996.

MAINE.

AUBURN.—The Auburn Medical Spring Company has been attached.
BANGOR.—Adams Brothers, shoes, are reported failed. Liabilities $6,000; nominal assets about $7,000.
DEXTER.—S. L. Smith, millinery, has failed.
PORTLAND.—H. C. Webster, fancy goods, has failed.
WATERFORD.—Frank L. Goodwin, general store, is reported to have failed, with liabilities of $3,000.
WEST CAMDEN.—Milo S. Leach, general store, has been attached for $1,000.

MARYLAND.

AQUASCO.—James B. Craycroft, general store, is reported to have failed. Liabilities about $1,200; assets nominal.
BALTIMORE.—Miss Emma Amos, millinery, is reported to have compromised with all her creditors but one at 25 cents.

MASSACHUSETTS.

BOSTON.—G. Baker & Co., wholesale fruits, have failed and will settle in insolvency.
BOSTON.—Osgood Fifield, carpenter, has failed and will settle in insolvency. Liabilities about $10,000, of which $6,180 is secured by mortgage on real estate. There are no assets for the unsecured creditors.
BOSTON.—William M. Pray, hotel, has failed and will settle in insolvency. Liabilities about $8,300, of which $3,000 is secured by mortgage on the furniture, which is the only asset.
BOSTON.—W. H. Satterlee, teas, has been attached.
BOSTON —Merris Strecker, manufacturer of pocketbooks has filed a petition in insolvency.
BOSTON.—William A. Travis, stockbroker, has failed and will settle in insolvency. Liabilities about $9,600, exclusive of three disputed claims; assets nominal.
DANA.—Creditors of A. W. Goodman, Schofield & Co. have filed a petition in insolvency against them.
EAST BROOKFIELD.—The creditors of J. W. Vaughan & Sons, spoke manufacturers, have filed a petition in insolvency against the firm.
EASTHAMPTON.—At a meeting of the creditors of the Williston & Knight Company, Mr. Knight stated the liabilities of the New York concern to be $248,760; assets $96,294. Of the Williston & Knight Company $63,110; assets $231,134. The liabilities are of three kinds—firm, corporation, and personal. He offered 25 cents on all firm debts, 60 cents on corporation debts, and 40 cents on personal liabilities, in five payments—two-fifths cash June 15, one-fifth cash July 15, one-fifth in notes payable December 15, and the balance in notes payable June 15, 1884; notes secured on the Easthampton property; the whole contingent on being able to make arrangements to continue the business. The insolvency proceedings have been stayed.
FITCHBURG.—J. E. Manning, clothing, has failed. Liabilities about $1,900 above the mortgage on stock of $8,000.
HUBBARDSTOWN.—Elijah A. Warren, chair stock manufacturer, has called a meeting of creditors.
LEOMINSTER.—At a meeting of the creditors of E. M. Rockwell, woolen manufacturer, the statement showed liabilities $143,000; nominal assets $170,000. The committee hope to enable Mr. Rockwell to resume.
LOWELL.—James A. Parr & Sons, knit goods, have gone into insolvency.
LOWELL —G. Wilson, hosiery, has failed.
MONSON.—E. F. Willis, clothing, has been closed by creditors.
PROVINCETOWN.—Young Brothers, fruit, have been closed by the sheriff.
SPRINGFIELD.—Charles E. Bixby, cigar manufacturer, is in insolvency.
SPRINGFIELD.—Mallett, Annable & Co., stationers, have been attached.
SPRINGFIELD (Indian Orchard).—Philip Bolger, dry goods, has been closed by creditors.
WORCESTER.—The liabilities of H. A. Richardson, machinery, are about $2,700; assets light.
WORCESTER.—J. F. Smith of No. 53 Green street, commission, has been attached. He has left town, and it is said his assets will pay but little.

MICHIGAN.

DETROIT.—Charles Canny, coal and wood, has been attached.
GRAND RAPIDS.—R. R. Hayslett, grocer, has had a chattel mortgage foreclosed.
GRAND RAPIDS.—Lynch & Hamilton, furniture, have assigned. Liabilities $755; assets $470.
LANSING.—The liabilities of T. B. Thrift, hardware, are reported at $6,000; assets probably $4,000.
MANCHESTER.—Mrs. George W. Bence, drugs, has failed.
MANCHESTER.—Van Duyn & Worculf, hardware, have sold out to the bank, which held a chattel mortgage.
MASON.—The liabilities of C. J. Charles, dry goods, are $6,115; preferred claims, $4,700; actual assets $3,450. He does not continue.
RICHMOND.—N. McIntyre, grain, has failed. Liabilities about $11,000, of which $6,500 is secured; assets estimated at $7,000. His indorsers have bought the stock to secure themselves.

MINNESOTA.

ADA.—Asbjornson & Monson, clothing, have been closed by the sheriff.

MISSISSIPPI.

BEAUREGARD.—Morris Daniel, general store, had his large brick building blown down in the recent cyclone, burying his stock, estimated at $9,000, in the ruins. He is endeavoring to compromise with his creditors at 25 cents, in one and two years. He shows liabilities about $30,000, and nominal assets $14,000.

MISSOURI.

CAPE GIRARDEAU.—Theodore Bessel, general store, has sold out and been attached.
GREENCASTLE.—J. L. Custer, harness, has failed and gone out of business. Liabilities about $1,400.
LAKEVILLE.—H. D. Sanford, dry goods and groceries, has failed.
SEDALIA.—F. Segerdale, saloon, has had a chattel mortgage foreclosed.

NEBRASKA.

COLUMBUS.—John W. Davis, grocer, has failed.
OMAHA.—Philip Lang, shoes, has compromised.
PHELPS.—J. M. Hopwood, drugs and groceries, has failed. His stock, invoiced at $5,000, he sold to his clerks for $2,600.

NEVADA.

RUBY HILL.—Ernest Man, general store, is advertised to be sold out by the sheriff. Liabilities $6,000; assets $3,000.

NEW HAMPSHIRE.

LITTLETON.—J. B. Chandler, 5-cent store, has assigned. Liabilities about $500; assets $200.

NEW YORK.

ALBANY.—Benjamin H. Thanhauser, grocer, has assigned to Aaron P. Pratt.
BROOKLYN.—William Peters, dry goods, has assigned.
BUFFALO.—G. & T. Farthing, distillers, it is said have paper out from $100,000 to $150,000, largely, it is thought, accommodation paper. Mr. Farthing says the firm is unable to meet it as it matures, but claims ample assets to pay all liabilities and have a large surplus left if he can arrange an extension.
BUFFALO.—Mrs. Georgianna J. Guenther, trading as Henry T. Gillett & Sons, wholesale liquors, assigned on the 9th inst. to John L. Romer. The principal preferences are John Guenther $7,000; Manufacturers' & Traders' Bank $2,150; E. W. Cook & Co. $3,113; George W. Kidd & Co., New York, $2,050; Waverly Refining Company, New York, $3,900. The firm was involved through G. & T. Farthing on accommodation paper.
BUFFALO.—Sherman Brothers & Co., cement and grain, have given a chattel mortgage. They were embarrassed through the suspension of G. & T. Farthing.
BUFFALO.—The Jost Brewing Company has assigned to Robert F. Schaeling. The partners were Edward Kretz and John Ringler.
CORTLAND.—Ignatius Miller, clothing, has assigned.
GENEVA.—Mrs. Charles P. Wilkins, books, has assigned to E. J. Rogers.
MUNNSVILE.—H. W. Gallup, general store, has assigned.
NEW YORK CITY.—John R. Barrett, cotton broker, has suspended. Liabilities about $2,000; assets small.
NEW YORK CITY.—Belcher & Bagnall, machinery, assigned on the 7th inst. to W. W. Schenck, giving preferences for $1,782. Liabilities about $12,000; nominal assets about the same. The failure is attributed to dull trade.
NEW YORK CITY.—The schedules of Duke & Cole, varieties, show liabilities $3,928; nominal assets $3,771; actual assets $1,822.
NEW YORK CITY.—Aaron W. Haines, wholesale cloth, assigned on the 7th inst. to Edward J. Knauer, giving preferences to Julius Crager $3,500; Sarah Chave $129; Frank G. Sigler $500; total $4,129. His liabilities are estimated at $125,000.
NEW YORK CITY.—The schedules of Hatch & Peters, bankers and brokers, show liabilities $299,294; nominal assets $276,172; actual assets $16,552.
NEW YORK CITY.—The schedules of Charles E. Hume & Co., builders, show liabilities $46,282; nominal assets $13,309; actual assets $6,922.
NEW YORK CITY.—Joseph Kopetzky, wines and liquors, assigned on the 10th inst. to Max Moses, giving sixteen preferences for $25,584, of which the principal ones are as follows: People's Bank $4,250; Murray Hill Bank $5,037; Francis A. Clarke $1,748; Maddux, Hobart & Co. $1,444; William Kraus $1,400; Margaret Henning $1,800; Louis Monheimer $1,800; Thomas Bacon $1,400; John J. Willis $1,339; Henry Frohman $1,500. The preferences were all for notes, checks and wages. His written statement of December 30 last claimed resources $112,000; liabilities $32,000; surplus $80,000. His liabilities now are reported at about $40,000 and assets about the same. The real estate which he formerly owned has been sold or transferred to pay off claims of relatives.
NEW YORK CITY.—The schedules of David Pontreniola, grocer, show liabilities $8,506; nominal assets $5,506; actual assets $3,080.
NEW YORK CITY.—Edward R. Reisenfeld, manufacturer of aprons, assigned on the 7th inst. to Gustave Hirschberg, giving a preference for $630. Liabilities $3,700; nominal assets $2,500. Dull trade is ascribed as the cause of the failure.
NEW YORK CITY.—Louis Rosenstein & Co., importers of fruits, assigned on the 5th inst. to Leopold Friedenberg, giving preferences for $128,708; to the North River Bank on discounted notes $10,000; Importers' & Traders' National Bank on discounted notes $27,402; H. H. & F. B. Thurber & Co., money loaned, $5,806; Isaac Stern, Heilbron, Germany, on open account $85,500. The liabilities are said to be over $250,000, and the assets are placed at $175,000. The failure is attributed to depreciation in prices, dullness in trade and heavy losses. The business was established by Louis Rosenstein, who died in 1873. The present partners are Moritz Stern, William Stern and William Rosenstein.
NEW YORK CITY.—The schedules of Louis Schiff, shoe manufacturer, show liabilities $12,101; nominal assets $12,248; actual assets $2,012.
NEW YORK CITY.—Sherman, Howe & Co., cement and grain, have given a chattel mortgage to White's Bank of Buffalo as security for notes.
NEW YORK CITY.—The schedules of J. L. Terpenning, produce, show liabilities $2,233; nominal assets $808; actual assets $252.
NEW YORK CITY.—Henry K. White, manufacturer of straw goods, whose factory is at Stamford, Conn., has failed. His liabilities are about $150,000, and assets $110,000, exclusive of the commission account. His paper went to protest on the 5th inst., and on the 7th inst. he was attached by Samuel Shethar for $4,500 on a past due note. The factory is still running, and he hopes to make arrangements to continue business. His real estate at Stamford, which cost $25,000, is mortgaged for $16,000. He began in 1873 as H. K. White & Co., claiming $40,000 capital, and bought out his partner, George P. Metcalfe, October 1, 1879.
RICHBURG.—B. W. Baum & Son, oil refiners, have assigned to Charles Brown.
RICHBURG.—H. C. Stevens, clothing, has assigned. Liabilities $4,000; nominal assets $5,000; preferred claims $1,500.
ROCHESTER.—Betty & Bullard, tile manufacturers, are advertised to be sold out by the sheriff.
ROCHESTER.—Andrew McCoy, hotel, has assigned.
TONAWANDA.—Frederick Smith, lumber manufacturer, has failed. He was associated with J. A. Bliss, who recently failed, in the timber business as Bliss & Smith, and this, together with the loss of about $40,000 by the burning of his mill on the 27th ult., resulted in his failure. The liabilities are reported at about $175,000, and assets about $75,000.
TONAWANDA.—George W. Vedder, harness, has failed and assigned on account of the failure of J. A. Bliss. Liabilities $6,473; nominal assets $7,456; actual assets $6,726.
TROY.—J. B. Nelson & Co., coal, have been levied upon by the sheriff on a judgment for $1,206.

NORTH CAROLINA.

SALISBURY.—P. N. Smith, grocer, is reported to have failed. Liabilities estimated at about $600; nominal assets $200.
WHITAKERS.—J. H. Pippen & Son, general store, have assigned.

OHIO.

AKRON.—B. Desenberg, clothing, has assigned to Charles Baird.
CINCINNATI.—James M. Dodge, druggists' specialties, has assigned.
CINCINNATI.—The schedules of Newburgh, Frenkel & Co., wholesale clothing, show liabilities $382,000; assets $275,500.
CLEVELAND.—W. R. Reid, fine art goods, has assigned.
GALION.—Charles A. Koppe, shoes, has assigned to H. Green. He succeeded Barker & Koppe about the 3d inst., assuming debts $8,740, and taking assets nominally $10,676.
LIMA.—William Askins, dry goods, sold out to his brother, Joseph, and assigned to Frank Schwab.
NEW HAMPSHIRE.—F. Stamats, grocer, has assigned to O. North.

OREGON.

PORTLAND.—Ida E. Blood, shoes, has assigned.

PENNSYLVANIA.

BROOKDALE.—Munson & Knight, manufacturers of sole leather, have assigned. They were also interested in the Rockdale Acid Works.
CARLISLE.—Execution has been issued against Mrs. Eva H. Cart, millinery, for $150.
CLIFTON HEIGHTS.—Samuel G. Levis & Son, manufacturers of cotton goods, have suspended. Their mill was valued at about $75,000 and was mortgaged for about $40,000. The business has been established over twenty years.
EXPERIMENT MILLS.—Samuel M. Ace, general store, has been closed by the sheriff.
LEBANON.—Aaron Hoffman, grocer, has been closed by the sheriff.
PHILADELPHIA.—Moss & Co., stationers, have assigned to J. Warren Coulston.
PHILADELPHIA.—John H. Nash, liquors, has been sold out by the sheriff, realizing about $350. Judgments against him amount to $1,755.
PHILADELPHIA.—Execution has been issued against Philip Nathans, clothing, on a judgment for $1,100. His liabilities are about $3,500.
PITTSBURGH.—A. O. Tintsman & Co., coke manufacturers, are reported financially embarrassed. They are the owners of the Mount Braddock Coke Company, against which execution for $20,000 has been issued. The principal part of their capital, it is said, was in real estate and plant, and on account of the dull trade were unable to meet their obligations. The creditors have agreed to allow the firm an extension of five years. The liabilities are $368,600; assets $382,000
PITTSBURGH.—The Y. Wasg Printing Company is advertised to be sold out by the sheriff
PITTSTON.—Peter Henry (agent), grocer, is reported to have been sold out by his indorsers.
SUGAR GROVE.—Emery Davis, patent medicine manufacturer, has been closed by the sheriff.
TITUSVILLE —Miss Maggie Mason, millinery, is reported closed by the sheriff, but she expects to pay up all claims against her in the sheriff's hands.
TITUSVILLE.—John P. Rice (agent), general store, who recently sold out for $2,000, is reported to have compromised for about 75 cents.
TRUCKSVILLE.—J. P. Rice, general store, has failed.
WASHINGTON.—Long & Son, grocers, have assigned to R. L. McConnell.

SOUTH CAROLINA.

CHARLESTON.—Gooding, Mull & Co., stables, have been closed by the sheriff on a chattel mortgage for $2,500.
LITTLE ROCK.—L. Kaufman, general store, has failed.

TENNESSEE.

ROME.—A. Norman, general store, has failed.
WHITESBURG —G. W. Merriam, general store, has been closed by the sheriff.

TEXAS.

FORT WORTH.—C. W. Baradall, drugs, has been closed on attachment.
McGREGOR.—Grimmer & Padgett, stoves and hardware, are reported to have been attached for $1,087 Liabilities $2,050; nominal assets $750.
SAN ANTONIO.—A. Strasburger, saloon, has been attached.
STEPHENSVILLE.—F. Nevi, general store, is reported to have assigned. Liabilities $2,500; nominal assets $4,156.

VERMONT.

MORGAN —Thompson & Howard, lumber, are in insolvency.

VIRGINIA.

WISE COURT HOUSE.—J. H. Blair, general store, is reported to have suspended.

WYOMING.

CARBON.—Sutphin Brothers, saloon, have been sold out under foreclosure.

MANITOBA.

BROADVIEW.—H. A. Wallis & Co., general store, have assigned.
VIRDEN.—Dier, Cooke & Co., general store, are reported in financial difficulties and endeavoring to make a settlement with creditors.

NEW BRUNSWICK.

ST. JOHN.—George E. Sinder, auction, has assigned. He is said to have no assets.

NOVA SCOTIA.

PORTE LORNE.—William Risteen, grocer, has assigned.

PROVINCE OF ONTARIO.

BELLEVILLE.—Samuel Ross, grocer, is reported to have failed.
COMBER.—William Rice, hotel, has been missing for some days and his creditors have taken possession of the hotel.
HAMILTON.—J. J. Broderick, gents' furnishing goods, is in the hands of the sheriff.
HARRISTON.—J. L. Macmillan, general store, has compromised at 75 cents.
JARVIS.—Thomas Morrow, grocer, has compromised at 50 cents.
LONDON.—C. B. Hunt, of S. P. Graham & Co., machinists, is unable to meet his liabilities, and the firm has recently given a chattel mortgage for $2,000.
LONDON.—M. McBride, shoes, is advertised to be sold out by the sheriff.
LONDON.—The chattels of Henry Popham, hotel, have been seized under a landlord's warrant and the sheriff is in charge.
NEWCASTLE.—William Douglas, groceries and dry goods, has been closed by the sheriff.
PORT HOPE.—Thomas Menhennet, grocer, has been closed by the sheriff.
TORONTO.—The liabilities of J. F. Muir & Co., hats and furs, are about $15,000; nominal assets $15,000. Creditors are endeavoring to set aside a confessed judgment for $3,480.
WINDSOR.—Drake & Joyce, furniture, have obtained an extension.
WINGHAM.—H. A. Black, liquors, has assigned.

PROVINCE OF QUEBEC.

DANVILLE.—E. McGovern, general store, has assigned.
MONTREAL.—Henri Girard, dry goods, has compromised at 40 cents.
MONTREAL.—James Lenihan, liquors, has assigned.

MONTREAL.—E Poliwka & Co., glue, have called a meeting of creditors.

MONTREAL.—C. C. Snowden & Co., hardware, have compromised at 50 cents

ST. EUSTACHE.—J. A. Authier, general store, has assigned.

ST. HYACINTHE.—H. Peloquin, confectioner, has assigned.

BRADSTREET'S:

A Journal of Trade, Finance, and Public Economy.

PUBLISHED BY THE BRADSTREET COMPANY,
279, 281, 283 BROADWAY, NEW YORK.

Terms, $5.00 per year in advance, including postage.
SINGLE COPIES, TEN CENTS.
SPECIMEN COPIES WILL BE SENT FREE UPON APPLICATION.

As a financial and commercial newspaper the foremost purpose of BRADSTREET'S is to be of practical service to business men.
Its special trade and industrial reports; its weekly epitome of bankruptcies throughout the United States and Canada, and the summaries of assets and liabilities, are alone worth the subscription price.
The synopses of recent legal decisions constitute an exceedingly valuable feature.
As commercial transactions, in the wider sense, are coming to be more and more conducted on a statistical basis, the information contained in BRADSTREET'S is of the first importance both to producers and middle-men.

THE TRADE AND AGRICULTURAL SITUATION THROUGHOUT THE UNITED STATES AND CANADA IS REPORTED BY TELEGRAPH TO BRADSTREET'S UP TO THE HOUR OF PUBLICATION.

ENTERED AT THE POST OFFICE AT NEW YORK, N. Y., AS SECOND-CLASS MATTER.

SATURDAY, MAY 19, 1883.

NOTES OF THE WEEK.

Telegraphic dispatches to BRADSTREET'S from leading business centers disclose no improvement in the condition of general trade. Business in the east is unsatisfactory, and collections are limited. Trade in the middle states has been only moderately active, and the temper of merchants generally is very conservative. There has been no material change in the industrial situation and outlook. The same general remarks apply to the west, where trade is generally reported quiet, if not dull. The unsatisfactory condition of trade is attributed in part to the weather, which has considerably retarded business in some lines. The complaints on account of the prevalent dullness are quite general. There is little or no change to record in the south, where trade, except in particular localities, has been at best only fair. The weather, however, has been favorable for planting, which is reported as progressing well. The advices concerning the wheat crop in the south are of an encouraging character.

The decline in the stock market continued this week, and so bad did the feeling become by reason of the sudden dropping of the quotations for the Gould southwestern stocks, that a panic began to be talked about in Wall street. Yesterday, however, the market had a reaction, and recovered tone and strength sufficient to allay all apprehensions. A bad state of feeling was created by the fact that the decline in the stocks referred to, Wabash leading, should occur immediately upon the return of Mr. Gould from an inspecting tour over the roads. He came back talking glowingly on the brilliant prospects, and to all appearances selling out his stocks as fast as possible. Even the Wabash general mortgage bonds dropped six or seven points. The recent buying movement in bonds has exhausted itself, and prices are dropping back.

A final dividend of 7 per cent. has been declared in favor of the creditors of the Freedmen's Savings Bank. This last dividend makes 62 per cent. of the liabilities returned to depositors. This, doubtless, makes up the final record of one of the most disgraceful chapters in the history of human legislation. The failure of the Freedmen's Bank did a vast deal of harm in discouraging habits of economy and saving on the part of the negroes in the southern states, who had just emerged from servitude, and who therefore needed treatment more wise and humane than to be turned over to financial sharks.

Governor Cleveland granted a hearing on Wednesday to the advocates and opponents of the Page savings bank bill, upon which we remarked last week. The general consensus of opinion seems to be against the bill. Mr. Shephard of New York strongly advocated the bill, the operation of which, he said, would be to the interest of depositors, and was so guarded that no possible damage or danger could result. Mr. Hoguet, of the Emigrants' Bank, however, said that the trustees of that institution were unanimously opposed to the bill, because they did not think its requirements were necessitated by the wants of banks, and because it sets in motion a system which may become pernicious, leaving to the opinion of three gentlemen the determination of the question as to what securities shall be held by savings banks. Mr. Rhoades, of the Greenwich Savings Bank of New York, also opposed the bill, saying that there was no general demand for it by depositors. The bill put altogether too much responsibility on the state officers, and, besides, placed no limit on the percentage that the savings banks may invest in any one security. Savings banks generally appear to be opposed to the bill, as appeared from the statement presented at the hearing by Bank Superintendent Paine, who said that replies as to their opinion of the bill had been received from all but 22 out of 115 banks in operation in the state. Of these replies, only 7 were in favor of the bill, while 86 were against it.

The future of municipal government in Philadelphia is dependent in a great degree upon the fate of the bill for the reorganization of the city's government now pending at Harrisburg and known as the Bullitt bill. The measure is after the plan submitted by the Municipal Commission of Pennsylvania at the close of 1877. Mr. John C. Bullitt, who was a member of the Commission, has given much time to perfecting the bill which bears his name. Philadelphia had a consolidation act in 1854, previous to which date the city was made up of the central corporation (Philadelphia) and several outlying minor independent corporations. So great have been the encroachments of the politician class that another consolidation act is now needed. It is proposed to reduce the city's twenty-five or more executive departments to about eight. The intended effect of the bill is thus stated by the Philadelphia *Record*:

> It creates for this city a chief executive officer in the mayor, who will be responsible to the people and whose position in the city administration will be analogous to that of the governor in the state and of president in the nation. It groups around this executive the several departments of city government in harmonious and responsible relations. It makes of the city councils a legislature, and takes from them the anomalous power of a many-headed executive. It fixes accountability in all departments of the city government, and thereby minimizes the opportunities for extravagance, corruption and fraud.

It is to be hoped that the Pennsylvania legislature will enact this measure, to the end that its good effects may become object-lessons to other disordered communities in the United States.

A bill has recently been reported to the House of Representatives of Massachusetts, having in view the organization of a company to furnish money to be used as business capital to persons desiring the same. From particulars furnished by Mr. John Stetson, one of the chief promoters of the enterprise, it appears that a certificate is to be executed, stating the amount of the capital and the period for which the same is furnished, and is to be filed and published in the same manner as certificates of limited partnership. The capital furnished, together with any share of profits due for the use thereof, is to remain at the risk of the business in which it is employed during the period named in the certificate, unless otherwise specially provided therein. The provisions already noticed would naturally operate to create a sort of limited partnership between the special capital company and the individual or corporation borrowing its money; but this is avoided by the provision in the act of incorporation that nothing in the contracts or business provided for shall establish the relations of copartner between the company and any other person or corporation. The project is one apparently adapted to meet a public want. A provision which is likely to win favor is that requiring that the capital furnished by the company shall not be withdrawn during the period named in the certificate. This appears to introduce an element of security which will be duly appreciated by those dealing with the borrowing concern.

The brewers sitting in convention at Detroit put forth a day or two ago a series of resolutions in which they inveighed against the prohibition movement and its leaders. This is all very well, and in their contention they will have the support of most intelligent persons. But the committee on resolutions dropped into generalities, and declared against "all attempts to regulate private manners at the arbitrary will of the majority or to make men moral by mandate of the legislature" as being "beyond the scope of power of any government established by the people." Not everybody will go to the same length as the committee in advocating principles of "freedom," and a very good cause may be injured by the inadvertent use of generalities. It is not entirely clear that governments established by the people have less power than governments established in any other manner; and as to attempts to make men moral by mandate of the legislature, that is something that rouses very little indignation in the world at large, if we may judge from the fact that the policeman everywhere is engaged in the administration of the legislature's mandates respecting morality, and is tolerated therein by most conservative people. It would be better if all resolutions and other outgivings of the kind were confined to a clear statement of the facts and circumstances of the case under consideration and to arguments concerning the policy of measures, leaving generalities severely alone. In this way clearness of sight would be possible of attainment, and disturbing emotional elements would be eliminated from discussion.

The state of Mexican finance is receiving particular attention in London just now. The last *Economist* at hand points out that so long as Mexico could get all the money she wanted in the United States the English creditors remained without any sort of recognition at the hands of the Mexican government. Latterly New York and Paris have not proved available markets, and the Mexican authorities are disposed to appeal to London capitalists. This, says the *Economist*, will not be of any avail so long as the Mexican national debt remains unrecognized. Yet a simple promise to pay would be of little use, as is clearly proved by the whole history of Mexican finance since the loans of 1824–5 were first floated. Reductions of interest and concessions have been numerous, but, with the exception of five or six years, and out of funds which the Mexican government were not called upon to provide, the bondholders have never obtained either interest or principal. The conclusion is reached that the prospects for the floating of a Mexican loan in the London market are not of an encouraging character.

THE NEW YORK, WEST SHORE AND BUFFALO.

So much centers in the new road built to compete with the New York Central, which is announced to be completed by September next, that a brief notice of it will be in order at this time. The New York, West Shore & Buffalo Railway will be 425 miles in length, or 17 shorter than the New York Central. It runs from Weehawken (opposite 50th street), on the Jersey shore, through the various towns on the west shore of the Hudson, to Albany, 141 miles, with a branch from Cornwall running back to Middletown, and from that another branch running up the Wallkill valley to Kingston. From Albany it runs through the Mohawk valley on the south bank of the Mohawk to Utica; from Utica it strikes straight for Syracuse, leaving the city of Rome about eight miles to the north; passing through Syracuse it runs up to Rochester, but passes about four miles south of that city, and curves down on an easy line making for Buffalo, a total distance from Albany of 284 miles. Connection is made with Rochester and Rome over the lines of connecting companies. The main track does not reach Albany. The company bought of the New York Central (a purchase much commented on at the time) the old Athens & Schenectady branch, for which the Central had very little use, and this old line has been improved over into the main track of the new line. Schenectady lies about sixteen miles west of Albany, and the West Shore road leaves the bank of the Hudson at Coeyman's Junction, thirteen miles south of Albany, and strikes northwestwardly to reach Schenectady. A single track branch, however, runs along the river bank up into Albany, and arrangements have been made with the Delaware & Hudson company for use of a joint depot in that city, and for interchange of traffic between the two systems of roads. Saratoga will be reached by the West Shore company through this arrangement. The main track of the latter company is double throughout, laid with 67-pound steel rail—the heaviest rail in use. Its alignment avoids much of the curves incident to the route of the New York Central. The company claims that 80 per cent. of the entire road is a straight line. This has been secured in measure by leaving some large towns to the right and left of the road, and making a sort of air line through the country. Greater economy in working is claimed on this account, as also the saving of expense in land damages; but the success of the plan remains to be proved. In grades, the West Shore road has an advantage over the New York Central, in that it avoids the steep haul which the latter has to make from Albany to Schenectady, which carries that road from the Hudson valley up into the Mohawk valley. The total ascent has to be made by the old road almost within the city limits of Albany; the West Shore road begins to make the climb almost as its main track leaves the river bank thirteen miles south of Albany. Its maximum grades coming east are twenty feet to the mile, and thirty feet to the mile going west—except near Haverstraw, where these limits are slightly exceeded. It is doubtful, however, whether there will be much to choose between the two roads in respect to economy in working merely from location.

West of Schenectady the new road closely parallels the old road westward to Utica. There the latter diverges to run up to Rome, coming back again to close quarters with its rival at Canastota; and the two keep side by side into Syracuse. Thence they go westwardly in the same relation to near Rochester; but the Central's Auburn division gives it a south road from Syracuse right through to Buffalo. From Rochester, or a short distance therefrom, the New York Central main road curves north following the line of the Erie canal to Lockport, and thence strikes south by west to reach Buffalo, having branches to Niagara and other points. The West Shore road follows a line to Buffalo between the two branches of the Central, and for this distance will have a local traffic of its own. Its latest reported progress is: between New York and Albany and Schenectady the road is so far completed that it is expected to be opened for travel some time in July; from Schenectady to Syracuse, in August; from Syracuse to Buffalo the road is now in process of construction, and though it is claimed that it will be opened as early as September, it is not unlikely that it will be nearly the close of the year before trains can be running over this section.

In the proposed equipment of the road great advantage is claimed over the New York Central; and it must be confessed that the claim is likely to be good, for the equipment of the Central, especially in the passenger department, is very far from what it ought to be, and what the traveling public have a right to expect. It is said that this company has already been so far aroused as to order a large number of new and improved cars. The West Shore company announces that it will make a specialty of its passenger department, and all this portion of its equipment is being built by the Pullman company, with the most recent improvements. Something entirely out of the common is promised. The freight department is to be furnished with powerful engines, of interchangeable parts, capable of hauling seventy cars of twenty tons capacity each; all the cars, like the engines, to be built of one pattern. Freight trains on the Central road are equal to about 570 tons per train. The West Shore company claims that, with its straight track and improved equipment, its trains may be made up to the capacity of 1,400 tons. Working expenses of no more than 50 per cent. are claimed for the new road, against 58 per cent. for the Central.

Turning to the finances of the West Shore company they are found to be decidedly foggy. The abundant advertising of the bonds has made every one familiar with the fact that they are in amount $50,000,000; are 5 per cent. bonds, and run fifty years. In addition the company is authorized to issue $40,000,000 of stock. The recent report of the company lays much stress on this "clean mortgage," with its $2,500,000 of interest, as against the $4,776,104 annual interest and rentals of the New York Central; and the public impression seems to be that the fixed charges of the West Shore road will be only this 5 per cent. interest on its bonds. The table given on page twenty-seven of the report referred to, would lead the casual reader to suppose this. Nevertheless the supposition, if it exists, is totally erroneous. In truth, there are no data in the report to ascertain what the fixed charges will be, except that they will certainly exceed $2,500,000. The statement of the company's finances as given is chiefly remarkable for its omissions. It defies all attempts to straighten it out. If there were no other obligations of the company except the $50,000,000 of bonds; if these represented the total cost of the road, its terminals and equipment; if no obligations had been incurred by leases, car trusts, or other forms of obligation, then, indeed, the annual fixed charges would be limited to the comparatively small amount of $2,500,000. But that this is not the case the report itself shows. In the first place, the West Shore company does not own the large and costly terminals it will use at Weehawken. They are owned by "New Jersey corporations," but who or what, we are left in the dark about. The West Shore company will have to pay an annual rent for their use, but we do not know how much. The company is bound up in a lease with the New York, Ontario & Western Company for the joint use of the line from Cornwall to Weehawken, and pays that company for the line a certain proportion of its gross earnings. It gets into Rochester over the tracks of an unnamed company which has acquired expensive terminals there, for the use of which the West Shore company must pay. There is nothing in the report to show that the equipment is not obtained on car trusts; but, on the contrary, a certain ambiguity of language which leads to the inference that it is so obtained. If this be the case there will be a heavy annual charge for interest on these car trusts. As to the estimates of the traffic it will obtain, based on what the New York Central gets after forty years of growth, they are of little practical value. The West Shore road is, to sum up, an experiment, whose success remains to be demonstrated.

COMMERCIAL ARBITRATION.

There is a general complaint that the regularly-constituted courts of the country are overburdened with business, to such an extent, indeed, that plans have been earnestly discussed for some time looking to the relief of the Supreme Court of the United States—the highest appellate tribunal of the country—from the pressure of work which unavoidably keeps the business of the court in arrears. The same condition of things exists in an aggravated phase in the other courts of the country, especially in the large cities, where the amount of litigation is greatest. Together with this ground of dissatisfaction there always exists the time-worn complaint of the delay and expensiveness of the law, an objection which it has hitherto seemed impossible to entirely obviate under any administration of justice. An attempt has been made by the courts to relieve themselves of some of the labor which is entailed by increasing litigation, and the expense attendant thereon, by the appointment of referees. This method, however, while resulting in some relief to the public at large, has been of comparatively little benefit to private litigants, either as regards the saving of time or of expense.

In the business community, where certainty and dispatch are of more consequence than the development of legal principles, an attempt has been made to avoid the disadvantages involved in the ordinary administration of the law by a resort to arbitration, and there are evidences that the system has, as its advocates maintain, been growing in popular favor. These considerations render of considerable interest a paper on arbitration, as conducted on the New York Produce Exchange, by Mr. Alexander E. Orr, a member of the present Board of Arbitration of that body, which appeared recently in the *Journal of Commerce*. Mr. Orr defines arbitration in its commercial sense as the voluntary reference of mercantile misunderstandings of a civil character to the determination of private judgment instead of their submission to legal tribunals for adjudication. The advantages of its methods consist in simplicity of statement, entire absence of technicality, rapidity of conclusion and extreme modification of cost. It is unnecessary for us to follow Mr. Orr in his researches into the antiquity of arbitration and the subsequent development of the law and its departure from the principles of justice. We need only remark that a widely different view of these subjects is possible. Those who take the ground held by Mr. Orr seem to us to lay too little stress on the silent influence exerted by the law, records of the effects of which influence, we need not say, are not found in the court registers.

The arbitration work of the New York Produce Exchange is classed under two heads—private and official arbitration. Each, it appears, is equally efficient as far as the exchange is concerned, but in case a remedy outside the exchange is sought the award of the latter is more effective. Private arbitration is voluntary. The arbitrators are selected by the litigants, the submission and the award made under it are required to be written and to be registered by the superintendent of the exchange, becoming to the parties in interest the law of the exchange. The person adjudged in default is obliged to pay a small fee to each arbitrator. Of the general provisions in relation to official arbitration in commercial bodies we have heretofore given a general view. It is sufficient to say that the Arbitration Committee of the Produce Exchange, in common with similar committees in other trade organizations, is empowered to exercise some of the most important powers of the regularly-established courts of justice, and that the award of the committee carries with it, when applied for, a judgment of the Supreme Court of the state. In the Produce Exchange the Arbitration Committee consists of five members, elected by the Board of Managers from among the whole number of members of the exchange who are not members of the Board of Managers. Dispatch is secured by the provision that a majority of the committee forms a quorum for business, and that a majority of those present can make an award. Adjournments may be made from time to time. Sessions are not expected to last over two hours, and a fee of five dollars is paid to each member present at the hearing of a case for each session. Records of the proceedings and of the award are kept in the exchange, and are accessible to all members. Lawyers, as advocates, are not permitted to examine witnesses or to address the committee. The average case, it is said, may be submitted at one session, and the average cost (to be paid by the party adjudged in error) is twenty-five dollars.

There is undoubtedly much to be said in favor of the system of commercial arbitration. Its inexpensiveness and dispatch have been often remarked upon. Less has been said about another valuable feature of the system—the substitution of a jury of experts instead of the motley array of twelve "good men and true," who are ordinarily charged with the determination of disputed questions of fact. Some such change as this is a necessity, in view of the constantly-growing complexity of facts and relations, which is a feature of the modern commercial world. That this and the other features remarked upon above have commended themselves to the mercantile com-

munity is evidenced by the statement made by the writer of the article referred to, namely, that during the past three years he has not known of a single instance of disagreement or controversy among the 3,000 members of the exchange that has been taken into a court of law, or of a single award of the many hundreds that have been made since the charter was obtained that has been set aside.

THE "CITY COUNCILS" AT ALBANY.

In discussing the New York charter question in its present phase, we have more than once pointed out that, in general, the only thing to do is to return to New York the ordinary forms of local government, to the end that the city may survive or perish at its own hands. To effect the change indicated, one of the first things necessary would be to return to the Board of Aldermen or City Council the taxing and appropriating power. This proposition was received with attempts at ridicule by such journals as the *Evening Post*, which, so far as their meaning can be got at, would have a committee of executive officers constitute a sort of local legislature. The *Post* would have it that "local self-government does not involve the idea of legislation at all." At the beginning of this week there were in Governor Cleveland's hands at Albany, awaiting his action, thirty-four bills relating to matters in New York city. Following is the complete list as reported in the *Times*:

Spinola's bill fixing at $1,200 the salaries of firemen appointed prior to May 29, 1880, and making it discretionary with the commissioners to fix the minimum salary of those members of the department appointed since that date at $800.

J. Murphy's bill authorizing the controller to pay ex-assistant alderman James E. McVeany $2,000 as salary.

The Police pension bill.

The Oakley bill fixing the same salaries for patrolmen as the Spinola bill provides for firemen.

The Fitzgerald bill authorizing the Park Commissioners to organize a force of park policemen, subject to similar regulations imposed by the police department upon the members of its force. By this removals can only be made upon charges and after full and complete hearings.

The Howe bill exempting the Ebenezer Baptist Church from certain assessments.

The Grady bill authorizing the city to release to Gerard and James W. Beekman the title to certain lands.

The Daly bill repealing the act directing the removal of the Forty-second street Reservoir.

The Grady bill authorizing the building of an iron bridge across Fourth avenue at Ninety-eighth street.

The Koch bill requiring the payment to John Foley of moneys claimed as salary for services as supervisor.

The Roche bill setting apart Pier No. 37 East river for the exclusive use of canal boats and vessels engaged in the transportation of coal, lumber and iron.

The Clarke bill directing the payment of certain janitors' claims as salaries for services in the justices' courts.

The Campbell bill designating docks for the dumping of stable refuse.

The bill amending the act incorporating the Maritime Association.

The bill authorizing the construction of four new public floating baths.

The Fitzgerald bill amending the charter of the Metropolitan Life Insurance Company.

The bill authorizing the Commissioners of Charities and Correction to expend $25,000 in the purchase of land outside the county for the purpose of furnishing additional facilities for the maintenance of the inmates of institutions under their control.

The Campbell bill requiring the Board of Estimate and Apportionment to provide for the contingent expenses of the office of Commissioner of Jurors.

The M. C. Murphy bill authorizing the Commissioner of Street Cleaning to appoint a deputy to act in his absence.

The House bill authorizing the Sinking Fund Commissioners to lease for market purposes to the West Washington Market Company certain unoccupied lands in the vicinity of Gansevoort Market.

The Browning bill amending the act incorporating the Fulton Market Fishmongers' Association.

The Campbell bill amending the act incorporating the Cotton Exchange Trust Company.

The Campbell bill providing that the tenure of office of all principals, vice-principals, and assistant teachers of the public schools shall be during good behavior, and prohibiting their removal "except for personal cause and after a proper hearing."

The Grady bill pensioning teachers, tutors, assistant professors, or full professors, in the public schools and in the College of the City of New York, who have arrived at the age of 70 years and have been for 30 years in the service of the city.

The Grady bill authorizing the Board of Estimate and Apportionment to audit and allow the expenses of the judicial proceedings for the determination of the term of office of the Surrogate in 1881.

The Grady bill extending the terms of the aldermen to two years.

The Roesch bill authorizing the use of vitrified glazed pipe in the construction of building-sewers.

The Kiernan bill regulating the use of certain slips, wharves, and piers on the East river.

The croton aqueduct bill.

The Ramapo bill permitting the introduction of water into the city from the Orange and Rockland district.

The Keyes general street railroad bill.

The Browning bill appropriating $100,000 for the building of an armory for the Twenty-second regiment.

The Miller bill authorizing the payment of certain claims of Warren S. Sillcocks, J. S. Cooley, and F. Kirkpatrick for supplies furnished assistant aldermen.

The bill authorizing the payment of certain moneys for defraying the expenses of Emigration Commission organized under the new law.

The above illustrates the sort of "legislation" which should be done in the city by a city council. Some of the bills are of a general character, and must properly come from the state legislature, but by far the greater part of those enumerated are entirely municipal in character, and should have been of local origin and completion. It is submitted that until would-be municipal reformers come to understand that reform means among other things to provide an elective body to decide just such questions as those in the above list of bills, no real progress will be made. New York city should not have to apply to the legislature for power to pension its public-school teachers.

THE DARTMOUTH COLLEGE CASE AND THE GRANGER DECISIONS.

It is a characteristic of the conservative jurisprudence of England and America that it proceeds in as far as possible by the light of established precedents, and adheres to the principles of decided cases. It is consequently reluctant to overrule previous decisions. With the lapse of time, however, changed circumstances, a new view of policy, or the attainment of more accurate knowledge of a subject, often reveals the inexpediency of a former ruling and suggests the necessity of the modification or the abandonment of it. In such cases very frequently, while the authority of the previous decision is nominally recognized, its effect is avoided by means of distinctions, plausible at times and at others abounding in laborious refinements. The result of this process is that, while the letter of an early decision is adhered to, a wide departure has been made from its spirit. Such appears to be the case with one of the most celebrated constitutional causes that have arisen in the United States, that of the Trustees of Dartmouth College vs. Woodward.

The law laid down in that case was that an eleemosynary corporation founded by private contributions for the distribution of a general charity was not an instrument of government, whose officers were public officers, but a private corporation, whose charter was a contract between the donors, the trustees and the government, founded on the consideration of public benefit to be derived from the corporation, which could not be altered, amended or modified by the state without the consent of the corporation. The results of the decision were very important, for the reason that the principle enunciated was afterwards extended to many cases not falling strictly within its scope. In most of the cases following the college case there was noticeable the tendency to class almost all corporations except municipalities as private corporations, the charters of which were held to be contracts. To such an extent did this idea prevail that the leading American writer on the law of contracts declared "that the doctrine that the charters of private civil corporations—of which banks, or insurance, turnpike and railroad companies, are leading instances—are contracts protected by this clause in the Constitution of the United States, seems to be well settled." There were not wanting some energetic protests against these results of the decision in the college case, but they were generally accepted, and the doctrine came to be recognized that no reservations but those expressed in the charter could be introduced by the legislature without the consent of the corporation.

The decisions of the Supreme Court in the Granger cases marked a distinct departure, in spirit, at least, from the principle upheld in the Dartmouth college case, although no attempt was made to attack the judgment in that case. It was early recognized by the Supreme Court that the provision of the Constitution referred to embraced no other contracts than those which related to property, or some object of value. But Chief Justice Waite, in the Granger cases, laid down the doctrine that property becomes clothed with a public interest when used in a manner to make it of public consequence, and to affect the community at large, and that when one devotes his property to a use in which the public has an interest, he in effect grants to the public an interest in that use, and must submit to be controlled by the public, for the common good, to the extent of the interest he has thus created. The principle laid down in the Granger cases formed the ground of the decision in the case of Ruggles vs. Illinois, decided last week, in which the court laid down the doctrine that grants of immunity from legitimate governmental control are never to be presumed, and that unless an exemption is clearly established the legislature is free to act on all subjects within its general jurisdiction as public interests may seem to require. The precise points decided were that a state may limit the amount of charges by railroad companies for fares and freights unless restrained by some contract in the charter, and that the giving the board of directors of a railroad company the power "to establish such rates of tolls for the conveyance of persons or property as they shall from time to time by their by-laws determine" does not form such a contract. The by-laws of the company must not be repugnant to the constitution and the laws of the state, and the charter given must be construed in the light of the established power of the legislature to regulate the rates of fare. It is clear that a new view of public policy has begun to prevail since the college case was decided, and, in spite of all attempts to reconcile the later with the earlier decisions, it is difficult to resist the conclusion that the latter must practically operate as a reversal of the former.

THE DEPENDENCE OF BRITISH SHIPPING.

The British mercantile marine is exceedingly depressed. Business has been poor for a year past. The dividends paid by such well-known companies as the Peninsular and Oriental, the Royal Mail, the Cunard and the Union Steamship companies have proved to be quite small. In some instances they have been as unsatisfactory as in 1876–7, when the period of greatest recent stagnation in the shipping trade took place. This situation has excited a great deal of discussion across the water. The freight market (at London) is quoted lower than ever. All the northern shipyards are busy, and most of them have contracts for a year's work. The prospect of continued competition, with weekly accessions to the lists of those which will underbid the market, has brought the subject to the serious attention of the British commercial interests. The rate of growth of British tonnage engaged in the foreign trade since 1860 has been rapid, the total having more than trebled in twenty-two years. From 13,914,923 tons of English in 1860, out of 24,689,292 tons of shipping of all nationalities clearing from the United Kingdom, the total of vessels bearing the British flag grew to 25,072,180 tons (out of a total of all varieties of 36,640,182 tons) in 1870; to 30,944,744 tons out of 46,276,838 tons in 1875; to 41,348,984 tons out of 58,736,063 tons in 1880; to 41,543,259 tons out of 57,945,545 tons in 1881, and to 43,670,361 tons out of 61,491,255 tons last year. In short, the proportion of British to the total of steamships and vessels clearing from ports in the United Kingdom for foreign ports in 1860 was 56 per cent.; in 1870 it was 68 per cent.; in 1880 it was 70, and last year it was 71.2 per cent., against 71.7 per cent. the year before. In 1882, it will be noticed, more foreign vessels traded with ports in the United Kingdom, proportionately, than 1881. The demand for freight room is, and long has been, so much below the capacity and number of vessels awaiting cargoes that vessel property in the United Kingdom (as well as in France) has depreciated in value. Some of the established lines which made little or no money last year admit that inefficient methods of doing business, or unsatisfactory transports, as compared with the more modern triumphs of the shipbuilder, are responsible for diminished receipts. On the whole, the outlook for the British mercantile marine, to say the least, if considered from the point of view of those who have money invested therein, is dispiriting. The British shipowner claims, however, that in dull times a revival in the corn (wheat) trade will unfailingly bring vessels into demand and appreciate the rates of freight. An advance of 6d. per bushel for wheat would fairly agitate the Atlantic cables with the exchange of dispatches between the grain centers here and the shipping points abroad. The United Kingdom imports about 14,000,000 tons of merchandise and produce annually, of which about 11,000,000 tons are of food products. On the requirements of imported food in the United Kingdom and in western Europe, then, does the situation complained of rest. There are a good many dealers in grain in

the United States who would be glad to help the British shipping interests by having wheat advance five or six cents a bushel. But the outlook just now is not in that direction.

THE BANK OF ENGLAND DISCOUNT RATES.

The interesting letter of our London correspondent excites a curiosity which it does not satisfy, since it suggests questions which are not answered therein, and which it would, perhaps, be difficult to answer in the limits of a single letter. The governors of the Bank of England, it appears, notified the bill brokers of Lombard street, about the end of last month, that thereafter they must not expect to get short-time loans except at a substantial advance on the posted bank-loan rate. The effect of this new regulation was to seriously diminish the profits of the class referred to, and we are told that, somewhat naturally, it created something like consternation among them. If the effect of this policy on the part of the bank be confined to the profits of the Lombard street note brokers, it is clearly a matter of interest only to them and the bank directors. If, on the other hand, it means that the loan rates in the London market will be permanently raised, it has a far wider interest; and if the cause of the adoption of the new policy by the bank authorities be, as our correspondent indicates, the unusually low rate of the bank reserves, and the fear of the directors that they will continue low through the ensuing months, it is a matter of much concern to the New York money market. That the directors did hold such views, and that this was the moving cause of their adoption of the policy of restriction of loans, appears to be proved by the raising of the bank loan, or discount, rate from 3 to 4 per cent., which has been done since the letter of our correspondent was written. Some hints of the notification which the note brokers had received reached us here in the early part of last week, and the raising of the rate was asserted by some on this side to have been done in pursuance of the policy announced; but such a hypothesis is at variance with the facts. Four per cent. is now the minimum rate for all loans; the note brokers must pay an advance on this, as before they had paid an advance on the 3 per cent. rate. We may assume as certain that the bank advanced its minimum rate for the very good reason that the demand for money and the supply available justified the advance. We, on this side, are frequent borrowers in the London market, and the inability to borrow money there except at higher rates than have hitherto prevailed will, of course, have a tendency to harden the rates for money in this market. At the present time, four and five day loans, on approved security, can be made at a lower rate here than in London. As the fall months approach, and the reserves at this center are drained down by the movement of money to the interior, loan rates must rise under the law of demand and supply. Then the action of the Bank of England may become an important factor in our own money market.

PECULIARITIES OF BRITISH TAXATION AND EXPENDITURE.

The British fiscal year ends March 31. The annual balance sheet of Her Majesty's government contains much that American financiers may study with profit. It helps, also, in a striking way, to illustrate the burdens of a system which, fortunately, the people of the United States do not have to support.

The total receipts of the British government for the fiscal year 1882 were £85,916,071. This sum was derived from the following sources:

Customs	£19,275,668
Excise	27,170,798
Stamps	12,348,150
Land tax	1,051,433
House duty	1,698,193
Income tax	10,004,094
Post-office	7,019,669
Telegraph	1,616,799
Crown lands	375,774
Interest	1,219,262
Miscellaneous	4,136,621
Total	£85,916,071

An analysis of the sources of customs revenue contains most fruitful suggestions to American economists. This revenue is derived from a few articles, the sources and the amounts of the burden from each being as follows:

Beer—spruce, mum, etc	£6,976
Chicory	71,497
Cocoa, husks and chocolate	53,478
Coffee	196,333
Currants	325,610
Figs	34,843
Plate, gold and silver	6,754
Plums and prunellos	3,110
Prunes	4,739
Raisins	143,355
Spirits, colonial and foreign	4,220,287
Tea	3,978,844
Tobacco and snuff	8,931,118
Wine	1,362,827
All other articles	2,449
	£19,551,630

From duties collected at the Isle of Man	48,992
Total, gross	£19,435,071
" net	19,275,668

The chief sources are tobacco, wine, liquors and tea.

Simplicity in the methods of collecting revenue is the lesson which these statistics contain for Americans; but they show that Great Britain is very far from being a "free-trade" country. An examination of the sources of the income of the kingdom shows that customs contributed about one-third of the entire revenue. The schedule of general taxation is so arranged that customs, excises and stamps contribute about 68½ per cent. of the whole revenue, and that the proportion of taxes which press heavily upon the masses is quite large. The cost of collecting customs is probably not less than in this country, although the British finance report does not supply sufficient details to make possible an accurate estimate. An approximate estimate fixes the average cost at about 4 per cent., but this is subject to modification. The cost of collecting the United States customs revenue is less than that.

The expenditures of the British government for the fiscal year were:

Interest, etc., of national debt	£29,665,945
Army, navy, etc	29,271,037
Cost of revenue departments	8,619,325
Public works and buildings	1,494,344
Public departments, salaries, etc	2,530,694
Law and justice	6,831,682
Education, science and art	4,419,346
Colonial and consular	694,754
Superannuations, etc	1,172,367
Miscellaneous and special	56,442
Civil list	407,590
Annuities, courts of justice, etc	306,836
Interests on loans, secret service, etc	199,482
	£85,569,784

An analysis of these expenditures furnishes the most striking contrast with the expenditures of our own country. The cost of the war establishments and the burden of the debt was £58,936,983, or about 69 per cent. of the total expenditure.

There is a certain class of expenses, those of the royal household, and for the general maintenance of royalty, which cannot fail to attract the curious attention of all Americans. The royal household is an expensive luxury to the British people. It consists of nearly a thousand persons, male and female, who are paid for rendering some real or imaginary service to Her Majesty. The total cost of maintaining the royal parks and pleasure grounds, for instance, is £112,637. The annual expenditures for the royal family proper are £893,302, or, in round numbers, about $4,500,000. These expenditures are thus distributed:

Her Majesty, the Queen	£622,133
The Prince of Wales	117,748
Prince Alfred	26,506
Prince Arthur	26,500
Prince Leopold	25,350
Princess Royal	8,040
Princess Helena	6,000
Princess Louise	16,000
Duchess of Cambridge	6,000
Princess Augusta	3,080
Duke of Cambridge	22,203
Princess Mary	5,000
Duke of Cumberland	500
Prince Edward (of Saxe-Weimar)	3,357
Prince of Leiningen	1,460
Prince Victor of Hohenlohe	1,860
Households of deceased sovereigns	6,475
Total	£808,302

And the income of the Queen is not restricted to the appropriations for the civil list. She has houses to live in, houses to use, and food and wine provided in abundance. She has in addition large income from the revenues of the Duchy of Lancaster, and from the "Neild bequest." Yet the question is sometimes raised among very loyal Englishmen: "Is the civil list inadequate to the purposes of fully maintaining and supporting the children of the crown?"

THE COKE INDUSTRY.

The coke-making industry of the country has been comprehensively treated by Special Agent Weeks of the Census Department, who has but recently completed his work in this direction. The magnitude of this investment of capital is not so great as is the intrinsic value of the completed product. It appears that in the census year 1879–80, $5,545,058 were invested in coke making in nine states. There were 3,140 persons employed, who received in wages for the year the sum of $1,198,654, or, on an average, over $381 each annually. The production of each of the states engaged in making coke, and the proportion thereof to the whole, in the year named was:

	Tons coke.	*Per cent. of whole.*
Pennsylvania	2,317,149	84.18
Ohio	109,297	3.97
West Virginia	95,720	3.48
Tennessee	91,975	3.23
Georgia	72,000	2.54
Alabama	42,535	1.53
Colorado	18,000	.65
Illinois	7,600	.28
Indiana	1,000	.04
Total coke produced	2,752,475	100

The total value of the coke produced as given above was $5,359,489. In its production 4,360,110 tons of coal were used, valued at $2,761,657. The yield of coal in coke, therefore, amounted to 63.1 per cent.

It is noted that while coke has undoubtedly been made and used commercially in this country for about sixty years, it is only within the past ten or eleven years that the industry has attained large proportions. The first successful use of coke as a fuel in iron furnaces was after the Baltimore & Ohio Railroad had been built, along in the fifties. The great coke-producing center in Pennsylvania itself is the Connellsville region, "a small trough," fifty or sixty miles long and about three miles wide. It is remarked that the coke produced there is held in as high estimation as that made in Durham, England. Coke is made at other points in Pennsylvania, especially in the Alleghany mountain region, in the Ligonier valley and near Pittsburgh, but, as a rule, none of these cokes equal the Connellsville. The price of the Connellsville product fixes that of all other varieties of coke, the latter depending upon the rate at which Connellsville coke can be procured at the point in question.

The average value per ton for the different varieties is given as follows:

Pennsylvania	$1.81	Ohio	$3.06
West Virginia	2.26	Illinois	3.25
Georgia	2 00	Alabama	3.52
Tennessee	2 32	Colorado	5.00
Indiana	3.00		

To manufacture one ton of coke one and a half tons of coal are required, and the average cost of labor and material to each ton produced in the various states is:

Pennsylvania	$1.39	Tennessee	$1.86
West Virginia	1.96	Georgia	1.98
Colorado	2.42	Indiana	2.53
Ohio	2.54	Alabama	2.94
Illinois	3.20		

By far the largest proportion of the coke made is consumed in blast furnaces for smelting iron, and both in England and the United States it was with the introduction of coke as a fuel for this purpose that its manufacture to any marked extent may be said to have been begun. Nearly one half the pig iron made in the United States in 1879 was with bituminous coal as fuel, either raw or as coke, and in 1880, 1,950,205 tons out of 4,295,414, nearly all of which was coke. Some of the iron reported as made with charcoal is manufactured from mixed charcoal and coke fuel. It is stated that 2,128,255 tons of coke were used to manufacture pig iron in the United States in the census year, and that 2,615,182 tons of anthracite were used at the same time.

OCCASIONAL NOTES.

The special committee of the Illinois House of Representatives appointed in March last to investigate open deals and grain gambling in connection with the Chicago Board of Trade has presented its report. From evidence taken and from personal investigation the committee are satisfied that the manner of conducting business on the various boards of trade does not materially differ from that followed in the exchange or bucket shops, and also that the proportion of actual deliveries made by the open board and the bucket shops, when regard is had to the amounts dealt in, is fully as great as the deliveries made on the Board of Trade. A large proportion of the operators in the various institutions are, the committee say, mere speculators, who do not deal at all in the actual grain or produce, and who never expect to handle the actual commodity, to deliver what they sell, or to receive what they buy for delivery at a future time. According to the committee, from 90 to 99 per cent. of all the transactions on any of the boards of trade and in any of the exchanges and bucket shops pretending to deal in grain or produce are purely fictitious, and amount only to wagers on the price of the commodity at a future time, not differing in principle from ordinary gambling. The committee advise the house that they are unable to see why this kind of gambling should receive the sanction and protection of the law, while ordinary gambling, affecting only the individuals therein, should be prohibited and made criminal. They are satisfied that no line can be drawn between the Board of Trade and the bucket shops, since their methods of doing business are substantially the same. In order to bring about a reform, the committee recommend that each of the institutions referred to be required to keep a record of all its transactions, to the end that the identity of each transaction, from its inception to its close, should be maintained, and also that such records should be required to be kept always open for inspection. The picture drawn by this remarkable report discloses a startling degree of depravity on the part of the commercial organizations of Chicago; the document reads almost like an indictment of one of our state legislatures, or of a committee thereof, such as is drawn by a reform committee about election time. It is not entirely clear how the committee arrived at its statistics, but that, of course, is a minor matter. Investigating committees are rarely particular in matters of fact and figures, deeming it much more effective to deal with very general (and sometimes very violent) conclusions, and with the emotional aspects of a subject than with the dry and tedious details thereof. And yet the committee showed a notable regard for accuracy in not making the 99 per cent. ("90 to 99 per cent.") 100. Such a distortion of the figures the committee would not condescend to make, even for the sake of effective presentation.

The fact that the herds of western Nebraska, as also those of Colorado, are running overmuch to coarseness of bone, is so felt by some of the herd-owners and ranchmen that steps are being taken to improve the quality, not so much as beef cattle as to reduce the bony structure by a cross with lighter breeds. With this in view two car loads of Devon cattle were shipped from Harsimus Cove yards this week for Omaha, destined for western Nebraska. The herd in question was selected in Massachusetts and Connecticut; the animals composing it are cows, heifers and calves, also yearling and two-year-old bulls; they were low in flesh, but in good health. Though diminutive when compared with the beef cattle standing close to them, they were so true in breeding that they must prove a valuable cross with the large-boned, semi-wild herds of the plains.

The select committee of the British House of Commons gave a hearing to representatives of the Manchester town council on the 1st inst. on the bill providing for the construction of a ship canal between the city named and the river Mersey. As is well known this enterprise contemplates making Manchester a seaport, and is ardently advocated by all Lancashire. The details respecting the project itself have heretofore appeared in BRADSTREET'S. Mr. Pember, Q. C., opened the case for the promoters of the scheme, and discussed the commercial bearings and the enormous value of such a canal, if built, to Lancashire, and to England, through five columns of small type set solid in the Manchester *Guardian*. When he had finished he was asked by the chairman of the committee what his engineering evidence of the feasibility of the project was. He replied that he expected to present that later—that it would naturally be presented after the other evidence. The questioner thought differently, and suggested that the practicability of the proposed canal was quite as important as the value of the water-way, if constructed, and in other ways talked sharply to the representatives of the Manchester town council. Finally it was agreed to bring in the engineering evidence in a few days, and the meeting adjourned.

The State Department at Washington has received some valuable information respecting the condition of the Irish peasantry, the immigration movement to this country, and the character of those coming or likely to, as the result of an inquiry made through consular representatives. The investigation was prompted by a recent letter to Secretary Folger from Governor Butler, of Massachusetts, on the subject of "Pauper Immigration from Ireland." The questions asked of our consular representatives in Ireland were as to the accuracy of the published accounts of destitution in Ireland, the prospects for an amelioration of the condition of the population there, as to the effect of existing conditions on immigration here and to British colonies, and whether any paupers are being sent to the United States. In reply to the first point, a con-

densation of the answers received indicates that, while the condition of the population in portions of Ireland is grave, it is not exceptional, and that many published accounts on this subject are grossly exaggerated. The failure of the potato crop and the unsuccessful fishery season again have aggravated the situation. Southern and western Ireland witnesses much suffering, and is worthy of aid, but the "starvation point" is declared to be a long way off. The prospects of amelioration of the present condition of affairs are declared to be most discouraging. It is most improbable that public works will be begun to furnish employment. Trade is exceedingly dull and land is unsalable. Capital can hardly therefore be expected to flow in, and without that no radical relief can be looked for. The present conditions are declared with great unanimity to stimulate emigration. Irish emigration jumped from 79,000 in 1881 to over 89,000 in 1882, and the present year points to 100,000. Of the Irish emigrants in 1882 74.8 per cent. were between fifteen and thirty-five years of age. Of the 47,426 males who left the island 32,955 were returned as laborers. As to farmers, the figures for the past three years were: in 1880 1,994; in 1881 2,440, and last year but 314. Some diversity of opinion is expressed as to the sending of paupers to the United States. No doubt some come here through the aid of friends, and, in a measure, helped by charitable funds. This opinion comes from Belfast, from Consul Wood, who says that most of the emigrants go abroad with only enough money to take them across the water, and with no trade by which to gain work when in the land of their adoption. Government agents are said to "induce the poor and lazy to emigrate," though "with no great success." Mr. Eccles, at Sligo, after saying that the guardians of the poor have scheduled out certain districts under the emigration clauses of the land act, states that in the Sligo union alone 600 applications have been made, and in the western unions considerably more. The bulk of these will go to the United States. Their passage is paid and enough given them to amount to about £1 apiece on landing. Mr. Eccles thinks the poor guardians are desirous to send those abroad who are likely to be in a state of chronic poverty at home. In conclusion, Consul-General Merritt states that certain contributions of food, etc., to supposed "starving Irish," from the United States, have been treated with disgust and reëxported to this country, as going to show the exaggeration used in various newspaper accounts of the situation there.

A special dispatch to the Boston *Herald* from London, May 12, recorded the opening ceremonies of the Fisheries Exhibition, for which preparations have been so long making, and in which so many countries are deeply interested. As was to be expected, the Prince of Wales went through the customary performance of reading an address, after which the leading features were inspected by the royal party, followed by the crowd present. The incomplete character of the exhibits left but meagre details for the two columns of description which the *Herald* printed. The Chinese collection is said to be most curious, including, as it does, junks, fish houses, fishing lamps made from fish-skins, life-size figures in costume, bamboo fish-baskets, models of methods of fish culture, preservation, etc. The stuffed fish and natural history sections of the exhibition are very meritorious, and contain, it is said, the finest collection of stuffed fish ever brought together. The tank section of both fresh and salt water fish excites special attention, as it justly may. Netherlands, and Norway and Sweden have a section to themselves, where the walls are festooned with nets of various colors. Here are also northern sea birds, models of vessels and fishing grounds, dried fish, boats, etc. The United States, of course, is among the leading exhibitors, with 10,000 square feet of space. It is not fully completed, but the boat gear and fittings, blocks, tackle and implements, fishing-spears of Indian make, and of later day construction more highly polished and finished, harpoons, blubber, etc., are ready for inspection. These comprise the first consignment by steamer and the rest was to arrive shortly. At South Kensington, however, will be concentrated the whole American exhibit, showing all the varieties of fish in the American waters, uses to which they are put, their preservation for food, etc., the food on which they live, the varieties of birds and animals which prey upon them, products of the offal of the fish, the instruments used in their capture, and the artificial means of pisciculture, and of restocking impoverished waters. The fisherman's calling will be illustrated in full-sized dress models, fishing vessels and boats fully equipped, journals of voyages, registers, licenses, charts, etc.; photographs of notable sites of the American fishery industry, maps of the same, and books and pictures giving the historical side to the industry from the crude methods of the early days. Such care is taken of the fish sent from here that water is to be filtered for their use. The hatching operations will also be shown to the fullest extent to which it has been developed in this country. Taken all in all, Europe and the rest of the world will doubtless find something of interest in the fishing exhibit from the United States.

The International Exhibition at Amsterdam was opened on May 1, as is customary, in the presence of the King and Queen of Holland, and a large crowd of spectators. According to report of the correspondent of the Manchester *Guardian*, just at hand, the exhibition must have been in a very incomplete state, though it is mentioned that special efforts were making to hurry towards completion. The confession was candidly made, however, that up to the date of the report the British section made "a very poor show." This may be in part explained by a statement further on that large quantities of goods were yet to arrive. Strange as it may appear, after the efforts of the Dutch promoters to induce other countries to take an active part, it is said that the King is disappointed at the large share which foreign exhibitors are taking in the affair. In his majesty's opinion, Belgium and France, sharp industrial rivals of Holland, are too much to the fore, and the Netherlands and the Dutch colonies not sufficiently so. France takes the lead as to space with 18,000 square meters of space, against 11,000 square meters for the Dutch exhibits. Belgium is quite on a par with Holland. The space allotted to Great Britain is relatively small, when considered exclusive of British India, Canada and the Australian colonies. The latter have made especial efforts, and have there "some of the finest wools ever brought together." Hopes are entertained that a continental trade may be developed in this product of the colonies. Everywhere are Dutch and French flags displayed throughout the city, and, being quite similar in appearance, the effect is quite monotonous. There is one exception noted—that of the "stars and stripes proudly displayed from an upper story in the establishment of the ubiquitous Singer, of sewing machine renown." The expectation in Amsterdam evidently is that the exhibition will help reassert the dignity of that city as the commercial capital of Holland, against the growing importance of its brisk rival Rotterdam, but the correspondent quoted assumes that this expectation is likely to be only in part realized.

The next number of *The Manhattan*, the new monthly magazine, will contain among other articles a sonnet by Mrs. Louise Chandler Moulton, a paper on "People and Places in Guatamala" by Dr. F. C. Valentine, and a discussion on "The Revival of Humanism" by Mr. Pedden. Mr. Joel Benton will tell us of "A Poet too Little Known." This periodical makes a fair start for favor. It appears to recognize who are welcome, able and popular writers, and is drawing liberally upon them. One feature of *The Manhattan*, thus giving it a double claim upon its title, is to be a series of special articles relating to New York city.

A treatise on trichina spiralis, in pamphlet form, has been given to the public by Mr. Siegfried Sydow, of No. 67 Avenue A, New York, which cannot fail to prove of interest to the public. The paper which refers to the experiments by Virchow, Blasius, Lenkert, Griepenkerl, Kuehn, Engelbrecht and others, was compiled and augmented by a German expert and microscopist, and has been translated by Mr. Sydow. This gentleman's purpose is not alone to furnish light on the subject of trichina and other types of "worm in the pig," but in aid of the passage by Congress of a compulsory law for the inspection of prepared hog products, whether for domestic consumption or for export. This position appears to be an eminently proper one, but should apply to live cattle, beef and other food products as well, prior to packing for export.

SPECIAL CORRESPONDENCE.

THE SENSITIVE CONDITION OF LOMBARD STREET.

London, May 3.—The notification which the Bank of England—now, by the way, under the governorship of Mr. John Saunders Gilliat—made to the bill brokers of Lombard street at the close of last week created something like consternation among them. It has of late years been the custom of the bank to loan out money for short periods at the bank published minimum, although if they found a borrower too importunate, even though he offered the best security, they would charge him an advance upon the published rate of the day; for the Bank of England directors make it a rule never to commit themselves over heavily in any direction. A few years back five-day loans were often obtained by the bill brokers from that institution, but more re-recently borrowers from the bank have been compelled to take their money for ten days. By the notification made last week, the bill brokers will in future be discouraged, as much as the bank management conveniently can discourage them, from obtaining those short advances, except during the final month in each quarter, when the offices for the transfer of government stock are closed, and when the bank itself is, as a rule, full of government money. The bank did not say to the bill brokers, "We decline to lend to you altogether, except during the closing month in each quarter," but gave them to understand that if they wanted short advances at these extra regulation periods they would have to pay a substantial addition upon bank rate for them. The result was that Lombard street, which had before ruled firm, at once made the Bank of England minimum the rule of the market, and not only was Lombard street affected, but the Stock Exchange was depressed.

The reasons which induced the Bank of England to make this alteration in its recent custom are worthy of consideration. In the first place the position of the banking department is, at the present time, an exceptionally weak one. The reserve is only £11,300,000, against £13,600,000 at this time last year; £15,900,000 in the corresponding week of 1881, and £16,000,000 in 1880. Hence it would be natural that the bank directors should desire to restrict business until a stronger position had been obtained. But this particular class of business, against which their action was directed, has for some time past been the special channel through which the bank itself has been so largely underbid. Lombard street bill brokers have hitherto relied upon the fact that they could always, in case of the money in their hands being called in, go to the bank for a temporary advance until the market eased again, and if for the time being they could obtain call money at 2 per cent. they would be disposed to secure bills at 2¼ or 2½, running the risk of having to pay now and again 3 per cent. at the bank for a short period. This tribe of competing bill brokers have done more than all the bankers in London to depress the market discount rates in recent years. Prime paper, in which alone they will deal, has been scarce, and the competition amongst them for it was at times sufficiently keen last autumn to put down the market rates for bills quite 1½ per cent. below the published rate of the Bank of England. Bill brokers, unlike bankers, only operate in the market when they feel so disposed; the establishment which they keep up is comparatively a small one, and unlike the bankers again, who allow their depositors certain fixed rates for their money, the bill brokers vary their allowances to suit their own convenience. Sometimes they find it necessary to pay more than the bank will do to obtain money, but if the floating supply increases, they forthwith put down their terms, and if they think there is a prospect of money continuing cheap for a time, they are the first to knock down the discount quotations of Lombard street. It was against this class that the bank notification of last week was directed, and as they very well know that in times of pressure the surrounding banks would be ill-disposed to accommodate them, the effect of the new order of things will be to render them chary of knocking down the quotations in Lombard street too far. In future, if they have to apply to the Bank of England for accommodation, the bank will either compel them to re-discount their bills or would charge them probably 1 per cent. above bank rate for temporary loans. Thus we find last week some people having been charged 4 per cent. for money at that establishment, although the published rate remains at 3 per cent. The change thus effected will also be attended by salutary results at times when gold withdrawals are threatening for exportation. During the last few years the bank has at times been very much hampered by Lombard street when endeavoring to check such exports of bullion. The bank has gone to 4 per cent., but found that the market has only moved to 3, and even then showed a tendency to relapse; or it has gone up to 5 per cent., and found the outer market doing business at 3½. At such times therefore it would be a particularly useful weapon which would compel the outer market to move more in conformity with the Bank of England itself. Of course if money is for the moment plentiful in Lombard street, the Bank of England cannot prevent the bill brokers from securing it on low terms, but they can say to them, "If you commit yourselves now, and by depressing the market increase the export of gold, you must not look to us for relief should pressure arise a short time hence." The bank, it should be remarked, has not in any way interfered with the genuine discounting of bills. They will be ready, as heretofore, to discount the paper brought to them; probably they anticipate they will obtain more of such discounting as a consequence of their recent notification to the market—but their intimation has been addressed solely to the more speculative element in Lombard street, and as such bankers in London are found to be far from disapproving of the action taken.

The London money market is not at the present moment threatened by withdrawals of gold for New York, but it finds the colonial requirements, and small demands for Holland, Spain, and other lesser states which look to London for their supplies of gold, quite a sufficient burden. A good deal has recently been said by Mr. Goschen and others respecting the supply of gold in the country, and certainly the quantity which is stored in the Bank of England and which alone is available for exportation is unusually small. The following figures will show this clearly enough:

	Coin and bullion.	*Bank rate, per cent.*
1883	£21,186,053	3
1882	23,777,067	3
1881	26,403,253	2½
1880	28,140,765	3
1879	33,078,047	2
1878	22,703,582	3
1877	25,670,710	3
1876	26,258,087	2
1875	21,023,290	3½

These figures are all of them for the last week in April, and they show that we must go back as far as 1875 to find a time when the coin and bullion stored in the Bank of England was as low at this time of year as it is now. As an almost invariable rule the stock of coin and bullion and the reserve are materially reduced during the latter part of the year. Last year, for instance, both the coin and bullion and reserve were reduced £3,000,000 in the six months from April to October, while in 1881 the same six months indicated a reduction nearer £5,000,000 in those two items. Now if any such prospect is before the London money market in 1883, it would be absolutely certain that the next six months must see a very material advance in the bank rate. To take off £4,000,000 or £5,000,000 from the present stores of coin and bullion and reserve in the bank would be to create something like a panic, and it must not be forgotten that apart altogether from any withdrawals for exportation the internal requirements of the country during the harvest and holiday period are certain to take gold from the bank for the provinces. Consequently the time has come when the bank must look sharply after its resources, and it was doubtless this consideration which brought about the change I have described. It is of course never safe to prophesy until after the event, but it is not very often that the London money market has looked more like higher rates than it does now. Any important threatening withdrawals of gold for export would certainly mean a higher bank rate, and in the meantime the directors have taken a very wise step in bringing the outer market up to the bank level, and in checking the speculative element in Lombard street as far as possible. There are complaints that the bank has in this matter employed a little sharp practice at the expense of the outer market, but it appears to be the general opinion that the end to be obtained has justified the means.

REVIEWS.

A CANADIAN HISTORY.

What may be truthfully described as a valuable addition to the literature of Canadian development has appeared in Mr. John Charles Dent's retrospect entitled "The Last Forty Years."* Of course, the work is written from a political standpoint, but the politics of the Dominion are so inseparably mixed up with ours — especially in the way of retaliatory legislation affecting certain industrial growths — that from this fact alone, as well as because the period covered is a cotemporary one, the history is of very considerable interest to the general American reader. Mr. Dent has taken hold of a difficult task and has executed it well; for it is far harder to write thus a a fair history of the events of one's own generation than to deal solely with the dead past. The more intelligent criticism of judgments based on actual knowledge has to be met. But the author was equal to it, and with a few exceptions—such as the

* "The Last Forty Years; Canada Since the Union of 1841." By John Charles Dent, Toronto. George Virtue, publisher. 2 vols., illustrated.

case of Alexander McLeod and the burning of the Caroline, wherein Mr. Dent's patriotic bias leads him to convey the impression that Canada was all right and the United States all wrong—the history is exceedingly impartial and written in a very bright, clear, entertaining style. On the whole it displays a commendable spirit of fairness in examination, coupled with the most painstaking research. Perhaps the most interesting passages of the two volumes before us (to the American view) are the chapters on the Ashburton Treaty of 1842, settling the northeastern-boundary question, and then the definition of the long-contested Oregon boundary in 1846. On both these settlements the general impression of Canadian writers has been one of bewilderment at the alleged weak action of their own diplomats, which, as Mr. Sandford Fleming mildly held, "alienated the allegiance of thousands of British subjects without their consent." Mr. Dent does not bewail the Canadian lot to this extent. Lord Ashburton's whole career does not confirm the degree of weak-mindedness our historian conveys. If we are to believe him, Great Britain has always been singularly unfortunate in her choice of representatives when the matter in dispute was with the United States. In the Oregon boundary settlement, Lord Aberdeen (the then Prime Minister of England) is accused by Mr. Dent of weak diplomacy and culpable ignorance of facts, while President Polk, whose attitude was very firm and consistent throughout, is wrongfully described as "a man simply elected to do the bidding of his party," "among the most conspicuous planks in the platform of which were the maintenance or extension of slavery and territorial aggrandizement." The general impression in the United States as regards success in both these cases is that the claims were founded on common sense and reason, and that the British representatives at the negotiations at last had the justice to recognize this fact. Mr. Dent traces very faithfully the growth of the Canadian railway system, the primary rapidity of which so largely helped to produce the crisis of '57. He points out also the rapidly approaching completion of the Canadian Pacific road, and the marvelous increase of population in the northwest in consequence. What is known as the "National Policy" is ably discussed. This is the existing strongly protective tariff, to impose which the present government, under the premiership of Sir John Macdonald, was first elected to office in 1878. Mr. Dent undertakes to present both sides, and concludes by saying "the great facts remain that under Mr. Mackenzie's régime trade was depressed, money was scarce, poverty was rife, and the prospect was gloomy; whereas, under the present administration, business of all kinds is brisk, money is plentiful and easily obtained, poverty is comparatively unknown, and the outlook, commercially and otherwise, is decidedly hopeful." The picture is undoubtedly a pleasant one, which we hope will live long. "The Last Forty Years" has that which very few American authors seem to have the faculty of making—an index. Altogether, the history is one of the best of the kind the Dominion has yet produced.

RECENT LEGAL DECISIONS.

[*Prepared expressly for* BRADSTREET'S.]

A question of some interest to bankers was discussed in the case of Brown vs. The Citizens' National Bank of Cincinnati, decided in the District Court at that city on the 8th inst. It appeared that the plaintiff deposited with the defendant bank $1,145, receiving therefor a certificate of deposit. Shortly afterward he lost the certificate, which had not been indorsed by him. The bank refused payment, and he brought suit to recover the amount deposited. The question before the court was whether the bank was entitled to demand an indemnity against subsequent demand and recovery on the part of the finder or holder of the certificate before paying the amount thereof to the plaintiff. Judgment went against the plaintiff in the court below. The District Court, in reversing that judgment, said: There are several exceptions to the rule, denying the right to sue at law when the lost instrument is negotiable, and among them is the case where the instrument is unindorsed by the payee, for in such case no legal title could pass so as to invest anyone with the privilege of a bona fide holder, and no indemnity would be necessary. That the certificate was negotiable and in effect a promissory note, is supported by the weight of authority, and therefore the principle applicable to promissory notes should apply. The uniform authority is that a note payable on demand must be presented within a reasonable time, or it would be deemed overdue, and that a negligent transferee would take it subject to all equities existing between the original parties. No one can become a bona fide purchaser of a certificate of deposit who does not take it within some reasonably short time, for the reason that banks would then be able to issue certificates of deposit of any denomination for circulation as ordinary bank bills, and with like effect. The question is narrowed down to the simple matter of indemnity, and if the instrument was due at the time of its loss the finder or subsequent holder took it subject to all the equities existing between the original parties, and the payment to the original holder would be a bar to another action by a person who should receive the instrument after due. And hence it follows that the defendant is not wronged by being required to pay to the plaintiff without indemnity, because he is under no legal obligation to recognize the present holder (if such there is) as a bona fide holder.

The Supreme Court of Ohio, in the case of the First National Bank of Mansfield, Ohio, et al. vs. Zent et al., decided on May 1, held that where a national bank has been accustomed to receive U. S. bonds as special deposits gratuitously, it is liable for any loss thereof occurring through the want of that degree of care which good business men would exercise in keeping property of such value, and that a demand of said bonds and a refusal by the bank to deliver the same, with no other explanation of such refusal than the statement that the bank has no such bonds in its possession, furnish sufficient proof of loss by such negligence as will render the bank liable therefor.

A bank had moneys on deposit in one account to the credit of S, and in another to the credit of S as sheriff. After the expiration of the term of office of S, the bank transferred the money standing to his credit as sheriff to his private account, and afterward, with his assent, applied the moneys so transferred to the payment of his private debt to the bank. In an action by the bank upon the official bond of S, as sheriff, for moneys of the bank received by him in his official capacity, it was held that the transfer and application of the funds referred to was a defense for the sureties on the official bond of S to the amount for which such transfer was made. McMillan et al. vs. Boyd et al., decided by the Ohio Supreme Court Commission on May 1.

One D and others executed a penal bond conditioned that they would pay to the obligee any sum or sums which D "may owe to or hereafter become indebted to the obligee upon bond, bill, note, draft, check, account or otherwise," and would indemnify the obligee and save him harmless "from all loss and expense by reason of said or any indebtedness incurred by D." A promissory note was subsequently made and delivered to the obligee for value by a firm of which D was a member, and for its use, and which was at its inception indorsed by D in his individual name. The Supreme Court of Ohio, in this case, Donley vs. Liberty Improvement Bank et al., decided on the 8th inst., held that the note referred to was not within the condition of the bond, and that an action brought thereon to recover was not maintainable.

A common carrier made a contract to the effect that it would transport goods to a point beyond its own line, and that the goods should go through the entire route on the identical cars on which they were shipped. Loss was occasioned by reason of the goods being changed into other cars in the course of transportation. The Texas Supreme Court, in the case of the Galveston, Houston & Henderson Railway vs. Allison, decided recently, held that, under the circumstances, the carrier was liable, whether the loss or damage occurred on its own line or that of a connecting carrier, and this, although the contract contained a special provision that the carrier was "not to be liable for any damage, loss or injury not on its own railroad." Upon violating its contract by changing the cars, the carrier became an insurer of the goods in its charge, and became liable for injury to them no matter from what cause it might come.

Where the plaintiff sold to the defendant 3,000 bushels of wheat, to be delivered at defendant's mill, it being understood by both parties that the wheat had to be transported by team a distance of twelve miles, the Minnesota Supreme Court, in Roberts vs. The Mazeppa Mill Company, held that plaintiff was not required to deliver or offer to deliver the whole amount in one lot at one time, such mode of delivery not having been in the minds of the parties and not being reasonably practical in view of the character and situation of the property. It was further held that the defendant having, after a part of the grain was delivered, refused to receive any more of it upon the ground that the time within which by the terms of the contract it was required to be delivered had expired, such refusal amounted to a waiver on its part of any subsequent tender or offer to deliver by the plaintiff.

In a recent case in Kentucky, Vice-Chancellor Simrall considered somewhat in detail the meaning of the phrase "vacant or unoccupied" in a policy of insurance. In this case, Kiernan vs. The Imperial Fire Insurance Company of London, it appeared that the defendant company, in January, 1881, issued to the plaintiff a policy of insurance upon certain premises, in which, among other things, it was provided that if the premises should "be or become vacant or unoccupied without notice to or consent of the company in writing" the policy should be void. The premises were then rented by the plaintiff to a person who occupied them for some time. On December 5, 1881, the premises were destroyed by fire. Ten days before, the tenant had moved out of the house, leaving there only a part of his effects, and a servant who was left in charge. The servant continued in charge until the fire, and was sleeping in the house the night it was burnt. The Vice-Chancellor considered that the building had been occupied until its destruction, both according to the letter and the spirit of the contract. The stipulation in the policy, he said, simply meant that the premises should not be without an occupant, without any person living in it. Judgment was ordered for the plaintiff for the full amount of the policy.

The Supreme Court of Indiana, in the case of the City of Lafayette vs. Timberlake, decided on the 11th inst., held that while the construction and maintenance of a street in a safe condition for travel is a corporate duty for the breach of which an action will lie, the making and enforcing ordinances regulating the use of streets brings into exercise governmental and not corporate powers, and for a failure to exercise legislative, judicial or executive powers of government there is no liability. The suit was brought against the city for damages caused by persons using the street for coasting.

Proceedings were brought against the directors of a gravel road company for a failure to make out and file a report as required by law. The statute provided that the statement required of the directors should be made out and recorded within fifteen days after the first day of July in each year. It was shown that the directors proceeded against did not come into office until July 22, 1882. The Supreme Court of Indiana, in The State vs. Cox et al., decided May 9, held that the duty of making the report rested on the predecessors of the defendants and appellees, and that the law had been violated before the latter had come into office. A just construction of the statute was that it applied to directors in office at the time of the breach of duty, and not to those who came in afterwards. Directors of a corporation, the court said, should not be punished for an offense committed by persons who had preceded them in office. The liability of the former directors does not end with the expiration of their term of office. A person who has violated a positive statute cannot escape its punishment by surrendering the position which devolved the duty on him.

According to certain covenants in leases, the lessees were to pay during the term all extra insurance upon the demised premises occasioned by the use to which the lessees or those claiming under them were to put the same, and the lessor was to keep the premises well insured, the lessees, as before provided, paying for extra insurance. In 1871, the lessors' devisees effected insurance by five years policies extending from April of that year to April, 1876, and the amount of the extra insurance paid for those policies was paid by the lessees and a receipt therefor was given by one of the lessors' devisees, payment being acknowledged to be "in full settlement of all extra insurance" for the time mentioned. In the meanwhile the insurance companies which had given the policies failed, and the devisees effected new insurance during the five years, and brought action to recover of the lessees the extra insurance paid in paying the premiums upon the new insurance. The Supreme Court of Massachusetts held, in Quincy et al. vs. Carpenter et al., decided on May 5, that the receipt referred to was a full discharge for the extra insurances sued for.

BUSINESS NOTES.

The long-talked-of Florida ship canal company, which is to make a water-way across the neck of the Florida peninsula and render it unnecessary for coasting vessels to venture close to the dangerous Keys, is now announced to be ready to go to work. It is reported that the company has been organized, and that J. C. Brown, of Tennessee, is president, and that he is backed by "a large board of influential directors."

The Minneapolis *Northwestern Miller*, of May 17, states that the production of the mills of that city during the past week was 13,000 barrels daily, against 13,600 the week before. A still further reduction is looked for unless the flour market improves.

The *British Trade Journal* admits that the claim made by Austrians that cigars made in Austria are "cheaper than anywhere else," is true. But the journal named explains the fact by saying that they are made from refuse tobacco from America, which is shipped to Austria in large quantities.

Baron Almeda, a representative of the government of San Domingo, has arrived in Lisbon to arrange the basis of a commercial treaty between his country and Portugal. The arrival at the Portuguese capital of envoys from Siam, on a similar errand, has been expected for some time.

The management of the Chicago National Exposition of Railway Appliances, desiring to prevent disappointment and inconvenience, and doubtless in order to intimate that the project has met with a hearty response from exhibitors in all directions, and that the affair is, therefore, to be a great success—in order to do this all at once, they merely announce that no applications can be received for space after May 15. The entire area of 500,000 square feet is exhausted, and the exposition will open promptly at noon on May 24.

There is a project on foot to establish a fruit exchange at Wilmington, Delaware. It has met with considerable opposition from the older members of the trade, who claim that the perishable nature of the commodity in which it is expected to trade will prove a great obstacle to the success of such an undertaking. They further claim that "the time has not yet come" for a fruit exchange. The *News* of Wilmington denies this, and suggests that if the older and wealthier fruit growers and merchants prefer to travel by stage that that is no reason why the younger members need not take the express train.

The New Orleans *Times-Democrat* states that arrangements have been made to place the steamer Sedbury in the Vera Cruz trade, to ply between the two ports named. This steamer was to leave New Orleans for Vera Cruz, Mexico, on the 15th inst., and make regular trips thereafter throughout the summer, subject, of course, to the delays and detentions of quarantine. The newly-established Mexican exchange at New Orleans has of late been making efforts to have regular trade communication opened between Mexico and New Orleans, and will find considerable satisfaction in the gulf line thus established.

A special cable dispatch to the *Herald* states that the *North German Gazette* attempts to prove by statistics that the danger of contracting trichinosis from American pork is sixty times greater than it is from German pork, and refers to the latest sanitary reports of the sanitary officers at Chicago, Erie and Boston, and to various American scientific publications, to prove its claim. It is declared that inspection of American pork on arrival at German ports proves useless, that the quantity of American pork consumed in Germany is small and decreasing, and that the question of prohibition is not, therefore, of economic importance.

The stagnation of the manufactured iron industry in France is leading to some stringent measures on the part of some of the manufacturers. At a late meeting of French iron-masters at Maubeuge to consider the general position of the industry, it was decided to stop work from four to five days per month. It was also resolved to establish a large warehouse in Paris in which to store sheet and other partly manufactured iron from the works in the north. This will enable customers to supply their wants directly from the producers, but will presently raise a cry from iron merchants and other middlemen in the trade who will thus be cut off.

The New Orleans *Times-Democrat* finds that the cotton trade is drifting away from those ports—principally on the Atlantic coast, which receive their portion of the staple overland by rail—back to the gulf cities. Statistics, it is added, prove this. Galveston is boasting loudly of having won the position of second largest cotton shipping port from Savannah, and it is believed she will be able to maintain that status with the enormous crop of

Texas behind her. Savannah's share of the cotton crop in 1880 was 17 per cent., in 1881 it was 15.4 per cent., in 1882 it was 15.8 per cent., and this season it is only 13.9 per cent. Norfolk has stood still, being 13.4 per cent. in 1878, and 13.2 per cent. now. For the four years from 1875 to 1879 New Orleans' share of the crop averaged 26.3 per cent., and has averaged 28.7 per cent. since. The New Orleans journal named adds that "as far as northern points, like New York, Boston, Philadelphia and Baltimore are concerned, their receipts have steadily declined for years from 11.8 per cent. in 1880 to 8.2 per cent. at the presnt time.

A report from the silk market of Lyons, France, states that owing to the backwardness of the season and the consequent risk to the silk crop prices have been very firm, and in the producing districts, especially in Italy, there has been a disposition to advance prices. Manufacturers, however, do not respond, and only a moderate business is doing, purchases being made for immediate wants only. The supply of Japanese silks was small, the prices consequently higher. At Milan and Turin the return of cold weather, and even of snow, had given rise to some degree of alarm with regard to the crop, and prices were rather dearer, but the markets were not active.

According to the statement of the agent for the Louisville, Ky., joint freight line, a comparative statement of the amount of tonnage passing east through that city during the first four months of 1882 shows a great gain. This is the more remarkable in consequence of the talk current about dull trade. In April the Louisville east-bound traffic was 71 per cent. greater than in April, 1882, and in the first four months of the year it was 45 per cent. greater than in the corresponding period of last year. The gain over the first quarter in 1882 in the three months preceding April last, was 37 per cent. There were 11,192,760 pounds of freight shipped east in April last, against 6,542,440 pounds in April, 1882. In the first quarter the total was 39,711,940 pounds, against 27,395,000 pounds in the first quarter of 1882.

The total number of failures in the United Kingdom and Ireland reported to *Kemp's Mercantile Gazette* (London) for the week ended April 28 was 268, against 258 in the corresponding week in 1882, and 239 in the like week in 1881. England and Wales had 232, against 236 and 213 respectively in like weeks in 1882 and 1881; Scotland had 32, against 18 and 20, and Ireland had 4, against 4 and 6. The grocery and provision trades led for the week with 50 failures, against 51 in each of the preceding weeks mentioned; merchants, brokers and agents came second, with 33, against 30 and 18 respectively; the drapery trades third, with 27, against 27 and 16; the building trades fourth, with 19, against 25 in each of the corresponding weeks in 1882 and 1881, and the liquor trades fifth, with 17, against 22 and 22 each.

A convention of peach growers, commission merchants, and dealers was held at the rooms of the Philadelphia Produce Exchange on Wednesday with a view to devising some plan for securing the return of empty baskets during the coming season. It was at first proposed to sell the baskets with the fruit, but this scheme was uniformly opposed by the growers, and after considerable discussion the matter was referred to a joint committee of the three interests represented who are expected to formulate a plan that will prove generally practicable and acceptable. The committee has not yet concluded its labors, but it is believed that the outcome of the matter will be the establishment of a deposit system that will make it an object to buyers to look after and return the baskets. The system has been tried before, but failed for want of thorough organization and unanimity among the trade. The importance of this subject to Peninsular farmers can be readily understood when the magnitude of their season's business is considered. Many of the growers of Maryland and Delaware who annually ship from 20,000 to 50,000 baskets of peaches to market have frequently been compelled to charge from 50 to 75 per cent. of their baskets to their "profit and loss" account at the close of the season.

It has been heretofore pointed out in these columns that most of the Russian railways have been built rather with a military use in mind than for the commercial or industrial development of the country. In this way has a large share of the unprofitable nature of these enterprises been explained. The relations of the Russian railways to the state, however, is fully explained in a book recently written by Mr. Alex. Stephanitz, of St. Petersburgh. It appears that nearly all the Russian railways are worked by private companies, which originally provided the capital under a state guarantee of the interest and sinking fund expenses. The loans which were at first raised upon bonds have been since taken up by the government, and the companies hold simply the shares. The arrangement under which the lines have been constructed has been a costly one for the imperial exchequer, and the charges are increasing. The original cost of the lines was not only very great, but the management has been extravagant and incapable. The main lines, owing to the strategic importance originally given them, rarely approach large towns, but run almost without deviation between a few important points. According to the terms of the Russian railway concessions, most of the lines will come into the hands of the government between 1950 and 1960.

The bureau of statistics states, under date of May 10, that during April 87,245 persons arrived in the United States from abroad, of whom 78,475 were immigrants, 4,982 were United States citizens returning from abroad, and 3,788 were aliens not intending to remain in the United States. Out of the total of 78,475 immigrants (against 104,274 in April, 1882) New York city received 54,173, against 73,313 last year. The various nationalities received in April of this and last year and for the ten months ended April 30 and a like portion of the preceding year, were as follows:

	April.		Ten months ended April.	
	1883.	1882.	1883.	1882.
England and Wales....	10,742	9,415	56,972	64,733
Ireland	11,796	11,832	36,810	46,339
Scotland	3,512	2,878	11,123	13,061
Austria.....	797	2,161	6,973	13,607
Germany.....	25,170	36,582	141,226	185,063
Italy	6,220	6,420	20,565	24,971
Norway	2,189	3,569	12,532	16,225
Sweden.....	3,368	8,072	21,331	33,562
Dominion of Canada...	7,691	11,540	52,810	73,937
All other countries.....	7,050	11,805	57,347	73,483
Totals.....	78,475	104,274	417,689	544,601

The change noted in the ten months' imports of new residents are interesting. While in the ten months ended with April, 1882, the order of leading nationalities received was, first, Germans; then Canadians (?); then English, and fourth, Irish, during the past ten months it has varied to, first, Germans; second, English; third, Canadians, and fourth, Irish.

The following national banks have been organized: The National German-American Bank of St. Paul, Minn., capital $2,000,000; Walter Mann president, Gustave Willins cashier. The Big Rapids National Bank, Mich., capital $100,000; Daniel F. Comstock president, Chester W. Comstock cashier. The Aurora National Bank, Ill., capital $100,000; Orin D. Howell president, William S. Beaupre cashier. The City National Bank of Akron, Ohio, capital $100,000; John B. Woods president, George W. Weeks cashier. The First National Bank of Union, Oregon, capital 50,000; Cornelius G. Linington president, William T. Wright cashier. The First National Bank of Port Townsend, Washington Territory, capital $50,000; Henry Landes president, Robert C. Hill cashier. The Exchange National Bank of Denton, Tex., capital $50,000; J. A. Carroll president, John J. Gannon cashier. The Clement National Bank of Rutland, Vt., capital $100,000; Charles Clement president, Percival W. Clement cashier. The Coddington County Bank of Watertown, Dakota, has been changed to the First National Bank. The First National Bank of Auburn, N. Y., has elected Edward H. Avery president in place of S. L. Bradley. The First National Bank of Greenport, N. Y., has elected D. G. Floyd president in place of G. S. Adams. The First National Bank of Baker City, Oregon, has elected Levi Aukeny president in place of D. P. Thompson. The State National Bank of Raleigh, N. C., has elected E. R. Stamps president in place of M. C. Williams.

There are several features worthy of notice in the report on the state of the labor market in England, printed in the London *Labour News* of May 2. The several strikes and disputes mentioned for some weeks past still continue. That among the weavers at Huddersfield is producing disastrous effects; it is not added whether upon the men themselves or upon the industry. At Nottingham the dyers are locked out, and at Cargleton the silk-weavers are on a strike. The Sunderland bottle-makers and manufacturers are said to be more conciliatory, and the strike there is believed to be near its end. But worse than all, if true, is the statement that a rupture is imminent in the North of England Iron Trade Board of Arbitration, owing to some firms not observing resolutions adopted. Notwithstanding British ocean freights are low, vessel earnings have been meagre and tonnage is plenty, and at places greatly in excess of the demand, in the northern ports shipbuilding and marine engineering are very brisk and men are wanted. At the yacht-yards, on the southwest coast, work is very brisk. Railway construction is active, and the building trades—carpenters, bricklayers, painters and laborers—are in good demand. The mingled activity, dissensions and discontent included in the above sounds somewhat anomalous.

As pointed out above, England is the scene of a considerable number of industrial disputes. Strikes are taking place in a variety of trades, and in some no indication of the end is at hand. A like condition has been reported in France for some months past, though in this case the old adage that "Paris is France" needs to be interpolated. The Parisian building trades and artizans in other lines have been protesting against the hours of labor required of them, and in some instances have struck for higher wages. Trade in Paris has been very dull, and some of the most eligible shops in the leading boulevards and avenues are tenantless. Marseilles also is suffering from labor strikes.

On this side of the Atlantic the situation is not nearly so bad, of course, but in industrial lines we have compared, and continue to compare, favorably with the record of strikes during the past year in either France or the United Kingdom. The shoemakers, many tobacco operatives and isolated coal-miners' strikes still continue, while agitation in a kindred direction in New York city has not abated. The most significant feature of the industrial situation at present is the Inter-state Convention of Bituminous Coal-miners at Pittsburgh. Delegates representing the bituminous miners of Pennsylvania, Ohio, Maryland and Illinois are present, and more from other states were expected. Arbitrators were appointed to meet the operators of the Pittsburgh railroad mines, and arrange a settlement of the strike in that quarter. The fact that the operators consented to meet the committee has been regarded as a sign of weakening; but the end is not yet. The Committee on Organization presented the following resolutions, which were adopted: urging the miners of the United States to organize themselves into one body, to be known as the Amalgamated Association of Miners of the United States, and that the object of this association shall be to bring within its folds every miner and laborer in and about the mines of the United States; to secure uniformity of action in matters pertaining to the interest of its members; to adopt, whenever and wherever practicable, the principles of arbitration; to shorten the hours of labor as far as practicable, and restrict the product when deemed practicable. There is no change to note in the outlook for a strike of the western iron-mill employés on June 1.

AMERICAN COMPETITION IN THE BRITISH COLONIES.

The *British Trade Journal* prints the following: On many occasions our correspondents have called attention to the rapid headway which American manufacturers are making, as successful trade rivals, in many foreign markets where the British manufacturer had at one time the monopoly. But, though the immediate effect of this competition has been to compel a reduction of prices, the strength of the English manufacturer's position, hitherto, has been in the superior quality and substantiality of the goods sent out, which have in the end generally gained the day over Yankee cheapness and inferiority. If, however, we are to judge from the tone of a letter recently received by one of the leading export houses in Birmingham from a customer in Melbourne, Brother Jonathan, with his customary 'cuteness, is gradually improving his position in regard to the quality of his productions, while, strange to say, English manufacturers are losing favor, and that, too, in our own colonial markets, on the very ground that our superiority of make and excellence of finish are no longer maintained. The writer of the letter to which we refer is the representative of a large trading firm in an Australian capital, and makes the following remarks:

"We would call your attention once more to the enormous increase in the number of articles we are buying from America. A few years since some half-dozen articles were about all we ordered of American make. Now, as you will see by the indents we send you, the items specially ordered of American make are to be counted by hundreds. This increase is still maintained, and is, indeed, still growing. Your English manufacturers would do well to take a lesson from their American rivals. The American goods exactly suit the requirements of the market. The timber they have will always command a certain trade, but why should they excel English makers of shovels, axes, picks, and edge-tools? It is annoying to those of us who have English sympathies to see so much trade go away from the old country. The general characteristics of American goods, as contrasted with home-made, are—quality more reliable, better finish, not an ounce of unnecessary material, better packing, and the articles themselves thoroughly adapted to the use to which they are put."

The writer admits that some classes of goods of American manufacture are found unsuitable for colonial requirements, and once ordered have never been repeated. Their cutlery, he adds, will not bear comparison with English make; and the same may be said of their plated-ware. In iron wire, cast and wrought iron, and hollow-ware, England carries all before it. This is very gratifying, certainly, but it by no means compensates for the unpalatable intelligence conveyed in the first portion of his letter, and it is to be hoped the hint thus given will be sufficient to put both English manufacturers and merchants on their mettle to try and regain the ground they have lost. The term "shoddy" is equally applicable to the workers in metal as it is to the weavers of fabrics, and unless British hardware manufacturers are determined to maintain their old supremacy for excellence, both in material and workmanship, they will have the humiliation of finding their goods rejected in favor of the productions of modern and more energetic competitors.

THE FUTURE OF MEXICO AS VIEWED AT LONDON.

The future of Mexico is thus regarded by the London *Saturday Review*: Mexico has a future, but it will, like the future of every country, be a future intimately connected with the past. There is no such thing as turning quite a new leaf in the history of a nation. The one great fact in the present state of Mexico is that the Americans are beginning to interest themselves in the country. They have brought much American money into Mexico. The Central Railway, for example, the most important of recent enterprises in the country, has been made and will be made entirely with American capital. Nor is the effect of this importation of capital merely such an effect as the importation of capital always produces. It has an exceptional importance from its being the Americans who bring the money in. The Americans will not allow themselves to run the risks to which other foreigners in Mexico might be exposed. They will not patiently endure their investments being endangered by revolutions or brigands. Mexico will be richer because it will be quieter, and it will be quieter because it will be under supervision. But it will not grow either rich or quiet in a day. The nature of a man is not rapidly changed even by compulsory education. The ancient tenure of land in Mexico is in itself an obstacle to swift improvement. Almost all the best soil is in the hands of large proprietors, who are generally absentees, living abroad or in the towns, who are frequently burdened with debt, and, at the best, are content to get a sufficient income in easy, old-fashioned ways. There are no doubt some few enlightened owners of land who are quite willing and able to try experiments, but these experiments do not always answer, and they find their neighbors slow to imitate their example. The income of Mexico is increasing, and with increasing revenue it is able to subsidize railways, and will soon, perhaps, settle its debt. But, in order to obtain this revenue, the government is obliged to impose duties which greatly restrict the supply of many things which are much wanted. The advance of Mexico is real and solid, and may be a steadily increasing advance. The pessimists about Mexico are much more wrong than the optimists, but the optimists carry their optimism too far when they talk as if Mexico had been touched with an enchanter's rod, and had waked up one morning to find itself rich beyond the dreams of avarice.

TAX COLLECTING IN HUNGARY.

Probably, says Mr. Phipps, British Consul-General in Pesth, there is no country in which the payment of taxes is enforced by such rigorous measures as in Hungary. Direct taxes, such as are collected in England annually, become due in the middle of the second month in each quarter, and persons who have not paid them on the day fixed receive a written admonition. Should they not be paid by the end of that month their movables or any real property or income they may possess are at once seized, and if within fifteen days the arrears are not paid, the property seized is sold by auction. The articles alone exempted are beds, bedding, food required for the fifteen days succeeding seizure, farming utensils, tools, books or instruments up to a certain value, and indispensable in order to earn bare livelihood.

FINANCIAL.

THE LOAN AND INVESTMENT MARKETS.

The stock market has again been on the decline this week, and Wall street begins to fear that Mr. Gould is selling out as rapidly as possible to follow the good example given by Mr. Vanderbilt, who retired from business after parting with all of what he usually termed his "speculative line" of stocks. The speculative line of Mr. Gould must be a very long line indeed, and the selling out of this would give the market a surfeit. It was not until the last part of the week that the Gould properties came into prominence by reason of their rapid decline; in the first part, the trunk-line stocks, the Villard properties, and the coal stocks attracted most attention. New York Central was still the heavy-weight which dragged the market down, for, notwithstanding its previous decline, and the fact that the selling had been so fast and furious that the stock loaned at a premium for use, there was scarcely any recovery in its price when the short sales were covered by purchases. The short interest in it was so far eliminated that the stock again became plentiful enough to be borrowed on the same terms as less active stocks, and therefore the few fractions of advance it had made under the purchases of the bears to cover were slowly lost, and the price declined somewhat lower than it had gone before. These facts proved that it was no mere bear attack which had depressed the price, but free selling of actual holdings of stock, and it is understood that the incoming steamers this week have brought some large amounts from London. Of course they had all been sold by cable order and borrowed for delivery until the stock could reach here, thus making a short interest which helped to temporarily sustain the price. When the deliveries were made, the usual weakening effect would be the consequence. The lowest price last week was 121¼; the lowest this week (made on Thursday) was 120⅜. This is the lowest quotation for this stock since November, 1879, when it sold at a fraction over 119. Lake Shore has been held with considerable tenacity, which is supposed, with Lackawanna, to be Mr. Henry Smith's pet stock. Nevertheless, it showed signs of weakening, and has been as low as 108⅜. Canada Southern and Michigan Central have been comparatively neglected in the trading, but both have declined somewhat in sympathy with the market. In respect to Lackawanna, Mr. Smith is credited with having thrown over a large portion of his holdings, causing the decline from 128 to 123¼, but at the latter figure another stand was made by him or by some one else, and the stock was held there with great firmness at a time when prices all around were sinking quite alarmingly. Jersey Central has been bound up in the street talk with Reading, as the latter road is about to lease it; and the statement is that the Reading is to guarantee 6 per cent. dividends upon the stock, beginning some time next fall or the opening of next year. As the Reading needs some one to guarantee not only dividends for its own stocks but interest on its bonded obligations, its promised guarantee for Jersey Central did not take very well with the street, which liked not the security. The late advance in the price of the stock was apparently correctly attributed to Mr. D. P. Morgan's purchases, and its subsequent decline to his selling out—whether at a profit, is exceedingly problematical. If he calculated on the Reading-lease business as a sustaining force which would enable him to float out of his holdings at the advanced price his own purchases had made, he made a mistake, as the quotations show. The Baltimore & Ohio Company is somewhere at the back of this Reading and Jersey Central arrangement, being anxious to control a line to New York and have the use of the Jersey Company's ample terminal facilities here; but exactly where it stands is at present quite unknown to the outside public. The suspicion that this wealthy corporation in some way or other intends to back the proposed lease is the only thing which has preserved it from ridicule. Mr. Gowen's chief stock in trade is promises; Mr. Garrett's is hard cash.

President Villard, of the Northern Pacific, returned from a prolonged inspection of his properties on Tuesday, and made a report upon them, and the prospects for the year, to his Board of Directors, which was stated to be highly favorable. It was stated that he had promised the regular payment of dividends hereafter on Northern Pacific preferred, and assured the gentlemen referred to that the road would certainly be opened through to the Pacific coast in September next. By way, apparently, of celebrating his return, the stocks of his various properties were subjected to a rattling fire of sales, under which they very sensibly weakened, Oregon Transcontinental especially. They, however, stood up much better than Union Pacific and Central Pacific, the latter having gone down to the extraordinarily low figure of 71⅜; and yet it is said that the company will pay its usual half-yearly 3 per cent. dividend in August. At one time, according to the statements of the leading officers of the company, who acknowledge having sold a little" of their stock, it was very doubtful whether the road would earn enough this year to enable that dividend to be paid. Union Pacific looks as if it would go even lower than it did some weeks ago, when the decline was stemmed at 91½. It will be remembered what an excitement that drop in the price of the stock caused here and in Boston; and how Mr. Charles Francis Adams, Jr., made a personal inspection of the road, came out with a highly laudatory letter, and at the subsequent annual meeting was elected a director, with Mr. Andrew H. Green, who took a place on the board as Mr. Tilden's representative. It was supposed that Union Pacific had seen its lowest quotation then, and it went back to par without a great deal of trouble. But there it stopped, then began to recede, and has since gone down slowly and surely under the weight of a steady selling movement. Now it is said that President Dillon is also going to follow Mr. Vanderbilt to Europe. Possibly the stock may not fall below 91, for some weeks ago one of the largest houses in the street sold a large number of "puts" on the stock at 91, running six months. The opposition of the Denver road has again been much talked about; but Denver itself has had a bad break. It is suspected that Mr. Cammack, before he started for Europe this week, sold out most of his large holdings of this stock, borrowing for delivery in the meantime, to make the transactions appear like short sales. When safely out on the ocean his brokers delivered the stock, and the drop in price was the consequence.

Everybody seems, in the phase of the street, "running." Mr. Gould certainly has been, or all signs fail. He and Mr. Sage returned from their trip on Friday of last week, and both came back full of glowing bull talk on the crops, the country, and the market. Mr. Gould was seen by numerous friends, and interviewed by the reporters, and he had the same glowing talk for all. He was a bull on everything. Wednesday night and Thursday he was in the Windsor, talking to everybody in the same strain. When Mr. Gould comes out into the halls of the Windsor, and spreads his views around, there is mischief afoot one way or the other. Some one, soon after the opening of the board Wednesday morning, went to sell some Wabash, and made the discovery that the usual supporting orders were not there. The price dropped 1 per cent. almost at a stroke. A general selling movement in these stocks was the immediate consequence. It lasted all day, and completely demoralized the market, and on Thursday there was no stop to it, the story going the rounds then that the orders to sell were from foreign holders. By this time all the Gould Southwestern stocks were thrown over right and left; Texas Pacific and Kansas & Texas falling in the most alarming way, while even Missouri Pacific declined. The demoralization extended to Western Union, which wore a decidedly sick look in the quotations. Mr. Gould was sought out at his office by the financial editor of an evening paper of high standing and solemnly interviewed by him as to the causes of this dreadful state of affairs; to whom Mr. Gould with equal solemnity imparted the refreshing information that he was not selling a share of Wabash, that at one time he had intended to do so, but now he had changed his mind, and would hold on to all his stock believing that he could build up that property. He also said that though the June interest had not been earned by the road (which was pretty well known in the street), it would certainly be paid. The street received these statements about not selling with much hilarity; but it is probably true that there will be no default on the June interest. Ugly rumors had been afloat that there would be; and the mortgage bonds had dropped from above 80 to 73 in consequence. Yesterday the sinking of the market was stayed, and a reaction in prices followed.

The loan market has been so easy this week—the loan rate on call averaging about 3½ per cent.—that it is probable the banks are still filling up with money and increasing their reserves. The bank statement to be issued to-day may, therefore, be expected to be good, as last week's was. The foreign exchange rates, however, still rise, the rate going up yesterday to $4.84 and 4.88, while the news from the London market wears a rather squally look. The bank's reserve is extraordinarily low, having further declined this week, and now standing at 32⅜ per cent. of the liabilities; and we have had recently news of heavy failures among stock operators of London, which argues that there is a pinch there somewhere. The constant selling of our securities by foreign holders must be mainly attributable to this state of things.

The market for government bonds was again affected this week by rumors concerning the Page bill, and a jump of ⅜c. in the quotations took place on Thursday, when a telegram came from Albany (apparently anticipating the fact) saying that the bill had been vetoed. The following were the closing quotations yesterday:

	May 11, bid.	May 18, bid.	May 18, asked.
U. S. 5s extended (3½ p. c.)	102¼	102⅜	—
U. S. 4½s 1891, registered	111⅞	112⅛	112¼
U. S. coupon	113	113¼	113⅜
U. S. 4s 1907, registered	119	119⅜	119½
U. S. 4s 1907, coupon	119	119⅜	119½

The bank statement of Saturday showed that the surplus reserve had been increased $3,599,700, bringing it up to $5,003,825. For the corresponding week last year the surplus reserve was $8,172,950. The following are the comparative totals of the statements of May 5 and May 12:

	May 5.	May 12.	Differences.	
Loans	$315,567,400	$315,451,000	Dec.	$66,400
Specie	55,769,100	60,022,000	Inc.	4,252,900
Legal-tenders	22,077,600	20,881,100	Inc.	803,500
Deposits	296,970,300	303,497,100	Inc.	6,526,800
Circulation	16,233,600	16,238,400	Inc.	4,600

The proportion of total reserve to liabilities is now 26.64 per cent., against 27.72 per cent. at the same date of 1882.

From Baltimore, Md.: Money is easy. Business in the stock market was a little dull and most transactions were in Virginias. New 3s sold off from 51⅝ to 51, with a disposition to decline. Old issues were firmer.

From New Orleans, La.: With the exception of placing state warrants on a cash basis, financial circles have been without any marked feature.

By cable from London: The Stock Exchange has been much affected by the failure of Turtons & Hadow, who failed on Thursday, with liabilities of over $1,000,000. They were speculating heavily on the bull side, and held large amounts of stock for a rise. Everything speculative is now out of favor here. Mexicans are lower and weak.

THE FOLLOWING WERE THE CLOSING QUOTATIONS FOR STOCKS ON THE DATES NAMED:

	May 19, 1882.	May 11, 1883.	May 18, 1883.

COMMERCIAL.

The dispatches to BRADSTREET'S from the business centers of the country do not make the condition of general trade any more encouraging. No improvement can be reported. Wheat has declined nearly 2c. per bushel during the week, owing to an increased belief that the damage done to the winter wheat has been overestimated. Favorable weather has helped, and the prevalence of bearish news on the breadstuffs' situation abroad, also accounts in part for lower prices. Corn also declined about 1½c., partly in sympathy with wheat, though largely because of favorable reports respecting planting, and the weather. Yesterday it reacted and offset the loss. The provisions markets weakened considerably toward the close of the week. Free receipts of hogs at western points, and the good quality thereof, precipitated the decline, and sales by speculators helped it on. The pig iron market is weaker than last week. Prices of American pig iron have been cut on an average about 50c. per ton under the late reduction, thus bringing No. 1 down to $21.50 and No. 2 to $19.50, but sales have remained very limited. Another reduction in price is shortly to be made, and the trade are resting in expectation thereof. Scotch pig is flat, arrivals are small, and sales limited. Steel rails are nominally $38@$39, and about 20,000 tons have been sold at these figures. Petroleum has at last caught the advance which the trade have so long awaited, and a rise of about 10c. per barrel on pipe-line certificates has resulted. The loss of about 94,000 barrels in pipe-line stocks at the end of April, larger exports from New York, and the failure of numerous borings which were expected to produce heavily, explain the rise. Anthracite coal, despite shipments west by lake, remains dull, and six more idle days at the mines have been added to the arrangement for half-time adopted in April. The opinion is ventured that this will crowd business into a limited period which may react unfavorably on freights. The excess of tonnage produced as compared with last year remains at about one million tons. Ocean charter freights are weaker, petroleum shipments having declined in the past few days. Rates on the berth are not materially changed. There has been no improvement in the wool trade. Transactions have continued small in all markets. There were 166 failures in the United States reported during the past week; 17 more than the preceding week, 50 more than the corresponding week of 1882, and 78 more than the same week of 1881.

BREADSTUFFS.

The English market was interrupted by the Whitsuntide holidays, which prevented any special advices for the time, and left to operators on this side to make up their minds as to the actual condition and prospects of the crops at home and abroad. By Tuesday and Wednesday the impression began to be more general that the damage to the winter crop in the United States had been over-estimated. The course of prices here since shows that this is so, and the feeling being communicated abroad resulted in an easier market in London and a noticeable decline in prices. The close of April saw the British crop in fair condition. The prospect had improved, and the market being well supplied no pressing necessity to buy was felt. Even the most conservative English reports state that the situation contains the elements of a satisfactory harvest. Advices from other wheat-growing countries have contained sufficiently favorable news to keep the London grain market quiet. Cargoes off the coast of red winter, and on passage, are 6d. lower per quarter, as is also California wheat off the coast, and the demand is nominal. Reports from France speak of a satisfactory though not rapid progress of the growing wheat. The acreage is diminished, but the plant is healthy, and with warm weather will yield a good crop. In Germany rain is needed. The Baltic is now open, and as a large quantity of wheat has been sold for delivery in England, the shipments during the month are expected to be heavy. In Australia the wheat harvest is deficient, and prices are high. Good reports are received from India, and reduced railway charges will stimulate exports. The New Zealand wheat crop is excellent, and it is estimated that there will be a surplus for export of nearly 5,400,000 bushels. As to the first of the three points mentioned last week now attracting the attention of the foreign grain trade, the progress and prospects of the crops in the principal importing countries of western Europe, little that is new has transpired during the week. It is a question to be answered within the next thirty days. It may be said, however, that the outlook is no worse, and contains many probabilities for improvement. The second point, as to the probable supplies in the immediate future from other countries than the United States, cannot be regarded as otherwise than partially answered in favor of supplies in excess of expectations earlier in the season. The third point was as to the crop prospect in the United States, which has unmistakably brightened. The quantity of grain on passage reported by Beerbohm's cable, May 17, as compared with one week previous, was as follows:

	May 17.		May 10.	
	Wheat, qrs.	*Maize, qrs.*	*Wheat, qrs.*	*Maize, qrs.*
To United Kingdom.	2,425,000	190,000	2,625,000	260,000
To continent	380,000	55,000	460,000	45,000
Total quarters...	2,805,000	245,000	3,085,000	305,000

This shows a decrease of 280,000 quarters of wheat and 60,000 quarters of maize, equal to 2,240,000 bushels of wheat and 480,000 bushels of corn. The official comparison made last week was erroneous in showing a slight increase of the quantity of grain on passage. It should have shown a decrease of about 1,000,000 bushels, and more than that for the past week, the exports having declined during recent days.

AMERICAN WHEAT MARKETS.

The condition of the coming wheat crop has continued to be the theme of the week, with the difference, that public opinion has veered around to a more favorable view of the situation. The Agricultural Department report of the winter wheat crop which was expected to exert a sudden impulse to the wheat market did nothing of the kind. It took fully twenty-four hours for operators and others interested to make up their minds as to what it really meant. It appears to have been very generally regarded, after due consideration, as an exceedingly conservative document, and one which in good faith put full emphasis upon the worst side of the picture rather than err upon the opposite side. Later reports have confirmed this view, and when backed by favorable weather in many portions of the winter-wheat belt, most of the apprehensions previously entertained were modified. While there are many reasons why the outcome cannot now be foreseen, still there is good cause to believe that much of the so-called winter-killed wheat is only apparently destroyed, and that, being well rooted, it will, under the influence of good weather, show its head again. The course of prices during the week sympathizes with this view, and the fact that many of the Chicago speculators who were carrying large quantities of wheat have unloaded upon the good-natured outsider shows how far the change of speculative base has extended. The receipts of wheat at western points have not increased since last week, but the quantity shipped east by the lake and canal route is quite heavy. There are probably 1,500,000 bushels of wheat on the Erie canal at the present time. These shipments have not had time to reach the seaboard, but the latter part of next week will probably witness an augmentation of receipts at this city. The export demand still continues quite light, and ocean freights are dull, and somewhat weaker.

The wheat market during the past week has fluctuated some, due to manipulation of holders, but gradually declined as is indicated by the following prices in the New York and Chicago markets, for May delivery, at the dates mentioned: New York, Saturday last, $1.22¼; Monday, $1.22⅛; Tuesday, $1.21¾; Wednesday, $1.21; Thursday, $1.20½; Friday, $1.20⅛. At Chicago, Saturday, $1.13; Monday, $1.12½; Tuesday, $1.11¾; Wednesday, $1.11¼; Thursday, $1.10⅞; Friday, $1.09.

The aggregate receipts of wheat at Chicago, Milwaukee, Detroit, Toledo, Indianapolis, Peoria and St. Louis, for the week ending May 11, amounted to 595,234 bushels, against 689,329 bushels in the previous week, and the shipments to 418,027 bushels, against 1,744,523 bushels in the preceding week. The succeeding week's receipts will probably exceed those of the week ending May 11, but the shipments will not exceed those last reported materially.

The visible supply of wheat in the United States and Canada on May 12, as compared with the previous week, shows an increase of 314,564 bushels, against a decrease in the preceding week of 74,662 bushels.

The Bureau of Statistics of the Treasury Department at Washington makes the total exports of flour, wheat, and corn from the United States for the periods indicated below as follows:

	4 months, ending April 30, 1883.	*4 months, ending April 30, 1882.*
Flour, bbls.	3,347,351	2,020,028
Wheat, bush.	22,795,142	23,166,551
Corn, bush.	22,830,146	7,873,298
	10 months, ending April 30, 1883.	*10 months, ending April 30, 1882.*
Flour, bbls.	7,881,335	4,861,272
Wheat, bush.	96,124,218	83,125,555
Corn, bush.	28,045,911	10,843,294

The total amount of wheat exported during the month of April amounted to 3,965,159 bushels, against 4,783,514 bushels for the corresponding time in 1882. The statistician of the New York Produce Exchange places the total wheat crop for the year ended May 1 at 503,000,000 bushels; the consumption for food, seed, etc., 304,558,000 bushels; exports, 133,890,226 bushels; surplus May 1, 1883, 64,551,772 bushels.

CORN.

The corn markets have continued much the same as reported last week, steady in the main, but with occasional lapses under the influence of the tendency of wheat. During the later portion of the week contradictory reports from the west to the effect that cooler weather, while it might benefit that stored by preventing it from heating, but would probably injure that in the ground, and to the effect that corn was rotting in the ground at several points, conspired to strengthen the cereal and hold the price well in hand, though generally believed to be rumors circulated to facilitate speculation. Small receipts and increased shipments at the west contributed further to its strength, and prices advanced ¾c. on Thursday in consequence of this and threatening weather in Iowa. The reports from various regions confirm previous announcements of area planted, and thus far there has been no actual damage done. The receipts of corn at western points show a falling away as compared with the preceding seven days, when a large gain was recorded. The shipments have been far more liberal—the reverse of the situation last week, when they fell behind those of the preceding week nearly one-half. The exports of corn from New York for the four months ended April 30, were 1,617,049 bushels, and from New Orleans during the same period they amounted to 1,265,717 bushels.

The visible supply of corn in the United States and Canada May 12, as compared with the preceding week, shows a decrease of 521,000 bushels as against a decrease of 725,823 bushels in the preceding week.

The course of the corn market during the past week is indicated by the following prices for May corn in the New York and Chicago markets at the dates mentioned: New York, Saturday last, 65⅜c.; Monday, 66⅝c.; Tuesday, 65c.; Wednesday, 64⅞c.; Thursday, 65⅜c.; Friday, 65¼c. At Chicago, on Saturday, 54⅝c.; Monday, 55⅞c.; Tuesday, 55¼c.; Wednesday, 54⅞c.; Thursday, 56c.; Friday, 58⅜c. Considerable strength was shown by corn on Friday.

The total receipts of corn at Chicago, Milwaukee, Detroit, Toledo, Indianapolis, Peoria and St. Louis, for the week ending May 11, amounted to 1,535,038 bushels, against 1,314,615 bushels in the previous week, and the shipments to 1,894,095 bushels, against $3,569,367 bushels in the preceding week.

AMERICAN GRAIN REPORTS BY TELEGRAPH.

From Evansville, Ind.: A cold snap has checked the growing vegetation. The crop outlook so far is good.

From Indianapolis, Ind.: Wheat crop is reported to be considerably damaged.

From Louisville, Ky.: The crops in this vicinity are making favorable progress. Grain is dull; flour is quiet and firm.

From St. Louis, Mo.: All grains are lower, weak and dull. Flour is in small sale and values are breaking a little.

From Minneapolis, Minn.: The weather has been unsettled in the northwest, but higher temperature, and favorable for the wheat plant. Wheat seeding is completed, and reports from all sections indicate prospects of a good crop. Corn planting will be late, which does not argue well for a crop. Increased acreage has been planted with flax, oats and barley. It is too early to judge of the final outcome of any of the crops in the northwest. The movement of wheat and flour continues light, and there is much speculation as to how much of last year's crop is back, as an indication that the quantity to come forward is not large. We give receipts of wheat and shipments of flour at Minneapolis first eight months of crop years, September to May, for two years, 1881–82: wheat received 11,200,000 bushels; flour shipped 1,763,000 barrels; in 1882–83 14,700,000 bushels of wheat, 2,000,795 barrels of flour. Nearly as much more has been ground by country millers. The wheat and flour markets are steady and firm.

From Lawrence, Kan.: The wheat prospect continues excellent.

From San Francisco, Cal.: The latest crop reports indicate an unprecedented yield of cereals and fruit throughout the state. There is 25 per cent. increase in acreage under cultivation. The crops are all in excellent condition, owing to the late rains. It is estimated that the wheat outturn will be 75,000,000 bushels, barley 20,000,000 bushels.

From Savannah, Ga.: This year less oats have been planted and more attention has been given to early vegetables.

From Nashville, Tenn.: The weather for the past two weeks has been unfavorable to the growing crops. In some localities they are suffering for want of rain. Wheat is dull at a decline, and in no demand. Corn is very quiet. Flour in fair demand, but with no change as to price.

From New Orleans, La.: Breadstuffs are steady. Grain receipts and exports continue fair.

PROVISIONS.

Until the latter portion of the week there was not much of interest in the provisions markets. Holders were stiff, receipts moderate, the demand in that unsatisfactory state in which it has been so long; and small speculators were afraid to go in. Later, however, the receipts of hogs at Chicago and the west have been quite liberal. In view of this and the restricted demand, with no improvement from abroad, prices have declined. Quite a drop in pork was recorded on Wednesday, and another decline took place on the following day. All classes of holders had by this time begun to sell, and the downward course of prices began to be quite precipitate. A natural reaction then took place, and the provisions markets became firmer.

The aggregate receipts of hogs at Chicago, Milwaukee, Cincinnati, St. Louis, Kansas City, Peoria, Indianapolis and Cleveland for the week ending May 17 amounted to 178,981, against 142,793 the previous week, and 179,719 for the corresponding week of last year.

The following shows the export of hog product from the places mentioned below for the week ended May 12:

	Pork, barrels.	*Bacon and hams, pounds.*	*Lard, pounds.*
New York	3,144	2,377,064	2,465,679
Boston	586	623,939	586,546
Portland	...	....	....
Montreal	480	400	3,150
Philadelphia	3	800,000	11,000
Baltimore	80	....	42,249
New Orleans	53	3,700	85
Totals	4,346	3,805,103	3,109,629
Previous week	2,889	5,807,524	2,555,373
Two weeks ago	4,940	5,816,453	1,640,505
Corresponding week in 1882	4,785	6,044,460	3,679,420

The total export of hog product from November 1, 1832, to May 12, 1883, as compared with the corresponding time in 1881–82, was as follows:

	1882–83, *pound.*	1881–82, *pounds.*
Pork	27,132,400	32,423,800
Bacon	251,756,513	202,604,282
Lard	134,154,216	149,740,413
Totals	416,043,129	444,784,495

The bureau of statistics report that the total value of provisions, tallow and dairy products exported from the United States in April, 1883, was $7,484,716, against $6,360,911 in April, 1881. For four months ended April 30 last, the total value was $37,573,196, against $36,801,201 in a like portion of 1882. The gain here noted is shown to be of recent origin, by the figures for provisions and tallow only, for six months ended April 30 last, which were $53,134,736, against $53,847,511 in a corresponding portion of the previous year. The shipments of bacon, pork and lard during the first quarters of this and last year were:

	1883, *pounds.*	1882, *pounds.*
Pork	24,916,112	30,003,757
Bacon	139,258,669	151,510,502
Lard	76,197,589	86,153,744

THE PROVISIONS MARKETS BY TELEGRAPH.

From New Orleans, La.: Provisions close easy and in sympathy with the west.

From Louisville, Ky.: Provisions are quiet and easier. Cattle receipts are fair. The demand is light and prices are lower.

From St. Louis, Mo.: Provisions are lower and dull. Cattle are tending downward but active, and in big offering. Hog receipts are unusually heavy and of good quality. Values are declining, but sales are only fairly brisk.

THE NEW YORK DRY GOODS MARKET.

The dry goods trade during the past week remains in much about the same condition as in those immediately preceding it. It opened with continued cool weather and the attending result of quiet business. A warmer condition of the atmosphere prevails toward the close, and business in some quarters improves. The spring trade is over as far as out-of-town buyers are concerned, with the exception of replenishing orders. City retail trade is quieter than usual for the season, but an increased demand is expected as the weather grows warmer. Jobbers of men's furnishing goods say that their spring trade has been of very fair proportions. The season has been a quiet one, but in most instances sales have exceeded the spring of 1882. This is owing to the fact that though buyers were fewer in number, their purchases were much larger than usual. With the cloth trade it has been a very quiet and backward spring, and there is no improvement shown during the past week.

THE BRITISH COTTON GOODS MARKET.

[By Cable to BRADSTREET'S.]

London, May 16.—The Manchester cotton business is restricted by the holidays; prices are nominally unchanged.

THE DRY GOODS MARKETS BY TELEGRAPH.

From Boston, Mass.: In the dry goods trade commission houses report a light business. The jobbers have had a fair trade, especially in New England. The quiet condition of woolen goods is unchanged. Collections have improved somewhat.

From Providence, R. I.: The print-cloth market is quiet and firm, and sales are reported light; 64s are quoted at 3 11/16c. and 56x60s at 3⅛c. There are about 130,000 pieces on hand. The cotton market is quiet and firm, the sales being small. Middling uplands are worth 11¼c., and middling gulfs 11½c. The stock on hand is about 12,000 to 15,000 bales.

From Philadelphia, Pa.: The jobbing trade has been fair in most lines, and some descriptions of cotton goods have been selling more freely at first hands, but general trade in woolens has continued quiet. The cotton goods market is hardening for some popular staples and is generally represented as in an improving condition.

From Rochester, N. Y.: Dry goods jobbers report trade about the same as last week, comparing very favorably with corresponding weeks last year, but if the weather were more favorable business would be considerably heaver. Retail trading during past week in this line was better than preceding week.

From Pittsburgh Pa.: The movement of dry goods the past week has not been so large in volume as in previous week, owing, it is thought, to cool weather. Collections reported fair.

From Cincinnati, Ohio: A slow trade has been done in dry goods; prices unchanged.

From Columbus, Ohio: Dry goods dealers report trade more quiet than last week, which, however, is characteristic of the season, but business is larger than previous year.

From Dayton, Ohio: The dry goods market is dull.

From Chicago, Ill.: Dry goods, millinery, fancy and furnishing goods are selling up to the average for this date in former years, the only complaint being on light fabrics, sales of which are restricted by adverse weather.

From Peoria, Ill.: The dry goods trade is fairly active, though the unseasonable weather is being felt.

From Indianapolis, Ind.: The dry goods trade is reported very satisfactory both in volume and character, exceeding previous year, though buyer and seller are rather conservative..

From Detroit, Mich.: In dry goods the demand has not been quite so active as during last week, but there is a fair business doing.

From Louisville, Ky.: The dry goods movement so far this month is better than for the same period last year.

From St. Louis, Mo.: Values in dry goods continue remarkably steady. The output of goods is ahead of last week and very large. The trade considerably exceeds that of the same date of last year, and the aggregate for the spring will be heavier.

From Milwaukee, Wis.: The distribution of dry goods during the week has been fair, but the volume of business has reached no such proportions as had been expected.

From Davenport, Iowa: The wholesale dry goods trade has been fair during the past week.

From St. Paul, Minn.: In dry goods the order demand is improved, mostly north and southwestern, for assorted spring stocks. Country merchants are still inclined to run light, feeling their way, though financially stronger than a few months ago. Southwestern Minnesota dry goods trade larger than that of other sections in consequence, of developed dairy interests and diversified farming.

From Topeka, Kan.: Dry goods partakes of the general inactivity, but the prospects are brighter for the coming week.

From Lawrence, Kan.: The dry goods trade is fair, and the money market is easy and collections good.

From Omaha, Neb.: Trade in dry goods quiet.

From Denver, Col.: The dry goods trade continues lively.

From San Francisco, Cal.: The dry goods trade is fairly sustained, the city trade improving with dry weather.

From Baltimore, Md.: The dry goods market the past week was active, and sales larger than for some time past. Retail dealers are doing a good business, and commission houses appear busy. Prints and dress goods were most in demand, and prices ruled steady.

From Norfolk, Va.: Dry goods jobbers are only doing a moderate business.

From Richmond, Va.: Dry goods trade fair.

From Wilmington, N. C.: The dry goods jobbing trade continues inactive.

From Savannah, Ga.: The dry goods trade is more even and steady. Dealers are buying only for immediate wants, yet larger shipments have been made than for some weeks past. They are stocked full to meet wants for some time to come.

From Memphis, Tenn.: In dry goods sales have been good, principally small orders.

From Halifax, N. S.: No apparent change in dry goods, though retailers are doing better.

COTTON.

The market for spot cotton at New York for the week past has been firm and steady, with a moderate demand. Quotations have been higher, having reached 11⅛c. for spot middling uplands on Monday, which is the highest point of the season. The closing price last evening was 11c., an advance of 1/16c. over the closing price last week. The sales for the week have been: For export, 2,961 bales; for consumption, 1,858 bales, and for speculation 200 bales. Included in the above are 200 bales to arrive. The deliveries on contract amount to 4,100 bales, against 2,500 last week. The volume of business done was moderate, the total sales footing up 4,819 bales.

Below will be found the closing quotations for prompt delivery uplands at New York on Friday evening, as compared with last week and the corresponding week last year:

	This week.	*Last week.*	*Last year.*
Ordinary	8 1-16c.	8c.	9 9-16c.
Strict ordinary	8½	8 7-16	10⅛
Good ordinary	9 5-16	9¼	10 15-16
Strict good ordinary	10	9 15-16	11⅜
Low middling	10½	10 7-16	11 13 16
Strict low middling	10 13-16	10¾	12 1-16
Middling	11	10 15 16	12¼
Good middling	11¾	11 5-16	12⅜
Strict good middling	11⅞	11 9-16	12⅞
Middling fair	12⅛	12 1-16	13⅜
Fair	12⅞	12 13-16	14⅛

STAINED.

	This week.		*Last year.*
Good ordinary	7½	7 7-16	9⅛
Strictly good ordinary	8 5-16	8¼	10⅛
Low middling	10½	8 15-16	10 13-16
Middling	11	10 1-16	11 13-16

The market for spot cotton closed easy.

The future at New York for the past week has been firm and steady. Quotations show an average decline of 5 points for near months, and remained practically unchanged for later month. The total sales for the week show a large falling off from those of the two preceding weeks, footing up only 510,400 bales, against 833,000 bales last week and 1,110,100 the previous week. The sales for the same week last year aggregated 603,260 bales.

The following table shows the closing quotations for futures at New York Friday evening, compared with last week and the corresponding week last year:

	This week.	*Last week.*	*Last year.*
May	10.97	11.00	12.14
June	10.96	11.00	12.18
July	10.91	10.98	12.29
August	10.97	11.04	12.39
September	10.58	10.57	12 07
October	10.26	10.26	11.58
November	10 16	10.14	11.39
December	10.17	10.16	11.41
January	10.26	10.25	11.53
February	...	...	11.68

The market for futures closed quiet and steady.

The southern markets have been quiet and steady. Below will be found the sales for the week and the closing quotations for middling uplands at seven leading ports as compared with last year's quotations:

	Week's sales.	*To-day.*	*Last year.*
Galveston	6,373	10⅜	11⅞
New Orleans	11,250	10¼	12
Mobile	1,050	10¼	11⅞
Savannah	1,375	10¼	11¾
Charleston	425	10¾	12
Norfolk	4,300	10⅜	11⅞
Baltimore	756	10¾	12¼

The total receipts of cotton at the ports since September 1 are 5,737,192 bales, an increase of 1,255,418 bales over the receipts of last year for the same time. The total at each port since September 1 is as follows, compared with the total to the same date last year:

	This year.	*Last year.*
Galveston	804,510	417,349
New Orleans	1,600,713	1,155 095
Mobile	397,733	257,067
Savannah	797,190	712,317
Charleston	503,278	486,291
Wilmington	128,635	132,553
Norfolk	772,484	588,970
Baltimore	67,810	35,463
New York	149,263	105.557
Boston	176,240	215,214
Philadelphia	85,573	70,537

Below will be found the receipts for each day in the week ending Friday, May 18, at eleven leading ports, as compared with last week and the same week one year ago:

	Sat.	*S. & M.*	*Tues.*	*Wed.*	*Thurs.*	*Fri.*
Galveston	1,268	1,157	1,381	915	641	311
New Orleans	479	3,528	2,057	1,848	455	1,503
Mobile	216	235	208	56	55	211
Savannah	296	391	486	279	417	589
Charleston	130	293	114	190	239	213
Wilmington	67	44	42	55	65	89
Norfolk	880	1,164	1,555	1,500	1,692	1,622
Baltimore	885	475	657	412	1,308	650
New York	....	....	23	123	58	116
Boston	387	523	864	348	570	1,396
Philadelphia	353	570	684	722	866	965
Totals	4,961	8,380	8,071	6,518	6,366	7,715
This day last week	7,504	8,283	9,753	8,953	6,767	8,227
This day last year	2,391	3,901	4,815	3,302	2,057	2,717

The total receipts at the ports for the week were 43,722 bales, against 50,526 last week and 19,939 for the corresponding week last year.

The receipts at the twenty-four interior towns usually reported were 13,808 bales, against 14,622 bales last week and 5,972 bales for the corresponding week last year. The shipments for the week were 26,991 bales, against 31,334 bales last week and 16,025 bales for the corresponding week last year. The stocks for the week were 122,381 bales, against 135,677 last week and 106,005 for the same week last year.

The Liverpool Cotton Exchange was closed Saturday, Monday and Tuesday, owing to the holidays of Whitsuntide. The market for spot cotton is reported firm and easier with a moderate demand, which was fully supplied. Quotations for middling uplands have been higher, the price having advanced to 5 15/16d. from 5 13/16d. last week.

Below will be found the closing quotations on Friday of low middling uplands for delivery, as compared with last week and the corresponding week last year:

	This week	*Last week.*	*Last year.*
May	....	....	6 36-64d.
May-June	5 55-64d.	5 56-64d.	6 36-64
June-July	5 57-64	5 59-64	6 36-64
July-August	5 6 -64	5 63-64	6 41-64
August-September	6 63-64	5 62-64	6 41-64
September-October	5 59-64	5 61-64	6 39-64
October-November	....	....	....
November-December	5 46-64	5 47-64	....

The sales for the week at Liverpool were 44,000 bales (of which 33,000 were American), against 68,000 (of which 42,000 were American) last year. The sales for export were 990 bales, against 11,000 bales last year. The sales for speculation were 2,200 bales, against 1,800 bales last year. The amount forwarded was 14,000 bales, against 18,000 bales last year. The stock in port is 960,000 bales (of which 722,000 are American), against 991,000 bales (of which 609,000 were American) last year. The total imports for the week were 106,000 bales (of which 90,000 were American), against 92,000 bales (of which 39,000 were American) last year, and the amount afloat 289,000 bales (of which 135,000 are American), against 420,000 bales (of which 170,000 were American) last year.

THE GROWING COTTON CROP, BY TELEGRAPH.

From Galveston, Tex.: The weather during the past week continues warm. The cotton crop prospects are good.

From Helena, Ark.: The cold nights create lice on the cotton plant. The stands are poor, but replanting goes on.

THE COTTON MARKET BY TELEGRAPH.

From St. Louis, Mo.: Cotton is in moderate sale, but the local stock is greatly reduced.

From New Orleans, La.: Though buyers show but little inclination to go on, holders are equally indisposed to let go. The present and near outlook is regarded very strong. The weight of cotton is still considered heavy in the aggregate, but so widely and proportionably distributed as to be only a passive factor in the situation. The week's sale spots is small. The market is one-sixteenth higher, except for middling, which is fair. The future movement is moderate. Prices have advanced eleven to twenty points.

WOOL.

Manufacturers have shown no more disposition to operate during the past week than for several weeks past, and trade has consequently continued on a small scale in all markets. Stocks of desirable old wools are now very small, as a rule, and only a moderate amount of new clip has yet arrived on the seaboard. Values are very irregular and to a great extent nominal in the absence of any general demand. So far as the eastern trade is concerned the situation has developed no features at variance with previous reports. The new clip is now the center of interest. There is considerable buying in the south and west for account of western mills, but comparatively few manufacturers or dealers from the east have as yet begun to compete for supplies. Growers' ideas of values continue relatively above seaboard prices, but it is believed that some modification of terms is probable as the actual condition and prospects of the distributing markets and the goods trade becomes generally recognized in the country. In Texas stocks are accumulating and have been offered 2c. per pound lower this week than the general asking price at the opening of the season; but in Kentucky, Tennessee, Virginia and other points where the clip is now ready for market the rates asked and occasionally paid are considered too high to afford any margin to dealers. Negotiations have been commenced in some parts of Ohio and Pennsylvania, but it is still too early for general business in those states. The foreign markets are firm. The London auctions of Australian wools opened on Wednesday with a good attendance, and latest cables report the closing prices of the March sales well maintained. The East India auctions will commence at Liverpool on the 22d inst.

AMERICAN WOOL MARKETS BY TELEGRAPH.

From Louisville, Ky.: Wool active and a shade lower. Common is steady, and a very fair business is doing at the recent advance.

From San Francisco, Cal.: There is more movement in wool and some sales.

IRON.

The American pig iron market is weaker than it was when last reported. As a matter of fact, another reduction in the price is impending. Cuts have been made of about 50c. per ton for two weeks past, so that the nominal quotations of $20 for No. 2 and $22 for No. 1 have in reality meant less. Just how much the reduction will be when made cannot of course be told at present writing. This movement of prices of American pig, however, quite corroborates the tenor of recent advices which have been published in these columns. Sales during the week have been of retail lots, for immediate wants only, and producers and consumers alike are now awaiting the lower figures. One lot of 600 tons of Bessemer pig (foreign) has been sold during the week for $21.50. Scotch pig iron in this market is now relatively higher than American iron. The arrivals this week have been moderate, about 1,500 tons, and sales have been quite as small. The arrivals have gone into consumption in small lots. The Scotch pig iron market here is dull, and, as may be inferred from the above, very little is doing. Nothing, in fact, in the way of improvement in pig iron of any description is looked for until after July. Scrap is featureless, and old rails likewise. Bar iron is dull, and few sales are made. Prices continue at 2@2¼c. at the mill for refined, where they are stiffly held owing to the impending strike in the western association on June 1. No improvement in the outlook in that direction has been reported. Steel rail mills are well employed. Prices continue to be quoted nominally at at $38@$39, at which sales of nearly 20,000 tons are reported. In some of the western manufactured iron centers more animation is reported than in the east.

THE BRITISH IRON MARKET.

[By Cable to BRADSTREET'S.]

London, May 16.—There is very little inquiry for iron this week. Prices are steady.

DOMESTIC IRON MARKETS BY TELEGRAPH.

From Philadelphia, Pa.: There is general lack of confidence in the pig iron market, and transactions are limited to small lots. Finished iron as a rule is stronger and more active. Buyers are meeting near requirements freely, but manufacturers are not pushing business far ahead owing to the prospect of a shut-down of western mills that will quicken demand and may harden prices.

From Pittsburgh, Pa.: The pig iron market continues dull; from this time until August 1 the demand is usually very light; prices are drooping. No. 1 mill may be quoted at $18.50 to $19—four months—No. 1 foundry $21.50 to $22. Demand for bars continues active on account of expected lock-out.

From Cleveland, Ohio: In iron ore there is but little doing as yet, and the general conditions governing the iron markets have undergone no material change during the week, and sales of pig metal are for present wants only, no inquiries being received for future delivery. Manufactured iron is in fair demand, but prices remain unchanged and weak.

From Cincinnati, Ohio: Notwithstanding a marked decrease in production of pig iron, prices have made no change, although consumption has been liberal. There is an active demand for manufactured iron.

From Detroit, Mich.: In iron there is no change in the condition of matters. The market is dull.

From St. Louis, Mo.: Manufactured iron is very firm, with quite satisfactory trade. The feeling of the pig iron market is unsettled, but rates are unchanged. The inquiry is rather better than last week.

From Chicago, Ill.: Refined iron jobbing fairly; country stocks low; card prices strongly maintained; pig quiet, spiritless, with fair consumption at low and irregular prices; No. 1 Lake Superior charcoal jobbing, $23; steel rails, fair demand.

COAL.

No special activity can be recorded in the anthracite market as yet, although the opening of navigation on the lakes and canals has largely increased the receipts of coal at the west. At Buffalo quite heavy shipments are being made to Milwaukee, Chicago, and other points. The principal complaints of excessive dullness are reported to be among outside dealers in free-burning coals rather than among the companies or handlers of Lehighs, and it is among those so affected that the cutting down is most marked. To relieve this feature of the situation an extra six days of no work at the mines has been agreed upon. Next week will bring half time, and the week ending June 23 will likewise contribute but three days of work at the mines. Good judges have expressed the opinion that this may result in crowding the trade into too short a period, inasmuch as the production is now about 1,000,000 tons ahead of the output at this time last year. If this view proves to be correct, higher freights may be the result. Since the placing of the larger bituminous coal contracts of the year there remains but little to chronicle respecting that market aside from its continued dullness. There is no result as yet to the impending arbitration between the Pittsburgh railway mine strikers and their employers. The total production of anthracite coal from January 1 to May 11 was 9,040,842 tons against 8,041,538 tons in a like portion of 1882, showing a gain during the present year of 999,304 tons.

PETROLEUM.

The speculative market for pipe-line certificates of petroleum has experienced a genuine boom during the past week. Prices at the close on Friday night of last week were 92¾c. On Wednesday last $1.05 was touched, a gain up to that time of 12¼c. On Thursday a slight reaction set in, through free selling to realize and in part owing to fears of the Gartland mystery well, in Forest county, which was being manipulated by means of accustomed methods to influence prices. For ten days prior to the beginning of this advance the market had been shaping itself for a decided movement in some direction. Numerous outsiders had prejudged the time of the advance, in which a majority of them seemed to repose confidence, and got in too early to stand the pressure. They were therefore landed high and dry just prior to the surging of the flood-tide which carried their more fortunate comrades up to and beyond the dollar mark. On Saturday last the market was extremely sensitive to well news, there being several important ventures in progress in the regions. Later in the day the reports were bullish in character and prices moved upward, the improvement during the day amounting to about 2½c. On Monday, the public, thinking it could see the elements of a permanent rise, rushed in to buy, and well news offering no obstacle prices made another advance of about 2¼c. over those at the close on Saturday. The undertone of the rise in prices was doubly stimulated by recent pipe-line reports of increased runs as compared with deliveries, as well as by the considerable number of alleged important wells which had of late proved of no special importance. During Tuesday afternoon dollar oil was reached amid the customary excitement on such occasions. There was also the usual "white-heat of excitement" and enormous transactions in pipe-line certificates. The gain in prices during the day was 3⅞c. On Wednesday the market opened steady, with a continuation of the advance, until $1.05¼ was touched. There were signs of a slight weakening during the afternoon, and prices closed, after a day of heavy trading, at about the same figure as on the preceding evening. Thursday, as explained above, was a lively day on the oil exchanges, but less so than Wednesday. The afternoon, for causes mentioned above, witnessed a small decline.

The market opened on Friday at $1.03⅝. Trading during the morning was animated, but prices gradually declined. By 1.30 p. m. $1.02½ had been touched, and the outlook was that a lower fraction might be reached before a rise could be forced. The trouble appeared to rest largely with the outside speculators, who, in their anxiety to realize, sold their holdings in a lump at every advance of ½c. The Gartland well was reported dry early in the day, but this was contradicted soon after, and the proprietors announced their intention of bringing the well in during the day. Later the Gartland well came in and proved a disappointment, in that it is of small size. Syndicate well No. 3, north of the Cooper tract, was announced as doing 60 barrels an hour, and broke the market ¾c.

The prices of certificates at the close was $1.02¾, as against 92¾c. on Friday night of last week, an advance of 10c. on the week.

The record of the prices of certificates of crude at New York during the week ended May 18 is as follows:

	Opening.	*Highest.*	*Lowest*	*Closing.*
Saturday	93	95	92⅜	95
Monday	95½	97⅜	95⅛	97⅛
Tuesday	97¼	1.03	90¼	1.01⅜
Wednesday	1.02½	1.05	1.00⅞	1.01⅞
Thursday	1.02½	1.01½	1.00⅝	1.01⅜
Friday	1.03¼	1.04¾	1.02½	1.02¾

There was no change in the quotations for crude in barrels and refined oil up to Monday's close, although the markets for these commodities were stronger, and some further inquiry had been developed. On Tuesday refined was much stronger, and was advanced ¼c. all around. Case oil was in fair demand at 9½c. for plain brands. On Wednesday refined was advanced another ⅛c. to 7⅞c. for 70° Abel test. The uncertain condition of the market for crude on Thursday was met by a reduction of ⅛c. on refined, but little was sold at the lower prices.

The quotations for certificates of crude petroleum and of petroleum products last evening, as against those of May 11, May 4, and April 27, are as follows:

	April 27.	*May 4.*	*May 11.*	*May 18.*
Certificates, crude	88¼	92⅛	92¾	1 02¾
Refined, 110°	7⅞	7¾	7½	7⅝
Refined, 70°	⅞	7⅞	7⅞	7¾
Crude, in barrels	7 @7½	7 @7½	6⅞@7⅜	6⅞@7⅜
Case, plain	10⅛	10	9¾	9½
Naphtha	6	5¾	5¾	5¾

The total quantity of petroleum (crude equivalent) exported from the United States from January 1 to May 12 was 204,048,279 gallons, against 206,607,591 gallons in a like period of 1882, a decreased exportation of but 2,559,312 gallons, against a decrease of 6,532,889 gallons reported up to May 4. For the week ending May 12, the foreign shipments were 14,164,820 gallons, against 25,767,796 gallons in the preceding week. New York city's exports of petroleum from January 1 to May 12 amounted to 173,759,909 gallons (leaving but 30,288,370 gallons for all other ports, against 38,248,962 in a like period last year), against 168,358,629 gallons in a like period in 1882.

OCEAN FREIGHTS.

The business of the week is not of noticeable dimensions or character. In the earlier portion, owing to a comparatively limited supply of tonnage, rates were firm, as at the close of the week preceding. The demand up to the middle of the week was principally for petroleum vessels, and a fair business was done in that line at moderately good rates. When the drop in prices of refined took place, the demand from abroad was checked, owing to the uncertainties of the situation and about the only mainstay of the market for charters was lost. Rates have since been nominal and practically unchanged. Rates on the berth are not materially different. There are few foreign orders for wheat, and but little is going abroad.

SPECIAL TRADE AND INDUSTRIAL REPORTS.

[By Telegraph to BRADSTREET'S.]

Special telegrams from leading cities, given below, include special reference to the condition of the manufacturing industries of the country, the cereal crops, general trade, and the movement of merchandise:

EASTERN STATES.

From Portland, Me.: General trade is still slow and unsatisfactory, yet gradually improving, b the season is backward, and dry goods especially suffering. Collections are limited, indicating a scarcity of money in the country.

From Boston, Mass.: The boot and shoe trade continues good. There are nearly seventy buyers in town, and fresh arrivals daily. The demand is heaviest in the west, southwest and south. Shipments for the week to places outside of New England, 33,890 cases, against 31,279 the twentieth week in 1882. Total shipments since January 1, 961,399 cases, against 876,019 cases same time last year.

MIDDLE STATES.

From Rochester, N. Y.: Collections reported as satisfactory under the circumstances. Boot and shoe manufacturers report the present time as being just between seasons, but the general opinion seems to be that the fall prospects are not so favorable as a year ago. The local labor troubles, though not at all general, have affected retail trade in most lines perceptibly, but indications are that these matters will be soon settled to the satisfaction of all.

From Troy, N. Y.: The grocery trade is reported quiet. There is a feeling that general business is not so good as at this time last year.

From Philadelphia, Pa.: General trade has been only moderately active during the past week. Distributors of all kinds of manufactured goods report orders small but frequently duplicated, showing that the smaller dealers as a general thing are carrying but moderate stocks. The temper of merchants generally is very conservative, and there is a good deal of caution in the matter of credits. The manufacturing situation and outlook have not materially changed. The cotton and woolen goods mills have not increased their output, and a good deal of machinery is still idle; but there is a fair degree of activity in other branches of production. The export movement of grain and petroleum has been measurably retarded by the small supply of unchartered tonnage in port. Handy-sized vessels are scarce and held higher, and the regular Liverpool steamers have their freight room under contract for the month. The demand for grain is not active. Orders are better for corn than for wheat. Speculation has been bearish in wheat, owing to the increasing movement from country points and fine crop weather, and corn has followed wheat until within a day or two, when there has been a tendency to hold the former against a declining market for wheat. Flour has ruled dull and weak in sympathy with wheat. Cotton has again advanced and declined, but closes a shade higher than last week. There is not much doing in raw sugars or molasses, but importers are holding for full prices. Refined sugars are in good demand. Dairy produce is declining. Farm products are generally in lighter supply and more active demand.

WESTERN STATES.

From Cincinnati, Ohio: There appears to be no improvement in the general features of trade. Manufactures are quiet, and the weather during the week has been decidedly inauspicious for business in monetary matters, and there is a smaller volume of transactions; there is, however, no lack of confidence. The strike of the Crispins has also had some effect upon the general dullness. Flour has been slow and heavy, with liberal offerings. Wheat has declined a little under a fair milling demand. Hemp is in good demand and firm. The receipts of the new-clip wool have been liberal. Tobacco has met with satisfactory sales; receipts liberal. Transactions in manufactured woolens have been light.

From Cleveland, Ohio: Considering the unfavorable weather, trade for the week has been fair, but the season has been too backward for an average spring business to be realized, and the comparison in most merchandise lines will show a decrease from last year. Lumber and building materials, however, are in good demand, and at city yards a steady business is doing at fairly satisfactory prices.

From Columbus, Ohio: Jobbers in boots and shoes quote business a little dull at present. Money somewhat scarce, but collections fair.

From Toledo, Ohio: Jobbers in all lines of goods report an increase in trade over last year. Collections coming in fairly well.

From Dayton, Ohio: General trade quiet. Money still continues in demand at 7 and 8 per cent. Collections are slow.

From Evansville, Ind.: The past week has developed little that is new in trade circles, and with the exception of soft-wood lumber, all lines of business are fairly brisk. Builders and contractors have all they can do, and are running on extended time.

From Indianapolis, Ind.: Trade is fair, but not rushing. The weather is still unseasonable, being too cold. Country merchants are not stocking up much, and collections are slow, and goods sold on very close margin. The movement of freight traffic is light, as is also passenger business. Banks are well supplied with funds.

From Chicago, Ill.: Clothing, hats, boots and shoes are selling fairly. Country collections good. Leather steady; manufacturers buying fairly. Hardware jobbing freely for season. Metals and tinners' stock selling fairly. Nails moving freely for consumption; firmly held. Groceries moderately active. Sugars scarce; firmly held; consumption increasing. Wheat influenced by fine growing weather; improved crop advices; prices lower and irregular; no shipping demand; values contingent on local speculative manipulation; general feeling distrustful. Corn—receipts small; shipping demand good; held with confidence. Oats dull; values chiefly supported by steadiness in corn. Provisions weak, lower and unsettled, being adversely affected by increasing receipts and better quality of hogs. No demand for pork or lard for consumption; bulls find it hard work to prevent a further decline.

From Peoria, Ill.: Trade is still quiet; merchants out of town ordering only for immediate use. On June 1 the distillers have agreed to cut down production to 20 per cent. of capacity; a present they are running 40 per cent. of capacity.

From Detroit, Mich.: General trade for the week has been only fair. In clothing and boots and shoes dealers complain considerably. Collections average fair in some lines, but there are numerous complaints from those whose business is affected by the backward season.

From Louisville, Ky.: The week's trade, as a whole, has been rather light. The presence of country traders in attendance on the Convention has contributed to an improvement in collections and local business. Whiskies are in regular consumptive demand. Leaf tobacco is strong and active. Money is steady, and increasing in supply, at 7 per cent. Groceries are inactive. Hides are in fair demand and steady.

From St. Louis, Mo.: General trade shows an improvement over last week, and the business feeling is excellent. Money is easier still, but interest rates are not quotably changed.

From Burlington, Iowa: No new features in trade for the week. A good general business is being done in both city and country trade, though warmer weather would stimulate the demand in some lines. Dry goods trade continues satisfactory; no marked features noticed. Collections fair.

From Davenport, Iowa: The general trade has been dull for the past week in all lines. The wholesale grocery trade has been very good indeed.

From Des Moines, Ia.: The retail trade in all lines has been dull. Wholesale trade is quiet. The weather has caused wet roads, and work of all kinds is much retarded.

From Milwaukee, Wis.: The past week has brought no decided improvement in the jobbing trade of the city. The general condition of merchants in the country is as good as at any time in a number of years; the outlook in this direction therefore is promising, considering the backward character of the season.

From Minneapolis, Minn.: The timber market is fairly active but weak. The jobbing trade is moderately active in all branches. Dry goods sales are checked by the backwardness of the season; but the aggregate business is much greater than last year. Old houses report an increase of 20 to 30 per cent., and new firms a large trade. Jobbers report a marked improvement in the class of customers buying. The number of immigrants arriving from all sections of Europe and the states and British provinces is unprecedented in the history of any country, largely bound for Dakota, Montana and Manitoba. Most of the immigrants bring money and stock, and are well fixed. Money market closes firm at 8@10c. Eastern exchange steady at $1.00@$1.25 for $1,000 premium.

From St. Paul, Minn.: Bank moneys are accumulating with the demand light; country deposits n-

creasing; currency shipments to wheat regions were scattering. Collections fair to good. Groceries and boots and shoes fair. Sales of clothing improving only slowly, owing to last fall's over trading. In drugs the order sales largely increased. Hats and caps prosperous. Building and shelf hardware, farming and mechanics' tools extremely active. Nails scarce and higher. Heavy iron slow, with prices stiffening. Fence wire in big demand, indicating near close of seeding in Dakota and northwest. Montana trade increasing. Lumber very active; prices firm. Log supply in tributary sections light. Rain wanted to swell streams. Immigration now largely seeking southern Dakota and Devil's Lake country.

From Omaha, Neb.: The spring trade is much behind, and cold, rainy weather prevails. Collections are very poor, and merchants for the most part are asking additional time. It has rained heavily during most of the past week, and no signs of a change yet appear. Jobbers in all lines report trade dull, and look for no improvement until warm weather sets in.

From Topeka, Kan.: General trade is dull; all business is more or less affected by the continuous cold rains which have prevailed during the week. Collections only fair. Groceries and provisions less affected than other branches of trade.

From Lawrence, Kan.: General trade is unchanged. Groceries and provisions are brisk.

From Denver, Col.: The demand for goods in general lines continues active. An unusual fall of rain this spring insures large crops for our farmers.

CALIFORNIA.

From San Francisco, Cal.: Hides are dull. The tin market is overstocked and weak.

SOUTHERN STATES.

From Baltimore, Md.: The general volume of rade the past week reached very satisfactory proportions, and was larger than the previous week. Jobbers in particular have been doing well, and think the present state of activity will continue for several weeks. Speculation in cotton has been rather dull, but holders insist upon full prices, and the market rules steady. The demand for wheat is fair, with moderate offerings; the market continues firm. In the chemical market brimstone has advanced $1.50 to $2 per ton. Dealings in wool are limited, and prices remain unchanged.

From Richmond, Va.: General business for this week is only fair, with tendency to increase.

From Norfolk, Va.: Trade for the past week generally fair. Wholesale grocers are more active. All other departments seem to be doing their usual business. Receipts of cotton increasing. Two hailstorms have injured the trucking interest somewhat. Collections moderate.

From Wilmington, N. C.: Weather favorable for planting, which progresses finely. The reports from wheat crop are very encouraging. Freights, foreign, quiet; coastwise, steady. Timber and lumber dull; shingles quiet. Naval stores, demand fair, prices tending downward. Provisions and grain, demand light, with market easy. Breadstuffs quiet.

From Savannah, Ga.: Trade is fairly steady in all lines. The demand for rice is fair, with more inquiry from the west. The supply of rough rice is limited. The stock on hand at the mills is about 110,000 bushels. The mills are running only on pressing demand to economize a supply. The weather is warm and favorable for the truck farmers, who are shipping large supplies of vegetables by every steamer.

From Selma, Ala.: There has been little change in any department of trade. The grocery business continues better than it was last month, but it is far behind the same season last year.

From New Orleans, La.: Louisiana products are quiet and unchanged. Coffee likewise.

From Galveston, Tex.: The general jobbing trade is dull, as is usual at this season.

From Nashville, Tenn.: There is a better feeling among jobbers this week. Trade is holding up very well.

From Memphis, Tenn.: Business the past week temporarily brisk on account of attendance of a good many people at the musical festival; still trade anyway is good compared with this season in previous years. Meats easy. Flour active and firm. Cornmeal firm, and corn strong, with light receipts. Live stock receipts very light, and prices remain firm at good figures.

NOVA SCOTIA.

From Halifax, N. S.: A fair volume of business has been doing during the week. From Prince Edward Island the accounts of the spring trade are favorable, and from Newfoundland the reports of the seal fishery are good.

LATE MAILS.

Chicago, May 16.—Although the volume of business at the banks is larger than at this period in former years, there is a tendency to increasing quietude. Money is in good supply, and easy at 6 per cent. to borrowers who present choice paper or collaterals, and large loans can be had on 60@90 days at 5@5½ per cent., the banks being desirous to place their funds where they will be employed during the dull period of summer. New York exchange is in light supply, the amounts made by shippers' bills being scarcely sufficient for the wants of bankers, and rates are firm at 75@80c. premium per $1,000. Merchants report collections from the interior as fully up to the best average at this period in former years, but trade is adversely affected by the cold, damp weather that has continued almost without intermission since the opening of the month. But in spite of these unfavorable conditions, and the further fact that farmers are busy with their spring work, the aggregate sales of goods is larger than at this date last year, and compares well with any corresponding period in previous years. Yet goods are sold on very close margins, and profits are small. There is, however, an increased caution in regard to selling time bills, and it may safely be said that while goods are cheaper, credit is dearer than formerly. An encouraging feature in the trade is the improved tone of the iron market, all classes of refined is meeting a fairly good sale for the season and stocks are held with more confidence. Pig is in moderate supply and meets a steady although not active demand. Nails are selling freely in an order way, and prices are better maintained. Steel rails are receiving a fair share of attention, and although sold at close margins on the cost of production, it is conceded that well arranged and closely managed mills are enabled to get a new dollar for an old one. Hardware and harvesting machinery move fairly, and the situation of the former trade is very satisfactory. The lumber trade is rather dull, and the market weak in anticipation of a large output. The improved crop reports have shaken the faith of the wheat bulls, and prices close 3½c. under the highest figures on Monday. The shipping demand is also small and stocks excessive for the season. It is also thought that the bull syndicate, who have held up prices for months, are gradually working out. Corn is moving out freely; there is less uneasiness regarding the condition, and the market to-day showed more individuality than at any previous time the present month. Provisions are influenced by an increasing supply of hogs, absence of consumptive demand, and the market closes at a decline of 75c. per barrel on pork, 35@30c. per 100 pounds on lard, and 40c. on short-rib sides, and the outlook for a legitimate rally unflattering.

GRAIN IN CHICAGO ON DATES NAMED.

	Wheat, bushels.	*Corn, bushels.*	*Oats, bushels.*	*Rye, bushels.*	*Barley, bushels.*
May 12, 1883...	6,121,000	6,101,000	813,000	650,000	28,000
May 13, 1882 ..	3,011,000	1,322,000	185,000	191,000	44,000
May 14, 1881...	5,861,000	3,210,000	1,310,000	56,000	91,000
May 15, 1880...	7,477,000	3,210,000	398,000	57,000	236,000

MONETARY CIRCULATION IN THE ENGLISH COLONIES.

The following is from a recent number of the Paris *Bourse:* The principal English colonies, with the exception of India, Hong Kong, the Straits Settlements, and Honduras, have the same monetary system as the mother country, which supplies them with gold, silver and bronze money struck in the royal mint of London. Australia alone has her own mint, but only gold is coined by them. At present the silver coinage in the English possessions is reported to be very satisfactory, but this has not been the case at all times. The English government takes good care now to withdraw all the worn and unfit coins from circulation, and to replace them by new pieces free of charges of any kind. Under this arrangement a sum of about £1,547,000 in new silver coin has, during the ten years ended December 31, 1881, been supplied to colonial governments, while £260,000 in worn coin has been withdrawn from circulation in the colonies. Of the new coin £965,000 had been shipped to Australia alone during the before-mentioned period. The issue of $4,000,000 in 25, 10 and 5 cent pieces for Canada is not comprised in the above figures. On account of the constant withdrawals and the fact that no contingency system exists in England with regard to the issue of fractional currency, it is not easy to estimate in a fair way the actual circulation even of such coin, which elsewhere may be fixed almost with absolute certainty. The following estimates, compiled by us with due consideration of all circumstances, must, therefore, be received under a certain reserve. At the beginning of 1883 the probable monetary circulation of the leading colonies was as follows:

	Gold.	*Fract'l currency.*
Dominion of Canada.....	£ 3,500,000	£ 800,000
Australia.....	13,000,000	1,000,000
Cape of Good Hope.....	5,500,000	400,000

EFFECT OF INTERNATIONAL EXHIBITIONS.

The Calcutta *Englishman* directs attention to the remarkable increase in the trade between Indian and Australian ports, which it attributes entirely to the stimulating effects of the Melbourne Exhibition. For the first ten months of the official year, beginning April 1, 1882, the value of the Indian exports to the Australian colonies amounted to no less than 89, 87, 683 rupees, as compared with 79, 96, 878 rupees in the whole year 1881-2, and only 52, 98, 699 in the preceding year. The trade would thus appear to have more than doubled in three years, but the increase is even more striking than this, for the exports for 1880-81 were swelled considerably above their ordinary amount by reason of their including the large number of valuable articles sent to Melbourne for the purpose of exhibition. A remarkable fact is the prominence in the export returns of articles in which there was before the exhibition little or no trade with the colonies. It is calculated that the shipments of Indian tea to Australia will this year exceed two and a half millions of pounds, or considerably more than three times the quantity exported thither three years since.

A MONSTER PRISON.

The largest prison in Europe is the House of Detention which has just been completed at Berlin. This enormous edifice comprises six separate buildings, to which have been transferred all the prisoners awaiting trial who have hitherto been confined in the various prisons of Berlin. The prison for men consists of a ground floor and four other stories, with 732 separate cells, dormitories for 195 prisoners, besides forty rooms for turnkeys and sleeping accommodations for 118 attendants. Each of the 732 cells has a window ten feet high. There are six cells in the basement for prisoners who are refractory to discipline, and in the basement are also to be found the kitchens, the bath-rooms, and the heating apparatus of the prison. The internal part of the prison is constructed of iron, and is so built that all the corridors look out upon a central hall, which commands a view of every cell. The prison for men, which is separated from the rest of the building by a wall 16 feet high, also contains a chapel and four large exercise grounds. The prison for women contains only 70 cells and 15 large dormitories, the latter of which are divided into sections, each containing a bed, which can be locked up every night after its occupant has retired to rest.

THE BANK OF FRANCE.

The eightieth anniversary of the foundation of the Bank of France has been referred to in a recent report of that institution, and it is interesting to note that the creation of this establishment was due to the initiative of Napoleon and M. Crétet, one of the Councillors of State, who was afterwards Governor of the Bank and Minister of the Interior. It was resolved to create a bank after the pattern of the Bank of England, with a capital of £1,200,000., in thirty thousand shares of a thousand francs each. The government at once opened an account with it, and purchased five thousand shares, with the guarantee money deposited by the Receivers-General of Finance. The list of original founders and shareholders is a rather curious one, comprising Bonaparte himself, who was compelled to borrow money to pay for his shares; his brothers, Lucien, Joseph, and Louis; Claude Perier, and Fould, fathers of the ministers of Louis Phillippe and Napoleon III.; and Mallet, the great banker. The Bank of France was from the first managed by the fifteen governors (*régents*) and three inspectors (*censeurs*) appointed by the two hundred largest shareholders. It may not be generally known that the Bank of France once suspended payment, and this was when the allied armies entered Paris in 1814. Upon that occasion M. Laffitte, the well-known financier, walled up the doors of the cellars containing the specie in reserve, and broke up the presses and plates, so that the invaders might not be able to issue any notes.

MUNICIPAL GOVERNMENT IN INDIA.

Mr. Kisch, officiating secretary to the government of Bengal, states that in Calcutta the working of the elective system has not been satisfactory, the qualified ratepayers evidently regarding the election of their municipal representatives with absolute indifference. Many of the ablest and most useful members of the old municipality have, we are told, shrunk from a public canvass for the office of commissioner—"a proceeding singularly distasteful to the ideas of a native gentleman"; while nearly all the European members have avoided candidature. At a second election for municipal representatives in 1879 it is stated that in three wards out of the eighteen the number voting showed a decrease as compared with the first election in 1876. Yet it is admitted that the number who recorded their votes had risen from 4,158 to 5,093, which hardly bears out Mr. Kisch's unqualified condemnation of the act of 1876 as "an attempt to rear a foreign plant on soil in no way prepared for it."

ST. LOUIS OPINION ON THE IRON SITUATION.

The St. Louis *Republican* says: The Midland Blast Furnace Company of this city, engaged in making iron in Crawford county, after having increased its original capital of $100,000 to $150,000, has just received authority to double it and make it $300,000. This, at a time when the iron business in Pennsylvania and Ohio is so depressed as to be leading to frequent failures and partial suspension of work, is highly encouraging to the growth of the industry in our state. The failures, suspensions and disputes between masters and workmen in Pennsylvania and Ohio are a sign that iron making is about to leave those states and seek cheaper and better fields. It costs all of $21 a ton to make pig iron in Pennsylvania, we are told, and nearly as much in Ohio. But it can be made—indeed it is now made—for $11 a ton in Tennessee and Alabama, and we presume it can be made at nearly these figures in Missouri. At any rate it begins to look as if eastern capital was getting ready to move to the south and west to embark largely in the business. It is certainly a great waste to send Missouri ore to Pittsburgh for making iron when it can be made into pig iron at least $5 a ton cheaper here than there. In five years from this time Missouri, Tennessee and Alabama will be the most interesting fields for the prosecution of this important business in the country.

TRADE EMBARRASSMENTS.

There were 166 failures in the United States reported to BRADSTREET'S during the past week, 17 more than the preceding week, 50 more than the corresponding week of 1882, and 78 more than the same week of 1881. Compared with the previous week the middle states had 31, a decrease of 6; New England states 28, a decrease of 1; southern states 34, an increase of 1; western states 55, an increase of 15; Pacific states and territories 18, an increase of 8; Canada and the Provinces 21, an increase of 1. The important failures were Maxfield & Co., wholesale fruits, and E. D. Bassford, house furnishings, New York city; V. Richards & Brother, dry goods, Augusta, Ga. In the principal trades they were as follows: General traders 34; grocers 24; shoes 11; clothing 8; liquors 7; manufacturers 7; fancy goods 6; drugs 5; dry goods 4; hardware 4; hats 4; jewelry 4; lumber 4; produce and provisions 4; millinery 3; millers 2; furniture 2; coal 2; flour and grain 2; tobacco and cigars 2.

ALABAMA.

BIRMINGHAM.—J. D. Mallet, harness, has failed.

LEIGHTON.—O. L. King, grocer, has failed.

MARION.—James Gregory & Son, general store, offer 50 cents.

ARIZONA.

SAN CARLOS.—C. T. Connell, general store, has compromised.

ARKANSAS.

FULTON.—F. P. Hesterly, drugs, has assigned. Liabilities $2,700; assets $1,420.

SUMPTER.—Brisbin & Brother, general store, offer to compromise at 35 cents.

CALIFORNIA.

AMESPORT.—J. A. Fleming, saloon, has been attached.

JANESVILLE.—J. M. Yanner, saw mill, has filed a petition in insolvency.

OAKLAND.—J. J. Pensam, contractor, is in insolvency.

SAN BUENAVENTURA.—S. Epstein, of Epstein Brothers, clothing, has filed a petition in insolvency.

SAN FRANCISCO.—D. Cohen & Brother, gents' furnishing goods, have compromised.

SAN FRANCISCO.—Constine Brothers, grocers, have assigned.

SAN FRANCISCO.—F. A. Cressy, soap manufacturer, has filed a petition in insolvency.

SAN FRANCISCO.—Dickie Brothers, shipbuilders, have compromised at 25 cents in thirty days. Liabilities $105,000; assets about $33,000.

SAN FRANCISCO.—E. T. Harris & Co., saloon, have failed.

SAN FRANCISCO.—S. Lewis, saloon, has been attached, and application made to force him into insolvency.

SAN FRANCISCO.—Allen McGarry & Co., wholesale liquors, have compromised at 50 cents in 60 days. Liabilities about $18,000; assets $10,000.

SAN FRANCISCO.—John H. Mathews, butcher, has filed a petition in insolvency.

SAN FRANCISCO.—R. Perry, contractor, has filed a petition in insolvency.

SAN JOSE.—F. Gambert, general store, has failed and sold out.

TULARE.—Morris & Michael, general store, have compromised.

CONNECTICUT.

ANSONIA.—Arthur C. Langdon, grocer, has assigned.

DANBURY.—J. O. Knapp, shoes, has been closed by the sheriff.

NEW HAVEN.—Frederick E. Cooper, grocer, has assigned.

DELAWARE.

WILMINGTON.—H. L. Tatnall & Co., lumber, have failed. Henry L. Tatnall, Sr., the founder of the firm, withdrew February 1, 1882. For some time past they have been hard pressed for ready money. The liabilities are about $40,000; nominal assets about the same.

DISTRICT OF COLUMBIA.

WASHINGTON.—J. R. Cornell, grocer, has assigned, giving preferences for $500. Liabilities about $4,000.

FLORIDA.

PENSACOLA.—Cade Shackelford, grocer, has assigned, but afterwards recalled it and paid creditors in full.

GEORGIA.

ATLANTA.—J. B. Jones, grocer, is reported to have left town and has been attached. Liabilities about $1,200; assets about $150.

AUGUSTA.—V. Richards & Brother, dry goods, assigned on the 14th inst. to J. C. C. Black and John G. Long. Liabilities $100,000; nominal assets $68,000. There is a mortgage on stock $7,500, on which there is due $6,300. There are no other preferences. They have been in business many years.

GAINESVILLE.—J. W. Miller, drugs, has been closed by the sheriff.

KEYTON.—J. D. & C. C. Holloway, general store, have been closed by the sheriff.

SYLVANIA.—Jacob Bazemore, general store, has assigned. Liabilities $1,600; nominal assets $1,500.

ILLINOIS.

ALTAMONT.—C. G. Schmidt, jeweler, has assigned to his wife.

CHICAGO.—William Burgess, printer, has been closed under a chattel mortgage for $15,700.

CHICAGO.—George E. Eichborn, saloon, has been closed by the sheriff.

CHICAGO.—Samuel Goldbaum, wholesale notions, has been closed by the sheriff on a claim for $3,600. He has had a very poor season.

CHICAGO.—Henry Hesse, grocer, has been closed by the sheriff.

CHICAGO.—George G. Knox, furniture, has been closed by the sheriff on an attachment in favor of Reuben Knox, for $3,000.

CHICAGO.—Frederick Korf, livery, has been closed by the sheriff.

CHICAGO.—Charles Rosenberg, clothing, has been closed by the sheriff on a claim for $674.

CHICAGO.—Louis Simansky, hats and caps, has been closed by the sheriff on a claim for $2,000.

DONGOLA.—Sivia & Graham, general store, have assigned.

JOLIET.—N. A. Pickle, grocer, has been closed by the sheriff.

ONTARIOVILLE.—C. W. Ackman, cheese factory, has failed and left town.

ROCKFORD.—M. T. Strauss, notions, has been closed on execution.

ROCKFORD.—The Rockford Grape Sugar Company is said to have sunk the capital stock of $150,000, but still have enough left to pay all debts. The principal cause of the difficulties is said to be disagreement among the company. The assets are said to be $100,000, and real estate encumbered for about $60,000 or $70,000. The property was recently sold out by the United States marshal, and the works were bought up by the stockholders at a nominal price.

SALEM.—G. R. Pace, general store, has assigned.

WHITE HALL.—Hill & Prindle, potters, have assigned.

WHITE HALL.—A. Mitchell, agricultural implements, has assigned.

INDIANA.

FORT WAYNE.—E. G. Anderson, grocer, has assigned.

INDIANAPOLIS.—E. G. Bagley, wholesale grocers' sundries, has sold out and failed.

ROCHESTER.—D. S. Gould & Brother, general store, have been closed up.

IOWA.

EAGLE GROVE.—H. E. Boughton, jewelry, has been closed by attachments.

HOPKINTON.—Emma S. Rutter, millinery, has been closed on a chattel mortgage.

IOWA CITY.—Sorter & Fry, grocers, have failed.

VAIL.—A. B. Andrew, grain, has failed and creditors have attached.

KANSAS.

TOPEKA.—E. H. Davis, clothing, gave a chattel mortgage for $10,000 and suspended.

KENTUCKY.

FRANKFORT.—M. J. Foley, groceries and saloon, has been attached for $255.

FULTON.—S. G. Patterson & Co., general store, are reported to have been attached and assigned.

LOUISVILLE.—Philip Rupp, groceries and liquors, has assigned.

MONTICELLO.—W. M. Gann, drugs, has been closed by the sheriff.

LOUISIANA.

NEW ORLEANS.—Marks Brothers & Co., wholesale dry goods, offer to compromise at 12½ cents, secured, in four, eight and twelve months. Liabilities about $200,000; assets $30,000.

MAINE.

CASCO.—Dennis A. Dyer & Co., general store, are in insolvency.

CASCO.—Taylor & Spillen, lumber, are in insolvency. Liabilities $9,000; nominal assets about the same.

LEWISTON.—A. K. P. Harvey & Brother, drugs, have been attached.

LEWISTON.—Augustine Young, fancy goods, is in insolvency.

PORTLAND.—Joseph Levy, tailor, is in insolvency. Unsecured liabilities $7,200; mortgage on stock $1,800; the stock is valued at $3,000; actual value of accounts $500.

SKOWHEGAN.—Fred. Hoyt & Son, shoes, have failed. Liabilities estimated at $10,000; assets about $5,000.

WASHINGTON.—C. R. Flanders, general store, has been closed by creditors. Liabilities about $2,500.

WATERFORD.—Frank E. Godwin is offering 20 cents.

WHITFIELD.—Isaac Oakman, saw mill, has been closed by attachment.

MARYLAND.

BALTIMORE.—J. W. Lewis & Co., oyster packers, etc., have assigned. They began in April, 1881, with about $3,000 capital.

BALTIMORE.—John T. Ryan, tobacco and cigars, has obtained an extension.

CALIFORNIA.—L. J. W. Wise & Co., general store, have failed and compromised at 50 cents.

MASSACHUSETTS.

AYER.—Briggs & Kelly, iron founders, have failed.

BOSTON.—Allen & Morse, commission produce, have been attached.

BOSTON.—The liabilities of G. Baker & Co., wholesale fruits, are about $7,300; nominal assets $1,800.

BOSTON.—Kalmus Benno & Co., pictures, have failed and gone into insolvency.

BOSTON.—Gates & Co., printers, have failed. Liabilities about $5,000, of which $2,000 is secured by mortgage; unencumbered assets small.

BOSTON.—The Boston Machine Company is in insolvency.

EAST LEE.—William May, woolen manufacturer, has settled at 10 cents.

HINGHAM.—A. F. Hutchins, shoe manufacturer, is reported to have failed, and offers 25 cents. Liabilities $4,000; nominal assets $1,200.

HOLYOKE.—A. B. Tenney, builder, is in insolvency.

HUBBARDSTOWN.—Elijah A. Warren, chair manufacturer, offers 10 cents. Liabilities about $20,000; nominal assets $3,000.

HUDSON.—D. F. Pope, livery, has compromised at 20 cents

LAWRENCE.—Mrs. M. S. Anderson, millinery, has been closed by attachment.

LOWELL.—The liabilities of J. A. Parr & Sons, knit goods, are $5,700; assets very light.

LYNN.—G. A. Nicho's & Co., shoes, have failed. Liabilities $11,300; assets $3,500. They offer 25 cents.

LYNN.—C. W. & E. S. Trafton, grocers, are reported to have failed.

MONSON.—The liabilities of E. F. Wells, clothing, are $14,762; nominal assets $15,286.

NEW BEDFORD.—T. G. Wing & Co., coffees and spices, have been attached.

SPRINGFIELD.—Mallett, Annable & Co., stationers, are trying to settle at 15 cents. Liabilities $2,285.

TAUNTON.—W. L. Gifford & Co., grocers, are in insolvency.

WEST MEDWAY.—Silas P. Holbrook, paper manufacturer, is reported to have failed.

WORCESTER.—John Kidder, fish, offers 30 cents. Liabilities about $3,000; assets $500.

WORCESTER.—George Legg & Co., woolen manufacturers, owe it is said about $12,000, besides what is due to Mr. Legg's father. Assets small.

WORCESTER.—William Smith & Co., tin and stoves, have been attached.

MICHIGAN.

DASH.—J. Fessenden, general store, has had a chattel mortgage foreclosed. Liabilities $700; assets about $400.

DETROIT.—George A. Johnson, shoes, has assigned to James R. McKay.

DETROIT.—J. T. Pepple, baker, gave a chattel mortgage for $1,766 and assigned to W. W. Petterick.

DETROIT.—A. Sheeler, harness, has assigned to Atkinson & Atkinson.

LANSING.—Eugene Angell, banker, has suspended, having become embarrassed by the failure of other parties, which caused a run on his bank.

WEST BAY CITY.—H. G. Hawkins, grocer, has been closed by creditors.

MINNESOTA.

EAGLE LAKE.—Irvin Wells, drugs, etc., has failed.

FAIRMONT.—Robert Heinze, general store, has assigned. Liabilities $3,000; assets $2,000.

HECTOR.—Juve Isaacsen, general store, has been attached for $729.

MONTROSE.—Jacob Wechsler, general store, has been attached for $1,382, and assigned.

ST. PAUL.—Application has been made for a receiver for the Anchor Manufacturing Company. Liabilities $35,488; nominal assets $53,492. There is a disagreement in the company. It is thought all debts will be paid.

WADENA.—A. J. Staples, general store, has assigned. Liabilities $4,000; assets $1,500.

MISSISSIPPI.

VICKSBURG.—Campbell & Pannell, printers, have been attached.

MISSOURI.

ST. LOUIS.—F. D. Macbeth, ladies' underwear, has failed.

ST. LOUIS.—The Missouri Lumber Company is advertised to be sold out at trustee's sale.

St. LOUIS.—The Mullanphy Planing Mill Company has assigned to G. G. Gibson and closed up. A chattel mortgage for $5,674 was given to secure the wages of workmen, and three notes for $3,674. The resources of the company are exhausted.

ST. LOUIS.—The Standard Tool Company has failed and the works are closed. It is thought the real estate and machinery will be sufficient to secure all the creditors in full, but it is thought the stockholders will realize nothing. The company had a capital of $50,000, but it was all invested in plant, making them cramped for ready money.

NEBRASKA.

OMAHA.—H. & C. F. Hickman, millinery, gave a bill of sale and mortgages.

NEW HAMPSHIRE.

PLYMOUTH.—H. L. Rogers, of Rogers, Smith & Co., furniture, is reported to have left town with the funds of the firm. Liabilities estimated at $5,000; nominal assets about the same.

NEW JERSEY.

NEWARK.—Sealy & Co., manufacturers of hats, have assigned to Marvin Dodd. They failed in April, 1882, compromising at 50 cents in four, eight and twelve months. They were attached on the 10th ult. for $548.

PATERSON.—Mrs. Max Rosenstein, fancy goods, offers to compromise at 60 cents. Liabilities about $2,500; nominal assets about the same.

NEW MEXICO.

ALBUQUERQUE.—E. C. Montfort, undertaker, has been attached.

NEW YORK.

BLOOD'S DEPOT.—J. D. Hendryx, grocer, is reported to have assigned.

NEW YORK CITY.—Edward D. Bassford, house furnishing goods, assigned on the 14th inst. to Thomas Keech, giving preferences to Eleanor P. Gage $700; B. G. Jayne and W. W. Gage $600; B. G. Jayne $250; C. K. Deutsch $214; George P. Bassett & Co. $150; estate of Alice Bassford $35,387; total $37,302. He began the present business last November.

NEW YORK CITY.—The schedules of M. T. Buchanan, paper stock, show liabilities $12,698; nominal assets $4,795; actual assets $2,950.

NEW YORK CITY.—The schedules of J. H. Chapman & Co., jewelers, show liabilities $12,267; nominal assets $9,131; actual assets $5,879.

NEW YORK CITY.—Henrietta Guggenheim, laces, assigned on the 17th inst. to Elias Small, giving five preferences for $1,306.

NEW YORK CITY.—Maxfield & Co, wholesale fruits, assigned on the 15th inst. to Joseph B. Maxfield, giving the following preferences: Hills Brothers $22,183; James A. Harris $12,000; Brown & Allen $1,291; Mrs. G. P. Lovell $1,458; W. F. Fuller $343; H. P. Robinson & Brother $851; W. E. Vail $328; John O. Matthews $823; Mrs. Anne Wood $360; Chatham National Bank on notes indorsed by H. P. Smith $5,000; total $44,643. The liabilities are reported at about $110,000; assets nearly as large. The failure was caused by dull trade, depreciation and losses on lemons last July. They have been in business about fifteen years, and were large receivers of Florida oranges, having a grove near St. Augustine.

NEW YORK CITY.—The sheriff has judgments and attachments aggregating over $7,000 against the Menhaden Company, fertilizers, on notes and for money loaned. A sale of the four steamers belonging to the company was stopped on the 14th inst. by an injunction.

NEW YORK CITY.—Charlotte M. Morphey, birds, made an assignment on the 14th inst. to Daniel M. Van Cott, giving a preference for $385.

NEW YORK CITY.—The schedules of Franklin Overbagh, lamps, show liabilities $1,472; nominal assets $769; actual assets $508.

NEW YORK CITY.—Isaac Pemberton, jewelry and silverware, assigned on the 16th inst. to Joseph A. McCray, giving preferences to J. W. Johnson $4,002; Joseph A. McCray $4,000; James Cochrane $1,500; total $9,502. He has been in business about four years, and formerly traded as The Pemberton Specialty Company.

NEW YORK CITY.—The schedules of Edward R. Reisenfeld, aprons, show liabilities $3,900; nominal assets $2,970; actual assets $1,224.

NEW YORK CITY.—The schedules of Louis Rosenstein & Co., wholesale fruits, show liabilities $265,318; nominal assets $166,705; actual assets $129,765.

NEW YORK CITY.—The chattel mortgage recently given by Sherman, Weeks & Co., cement, was for $150,000 to secure the National Park Bank of New York, White's Bank and the Mechanics' Bank of Buffalo. Horace H. Weeks previously conveyed to his father his individual one-third interest in the firm's real estate for a consideration of $30,000, subject to a mortgage of $13,000. Sherman Brothers & Co., of Buffalo, also gave a chattel mortgage covering the personal property of the latter firm and their interest in Sherman, Weeks & Co. to White's Bank, C. B. Gaskell, J. B. Irish, C. J. North and the National Park Bank of New York.

NEW YORK CITY.—The American Heating & Power Company has been placed in the hands of Richard L. Edwards as receiver, on the application of The Farmers' Loan & Trust Company, trustees of the mortgage bonds. The last annual report showed existing debts $802,252.

NEW YORK CITY.—The schedules of William Wogler, webbing manufacturer, show liabilities $3,972; nominal assets $9,854; actual assets $5,572.

POUGHKEEPSIE.—Cusack & Murtaugh, shoes, are reported to have assigned.

ROCHESTER.—Jacob Beesch, shoes, has assigned, giving preferences for $1,455. Nominal assets about $5,000.

TROY.—The schedules of John A. Ferris' Son (agent), crockery, show liabilities $4,625; actual assets $2,677; preferences $913.

NORTH CAROLINA.

ASHEVILLE.—S. Van Gilder, shoes, has assigned.

GOLDSBORO.—Hauff & Son, musical instruments, have assigned.

PITTSBORO.—J. B. Harris, general store, has assigned.

WINTON.—Rogers & Saunders, general store, are reported to have assigned to J. O. Marshall.

OHIO.

CANTON.—William M. Shook & Co., mill machinery, have assigned to A. S. Van Buskirk.

CINCINNATI.—Ringel & Elliott, wholesale hats and caps, have given a chattel mortgage for $7,500 to the Exchange National Bank and assigned to C. K. Shunk.

CLEVELAND.—F. H. Knippenberg, merchant tailor, has assigned to George H. Schwan.

CLEVELAND.—Peter Low, cigar manufacturer, has been attached.

FREDERICKSBURG.—F. W. Wright, shoes, who recently assigned, has liabilities $4,338; assets $2,316.

GALION.—Klopp & Weiler, dry goods and groceries, have been attached.

GALION.—Johnson, Linsley & Co., lumber, have assigned.

NORWALK.—E. B. Hoyt, grocer, has assigned to H. S. Mitchell.

NORWICH.—J. P. Kelly, general store, has assigned to W. Drummond.

VIENNA.—Carey & Bowman, general store, who were recently burnt out, have assigned.

IMPORTANT NOTICE.

SCIENCE.

The undersigned begs leave to state a specimen copy of SCIENCE—the new weekly illustrated paper—will be sent to any address on receipt of ten cents. It should be borne in mind that SCIENCE is the only periodical of its class in America, and every reading American can well afford to have it regularly sent to his home, in order to get concisely the scientific news, in all departments of science, from all parts of the world. SCIENCE is owned by The Science Company, whose directors are Daniel C. Gilman, of Baltimore, President; Alex. Graham Bell, of Washington, Vice President; Gardiner G. Hubbard, of Washington; O. C. Marsh, of Yale College; and Samuel H. Scudder, of Cambridge, Editor and Treasurer. The price of SCIENCE by the year is $5. (52 numbers, two volumes, 1,500 quarto pages, neatly printed and well illustrated.) By single numbers, 15 cents each.

BRADSTREET'S:

A Journal of Trade, Finance, and Public Economy.

PUBLISHED BY THE BRADSTREET COMPANY,
279, 281, 283 BROADWAY, NEW YORK.

Terms, $5.00 per year in advance, including postage.
SINGLE COPIES, TEN CENTS.
SPECIMEN COPIES WILL BE SENT FREE UPON APPLICATION.

As a financial and commercial newspaper the foremost purpose of BRADSTREET'S is to be of practical service to business men.
Its special trade and industrial reports; its weekly epitome of bankruptcies throughout the United States and Canada, and the summaries of assets and liabilities, are alone worth the subscription price.
The synopses of recent legal decisions constitute an exceedingly valuable feature.
As commercial transactions, in the wider sense, are coming to be more and more conducted on a statistical basis, the information contained in BRADSTREET'S is of the first importance both to producers and middle-men.

THE TRADE AND AGRICULTURAL SITUATION THROUGHOUT THE UNITED STATES AND CANADA IS REPORTED BY TELEGRAPH TO BRADSTREET'S UP TO THE HOUR OF PUBLICATION.

FINANCIAL.

ENTERED AT THE POST OFFICE AT NEW YORK, N. Y., AS SECOND-CLASS MATTER.

SATURDAY, MAY 26, 1883.

NOTES OF THE WEEK.

The dispatches to BRADSTREET'S this week tell of cold and unseasonable weather. From Savannah it is reported that the weather had a depressing influence on trade and that sales for the week were light. At Buffalo the general trade movement was of only moderate proportions; transactions were on a conservative basis and confined largely to merely mail orders. St. Louis reports general trade less active than last week. Cincinnati reports a slight improvement in the tone of the markets, notwithstanding the ill effect of the almost unprecedented cold snap. At Cincinnati a new warehouse, claimed to be the largest in the world, will be opened next week. At Kansas City in jobbing circles the bulk of the spring trade is over, and business is on a reduced scale. Philadelphia reports that trade has not improved in any line, and, if anything, has been less active in some departments owing to the advanced stage of the season and the cool weather. Trade is reported dull at Marshall, Tex. Cleveland reports that the continuous rain-storm which prevailed during the greater part of the week had a depressing effect upon retail trade and the country orders as well. Louisville reports indications of an abundant fruit crop. At Norfolk trade generally is not active except with the wholesale grocers, who seem to be doing a fair business for the season. St. Louis reports trade less active than last week.

The stock market reacted this week, and with the rally in prices all talk about the possibility of panics which was heard last week vanished. The turn was made in the market on Wednesday, but as soon as the spurt had been made and prices put up to a higher level the market relapsed into extreme dullness, and continued without other feature than arose from room trading. No change in the temper of speculation is observable, the news of the crops and of the state of trade being against an improvement of feeling in Wall street. The troubles in the London market threw a rash lot of securities on this market, causing exchange rates to rise, but they declined again when the rush to sell was over.

Among the striking features of the celebration at the opening of the Brooklyn Bridge on Thursday was the distinct and emphatic statement of Mr. Abram S. Hewitt that all the money raised for the bridge has been honestly expended, and that the structure could not now be duplicated at the same cost. Mr. Hewitt's statements must be regarded as a sufficient refutation of the charge widely made that millions of dollars have found their way into private pockets during the construction of the bridge. At a time when public jobbery has obtained to a disgraceful extent it is but natural that such charges should be freely made. The truth is that by far the greater portion of the thefts of public money came from the blundering incapacity of those immediately responsible for the proper conduct of public business. Bad systems of finance are erected and loose methods of accounting intervene. As the world goes human nature must be subjected to adequate checks, lest well-meaning but weak men go wrong under temptations which never should be thrust upon them. Thus it is not strange that a clerk in the city controller's office should rob the city when the system of accounting is so loose that two sets of reports differ by thousands of dollars as to the amount of the city's loss.

The union of New York and Brooklyn by a suspension bridge suggests various results which may possibly flow from the improved means of communication. As a metropolitan city, New York is favored in about every way save as regards opportunity for easy expansion in the way of cheap dwellings for the wage-receiving classes of the community. It appears probable that the effect of the bridge will be to make of the abundant land beyond the East river the use indicated. To make the most of such an outcome additional bridges will be required further up the river, and these will, of course, be built as the need becomes urgent.

Our correspondent at St. Louis sets forth elsewhere the working of the St. Louis Freight Bureau, an organization which is doing much to adjust differences between the shipper and the railway. The letter will repay reading by merchants everywhere. A comparison of methods with those of the New York Board of Trade and Transportation would doubtless be profitable. If we mistake not the methods of the New York organization partake more of the character of public denunciation and clamor than do those at St. Louis.

The Philadelphia *American* prints the first of a series of papers on the history of the distribution, of the surplus, apparently with the view of pressing upon public attention the feasibility of a resort to that scheme as a means of settling the revenue question of to-day. The journal referred to quotes with approval the statement made by the original author of the measure regarding its objects, of which the leading one (although the last mentioned) was to disentangle the question of the general expediency of this or that part of the fiscal legislation from the quesion whether the general government could use to advantage the revenue it would bring in. It is difficult to see what there is in this project to recommend it, unless it be regarded as as an all-sufficient recommendation that its adoption would effectually prevent a reduction of duties. The scheme certainly cannot be supported on grounds of economy, it being much cheaper to leave the surplus tax in the hands of the people than to employ the additional force necessary to collect the tax and to distribute it. The expenses of this double and presumably unnecessary process would be saved by leaving the tax uncollected. It is unnecessary to call attention to the wide field for extravagant expenditure which would be opened by the adoption of such a measure. The good sense of the people may be relied upon to give the project the treatment it deserves.

We give place elsewhere to a condensed statement by Mr. Goschen of his argument as to the increased purchasing power of gold. As a speculation in economics Mr. Goschen's plea is of unusual interest. Beyond this it is of little moment, for, on his own admission, there is no room for specific action. We have already pointed that, so far as relates to the practical direction of the world's affairs, the value of gold is a fixed quantity. It is known that less and less gold in proportion to the amount of the world's business is employed. In other words, the amount of gold in use becomes relatively less as bank notes and clearing-house devices are introduced to lessen the need of gold. If, then, the supply of gold at any time appears seriously short the remedy is to be found in a further development of the clearing-house principle.

Under the laws in force until the passage of the tariff act of March 3, 1883, national banking associations were required to pay a duty of ¼ of 1 per cent. each half year upon the average amount of their deposits and a duty at the same rate on the average amount of their capital stock beyond the amount invested in United States bonds. In order to enable the Treasurer to assess the duties it was provided that such associations should make returns of the average amounts of their deposits and of their capital stock (with the exception mentioned) for the six months next preceding the most recent first day of January or July. A question having arisen as to the effect on these provisions of the act of March 3, 1883, which repealed the taxes imposed by the laws previously in force, "except such taxes as are now due and payable," the matter was referred to the Attorney-General for decision.

The Aitorney-General has just rendered an opinion in which he holds that the duties, the collection of which is provided for as set forth above, could not be assessed, nor the amount thereof ascertained, until the expiration of the half year, and that no part thereof could be regarded as becoming due prior to that time; that such taxes were not due and payable on March 3, 1883, for the period intervening between that date and Dec. 31, 1882. The conclusion arrived at by the Attorney-General is that duties are not assessable and collectable on the deposits and capital stock of national banking associations for the period between the date of the act of March 3, 1883, and Jan. 1, 1883. A question concerning other than national banks and involving a similar principle is decided by the Attorney-General upon the same grounds.

The *Mexican Financier*, in discussing the project for a new Mexican loan, points out that while "her resources are beyond all question," and her "ability to repay such loans as her present condition may cause her to contract is absolutely certain," there has as yet been nothing in the public or official conduct of the government than can lead her to expect anything but the coldest reception and the firmest denial if she attempt to effect a new loan abroad; that time will be lost in endeavoring to effect any such negotiation. In other words, the past conduct of the government of Mexico in dealing with her finances has been so disgraceful as to debar further negotiations. The *Mexican Financier* and the London *Economist* are of one mind with respect to the feasibility of the proposed new loan. They undoubtedly reflect the true disposition of the London loan market. It remains to be seen if the home money-lenders of Mexico will come forward with the required capital. The *Financier* recommends that the loan be taken at home.

THE UNITED STATES AS A SUGAR PRODUCER.

The annual consumption of cane sugar in the United States may be roughly placed at 2,100,000,000 pounds, or about 40 pounds for every man, woman and child. Inasmuch as the news from the Louisiana sugar parishes continues to be quite favorable, and opinions prevail there that the yield of sugar will be remarkably large, the outturn of the Louisiana crop may be placed at about 225,000,000 pounds, or say, one-tenth of the total quantity consumed. The consumption of foreign sugar in 1882 was noticeably in excess of that in the preceding twelve months, about 2½ per cent. or about 50,000,000 pounds. Louisiana sugar, that is, domestic cane sugar, has been protected, and still is, by the tariff. The claim has long been made that protection is all that is required to ultimately develop the sugar industry so that the entire home market can be supplied. Yet we have just noted that the gain in importations of foreign sugar in 1882 alone amounted to over 22 per cent. of the entire probable yield of sugar in Louisiana in the present year. This looks as if the requirements of the home market had long since distanced the pace at which the domestic production is proceeding, and as if the gap were being constantly widened.

Various southern journals have been publishing extended accounts of the results of the new system of drainage in Florida. Immense tracts of land, heretofore impenetrable marshes, have been drained by means of a network of canals. The soil so reclaimed, rich with vegetable deposits of ages, is to be turned over to the agriculturist. This work of reclamation has been just begun, and the results already attained warrant the assertion that a large region specially adapted to the cultivation of cane sugar will thus become available. It has also been pointed out that in southern Texas sugar cane may be successfully cultivated. It is in this way, then, that the sugar producers believe the commodity may be more largely found at home, although it has not been claimed that Florida and Texas, in addition to Louisiana, will be able to yield 943,000 tons, which is the quantity now required. A more comprehensive idea of the quantity and value of the foreign cane products required in the United States may be obtained from the official statistics of importations during the year ending June 30, 1880, and again in the fiscal year ending in 1882. The free importations of sugar and molasses were from the Sandwich Islands under the reciprocity treaty:

FREE IMPORTATIONS, 1882.		
Sugar, pounds	106,181,858	$6,918,083
Molasses, gallons	152,708	25,257
DUTIABLE IMPORTATIONS, 1882.		
Brown sugar	1,873,546,056	$83,147,135

Molasses, dutiable, gallons	38,008,930	8,705,243
Total value molasses	38,120,880	$88,725,078
Total value, above importations		$88,771,565

The figures given above show to some degree what remains to be done in the way of raising our own sugar, and the almost fruitless task of undertaking it with the cane variety, on account of the limited area in which it may be profitably grown. But of late we have begun to hear a new version of the old, old story concerning sorghum. For thirty years American farmers have been trying to make sugar and molasses from sorghum, but almost universally with disheartening results. Sorghum sugar was not popular after being once tasted. As has been alleged of it, "no small boy would ever steal sorghum sugar," and against that indictment not much remained to be said. It appears, however, that there are three sorghum sugar manufacturing companies in the United States which have, without parade or trumpet, quietly developed a successful method of producing a light-yellow colored sugar from sorghum with an unobjectionable taste. One concern is said to have made over 100,000 pounds last year, and 25,000 gallons of molasses. But the most striking part of the record is that it declared a 30 per cent. dividend. Another of these companies is reported to have made over 250,000 pounds of sugar and correspondingly large profits. Illinois and New Jersey are known to claim each one of these successful sorghum sugar manufactories. The causes of repeated failures with sorghum heretofore are now said to be want of proper machinery, lack of requisite attention to the growing cane, and not sufficient care in manipulating the juice after extraction. The success of sorghum sugar making in this country will mean a great deal, for the sorghum stalk will grow where Indian corn will, and its seed forms an excellent feed for cattle. The beet sugar experiments which have been made in this country have universally been failures with the exception of that in California. Not for the reason that sugar cannot be made here from the saccharine portion of the beet, but from the lack of adequate arrangements to secure a permanent supply of beets.

In a recent number of the *American Protectionist* we find a letter from Henry A. Brown on the "Home Production of Sugar," in which he makes the statement that our normal capacity for producing sugars, cane, sorghum and beet, is unquestionably abundantly adequate to supply the country, and, in view of the inquiry made above, there is little reason to doubt it. But the remainder of Mr. Brown's letter, further than an exposition of the situation, is employed to argue in favor of the retention of a high tariff on foreign sugars. To remove the duty, it is pointed out, would be to cut off $40,000,000 revenue. To add a bounty tax of 2 3-10 cents per pound for the domestic product would prove a burden of about $7,000,000 per annum at the existing rate of production, and when the home production shall equal the demand (it is presumed within a decade!) this bounty tax will have amounted to $57,000,000. From this it is argued that the American consumer would not have secured cheaper sugars. We fail to see anything calling for special attention in this special plea for the Louisiana sugar industries. It is a kindred one to those which have been, and will be made for some time to come, in behalf of other and easily named domestic industries. It is a matter of considerable doubt if the sugar cane area of this country ever can supply the already enormous and steadily growing demands of the United States for sugar. And even Mr. Brown seems to recognize that to meet the home requirements by domestic production sorghum and beet sugar will have to be depended on. "The only successful beet sugar factory in the country" is at Alvarado, Cal., within the reach of the free sugar from Hawaii. As for the pioneer successful sorghum factories, they appear to be doing pretty well as infant industries, with dividends amounting to 30 per cent. per annum. It appears to us that these facts carry more weight with them than all discussions as to the best methods of fostering home competition with foreign sugars, bounties and the like.

THE DUTIABLE VALUE OF MERCHANDISE.

The subject of the dutiable value of merchandise was one which received much consideration from the Tariff Commission and from Congress. The testimony of merchants was uniform that the duties on what are known as "charges and commissions" should be repealed. The Tariff Commission regarded the repeal of the section of the statutes imposing these duties as very important, and said:

"Perhaps the most important and radical change recommended is the repeal of the sections of the existing law requiring the addition of inland transportation costs and charges to the basis of an ad valorem duty. Although the repeal of these sections will effect a large reduction of duties, especially on bulky goods, such repeal was strongly recommended, both by custom-house experts and importers, as a measure of relief from the greatest source of annoyance in the liquidation of duties on imported merchandise." The repeal of these duties affected certain species of earthenware more seriously than it did any other article embraced in the tariff schedules, and, for that reason, the Tariff Commission recommended an increase in the duty upon those articles from 40 to 50 per cent. The argument of the commission was, in one sense, a sound one, for there certainly can be no reason why a box sent with silks from Lyons should pay 60 per cent. and another box sent with figs from Smyrna should pay nothing. The boxes were simply the arbitrary vehicles of trade, while the commissions were purely imaginary and arbitrary. The compulsory addition of these petty charges yielded no considerable revenue, and caused incessant annoyance to the importer.

Congress repealed, or tried to repeal, these charges. The construing officers of the Treasury have been considering, since Congress adjourned, the manner in which this law shall be enforced. At last a decision has been made upon the following question:

"What items of cost are to be regarded as included in the value of imported merchandise, under the act of March 3, 1883, which repeals the duties on charges and commissions incident thereto?"

The question came up as to the application of the language of the seventh section of the new tariff act, which repeals the duties on charges and commissions that are specified in section 2907 of the Revised Statutes in this form: "whether duty will be exacted on the market value of wine imported in bottles with certain labels, or upon the full value of such wines previous to the bottling and labeling?" At the outset, therefore, the customs officials were met with a problem which Congress either did not anticipate or did not care to solve.

Under the old law the following elements entered into the dutiable value of merchandise:

1. The cost, or actual market value, of the goods in the country from which they are exported, and at the time of exportation.

2. The cost of transportation and shipment, all expenses included, from the place of production to the vessel in which exported.

3. The value of the sack, box or covering in which the merchandise was contained.

4. Commission at the usual rates, not to exceed 2½ per cent., and brokerage, export duty, and other actual charges in preparing the goods for transportation or shipment.

This broad margin made it possible to include in these charges the expense of agents sent to Europe, or any other constructive expenses, and, of course, opened the door to extensive frauds.

The Treasury Department decides that the dutiable value of merchandise is now to be considered as confined to its actual cost, or market value, or wholesale price, as provided in section 2906 Revised Statutes, which was not repealed. Under this ruling such items of expense are to be included in the dutiable value as are necessary to put the goods in a salable condition at the place of the growth, production or manufacture. The actual market value will include the cost of the box, package or covering in all cases where the merchandise is actually purchased in boxes, packages or covering. The exact ruling of the department is contained in the following language:

"This department holds that the cost, or market value, or wholesale price, which is now the basis of assessment of ad valorem duties, includes the elements of expense which have been incurred in placing the goods in the condition in which they are actually and usually held for sale in the foreign market." The value of the box which contains cigars, the value of the cards upon which buttons are mounted, and the cost of cartons containing artificial flowers, will be included in the market value. Anything will be included in the dutiable value which is necessary to put goods in a marketable condition. The market value becomes the dutiable value. The cost of coverings for transportation and shipment, and all the other items mentioned in section 2908, have ceased to be a part of such dutiable value.

MR. NIMMO ON AMERICAN MANUFACTURES.

The relations of American manufacturing interests to the prosperity of the country have been very much discussed during recent years, and an abundant use of statistics has been made both by those in favor of and by those opposed to the intervention of government to protect those interests; but the materials for an intelligent decision of the question involved (apart from the economic principles upon which so much current discussion is based) cannot be said to have been as yet collected. The diffi-

culties of the subject are very considerable, owing, among other things, in great measure to the variety and complexity of the interests involved and to the extremely slight progress thus far made in the intelligent use of statistics. Such being the case, light upon the subject from any capable source is eagerly welcomed by economic students, and for this reason much interest naturally attaches to the paper on "American Manufacturing Interests," contributed by Mr. Nimmo the Chief of the Bureau of Statistics of the Treasury Department, to the *North American Review* for June.

Mr. Nimmo does not seek to conceal the standpoint from which he regards the question we have referred to, but declares that the principal object of his p per has been to present facts in regard to the industrial interests of the country which prove the wisdom of Hamilton's policy respecting the protection of manufactures. He begins with a sketch of the early history of manufactures in the colonies. Notwithstanding the severe repressive measures which were adopted by the British Parliament with a view of stamping out colonial manufactures, the latter prospered. To such an extent indeed was this the case that "the colonists were able to meet all their home needs and besides to clothe their army and supply its commissariat during the terrible struggle of the seven years' war," and the writer adds that "not the remotest allusion is made in the Declaration of Independence to the repressive measures of Great Britain in regard to colonial manufactures, and it is believed that such mention would have been more likely to provoke a smile than to excite indignation. It may be noted in passing, that facts such as these are used by the opponents of protection to prove that the adoption of that policy was unnecessary. In Mr. Nimmo's view, however, they apparently do not bear that construction.

Hamilton's policy was seemingly not suggested by any necessities of the colonial period, since, as we have just seen, the active opposition of England when in a position of authority was unable to cripple seriously the infant industries of the colonists. That policy was adopted on faith and on general principles, Hamilton not having at his command "the requisite statistics which would enable him to prove conclusively the correctness of his views—a fact which he frankly admitted." Mr. Nimmo proposes to consider "how far the postulates and the predictions of Hamilton have been sustained by clearly ascertained and recorded facts expressive of the commercial and industrial experiences of the country." He confines his attention to the growth of the manufacturing industries of the United States since 1850, but especially since the year 1860. He gives figures to show that the value of the products of manufactures has increased very greatly since 1860, and he adds that during the period referred to the manufacturing industries of the country were more highly protected than during any previous period in the history of the country. Mr. Nimmo admits, however, that as an historical fact the large increase of duties made during the early part of this period was prompted by the needs of national defense and not by any prevailing sentiment in favor of the protection of American enterprise. In the same space of time he shows that the foreign commerce of the country grew more rapidly than ever before, and that similar advances were made by all the other great business interests of the country, the means of transportation having more than tripled in extent and efficiency. There are those who would see in the comparison drawn by Mr. Nimmo merely a striking picture of the great advance in prosperity of the country and of the tremendous development of its material resources induced by general causes during the last quarter of a century; but, as will be seen, they bear another and a specific meaning for him.

The writer next proceeds to trace the influence exerted by the growth of our manufacturing industries upon the development of the other great business interests of the country. Into the details of this inquiry we have not space to follow him, but the main results arrived at may be briefly stated. Regarding the relative values of the products of manufactures and of agriculture, Mr. Nimmo estimates that the value of products of manufacture is from 80 to 90 per cent. of that of the products of agriculture, but that the relative productiveness of capital in manufacturing and in agriculture is as two to one. The latter conclusion, however, he admits to be based upon a special view of the subject. Another result to which Mr. Nimmo's researches lead him is that the manufacturing industries of the United States have become distributed and to a great extent nationalized, though from the figures given it appears that nine-tenths of those industries are still carried on in the northern tier of states. In regard to the influence of the manufacturing interests upon other industries, Mr. Nimmo points out that the mining of all metallic ores other than those of the precious metals is almost entirely dependent upon manufactures, that a large proportion of the freight receipts is derived from the transportation of manufactured articles and of material and coal required in their production; that manufactured products enter largely into the internal commerce of the country, and that a large proportion of bank credits is based upon manufactured articles. These considerations lead Mr. Nimmo to the conclusion that "manufactures and commerce and agriculture and mining and transportation, and the other great business interests of the country, take hold on each other in innumerable ways, and that as elements of national prosperity they are one and inseparable." With this view, we believe, most intelligent people will agree, but there is a very considerable step to the proposition which the writer has attempted to demonstrate, namely, that the relation sustained by the manufacturing industries of the country to its other great business interests is one of cause and effect. The fact that the country has prospered during a period when high duties were imposed, admittedly for a purpose other than that of protecting our manufactures (though that was incidentally done), by no means demonstrates that the protection was the cause of the prosperity. The logic of the paper in this respect savors overmuch of the *post hoc propter hoc* variety.

AMERICAN STEAM VESSELS AND OUR FOREIGN TRADE.

That the United States, whose surplus products sent abroad and whose return imports count up to millions of tons annually, should forego the profits of conveying the major portion of these in her own vessels is a phenomenon which has no parallel in the history of great maritime commercial nations. Previous to 1862 the carrying capacity of steamships engaged in foreign trade was about the same in the United Kingdom and the United States. The contrast at present is startling, being three to one against this country. Last year our foreign arrivals were 197 American steamers as against 1,168 British steamers; arrivals of German steamers were 223, of French 100. The tonnage of British vessels entering our ports approximated to 9,500,000 tons and of American to 3,500,000 tons. The loss from not taking our due maritime mercantile rank has been placed as high as $100,000,000 per annum, and possibly exceeds this amount. The causes, as all know, are historic, dating from our civil war, a period corresponding to the development of iron shipbuilding. Our position, however, in respect to an ocean marine is far from being such a despondent one as would seem to have been generally surmised. We are making decided headway in setting afloat ocean steamers. Capital is returning to the business. Without waiting for congressional legislation, which has been too much depended on for this revival, mercantile trading companies are being organized, and are having orders executed in our shipyards for vessels to run between California and ports on the Pacific coast, and to Australia, New Zealand, China and Japan. We hear also of projected lines of steamers between New York and ports of the Mediterranean.

The question as to whether or not we can build ships as cheaply in this country as in England is not of the importance that has been assigned to it. First cost of vessels counts but little in determining our power to cope with other maritime and commercial nations as carriers on the seas. Should a manufacturer erect a factory costing $30,000 more than that of his competitor on the opposite side of the street, it is not the difference in his outlay that will ruin him; results will depend on his managing capacity. So with first cost of vessels. The tendency of any large development of steam shipping is to minimize current cost. As the steamship is built out of the same materials as locomotives and railroad cars, namely, steel, iron, brass and wood, and as the United States now leads in the manufacture of these vehicles of transportation, and sells them to eighteen foreign countries, it can be no marvel if in time we lead in the manufacture of steamships. American shipbuilders are coming forward to aver that we build steamers as cheaply as those of Great Britain, and taking quality into account, even cheaper. In supplying steamers we already compete successfully with foreign countries. In addition to war vessels turned out for foreign governments, two score of American steamers run on the river Amazon, and they are multiplying on the Oronoco. In China they are creating a revolution in the river carrying trade, and large orders have been received for small steamers from Russia to ply on the Volga. It is worth noting in respect to shipbuilding that upwards of 1,000 vessels are being yearly built for the coastwise, lake and river trade, the first named being staunch sea-going vessels of 2,000 tons and upward. Our 175 American built ocean steamers are in service between the ports of the United States and England, China, Japan, Australia and Central and South America. American built vessels have displaced English steamers between New York and Cuba and Mexico.

Established steam lines allow of a very different policy being carried out by our merchants than that which they must abide by in the absence of regular communication, such as steamers best provide. Taking South American countries, it will be found that the importation of merchandise into these is on a well defined system, goods being thrown into those countries in quantities in excess of immediate consumption, while returns or remittances in payment for these large stocks have been picked up at the ea liest moment or hypothecated before they were produced. All subsequent direction of their produce for sale, all remittances of specie and bills drawn against articles in universal demand, have followed the line of commercial dependence. Every important state of South America is now making efforts to get free from the long existing state of indebtedness for merchandise and contract pledging of the best staples. They look to us for all the aids in this new system, and offer us opportunities never proposed to European countries. Any reasonable degree of effort on our part to divert the long existing commercial practice will be met more than half way. Our commerce with Brazil, from which we import more in value than any other nation—France and Germany, however, vastly exceeding our exports to that country—has particularly been diminished for lack of speedy communication. This fortunately has been remedied by the liberality of the Brazilian government, the new line of steamers placing New York within twenty days of Rio, and enabling us to lay down goods in that city quicker than than they can be laid down from Liverpool. The fact that European merchants have had their business houses there for many years may long continue an impediment both at South American, Mediterranean and other ports, but steam communication will quickly lead to better acquaintance with business methods locally prevailing. Our consular reports from numerous quarters show that the great mistake made by American manufacturers seeking to build up a trade at distant ports has been that they supposed it could be done by sending out agents and soliciting trade from samples. Offered a choice between purchasing from known European houses goods which are on the spot, and from a strange American house goods of which only the samples could be seen, with the certainty that the goods will not arrive for months, the foreign buyer continues to patronize European houses. There is but one way to secure trade. Goods must be put where they can be seen in bulk and shipped as soon as they are sold. In order to do this the establishment of lines of steamers is of vital concern. It will not be necessary to carry large stocks in such cases, for they can be regularly replenished; but to introduce most lines of goods into a country, they must be kept on hand at the ports which are the centers of distributive trade. It is the recognition of this truth which is favoring mercantile organization in establishing new steamship lines. In addition to effecting saving in freight charges, they assure the securing the profits of much indirect trade carried on in American products, while they will certainly serve to enlarge existing markets.

EGYPT AND ITS FUTURE.

The subject, "Egypt, Present and to Come," was interestingly discussed at a meeting of the London Society of Arts on February 27, by R. W. Felkin, of the Royal Geographical Society, who has evidently spent considerable time not only in the land of the Pharaohs, but in Soudan and other outlying regions at present or prospectively having relations thereto. Mr. Felkin's position appears to be that although in Egypt proper the people are downtrodden and overburdened with a debt of about £100,000,000—population about 5,500,000—and although they have not the means of turning to account the resources of their fertile land, still, with a proper amount of enterprise by Englishmen, Egypt and her commercially tributary regions may not only be raised to a higher plane of intelligence, even to thrift, and England will thereby be enabled to secure new, vast and exceedingly profitable markets. He makes a good case, and, speaking as he does from actual inspection and careful investigation, there is good reason to agree with most of the conclusions reached. The doubtful part lies in the probability of British capitalists raising and spending the amount of money required, and of putting in enough to bring the plans suggested to full fruition. In Soudan Mr. Felkin found numerous semi-civilized tribes, and others, of course, still barbarous. This great country is reported not to be a source of revenue, not alone on account of misrule and peculation from top to bottom of officialdom, but quite as much for the reason that a mistaken policy has been adopted of draining the country for present wants irrespective of its future. Notwithstanding this narrow-sighted policy, the residents of Soudan have become accustomed to Egyptian rule; a network of government stations has been established, and steamers are plying on the rivers and Albert lake. This means a long stride toward organization, and suggests that wise management alone is needed to secure the rapid development of an extensive and prosperous trade. On this point it is noted that "wise management," perforce, means European management, as the native governor or sub-agent has yet to be discovered (so Mr. Filkin intimates) who has not the habit of charging arbitrary commissions on all property passing through his hands. In regard to the future of Egypt proper, it is mentioned that the varying recurrence of comparative agricultural prosperity, which has resulted in greatly augmented exports and a succeeding influx of foreign goods, sufficiently shows that the people there are capable of a great advance, and of rising to prosperity. To gain this, four things are mentioned as indispensable—an enlightened government, just taxation, means provided for an extended irrigation of the soil, and encouragement given to cultivate it. An enlightened government it has not. The taxes are farmed out, and the governors bastinado the money or its equivalent out of the residents, each in his own district. This prevents the agricultural population from earning more than enough to support themselves, for they know that any excess they may lay away will become known, and will have to be given up to the tax-gatherer. Egypt is, then, being leeched to a state bordering upon a practical enslavement of the fellaheen, who comprise 5,000,000 out of the 5,500,000 total population. A canal is proposed from Alexandria to the Red sea to revive the port named and give an independent route

which could be doubly utilized to irrigate the lands. A railway from Suakim, on the Red sea, to Berber on the Nile, a distance of 250 miles, is projected. It is estimated to cost £2,500,000, including rolling stock, but it would open up Soudan to the outer world. The latter already grows unrivalled long-staple cotton, by aid of slave labor, and manufactures it into cloth by means of crude machinery, the use of which has been taught the natives. From Berber, steamers already ply to the chief towns of the equatorial provinces, to Bahr-el-Ehazel and to the Blue Nile. The productive capacities of this vast interior are unquestionably great—probably much greater than has been believed by many who have given the subject considerable attention, as the more recent explorations of Soudan indicate. The renewed agitation by De Lesseps of his project to create an inland sea by flooding the desert of Sahara and thus irrigate vast regions, and bring Tunis and Algeria nearer to the heart of Africa by means of ships and steamers, renders English ears readier listeners to Mr. Felkin's remarks. The French on the Senegal (west) coast of Africa are laying rails to the Niger from the coast, and menace a commercial conquest of the interior from that direction. It would be strange if, after all, Egypt's curse—the cupidity of her conquerors—should prove to be the very agent by which her condition is to be improved and her uture brightened.

OCCASIONAL NOTES.

While it is too early to deal conclusively with very numerous reports as to the condition of the wheat crop in the Province of Ontario, the secretary of the Dominion Bureau of Industries, who makes a report thereon, states that there is much of an encouraging character to report concerning the advancement of spring work on the farms. The replies respecting the staple Canadian crop (in Ontario) are singularly classed. Eighty per cent. of the winter wheat belt lies west of the meridian of Toronto. From this region the replies are generally unfavorable, while from the remaining portion of the province the report was never better. The uncertainty of the outcome arises from the fact that while the fall wheat at the west has been winter-killed in places, where it has apparently suffered it is likely in many instances, with favoring weather and a warm sun, to revive and bear fruit. This indeterminate element it is, then, which prevents any sort of an estimate on the outlook. In the east the winter was a quiet one. The snow lay on the ground without intermission and the seed was kept warm. In the west, however, the ground was denuded and whitened again a half-dozen times; the great Ohio valley storm in the latter part of January swept northward as far as the Georgian Bay and east as far as Toronto with serious effect on the planted grain. Except in two or three counties in the territory west of Toronto specified the reduced area to wheat is roughly placed at 20 per cent The eastern section of the province is expected to produce a full crop. The quantity of wheat in farmers' hands is above the average for this time of year, although the bulk of last year's crop has been marketed. There is a large surplus of hay, but the supply of oats is not more than is required for home consumption. The number of fat and store cattle is not large, and the demand for them continues active.

The World's Industrial and Cotton Centennial Exposition, of which so much has been hinted of late, has at last taken definite shape. This great fair, a worthy successor to that which celebrated the robust infancy of the new agricultural and industrial south, at Atlanta two years ago, will be held at New Orleans some time between December 1, 1884, and May 31, 1885. This brings it into the great southern metropolis in its busiest season, with its world-famed Mardi Gras festival to come in the midst of it to add to the enjoyment of visitors. The charter has been perfected, and several important details other than those named above were decided upon. The act provides for the appointment by the President of the United States of thirteen commissioners, who shall act as a board of directors, six of them upon the recommendation of the subscribers to the enterprise, and five upon the recommendation of the National Cotton Planters' Association, to whose suggestion the enterprise mainly owes its origin. The following were the recommendations made: By the subscribers—Albert Baldwin, E. A. Burke, Gus. A. Breaux, S. Hernsheim, John V. Moore, Duncan F. Kenner, W. B. Schmidt. By the Cotton Planters' Association—Samuel H. Buck, New Orleans; E. M. Hudson, New Orleans; Edward Richardson, Mississippi; Thomas Hardeman, Georgia; Gov. R. M. Patton, Alabama; Frank Morehead, Mississippi. Speaking of these gentlemen, the New Orleans *Times-Democrat* says that they form a strong and a thoroughly representative committee, and that it can safely be counted on to raise all the funds and perform all the work necessary to assure success. Of course this recommendation may be considered equivalent to appointment.

In view of the concern manifested in the case of Egypt while its fate was still trembling in the balance, it will not be without interest to observe the political settlements made in that troublesome country. An outline of the system under which the inhabitants of the Nile land are to be initiated into the mysteries of modern constitutionalism is given by Professor Sheldon Amos in a recent letter to a London journal. The ballot, it appears, is made universal for all elections except where a village elector cannot read and write, in which case his vote may be publicly recorded. The capacity to read and write is made an indispensable qualification of all members of provincial councils and of all members of the local commissions appointed to conduct and supervise elections. Where more members than one have to be elected the principle of plurality of votes and cumulative voting is always applied, the idea being to protect the rights of cohesive minorities, such as the Coptic Christians. There are three classes of assemblies, the "provincial council," elected by elector delegates from the villages; the legislative council, of which certain delegated members are elected by the provincial councils (the remainder being permanent nominated members), and finally, the general assembly, a body including the legislative council, and also certain members having a high property qualification especially elected by the electors-delegate without the intervention of the provincial councils. For the present the government is to take the formal initiative in legislation, neither of the higher assemblies having the right to throw out bills. They may remonstrate, however, and in case a law is passed against their remonstrance the government is required to formally communicate its reasons to the assembly concerned. The legislative council may also invite the presentation of a bill. This latter provision will be seen to contain, as Professor Amos suggests, the germ of a real legislative activity. A fact of particular interest, as indicating the change that has come over Egypt during the year, is recorded by a writer in the *Journal des Débats*, viz., that English is surely and not slowly superseding French in that country. The writer referred to says that the donkey boys devote themselves assiduously to the acquisition of English, and notices that whereas formerly he was usually saluted with the French morning and evening greetings, upon a recent visit he was somewhat surprised to be greeted with the common English salutations "Good morning" and "Good-by."

The present is peculiarly an age for new projects, and among the citizens of the great republic, proverbially inventive, it is not difficult to secure sympathetic attention for novel and remarkable enterprises, especially for such as involve the expenditure of public money. Encouraged by considerations such as these some person probably unknown to fame, and seemingly not very anxious to acquire it, has broached the idea of a "Centennial History of the United States," to be written by a commission under the guidance of a director and subject to the supervision of Congress. The expenses are of course to be borne by the government. It is not unlikely that in this era of centennials of one kind and another some patriotic persons may be inclined to further such an undertaking as that referred to. To such and to the individual who is responsible for the original suggestion, it may not be amiss to remark that a history, according to the accepted canons, is or should be a work of art, and that the essential unity necessary thereto would be wanting from a work enacted by a commission, especially such a commission as would be likely to be appointed in the present transitive stage in our politics. Again, the government of the United States is an interested party as regards its own history, and a certain delicacy should prevent it from becoming its own annalist. Further, the originator of the scheme will not secure for himself that fame which is desired by every one who creates "a possession for eternity," the credit, if any, accruing from the execution of the work, being likely to be scattered and lost, as we see responsibility is in such cases, among the members of the commission. Finally, it might be suggested to the vigilant guardians of the public purse in Congress that it is not unlikely that the people may be fleeced heavily in order to provide salaries for a board of historians and to secure bound and printed wastepaper to the second-hand dealers therein at the lowest cash prices. Altogether the project looks as if it might be fitly described by a very familiar word of three letters.

Queen Victoria's recent efforts to discourage the consumption of lamb have not been well received everywhere in England. At a recent meeting of the Berks and Oxon Association for Promoting the Welfare of Agriculture resolutions were unanimously passed declaring that, while the meeting fully recognized the desirableness of an increase in the stock of sheep and in the meat supply, it believed that discouraging the use of lamb meat was a very sure way of defeating both of those objects, and also that the sudden diminution of the demand for lamb meat would inflict serious loss on those who had arranged their farming operations for the production thereof. The above is probably only one among very many instances where the action of those in high quarters is felt to be injudicious and in its way oppressive. One would have thought that instances enough were on record of the evil effects of the ill-considered interference of the state (or of those high in station therein) in deranging ordinary industrial arrangements, but it seems that the lesson has not been thoroughly learned as yet.

The *North American Review* for June is fully up to its usual standard. We notice fully elsewhere Mr. Nimmo's article on "American Manufacturing Interests." President D. C. Gilman contributes an interesting paper on the "Present Aspects of College Training," in which he remarks upon the extent to which money has been invested in college buildings during the last two decades, and urges an increase of the funds devoted to the maintenance of the academic staff. He recognizes that the teachers and not the buildings form the strength of the college, and that unless liberal provision is made for high-class teachers the cause of higher education is likely to suffer. The troubles in Ireland and the possible complications arising thereout, have suggested to Mr. Edward Selt an essay on "The Abuse of Citizenship." A well sustained attack on a great reputation like that of Herbert Spencer is always interesting, and for this reason Prof. Isaac L. Rice's paper on "Herbert Spencer's Facts and Inferences" will be found to be entertaining reading. The writer charges, among other things, that Mr. Spencer does not always correctly apprehend the authors to whom he refers, and impeaches him of a want of historical accuracy in his essays on political and social science. In particular he dissents strongly from Mr. Spencer's claim that the evolution of society consists in a change from the less coherent to the more coherent, accompanied by a change from the homogeneous to the heterogeneous, and maintains that while viewed from some particular aspects or in some particular epochs evolution manifests itself by such a change, yet that in other epochs or viewed from other aspects evolution is manifested by a change in the opposite direction. Mr. Spencer's generalization that with the advance of civilization status passes into contract, is declared to be a half truth. The writer combats also Mr. Spencer's assertion that "the claims of the body politic are nothing in themselves, and become something only in so far as they embody the claims of its component individuals," and opposes the English philosopher's narrow limitation of the sphere of state activity. Mr. Wm. M. Springer's article on "Incidental Taxation" is a criticism of the present tariff system of the United States, which, the writer declares, violates most of the classical canons of taxation. Adam Smith's fourth rule, viz., that every tax ought to be so contrived as to take from the people as little as possible over and above what it brings into the public treasury, has in particular been disregarded, says Mr. Springer, for "by the imposition of discriminating duties the consumer is obliged to pay two distinct taxes, only one of which is paid to the government; the other goes to the producer or manufacturer of the article or is lost on unprofitable industries." To such an extent has this been carried, the writer adds, that "the people of the United States have been subjected to a burden of at least $556,000,000 every year for the past twenty years, making an aggregate of over eleven billions of dollars, not one dollar of which went into the national treasury."

We are in receipt of a bulky pamphlet entitled "History of American Shipping; its Prestige, Decline and Prospect," by Charles S. Hill, of New York. While claiming, of course, that a nation's shipping is an indispensable influence in national and international relations, the statement is made that "the American shipping has generally involved a loss of capital." The conclusion reached is, that the government cannot coerce capitalists into financial loss except through their enthusiasm for national honor and industry—"hence our national dilemma." It is explained, with a startling use of alliteration, exclamation points and display type, that our present humiliating condition is due to "burden, bounty and booty." The burdens placed upon American shipping through excessive port, light-house, quarantine, consular and other charges, are elaborately set forth. The recapitulation under the head of "bounty" consists mainly of a comparison of the sums paid American and foreign vessels for carrying the mails, whereby the excess of the latter is brought prominently to the surface. The "booty" consists, we are told, in an organized congressional opposition to plans for the revival of American shipping, said plans including a system of subsidies. The "booty" is explained as accruing to the British capitalist, shipbuilder, artisan and insurer, who monopolize the business which we thus throw away through a refusal to pay the Cramps, Harlan & Hollingsworth, John Roach and others, subsidies to continue a business which in the absence of said subsidies (by inference) would be unprofitable. "British gold" in Congress, and the foreign lobbyist complaint are discussed with all the fervor of italics and big caps. Portraits of the prominent shipbuilders named are given, as well as numerous full-page wood-cuts by artists who unquestionably would require a subsidy to do a profitable business if dependent on the merit of this work for trade. On the whole, the book is, to say the least, a rather slashing document to come from the pen of the statistician of the State Department of the United States.

SPECIAL CORRESPONDENCE.

THE ST. LOUIS FREIGHT BUREAU.

St. Louis, May 21.—The St. Louis Freight Bureau is a novel and interesting business institution, which was started as an experiment, but almost at once commanded recognition as a permanent necessity. It was organized something over four months ago, and had no close counterpart among the accessories to commerce in this country. Lately, however, the business men of Louisville have established a freight bureau modelled after this one, and the leaders of trade in Chicago are in the process of duplicating it in their brisk city. Cincinnati merchants are also making diligent inquiry into the workings of our freight bureau, with a view of effecting a similar organization.

This institution was established for the general purpose of concentrating the local commercial influences and intelligences upon transportation questions in such a way as to increase St. Louis trade. The city had been denied its proper advantages at points nearer to this than to any other market. As steps toward the general end it was desired to make St. Louis supercede East St. Louis as the actual railway terminus of eastern business. An obstacle to this was the bridge toll as an arbitrary tax, costing our trade half a million dollars per year. It was desired to secure the merging of the bridge toll into rail rates. Another reform in view was "the change of our basis of freight rates from the seaboard from the arbitrary rate of 119 per cent. to the actual distance of 116 per cent." Again, as to business in the southwest, there was in force an arbitrary tariff system which could not be defended upon any fair principle of transportation, and a revision of the whole system of freight rates and classification to and from the west and southwest was sought to be secured, basing it upon the actual mileage to the various points by the most direct routes. Thus it was expected that St. Louis would acquire advantages equal to those of Chicago and Kansas City in competing for the trade of the vast regions named. Direct export and import via New Orleans were also believed to be practicable and important in building up the foreign commerce of St. Louis. Confidence was felt that by combining influences and aggregating freight, thus increasing tonnage, and consequently reducing ocean rates and placing this interest under one control, ocean rates could be reduced so that freight from Liverpool could be laid down in St. Louis almost as cheaply as in New York—for freights from New Orleans are less than 50 per cent. of rates from New York. At the same time and by the same influences export rates from New Orleans could be greatly lowered. Finally, with no centralization of forces, our shippers and receivers of merchandise were finding almost daily difficulties and disadvantages as to shipments, to the overcoming of which no one man could give sufficient time or bring sufficient influence and effort. By combination under one controlling agency it was hoped that these troubles could be greatly avoided.

About two hundred business firms and corporations of St. Louis organized to accomplish these and

collateral purposes as far as possible through a freight bureau, for the support of which during two years of proposed experiment they subscribed what funds were deemed to be sufficient. But it is no longer regarded in the light of an experiment. A manager was secured who had long been at the head of the freight department of a leading railway of the southwest. He selected an assistant thoroughly acquainted with the commercial circles of the city. This modest force constitutes, so far as public attention is concerned, the active element of the St. Louis Freight Bureau, though it is supplemented, of course, by the gratuitous yet valuable services of officers and committees selected from the subscribing members of the organization.

If the idea is entertained at all by the reader, let it be dismissed that the mission of this bureau is to fight railways, in the new-fangled, anti-monopoly sense. On the contrary, its mission is to subdue clashings and establish harmony between railway and shipping interests, which are so inseparably dependent upon each other. Several great railway corporations and at least three river transportation companies are subscribing members of the organization and in hearty working sympathy with it. There is difficulty in defining the precise functions of the bureau. It adjusts differences without strictly arbitrating them. By no means can it be said to dictate rates, yet it effects substantial and desirable changes in rates. It is an attorney in presenting claims and pleadings for shippers, yet stands as an *amicus curiæ* in relation to the railways. It effects its ends through the arguments and influences which strictly pertain to cold-blooded and unsentimental business, and in its operations there is no balderdash of pretense that the shipper and the railway are not equally selfish regarding their respective interests. In so far as the bureau manages to render this mutual selfishness reasonably consistent and symmetrical, that far it is regarded a success—for it really aims at no more.

What has it accomplished in its four months of work? Well, for instance, the rates in effect January 1 on the St. Louis & San Francisco road had a marked tendency to divert the trade of southwest Missouri and southeast Kansas from St. Louis to other markets. The arguments and business considerations advanced by the freight bureau to the freight department of that road resulted in the establishment of unusually just and equitable rates. Dakota and the great states of Iowa and Minnesota had been comparatively unoccupied by St. Louis trade. By the warm coöperation of the Chicago, Burlington & Quincy people with this bureau in reforming rates, that grand commercial territory has been opened up to us on an equality with competing markets. St. Louis merchants obtain Chicago rates from East St. Louis to all points on the Chicago, Burlington & Quincy railroad. Owing to the same agency, every change in rates made by the Missouri Pacific system since January 1 has been to the advantage of St. Louis trade. Rates reaching the trade of southwest Missouri, part of Kansas and portions of western Tennessee have been greatly improved by the alterations made by the Gould roads, and entered upon in a spirit of fairness.

The Wabash and the Missouri Pacific system have been influenced to place on sale 1,000-mile tickets, available to country merchants coming to St. Louis and returning.

The abolition of the bridge arbitrary rate is desired by the bureau. Enough has been accomplished so that it may be relied upon that the trunk line pool will not include all the east and west lines until this abolition has been consummated.

By reason of the arguments and inducements brought forward by this bureau, the Harrison Steamship Line, direct from Liverpool to New Orleans, has been established. Regular arrivals and departures began about April 1. The success of the trial trips indicates that it will have business enough for permanence.

By suggestion of the bureau, the management of the Missouri Pacific system have directed and instructed their agents at El Paso and Laredo as to serving as forwarding agents for our merchants in their trade with Mexico, and in attending to the passage of goods through the customs houses, etc.

The bureau has collected and arranged a vast amount of general railway and business information, and placed it at the command of our merchants.

During the four months under review 320 formal complaints have been filed with the bureau manager. In some cases the complainants were at fault through lack of familiarity with the methods of railway business. In other instances the railway officials cheerfully corrected mistakes or injustices.

Much has been accomplished in various matters not here alluded to, which, however, are not in a condition of sufficient forwardness to be estimated as completed results. E. J. D.

CONDITION OF THE MILLING INDUSTRY.

Minneapolis, Minn., May 17.—My attention has been directed to an article published in a Milwaukee journal and largely copied into other papers, on the depressed condition of the milling industry of the country, especially at Milwaukee and Minneapolis, giving as the chief causes excessive milling capacity and the high price of wheat as compared with flour. The latter is undoubtedly the chief factor in producing a temporary stagnation in the milling industry of the country. It is not true, however, that the milling interest at Minneapolis has suffered materially from any cause during this season. The output of flour has been for the first eight months of the crop year, from September to May, 2,790,205 barrels against 1,763,922 barrels during the same months in the preceding crop year, and in no month, except April, has the product of the mills been less than in the same month in any former year, and there has not been at any time large accumulations. If the high price of wheat, as compared with flour, is injuriously affecting the milling industry, as we admit it is to some extent, let us look for the causes which produce this state of things. First, I think the principal cause lies in the effort of railroad, land and territory speculators to create a boom that should stimulate immigration to the west and northwest, give promise of large tariffs to the railroads and as a consequence large dividends, enhancing the value of the stock on the market and enabling land and town-site speculators to draw immigration to their locality. Cities, states and territories have joined in the attempted boom. As the surest way to accomplish this large crops must be reported in the west and northwest and large profits in farming. Before the last harvest was ready for the sickle plans were perfected and reports of fabulous yields of wheat were prepared, and before harvest was over in the winter-wheat districts, the aggregate yield of wheat in the country was fixed at 600,000,000. Newspapers were eager to spread the news, and before the crop was secured this report had been published in every country and in every language in any way interested in American breadstuffs as consumers or as competitors for the trade. The effect was just what might have been expected. Consumers at home and abroad argued that with such a store of wheat in America flour must and will sell at much lower prices, and dealers, large and small, adopted the hand-to-mouth system of purchasing. With the ordinary output in the fall and winter stocks of flour would accumulate under such circumstances. As spring advanced, millers, having little confidence in the keeping quality of their winter-ground flour, ordered their correspondents to meet the market and sell their flour. This of course meant lower prices or any price it would bring. This state of things applied especially to winter-wheat flour. There was not a large stock of spring wheat flour on the market. This explains the cause of the depression in the flour market. The men engaged in the wheat trade knew the wheat crop of the country had been over estimated by almost 100,000,000 bushels, and entered the market with full faith in the future, forcing millers to pay prices that the flour market did not warrant in its depressed condition, although at the time the bulk of the crop was marketed there was a small profit in its manufacture. Early in the present year speculators further advanced prices for wheat 10 to 15c., while flour continued inactive, and still lower prices were accepted. Millers continued to press their flour on the market for some time, but in March and April better counsels prevailed, and a large portion of the mills shut down and will continue idle until there is a better demand for flour. In spring-wheat flour a better feeling is apparent; orders are coming in, and the output of the mills has increased materially since the beginning of May. Another cause (and one that it is more difficult to meet and overcome) for the relative high price for wheat as compared with flour is the mania for speculative dealing, in other words, "gambling," making wheat a leading article in their games, but leaving flour entirely to the legitimate trade. The quotations for wheat for the present delivery or for any future month in any of the leading western markets is in no way governed by the value of the article for milling or export, but, as a rule, is governed by a ring who are clubbed together to manipulate the market in their own interest. They put prices up or down at pleasure, depending for their profits on the fleeces they take from the "country lambs," as Rufus Hatch calls the country speculators. Prices at Chicago are often advanced or depressed 5@10c. in as many days with not a farthing change in the value for export or in the value of flour. These prices, however, are an important factor in making the price millers must pay for their wheat. There is no one cause which affects the milling interest of the country more unfavorably than this. Let us now turn to the other causes given for the depression in the milling interest of the country, viz.: excessive milling capacity. This element has, I think, been given an entirely disproportionate importance; experience has proved that there is economy in manufacturing wheat into flour at the nearest point practicable to where it is produced. There is a saving of 30@40 per cent. in the freight, which is an important item.

Flour can be manufactured as cheaply in America as in Europe, and of much better quality than in any country to which our breadstuffs are sent. With judicious management millers can pay a premium on the value of wheat for export at any given point, and make a good profit on their business. So long as there are from 100,000,000 to 200,000,000 bushels of wheat sent to Europe from our Atlantic ports the milling capacity is not excessive. It may be that in some localities, to which there is but little wheat naturally tributary, there may be an excess of mills, but not in the country at large. S.

RAILROAD IMPROVEMENTS IN NORTHERN MICHIGAN.

Detroit, May 23.—The important announcement is made that the Marquette & Mackinac Railroad, in northern Michigan, is to be immediately extended from Marquette to the iron mines in the vicinity of Ishpeming and Negaunee. Up to the present time the Marquette, Houghton & Ontonagon Railroad as enjoyed a monopoly of the traffic between the mines and the port at Marquette. The owners of the new road between Mackinac and Marquette have recently tried to secure more favorable terms by which the products of the mines might in some measure be carried by their own line toward the east and south, instead of being obliged to go by the other road in the direction of Chicago. It was manifestly in the interest of the old Marquette, Houghton & Ontonagon road to keep the traffic as far as possible under its own control. It is not strange, therefore, that the owners of that road were very firm and exacting in their dealings with Messrs. Newberry, McMillan and Palms, the owners of the new line. But they seem to have gone beyond the bounds of prudence, and accordingly the Detroit capitalists have determined to build and own a road for themselves. The syndicate having the improvement in charge has already raised $2,000,000, and Mr. McMillan is reported to have said to the *Free Press* interviewer: "We won't have to borrow a dollar. We have got the money all raised, and after building the road can issue our securities. That is the way we did in building the Marquette & Mackinac Railroad. We raised the money, built the road, issued our securities, and still hold them."

As a part of this same general improvement, is to be noted also the construction of a branch line from the main road to Sault Ste. Marie. Thus the road extending northward from Detroit will be ready to receive traffic from both directions. Branching out in the form of a Y, the road from the Sault Ste. Marie will attract business from Lake Superior as soon as the canal is closed, while the branch from the mines will offer similar facilities to trade from the other direction during the whole of the year. It is announced that General Manager McCool, of the Marquette & Mackinac Railroad, is now at work superintending the locating of the extension to the mines, and that the work of grading and construction will begin in about thirty days. This portion of the improvement is through a rocky and hilly region, and it is estimated that the cost of the new road will be not less than about $40,000 per mile. The length of this extension, however, is only about seventeen miles. The branch road from the main line to Sault Ste. Marie, extending about forty-eight miles, passes through a region for the most part covered with heavy timber. Three preliminary surveys have been made, but the exact location of the road has not yet been determined.

The advantages offered by the new project are apparent. At present the only direct egress from the mining regions of the northern peninsula of Michigan is by way of Wisconsin and Chicago. The present location of the roads is such that all the ore coming over the Mackinaw & Marquette road has first to be brought over about fifteen miles of the line of a rival company. The high rates demanded and the inconveniences of transfer have amounted to prohibition. The consequence has been that all of the ores, so far as they have been transported by rail, have been carried by way of Wisconsin and Chicago. The proposed extension opens a rival line by way of southern Michigan and Detroit. Relief from what at present is practically a monopoly is likely to prove beneficial alike to the mining interests and to Michigan roads already constructed. The benefits to be derived from the extension to the Sault Ste. Marie are patent. The Canadian Pacific and the Grand Trunk have nearly completed their roads to the St. Mary's river, and when these are finished the bridge across the river must bring a large patronage from the northeast, east and southeast. Extensive ore wharves are to be constructed by the company at Marquette, and a mammoth iron ferry-boat is to be built at once for the transfer of cars across the Straits of Mackinac.

RECENT LEGAL DECISIONS.

[*Prepared expressly for* BRADSTREET'S.]

Enterprising retailers in many lines may not be uninterested to learn that the prevalent practice of including tickets for prizes in the sale of commodities amounts to keeping a lottery. Such was the conclusion reached by the Queen's Bench Division of the English High Court of Justice, in the case of Taylor vs. Smettem, on the 10th inst. The defendant and appellant, who was termed in the unappreciative law report a "cheap Jack," kept a tent open every Saturday night upon a piece of waste land, and in it he sold tea in pound packages at 2s. 6d. each. Every package contained in addition to the tea a coupon, which entitled the purchaser to the article named upon it. The magistrate before whom the defendant was brought for trial convicted him of having kept a lottery, and fined him £1 and costs. The case was argued before Mr. Justice Denman and Mr. Justice Hawkins on appeal, and they were of opinion that the business engaged in by the defendant amounted to the holding of a lottery. The judges declared their assent to the definition of the word "lottery" in Webster's dictionary, where it was described as a "distribution of prizes by way of chance." In the case before them each person buying a package of tea received a coupon for a prize, and these prizes were of infinite variety. Among them were a nickel-silver brooch, tea caddy, bread board, five stones of flour, a butcher's knife, glass vases, &c., an enumeration sufficient to set the unsophisticated wondering as to where the margin of profit for the dealer lay. The court thought that without doubt the defendant used the coupons to induce persons to purchase the tea and get a profit for himself, and although it was found that the tea was worth (?) the money, yet within that money must be included the cost of the articles named in the coupons. What was bought was a pound of tea and the chance of getting something in the nature of a prize, but what this prize would be the purchaser did not know. If the mere piece of paper had been sold nobody could doubt that it would have been a lottery, and the court was of opinion that it was immaterial that some specific article was sold with it.

An interesting question was presented in the Chancery Division of the High Court of Justice on the 11th inst., in the case of Barrett et al. vs. White et al. The plaintiffs, mineral water manufacturers, sought to restrain the defendants, who carried on a similar business, from sending out to their customers aerated water in bottles of a peculiar construction, which the plaintiffs claimed the sole right to use. It appeared that in 1875 a French inventor patented a glass bottle with a glass marble in the neck to serve the purpose of a stopper or cork and that the plaintiffs purchased from him the sole right to use the invention. These bottles were in the course of business returned to other manufacturers and the suit in question was brought to try the right of persons obtaining them in that way to refill and send them out again with aerated waters of their own manufacture. The action was dismissed with costs, Mr. Justice North being of the opinion that the plaintiffs' rights had not been infringed.

In the case of Bannon vs. Pugh et al. recently (May 15th) decided by the District Court of Ohio on appeal, the plaintiff sought to set aside a conveyance of property upon the ground that the defendant, Pugh, the grantor, was insolvent, that the conveyance was for a pre-existing debt, and that the circumstances were suspicious, the defendant mentioned continuing in possession of the property conveyed (a house and lot). The court in affirming the decision of the court below, refusing to set aside the conveyance, said that the fact that a man was insolvent did not prevent his transfer of property; if it did the vendee would require an abstract of the vendor's circumstances as well as of his title; neither did it forbid a conveyance in payment of a pre-existing debt. At the same time cases of the sort under discussion required close scrutiny, and if a

conveyance was claimed to be in payment of a debt that fact should be clearly established. The court said also that the possession of the property referred to by the defendant Pugh was explained by the fact that he held it as tenant, and added that the possession of real property by one was not inconsistent with title in another, nor was it apt to deceive for the reason that as to real estate persons look to the public records for the title and not to possession.

The case of The McBirney & Johnson White Lead Company vs. The Consolidated Lead Company, decided by Judge Force in the District Court at Cincinnati on the 16th inst., developed some points of general interest. The defendant, it appeared, was a corporation formed to regulate the price of lead, the stockholders in which were the different white lead manufacturers west of the Alleghany mountains; the plaintiff, an Illinois corporation, being one of them. With the view of regulating the price of lead an agreement was entered into between The Consolidated Lead Company and each member of the corporation, according to which the company was to fix from time to time the price at which lead should be sold by the different manufacturers, and in case of any manufacturer who was a member of the company being unable to sell in any one month his proportion of lead at the price fixed by the Consolidated Company, the latter was bound to receive from him the amount he had on hand. Under this agreement the plaintiff turned over to the defendant certain quantities of lead which it had not sold. The plaintiff claimed that it had not been paid in full for the amount turned over and brought suit to recover the balance alleged to be due. Among other grounds the defendant relied upon the position that the contract was void as against public policy, and that therefore the plaintiff could not recover under it. This was the view taken by the court, who, in ordering judgment for the defendant, said: There are two classes of cases where parties are allowed to contract to regulate the price of certain commodities. One is in the case of patent rights; another is where a man engaged in regular business sells that business to another, and in consideration of the price received also sells his custom. In these two cases the agreement should be enforced. But where parties combine to regulate the price of a commodity as against the whole public, they have no right to ask the public to enforce such agreement, and the public will not enforce it through its courts. The public have a right to demand that every man shall contribute his labor and industry untrammeled by agreement. It has been repeatedly held that agreements to control the price of commodities are in restraint of trade, and are illegal. The agreement under which the plaintiff claims is part of a scheme which was against public policy, and therefore void, and the court will not enforce it.

The case of Walker vs. Wiltberger, decided by the same court, raised a point of trade-mark law which was quickly disposed of. The proceeding was in error to reverse a decision of a lower court granting an injunction against the plaintiff in error, Walker, restraining him from using a certain trade-mark which it was claimed was an infringement on the trade-mark used by Wiltberger. It appeared that in 1853 one Benjamin Barlow was engaged in Philadelphia in the manufacture and sale of washing blue, put up in small boxes, and that in 1854 Wiltberger became the owner of the business and process of Barlow, and continued the manufacture of the article at the same place under the same name, "Barlow's Indigo Blue," selling it through agents in Cincinnati and Newport. Some years ago one John H. Barlow commenced the manufacture and sale of an article under the name of "John H. Barlow's Soluble Washing Blue." In 1881 J. H. Barlow executed an assignment of his right to Walker, declaring himself to be the inventor of the compounds for laundry purposes known as "Barlow's Indigo Blue." Walker introduced the compound to the trade of Cincinnati, claiming it to be the same sold by Wiltberger under the name of "Barlow's Indigo Blue." Wiltberger insisted upon his right to the name and procured the injunction against Walker, which was sought to be set aside. The District Court refused to disturb the injunction granted by the court below, saying that the rule was well settled that when a person has appropriated a mark to a particular species of goods, and has caused his goods to circulate with that mark which has become the known *indicium* of their being his, nobody shall be allowed to defraud him by using that mark and passing off the goods of another manufacturer as his. The ownership is allowed to him that he may have the exclusive benefit of the reputation that his skill has given to the articles made by him.

The distinction between larceny and embezzlement by an agent or servant was pointed out by Chief Justice Hargis, of the Kentucky Court of Appeals, in the recent case of Warmoth vs. The Commonwealth, decided on the 5th inst. The learned judge, speaking for the court, said that the felonious appropriation of goods by a servant who has merely the custody of them, is larceny, but where the servant has the possession of the goods, his felonious appropriation of them is embezzlement. He added, that generally where the agent has received goods or money to carry, deliver, control or manage for the principal, unless he parts with the manual possession and delivers the property to the principal, or another for him, or places it in some depository, such as a drawer or safe provided for the purpose and to which the principal or superior agents have access, or over which they have control, he cannot be convicted of larceny for a felonious appropriation of the goods or money, the offence being embezzlement.

BUSINESS NOTES.

The total number of failures in the United Kingdom and Ireland reported to *Kemp's Mercantile Gazette* during the week ending May 5 was 223, against 242 in the like week in 1882, and 280 in the corresponding week in 1881. There were 208 in England and Wales, against 217 in the same week in 1882, and 253 in the like week in 1881. Scotland had 15, against 17 and 12 each in the corresponding weeks in 1882 and 1881. Ireland had none (so reported), against 8 and 15 respectively in the like weeks in the preceding years.

The manufacturing jewelry trade at Providence has been more quiet this year than during the corresponding months for several years past, and this month shows no improvement, although many are making up goods ahead in anticipation of the fall trade, which, it is hoped, will set in soon after the July holidays. Orders are now being received, but the trade are obliged to figure close and at prices which show no margin to the smaller manufacturers, who labor at a disadvantage. The market is thought to be in a healthy condition and stocks in the hands of dealers are reported light.

The Boston boot and shoe trade during the latter part of the week was more quiet, many buyers having placed their orders and returned home. The trade however is good. Shipments to places outside of New England during the week were 29,960 cases, against 33,786 cases during the twenty-first week in 1882. Total shipments since January 1, 991,359 cases, against 909,805 cases same time last year. The bad weather has affected the shoe trade of Rochester manufacturers in the western states. The prospects for a good fall trade in the boot and shoe line are not regarded very favorable, and manufacturers are working cautiously.

The tenth annual meeting of the National Conference of Charities and Corrections will be held at Louisville, Ky., beginning on the evening of Monday, September 24, 1883. This conference is an organization composed of the official representatives of state boards of public charities, of prison commissions, of the associated charities of the larger cities of the United States, of charities aid societies, of state, municipal and private charitable and correctional institutions throughout the country, and of all other persons interested in charitable and reformatory work who choose to associate themselves with them in the study of social evils and their cure or prevention.

The secretary of the American Iron and Steel Association at Philadelphia has prepared statistics of all grades of rolled iron in Pennsylvania and Ohio, the largest producing states, during the past year. In Pennsylvania the output was 1,123,886 tons, a decrease of 130,980 tons compared with 1881. Of this amount the various districts in the state made the following output: Philadelphia, 86,908 tons; eastern Pennsylvania, except Philadelphia, 311,951 tons; central Pennsylvania, 209,677 tons; Allegheny county, 430,627 tons; western Pennsylvania, except Allegheny county, 84,723 tons. The production in Ohio during 1882 was 356,608 tons, or 10,881 tons in excess of the previous year.

New Jersey farmers are sanguine of a profitable season this year. The spring planting was later than usual, but no other drawbacks of moment are reported. New Jersey is the great trucking farm of the larger Atlantic seaboard cities and surrounding country. There is a large acreage to corn. Winter wheat is promising, though it has been killed in spots. There is an increase of acreage to pasturage, and the dairy interest is therefore gaining. The oat crop will be a large one. The potato crop cannot now be foretold. Although there was a late frost there are no reports of damage to the fruit trees. There are a number of flourishing peach orchards which promise exceedingly well. Altogether the outlook is considered favorable for a prosperous season.

A member of "the United States Treasury Cattle Commission" was to have left during the present week for Europe on "a special governmental mission." It has been reported that it has particular reference to the restrictions now placed on our export cattle trade with Great Britain and to our pork trade with Germany, France and elsewhere. It is added that this gentleman, Mr. J. H. Saunders, of Chicago, is under instructions to examine into and report upon the dangers, if any, from contagious and infectious diseases to which our live stock is exposed by further importations from European countries; to visit and report upon the international live stock exhibition to be held July next at Hamburg, and to make a general survey of the live stock interests of Europe, as compared with our own, under direction of the Commissioner of Agriculture.

The Bureau of Statistics has issued an estimate of the probable exports during the fiscal year ending June next. While not a thoroughly trustworthy guide while there is any doubt as to the foreign demand for certain of our surplus products during the coming weeks the statement probably approximates the forthcoming total and is therefore of interest. It shows that the exports of merchandise during the present year will probably exceed those of last year by from $60,000,000 to $75,000,000. Last year their value was $750,000,000. This year, judging from the work of nine months the total will be from $810,000,000 to $820,000,000. The total exports for the nine months ended March 31 were $650,000,000, against about $590,000,000 in the corresponding time of last year. If the increase goes on during the remaining three months at the same rate the exports this year will exceed those of any year in the history of the country, excepting 1880 and 1881.

The British labor market, as reported by the London *Labour News* of May 9, shows an increased demand for all classes of labor, although "strikes and rumors of strikes" were "unfortunately too numerous." In North Staffordshire it was hoped that the strike which was imminent might be averted, the masters having altered the 15 per cent. reduction to 10 per cent. At Newcastle-on-Tyne a strike had taken place among the engineers, which appeared likely to extend, and Glasgow engineers were asking for an advance of ½d. per hour. The Bristol copper-boiler makers were disputing, but at Huddersfield the attempt to stop the weavers' strike by arbitration had partially succeeded and some of the hands had gone to work. Building operations were active, and skilled artisans and others were in active demand. There was some improvement in the textile trades, and at Leeds all the cloth manufacturers were running on full time. There was some activity at Manchester, but mining in the Cornish districts was almost at a standstill. Emigration was steadily increasing.

The following national banks have been organized: The Peru National Bank, Ill.; capital $50,000; Joel W. Hopkins president, Henry Ream cashier. The First National Bank of Seneca, Kan.; capital $50,000; Willis Brown president, George E. Black cashier. The Merchants' National Bank of Grinnell, Iowa; capital $50,000; Samuel F. Cooper president, George H. Hamlin cashier. The First National Bank of Sabetha, Kan.; capital $50,000; Jackson Cotton president, Charles E. Clarkson cashier. The First National Bank of Tecumseh, Neb.; capital $50,000; James M. Irwin president, William A. Wolf cashier. The Cleveland National Bank, Ohio; capital $350,000; Sidney S. Warner president, P. M. Spencer cashier; The First National Bank of Meridian, Miss.; capital $50,000: Charles A. Lyerly president, C. W. Robinson cashier. The Drovers' & Mechanics' National Bank of York, Pa.; capital $100,000; Nathan F. Burnham president, Jesse V. Giesey cashier. The Boston National Bank has elected James H. Bouvé president in place of C. E. Hall. The First National Bank of Maquoketa, Iowa, has elected T. E. Connell president.

On the day customarily appointed for celebrating the birth of Queen Victoria, on that which in the present year that magnificent exhibition of bridge building across East river between New York and Brooklyn was declared complete and opened to the public, the much heralded Chicago National Exhibition of Railway Appliances was opened with appropriate ceremonies. It is the first fair of the kind ever held in the country, if not anywhere, and has been fittingly located at Chicago, the railway metropolis. A press dispatch concerning the general arrangement of the exposition states that in the main building are the lighter exhibits, comprising everything portable which enters into the construction of a railroad or its equipment. In the yard are locomotives, freight cars and passenger coaches and water-tanks. In the gallery of the main building, running entirely around it, is a track for the electric railway. During the exhibition two cars capable of seating forty persons will be run upon it. Other features are miniature sleeping and dining cars complete in all detail; the largest, the smallest and the oldest locomotive in the world, and a mammoth snow-plow used in the Rocky mountains.

The annual report of the Minneapolis Board of Trade and Chamber of Commerce for 1882 has been completed, and an interesting abstract thereof has been published in the *Minnesota Tribune* of that city. The business of Minneapolis in 1882, as shown by the figures given, certainly shows a remarkable gain over that of the preceding year. The value of the manufactured product last year was $43,759,490 against $41,693,356 in 1881, an increase over 1881 of $2,006,134, although it will be observed that the value of the flour manufactured was $2,781,760 less than in 1881, which was due to the inferiority of the wheat crop of 1881, and not to any cause for which the millers were responsible. Had it not been for this fact regarding the flour product, it is stated that the combined manufactures of the city would have shown an increase of at least $5,000,000 over 1881. The wholesale trade, including flour and lumber, amounted to $97,000,000 against $83,126,000 in 1881, an increase of $13,487,000; the real estate business to $18,701,256 against $7,393,428, an increase of $11,307,828; building to $8,375,075 against $5,064,500, an increase of $3,310,575; and live stock and packing to $3,835,000 against $3,622,700, a gain of $812,300. This shows a total gain in manufactured products of $31,770,837.

A meeting of Connellsville coke producers was to have been held at Pittsburgh last evening, but was not. It was brought about by the depressed condition of that industry, that a consultation might bring to the surface measures calculated to revive it. The depression in prices of coke is due to a lively competition between the producers, some of whom have contracts extending through the year for a large part of their product at fairly remunerative prices. This enables them to throw their surplus on the market and cut prices. Coke is now lower than it has ever been, and can be purchased at the ovens on cars at 90c. a ton. The shipments are large, aggregating between 300 and 400 cars a day, but there is no money in the trade at this price, and the smaller operators are curtailing their products. Two of the largest Connellsville producers have large contracts, and outside of these are waging war against each other by cutting rates. A prominent producer recently said: "Coke is produced relatively cheaper now than it was immediately after the panic, for while the rate of 90c. a ton is about the same now as it was then, wages, freight rates, and other expenses of production are not less than 20 per cent. more. We had a bonanza a few years ago, but present conditions are hard on bank accounts." The outcome of the meeting, it has been thought, will be a plan to limit production and reduce its cost. This will probably include a reduction in wages.

The *Pioneer Press* of late date published a complete review of the logging operations of the past season in the Minnesota and Wisconsin woods. The reports were obtained from personal visits and from accounts furnished by various companies. They include all the lumber operations between the west shore of Lake Michigan and the headwaters of the Mississippi, showing the total cut on what is now the largest lumber producing district of the world. The total results reveal the magnitude of the northwestern lumber interest. The total cut of the two states exceeds 4,000,000,000 of feet. The mind will be better able to grasp this, when it is understood that it represents the trees growing on 1,250 square miles, or about thirty-five townships. In the classification of districts, the great Chippewa valley region of Wisconsin is first, with nearly 1,000,000,000 of feet on the Chippewa, Eau Claire and their tributaries. The Mississippi above Minneapolis comes next, with nearly 600,000,000 feet. The Wisconsin river returns 441,000,000, the Duluth district 297,000,000 and the Black river 226,000,000. The streams on the west shore of Lake Michigan, grouped together, show a cut of 785,000,000 feet. On the different railroads in Wisconsin and Minnesota between

500,000,000 and 600,000,000 of feet were cut. The value of this review, from one point of view, would be greater if there were a basis of comparison with the crop of former years. But it is stated that this complete review is now made for the first time, which forbids such comparison. It is beyond question, however, that the cut is by far the greatest in the history of the northwest. The *Pioneer Press* discusses the question of the probable exhaustion of the pine lands of Minnesota and the northwest very fairly. While not placing the time at so near a period in the future as has been estimated by some, say ten or fifteen years, it is thought that the extension of this time will be due to the utilization of inferior lands and the employment of more efficient methods of cutting and sawing. It is added that the "loggers are already invading the Red lake and Vermillion districts in Minnesota, and the railroads have penetrated to the hitherto intact forests above and between the heads of navigable streams in Wisconsin. Whether ten or twenty years hence, the exhaustion of the northwestern lumber supply is near enough to suggest the most careful husbanding of the resources that remain, and to emphasize the blind and mad folly of a lumber tariff that preserves the forests of our neighbors and puts a premium upon the destruction of our own." The season's cut of the two states in detail is placed as follows:

MINNESOTA.	*Feet.*
Mississippi and Rum rivers	567,166,000
St. Croix river	360,208,964
Duluth district	297,355,996
St. Paul & Duluth Railroad	38,160,000
Total	1,262,990,960
WISCONSIN.	
Chippewa and tributaries	993,000,000
Black and tributaries	228,100,000
Wisconsin and tributaries	441,100,000
Lake Michigan streams	765,487,758
Ashland and Bayfield	63,651,000
North Wisconsin Railroad	187,800,000
Wisconsin Central Railroad	190 000,000
Milwaukee, Lake Shore & Western Railroad	67,500,000
St. Paul, Minnesota & Omaha	52,200,000
Green Bay & Winona Railroad	4,800,000
Wisconsin Valley Railroad	21,300,000
Total for Wisconsin	2,973,338,758
Total for Minnesota	1,262,990,960
Grand total	4,236,329,718

The electric-lighting company craze through which our English cousins have just passed is remarkable. There were enough of such companies formed to light separately almost every county in Great Britain and every province in the British colonies. Some of them came to a justly-merited and untimely end. Even the last annual balance sheets of the Anglo-American Brush Electric Lighting Company was subjected to a raking criticism by a standard English financial journal. And now comes another American electric light abroad, with a caustic comment from *Knowledge* (London, May 11), as follows: "At the second annual general meeting of the Maxim-Weston Electric Light Company, the chairman, in his opening congratulatory (!) address, observed that, all things considered, he did not think they had done so very badly. Though they had lost £70,000 in the purchase of patents which they had not used, and had conducted the lighting of the city at a loss, they had managed to avoid getting into difficulties. For further patents they paid £52,000. Up to October, 1882, they made sales amonnting to £6,776, with a clear profit on that of £1,666. They took a certain amount of contracts as low as they could. There was the Metropolitan Railway contract—on that they made a loss of £1,225. Then there was the Edinburgh post office, which resulted in a loss of £380. They thought it well at a certain sum to take a contract for lighting the Botanic Gardens. There they had a loss of £26, while at Reading they also made a loss of £26. On the city lighting they had made a loss of $4,405. Their great loss on the city lighting had been owing to their having had to lay their cables two or three times, and the difficulty of getting them properly to carry the electricity from the other side of the river. They had spent no less than £1,347 for the Crystal Palace Exhibition; at Warwick House, Regent street, £170; at the Guildhall, £160, and at the Albert Hall, £50. These were exhibitions. At the Opera House, too, there was an installation before this company came into existence, and there was an expenditure of £128. Altogether £1,868 had been spent on exhibitions, and that, added to the loss of £6,064, was a very considerable item. Having, however, got all the advantage they could by the exhibitions, they had declined to exhibit any more. Notwithstanding the bad appearance such figures must make on a balance-sheet, the directors think the prospects of real business warrant an increase in capital to the amount of £500,000." This company was formed from the combination of the interests of the Weston arc lamp and the Maxim incandescent lamp. The latter is in use in the capitol at Albany and elsewhere in New York and the country. The Weston arc lamp is that in use on the Brooklyn Bridge.

THE SUPPOSED ADVANCE IN THE PRICE OF GOLD.

Mr. George J. Goschen has sent to the London *Times* the following statement of his argument with regard to the increased purchasing power of gold:

"My argument may be briefly condensed as follows: Gold to the amount of nearly £200,000,000 has been required for supplying Germany, the United States and Italy with new gold currencies. This extraordinary demand fell on a diminished supply. The annual production of gold during the first five years after the discoveries of 1851 averaged nearly £30,000,000. It now amounts to less than £20,000,000. The new demand has been equal to the total supply of ten years. At the same time we have to reckon with the normal demand for arts and manufactures, while more gold has also been required to meet the wants of an increasing population and an increased balance of transactions in all gold-using countries.

"No evidence is before us to prove that a fresh development of banking expedients has to such an extent further economized the use of gold as to neutralize this normal rate of increase. On the contrary, it is believed that in England alone the gold circulation has grown by £20,000,000 in ten years.

"It is a received axiom that prices of commodities are affected by changes in the volume of the circulating medium in which they are expressed. The late strain on the common stock of gold must, therefore, have had some result. It must have caused a general decline. Examined by the test of present prices, these deductions are borne out by facts. A general fall has occurred, though exceptional circumstances have maintained the prices of some articles and accelerated the fall of others far beyond the average.

"But this general decline is not in itself a calamity. The period of transition from a higher to a lower set of prices is likely to be accompanied by much real suffering and more apparent suffering. But when the change has been accomplished commerce and manufactures may prosper as before. The final disturbance will be limited to those cases where individuals or corporations have permanent contracts either to receive or to pay fixed sums of gold, and to those further cases where exceptional circumstances of habit, convenience, or sentiment will probably come into play.

"Such is my argument. In its main lines it seems to be unassailable, though I may have failed in some of my illustrations, and have dwelt too little on qualifying circumstances. If my position is to be attacked, it must be shown either that I am wrong as to the existence of the cause which I allege, or that the results which I maintain to have followed cannot be traced, or that my description of the facts as to gold and as to low prices may both be correct, but that it cannot be proved that the former have led to the latter; or, lastly, the general argument may be admitted, but its particular applications be disputed.

"No serious contentions have been put forward that I am wrong as to the strain upon gold. My allegations as to prices have been more seriously questioned. To those who deny a fall in prices altogether I would only say that, even if they were right, the extraordinary demand for gold cannot have been without a result. On this hypothesis it must, at least, have had an effect in restraining a rise. If it is contended that prices are not low, as I contend they are, it must in any case be admitted that they would have been higher if the circulating medium in which they are expressed had not been called upon to perform largely increased work without a proportionate increase in the supply. It is impossible to assert such a cause to have had no effect.

"But nine statisticians out of ten not only admit a decline in prices, but have been expatiating on it for several years. It may be true, as alleged, that I might have made a better comparison than between the years 1873 and 1883. I certainly do not contend, and have not contended, that the general fall is measu ed by the difference between these years. Indeed, no single years would afford a proper measure. Fortunately, calculations exist by which we may gauge the scale of prices over periods ranging back as far as the years 1845-50. In the 'Commercial History,' published every year by the *Economist*, so-called index numbers are given representing the results of an ingenious calculation of the wholesale prices of twenty-two of the most important commodities of our markets in successive years. The 'total index number' does not present a full and accurate representation of the variations of prices, inasmuch as the relative importance of the different articles is not allowed for; but, nevertheless, even with the needful qualifications, it affords important inferences. The numbers of the table are as follows:

Years.	*Total Index No.*	*Years.*	*Total Index No.*
1845-50	2,200	1875, January 1	2,778
1857, July 1	2,996	1876, January 1	2,711
1858, January 1	2,612	1877, January 1	2,723
1866, January 1	3,564	1878, January 1	2,529
1867, January 1	3,024	1879, January 1	2,202
1870, January 1	2,689	1880, January 1	2,538
1871, January 1	2,590	1881, January 1	2,376
1872, January 1	2,835	1882, January 1	2,435
1873, January 1	2,947	1883, January 1	2,343
1874, January 1	2,891		

"The teaching of these figures is obvious. Notwithstanding some fluctuations, the continuous low prices since the year 1878 will at once strike the eye. It is true that the lowest point was reached on the 1st of January, 1879. The exceptional character of the disastrous year 1878 will be remembered. Three bad harvests had followed in succession, and, to crown all, the Glasgow Bank failed in October, 1878, an event followed by a general collapse. There was some recovery from these exceptional disasters in the following year, but, with the strain on gold at work, that large rebound in prices which has been the almost invariable result after a collapse has not been witnessed, and the last four years, even omitting the year 1879, show a lower average than any years given in the table since 1850.

"But the low prices for individual articles supply an even more valuable proof of the existing state of things than the 'total index numbers.' It is worth while to compare prices on the 1st of January, 1883, with the average prices of the period 1845-50. The total index number for the latter is 2,200, for the former 2,343. (If tobacco were excluded, which shows a very considerable rise, due in part, I am inclined to believe, to some confusion of qualities in the calculation, the total index number for the two dates would be exactly the same.)

"Taking 100 as the basis of the price for each article in 1845-50, the relative value of coffee is now 82, sugar 60, tea 76, wheat 77, cotton 89, flax and hemp 68, oil 100, copper 80, iron 79, lead 83, cotton wool (Pernambuco) 75, cotton yarn 100, cotton cloth 92—that is to say, all these articles are lower, or as low as they were five-and-thirty years ago. On the other side the following articles are only slightly above the prices of 1845-50, viz.: Timber 108, tallow 111, sheep's wool 106, and indigo, leather, butchers' meat, and raw silk alone, besides tobacco, show a considerable rise, standing at 190, 139, 145 and 126 respectively.

"I am bound to say that I am myself astonished to see in the case of how many articles prices have gone back to the rates which prevailed before the gold discoveries of 1850. I was scarcely prepared to find that, taking an average of the most important articles of consumption, almost the whole of the advance in prices consequent on the immense increase in the supply of gold thirty years ago has been lost. Even should this not be so to the full extent, I think it will be admitted that I have, at least, furnished substantial additional proof that prices are at present ranging on a very low level.

"But very natural remonstrances have been made to me. 'It is all very well to speak of low prices in statistical tables, but is it true that prices have so far fallen to the individual purchaser and to the spender of money as to establish the proposition that a sovereign goes further?' This question is so interesting and important that I should like to examine it more fully in a future letter. At present, I will confine myself to pointing out that, especially in the expenditure of the upper and middle classes, the purchase of commodities forms by no means the largest part; on the other side are house-rent, rates and taxes, wages, traveling, children's education, and numerous other items for what I may call 'services rendered,' and it can easily be shown why the prices paid for 'services rendered' do not fluctuate with the same rapidity as market prices. In many cases tradition, or a professional code, or an actual law has fixed an immutable scale. However the purchasing power of gold may fluctuate, the physician, the singing master, the dentist, receives the traditional guinea, the lawyer his 6s. 8d., the cabman his legal 6d. per mile.

"But the chief item of 'services rendered,' and one requiring the fullest examination, is the question of wages generally. The length at which you were good enough to report the earlier portion of my address at the Bankers' Institute naturally precluded a full report of its concluding part, in which to a certain extent I discussed both wages and house-rent. The question would form part of any further disquisition on the purchasing power of gold as regards 'services' as distinguished from commodities generally.

"I now turn to the objections made, not to my contention as to low prices, but as to their resulting from the particular cause which I have discussed. Granting, it is asked, that prices are exceedingly low, can you prove that facts connected with gold are the determining cause?

"Some writers have appeared to show something approaching to irritation at the view that the situation of gold should have largely influenced prices. I scarcely know why, unless through the apprehension that the bimetallists may utilize the argument. I must repeat that to my mind the connection between the additional demand for gold and the position of prices seems as sound in principle as I believe it to be sustained by facts. On the other hand, I cannot plead guilty to the charge which has been made that I have overlooked or denied the existence of other causes. I enumerated as possible contributory causes the increased facilities of communication, the operation of the telegraph, the progressive elimination of the profits of middle-men in international commerce, decreased speculation and increased production. At the same time it is clear that many of these causes were almost as fully developed during the period 1870–75 as during the years 1875–83. They must have contributed over a course of years to cheapen the cost of many commodities, but to my mind they do not account alone for the prices of the last five years. Bad harvests in England have, no doubt, also operated to a considerable extent; but it is not in England alone that the fall in commodities has taken place. Nor has the average of prices risen with the better harvests of the last two years.

"With regard to the deductions to be drawn from my general argument as to the probable effects on commerce and manufactures of a lower level of prices generally, I had no time at the Bankers' Institute to enlarge sufficiently on a very important point. To the manufacturing community, I think, it is a matter of the highest moment to consider whether the present range of prices is still the result of what is called 'depression,' of absence of prosperity, of slackened demand, and so forth; or whether we have to deal with the circumstance that prices are affected by a change in the purchasing power of gold. If the latter view is correct, the sooner men make up their minds to it the better. They will then cease to base their operations or found their hopes on the return to a scale of prices which would, under existing circumstances, represent even higher prices than before. So long as men think that the low price that an article may command simply means bad business, so long we shall hear of the decline and sickness of our commerce, though the volume of our exports and imports may be quite satisfactory. It is surely important that men's minds should be cleared in this respect.

"As I have repeatedly stated, it would be most unwise to dogmatize or to prophesy where the operation of causes is so covered and obscured by countless modifying circumstances, but it is none the less right to trace them and bring them into light as far as it is possible.

"With one further point I should still wish to deal within the limits of this letter. Several acute correspondents have pointed out an error on my part with reference to the probable effect of the enhanced value of gold on the price of consols. My argument was substantially this: Consols entitle the holders to a given number of sovereigns; these sovereigns will command more commodities; therefore, the instrument conveying these sovereigns will be proportionately more valuable. This is absolutely correct. But it was not correct to add that this greater value would be expressed in a higher quotation. Though consols will become more valuable to the holder, more valuable if measured in commodities, it does not necessarily follow that their price would be higher. Their sale for the same number of sovereigns would represent a larger return. A stockholder receiving 100 sovereigns as purchase-money under the new state of things would be receiving more value than when he received 100 sovereigns under the old state of things. Clearly consols would not fall like other commodities, and, indeed, would be more valuable, but that greater value would be adequately expressed by their retaining the same market price as before. Theory does not, therefore, absolutely require that they should rise. It is probable, nevertheless, that not only would they retain their price, but that they would be more in demand, and that therefore they would rise in price after all. The disposition of the market would be in favor of an investment which was not partaking in the general decline, and which was steadied by the very fact that it conveyed a revenue in gold which had an upward tendency as compared with other commodities all tending downward. I do not, however, overlook the fact that other circumstances have combined to raise the price of consols."

FINANCIAL.

THE LOAN AND INVESTMENT MARKETS.

The stock market this week has been tame as compared with last, when many people began to lose their heads at the alarming style in which prices were falling, and to talk about panics. There was no danger of a panic. Prices are down too low, business too circumscribed, and the control of affairs in the street too concentrated. If stocks were widely distributed in the hands of the public, and prices up where they were two years ago, the case would be different. We were preparing the way for a financial convulsion in the summer of 1881, when the country was getting a terribly severe blow in the failure of the crops, while the general public were mad with the rage of speculation, and refused to see or believe anything except that prices must go on rising forever. But the assassination of the President changed all that, and instead of going on with a blind rush until the whole fabric of inflated credit was tumbled over the edge of the precipice in one grand crash, we have been going through a shrinking process ever since, and the severe fall which prices had in the first two weeks of this month was only an incident of the shrinkage. We have had them before on the way down, and just at the last right moment the fall has been checked, the market steadied, and then a reaction brought about in preparation for another decline. The past week has been mainly devoted by the great operators to getting the market into a steadier state and then working up quotations to get a better level to sell from. It is hard to say who among the leaders of the street is on the bull side, except because he is obliged to be there, and, consequently, in a defensive position. The bears are acknowledged to have control. They are the aggressive power, and it would seem that it is due quite as much to them as to their opponents that the market reacted this week. They had pounded prices down to a level where it was desirable to stop for a time; and having covered possibly the greater part of their short contracts, reserved the rest as a lever, which, rightly employed, would start prices up again and put the market back to where they wanted it. It is significant of the state of feeling now prevalent in Wall street that the rally this week does not appear to have suggested the usual talk that "the turn has come," or that "the bulls have got the market again," or that "now is the time to buy stocks." Nothing of the kind has been heard anywhere. So deep-seated is the distrust of the future, so hopeless does the outlook seem to be considered, that the only question one has heard through the week has been, "how long will the rally last?" There is just this thing to be said about such a state of affairs—that it is one the bear leaders often take advantage of to change their tactics, and, keeping up a smart buying of stocks, cause prices to rise much higher than they were expected to, and to hold on longer. This generally has the effect of confusing the average run of traders; they are apt to think a permanent change has come, and to change front themselves from the bear to the bull side just in time for the astute leaders to sell out on them, and begin again to pound the market.

The extreme depression of last week was undoubtedly due to the discovery that Mr. Gould was selling out his stocks as fast as possible; and as remarked here last week, this had the worst kind of effect on the street from being done on the heels of his tour of inspection over his lines. People naturally thought he did not like the crop outlook, and the very unfavorable reports which have since come in thick and fast on this important subject have shown that the surmise was correct. In addition, we had a perfect deluge of securities poured upon the market by cable orders from abroad, owing to the troubled state of affairs in the London market. It may be assumed that Mr. Gould considered it necessary to stop selling for a time, unless he wanted the market to go all to pieces under him; and there has also been a cessation of the rush of foreign selling. This had been so large as to cause exchange rates to advance to near the gold exporting point—and here it may be well to correct an error made in these columns two weeks ago as to what is the shipping point. It was there given too low by nearly three-quarters of a cent on the dollar. The calculation latest supplied to us as the figure at which gold can now be sent out without loss is $4.89.20. As a matter of fact, no gold is likely to be sent out until the actual rates reach $4.89½, or possibly $4.90. Posted rates rose on Tuesday to $4.89½, but they weakened again on Thursday, dropping to $4.89, and yesterday declined still more to $4.88½. It had been rumored that the Bank of England would raise its discount rate that day from 4 to 4½ or 5 per cent.; but it did not, and its weekly statement showed that it had gained gold during the week and increased its reserve from 32½ per cent. to 35¼ per cent. of liabilities. Though there has been some recovery in the London stock market, it is pretty safe to assume that, except such buying as the daily traders between the two markets may do, there will be no more buying of our securities on that side for a considerable time to come.

In the rally of the market the Vanderbilt stocks did not make much headway. Lake Shore, it is true, was quite active, and recovered something of what it lost in price; but the other stocks of this group showed a plentiful lack of elasticity, which certainly would not have been the case if had the short interest in them been large. The proof—if any were wanting—that their decline was due to sales of actual stock, and not to speculative short sales by the bears, was abundantly supplied. It appeared as if all the short interest in them had been covered, without materially advancing the quotations. The coal stocks were less heavy. The dealings in Lackawanna were, as usual, very large, and the stocks made a quick advance when the market turned; and Jersey Central also showed recuperative powers. Delaware & Hudson was quite strong. As to this and Lackawanna, it is useless for the bears to attempt to deny the fact that these companies have had a season of great prosperity far beyond the time it was thought that prosperity could possibly continue. It is a surprising fact that the anthracite coal companies have mined and sold thus far this year over a million tons more coal than they produced in the same time last year, when they did an extraordinarily large business. It was reasonably supposed that when the iron trade began to fall off the coal companies would suffer in like degree; but it would appear that such large markets for anthracite have been opened in the west, the increased domestic consumption there has more than made up for the loss for decline in the manufacturing demand. Anthracite coal can now be laid down at western points, through the extension of railroads, at prices which put it within the reach of large classes of people to whom before it was a forbidden luxury; and it is certain that wherever anthracite can be obtained for domestic purposes at moderate cost, the western bituminous coal is at once discarded. The superiority of the hard coal is such as to leave comparison out of the question. The drawback on the Lackawanna company, however, is its costly Buffalo extension, which at present is, and must be, a dead weight upon its resources. It will be a long time before business grows up to a point where that expensive line of road can get on a paying basis. Another stock which distinguished itself by jumping to the front in the rally was Central Pacific, which outstripped all competitors in the quickness of its advance. The president of the company has been talking very freely in the newspapers about the undiminished prosperity of the concern, its great future, and the unreasonableness of the decline in the price of the stock. "Mere Wall street manipulation," was his explanation, and some of the other officers of the company said the same thing. This is such childish rubbish that it is hard to suppose these men expected any one to believe it when they uttered it. If the company's prospects are as bright as ever they were, why did they sell their stock? Vice-President Crocker says he sold his, and he "supposes" his associates did the same. They are not the sort of men to let go a good thing when they have it. Very little is known about the Central Pacific here, the road is so far off, and when the officers of the company are found to be getting rid of their holdings, and the stock tumbles 10 per cent.—as this did—before anyone fairly knew what was the matter with it, the average observer surmises that the men who know most about the value of the property consider that something has happened not conducive to its future prosperity. Possibly these people may be willing to buy back the stock in the neighborhood of 70, but it would not be safe for a man to bank too confidently upon it.

The loan market has been remarkably easy through the week, the general rate on call loans being from 2½ to 3 per cent. In government bonds there has been no movement of note. The following were the closing quotations yesterday:

	May 18, bid.	*—May 25,— bid.*	*asked.*
U. S. 5s extended (3½ p. c.)	102⅜	102¾	—
U. S. 4½s 1891, registered	112⅛	112	112¼
U. S. coupon	113¼	113⅛	113¼
U. S. 4s 1907, registered	119⅜	119⅛	119⅜
U. S. 4s 1907, coupon	119⅜	119⅛	119⅜

The bank statement of Saturday showed an increase in the surplus reserve of $756,800, which was not large. It brought it up to $5,760,625, which is still considerably lower than it was at the same time last year. The following are the comparative totals of the statements of May 12 and May 19:

	May 12.	*May 19.*	*Differences.*
Loans	$315,451,000	$317,828,000	Inc $2,377,000

The proportion of total reserve to liabilities is now 26.78 per cent., against 27.06 per cent. at the same date of 1882.

BRITISH STOCK MARKET.

[By Cable to BRADSTREET'S.]

London, May 24.—The Stock Exchange is recovering from the effects of the failures reported last week. There is no pressure now to sell American securities, and some are buying them back instead.

From Cincinnati, Ohio: Money matters are easy and good paper finds ready sale. Lines of deposits have swelled, and there is an increase of currency from the country.

From New Orleans, La.: Financial circles are quiet, with the exception of the endeavors to compromise the Gaines case. Business in cottonseed products will now be carried on regularly under the rules and regulations of our Cotton Exchange.

From Louisville, Ky.: The money market is easy. The demand for loans is decreasing, and bank balances are increasing. The standard discount rate is 7 per cent. Exchange is unchanged. Collections are tolerably good.

THE FOLLOWING WERE THE CLOSING QUOTATIONS FOR STOCKS ON THE DATES NAMED:

COMMERCIAL.

Special telegrams to BRADSTREET'S from leading business centers in the United States show that the unseasonable and stormy weather throughout most of the northern states has interfered to a considerable extent with the general movement of distribution, and to that extent business has been less prosperous. Lake transportation, while heavy, has suffered considerably, and jobbers in boots and shoes, cotton goods and other fabrics have suffered an interruption of business. The industrial situation is no less complicated than when last reported. The Amalgamated Association of iron and steel workers in the Pittsburgh district will strike June 1, although it is thought that some of the extreme western iron and steel centers may not be affected, as it is probable the battle will be fought out at Pennsylvania, Ohio, and West Virginia centers. A long strike is in prospect. Cotton for present delivery has declined during the week ⅛c. The wheat market here has advanced about ⅜c. on the week. This is largely due to the threatening weather in the central western winter-wheat states, a reduced visible supply, and renewed activity on the part of the longs at the west. The price of corn has fluctuated. The condition of this cereal in store and in the ground since the cold weather has been the ruling influence. In the provisions market there is little or no demand, the foreign trade hold aloof, and speculators fear to move, owing to a suspicion of a corner. Iron is as flat as ever, except in manufactured, which is firmer, owing to the prospective strike of mill hands on June 1. The previously announced cut in prices of pig is now regarded as unnecessary. Its effects have been largely discounted by underselling in small lots at less than current rates, and, more than all, it is now definitely known that from fifteen to eighteen of the smaller or less efficient furnaces in the Lehigh valley are to be blown out within the next month. Petroleum has exhibited considerable strength, and has held itself well above the dollar mark. This is mainly due to the close proximity of the daily production and consumption as well as to the fact that pipe-line stocks recently had to be drawn upon to supply requirements. Friday's trading was rendered uncertain by the Murphy well in Forest county, which was looked upon as an important venture and expected in during the day. The anthracite coal trade has experienced a change for the better since the extra half time at the mines was ordered. The excess production continues to increase, as compared with that of 1882. Ocean freights are dull, but, in the main, firmly held. Petroleum charters have led in the week's business. Grain exports have been limited. Wool has been selling slowly in all markets, the depression in the goods trade causing general indifference on the part of manufacturers. There were 155 failures in the United States reported during the past week, 11 less than the preceding week, 31 more than the corresponding week of 1882, and 58 more than the same week of 1881.

GENERAL INDUSTRIAL FEATURES.

The complications in the industrial situation in the United States have thickened during the past week. The representatives of the Amalgamatep Association of Iron Workers have presented the existing scale of $5.50 for puddling iron to the various Pittsburgh and other firms interested, who have declined to sign the same. One steel mill firm has signed the agreement proposed by the workmen. But this house was the first to accede to the demands of the workmen last year. No appreciable effect was noticed then, and none is looked for now. The existing struggle is between the iron men and their employés exclusively. It is now stated that the Ohio puddlers will demand $6 per ton for puddling, the rate paid two years ago. This will seriously affect the industries at Cincinnati, if carried out. The prospective iron strike therefore promises to exceed in bitternesss that of last year, and with no better results so far as the workmen are concerned. The Pittsburgh district bituminous coal miners have resumed work at 3 cents. per bushel for mining, the employers' rate, pending arbitration under the new Pennsylvania law as to whether they shall receive 3½c. demanded or the 3c. offered. The Chicago builders' trade difficulties, while not serious, resulted in a display of violence during the week, which was speedily quelled. Over 100 silk weavers of one firm at Paterson, N. J., struck during the week for an advance of 10 per cent. in their wages, which had been refused. Considerable textile machinery at Philadelphia lies idle. In other respects, the only recent features of the industrial situation will be found in the following special telegrams received yesterday:

From Rochester, N. Y.: Labor troubles are now confined to one tobacco house, with no prospect of immediate settlement. The firm continues business with non-union hands.

From Philadelphia, Pa.: The consumptive demand for wool and cotton has continued light, and the apathy of buyers in these markets is a fair index of the unsatisfactory condition of the manufacturing trade in textiles in this vicinity.

From Pittsburgh, Pa.: No conference of Connellsville coke manufacturers here Friday as announced, but there will be on Monday. There are as yet no indications that a strike will result if the production is limited.

BREADSTUFFS ABROAD.

The lower prices for wheat in the United Kingdom reported last week have exhibited no new strength, notwithstanding the unfavorable change noted in the prospects for the wheat crop in that country since May 1. This is unquestionably due to the fact that supplies of wheat, corn and flour are heavy, the quantity of breadstuffs on passage continues large, and prospects of a good average (if not a larger) quantity for export in the aggregate from the various countries raising surpluses of these grains. Although April in the United Kingdom was not a month of the heavy rainfall, and was not warm, the winter and early spring wheat was not injured by the 30th ult., more than being a little backward. The growth of the plant was regular, and (says the London *Miller*) was generally conceded to be healthy. May, if warm, would have done a great deal therefore towards permitting a full average crop, although a deficiency in acreage has been accepted by the trade on the other side as an irremedial consequence of the disastrous sowing season. Later advices than these, however, make the outlook less favorable. The *Mark Lane Express* of May 14 says that it is now considered certain that the wheat crop will not amount to an average yield. Foreign wheat other than in England has been featureless. At the opening of the week English wheat was selling in London at 43s. 4d., against 47s. in the corresponding week in 1882. The crop in France, Germany, Austria and Hungary are all of promise and of sturdy growth, though somewhat backward. A French circular, however, quoted by *L'Economiste Français*, states that the acreage planted to winter wheat in that country has fallen off this year, so that the whole area to wheat will not exceed 16,055,000 acres, against 17,907,000 acres last year. Favoring conditions will, it is said, hardly permit as large a crop there as last year. That the British markets continue inactive and prices low is plain, in view of the fact that there were, April 7, 2,500,000 quarters of wheat on passage and due to arrive in the United Kingdom prior to the end of August. The English reserves are 3,000,000 quarters, and English deliveries prior to the date named will aggregate 2,480,000 quarters, a total supply of 7,980,000 quarters. The demand is placed at 8,740,000 quarters, thus leaving 760,000 quarters, or 6,080,000 bushels to be supplied from elsewhere. To meet this the Black sea, Egyptian, American and Indian exportations were counted on, which will, according to all precedent, prove more than enough. Over and above all these must be included the supplies from the Baltic, all of which means that the "Island Garrison" will have enough food at moderate rates from somewhere in any event.

The quantity of wheat on passage to the United Kingdom, according to Beerbohm's cable of May 24 and in preceding week was:

	May 24.		May 19.

AMERICAN WHEAT MARKETS.

During the past week wheat has crept along on the ground part of the time, refusing to let prices be carried above the lower levels to which news from the wheat regions and the revulsion in public opinion carried it during the preceding seven days. The large operators in Chicago who deal in wheat on the bull side of the market found themselves carried irresistibly to a modified view of the situation, and prices naturally dragged, notwithstanding the season of cold and unfavorable weather which prevailed for several days in Iowa, Illinois, Indiana and Ohio. "Private crop reports" by special agents of Chicago bulls and speculators appeared toward the middle of the week, which went so far as to say that the last three states named "would have no wheat to sell this fall," and advices were issued to customers in accordance therewith. A reaction took place on Thursday, and wheat at New York advanced ¾@1½c., displaying considerable activity. This was, of course, largely on speculative account, foreign buyers still maintaining their conservative attitude. At Chicago also a marked rise in prices was noted, particularly in the July option. The smaller advance here was caused by the heavy arrivals. These must continue for some time, but the outlook favors an early reaction in prices to a lower basis than that to which they have advanced. The weather is improved, and Minnesota and the northwest have confirmed previous reports of probable increased yield. Late dispatches from the Pacific coast quite confirm those to BRADSTREET'S last Saturday. The *Times* on Monday printed nineteen columns of special dispatches from the wheat-growing regions, which corroborated previously rendered favorable advices.

The course of the wheat market during the past week is indicated by the following prices in the New York and Chicago markets, for June wheat at the dates mentioned: New York, Saturday last, $1.19; Monday, $1.20; Tuesday, $1.19⅞; Wednesday, $1.19⅞; Thursday, $1.20⅞; Friday, $1.20⅛. At Chicago, Saturday, $1.08⅜; Monday, $1.09⅞; Tuesday, $1.09⅞; Wednesday, $1.09⅝; Thursday, $1.11⅜; Friday, $1.12¾.

The total receipts of wheat at Chicago, Milwaukee, Detroit, Toledo, Indianapolis, Peoria and St. Louis for the week ended May 18 amounted to 692,600 bushels, against 595,234 bushels in the previous week, and the shipments to 343,241 bushels, against 418,027 bushels in the preceding week.

The visible supply of wheat in the United States and Canada east of the Pacific coast May 21, as compared with that on the previous week, showed a decrease of 475,226 bushels.

INDIAN CORN.

Corn has shown more activity and has ruled relatively higher than wheat during the week. A portion of this has been due to the cold weather. After some active trading had been indulged in on this account it was learned that the weather had been no colder and no more unfavorable than last year at the corresponding time. A reaction has taken place since, followed again by activity and an advance in prices. A peculiar feature of the week in breadstuffs markets has been the relatively higher and firmer market for corn than for wheat, in the face of an admittedly increased acreage of the former as against last year, and no real weakness in the outlook. The receipts of corn from farmers' hands have, however, declined during the week, and the shipments east have been quite heavy, thus pointing to large receipts at New York early in June. The western markets declined about the middle of the week, although the shipments east from Chicago were equal to twice the quantity arriving. Later still higher prices and an inactive market prevailed in general sympathy with the statistical position at the west and with wheat.

The visible supply of corn in the United States and Canada on May 21, as compared with the preceding week shows a decrease of 1,038,460 bushels.

The course of the corn market during the past week is indicated by the following prices for June, in the New York and Chicago markets at the dates named: at New York, on Saturday last, 64⅝c.; Monday, 64⅞c.; Tuesday, 65c.; Wednesday, 65c.; Thursday, 65⅜c.; Friday, 65¼c. At Chicago, Saturday, 55⅜c.; Monday, 56⅝c.; Tuesday, 56¾c.; Wednesday, 56⅜c.; Thursday, 56¾c.; Friday, 56¾c.

The total receipts of corn at Chicago, Milwaukee, Detroit, Toledo, Indianapolis, Peoria and St. Louis, for the week ending May 18, amounted to 1,290,304 bushels, as against 1,535,038 bushels in the preceding week, and the shipments to 2,182,162 bushels, as compared with 1,894,095 bushels in the preceding week before.

The closing prices of breadstuffs at New York last evening, as against like quotations of May 19, and the comparison of prices of one year ago with leading staple breadstuffs, were as follows:

CLOSING PRICES OF BREADSTUFFS IN NEW YORK.

	May 18.	*May 25.*

AMERICAN GRAIN REPORTS.

[By Telegraph to BRADSTREET'S.]

From Philadelphia, Pa. Speculation on the grain boards has been limited in volume and confined chiefly to regular operators, the general public showing a disposition to hold out of the market. Flour has been depressed by the recent decline in wheat and a very indifferent demand, under which prices have yielded slightly in some instances.

From Cincinnati, Ohio: Wheat appears unhurt, and what corn has rotted will be replanted in time for a good crop. The severe cold spell has done little damage beyond destroying some of the earlier vegetables and particularly injuring strawberries. Flour is without essential change. Grain has rallied a little during the week, but closes dull.

From Columbus, Ohio: The recent cold, wet rains it is feared will rot the corn, which has already been planted in some localities.

From Chicago, Ill.: Wheat is unsettled. The advance since yesterday morning is chiefly due to manipulators of bull combination, who report damage to growing crop greater than given by other advices which are considered reliable. Corn is weak. The week's movement will show a heavy reduction in stocks, but increased receipts and uneasiness regarding its condition checks speculation. Oats are depressed by heavy receipts. The demand is light.

From Peoria, Ill.: The recent frosts have damaged the garden truck, but not seriously. There is very little corn up in this vicinity, and the damage is but slight. Collections are easier.

From Indianapolis, Ind.: The weather shows some improvement, although still quite chilly. Prices are uniform. There is no special improvement in the crop prospects. Collections are slow.

From Evansville, Ind.: The mercury is down to freezing, with a slight snow. The unseasonable weather has depressed trade.

From Louisville, Ky.: The cold wave inflicted no material damage to the crops. The rains of the past few days have improved wheat very much. It had previously been too dry and cold. The stand now looks very fair, and with moderate rains and no extreme hot weather the Kentucky crop may reach a fair average. The berry promises to be more perfect than usual. A full average of corn was planted, and the seed being very good, has come up in promising shape. Flour is steady, but the demand is small.

From St. Louis, Mo.: Wheat has advanced sharply, but is greatly unsettled. Corn is tending upward, but shows little excitement yet. In this region the young corn will recover from Thursday's frost.

From Kansas City, Mo.: The late and general rains have improved the crop prospects.

From San Francisco, Cal.: We are having favorable warm weather for the growing crop, and the outlook is very satisfactory for a good harvest. Wheat and barley declined 10 to 15 cents per cental during the week. Barley is now weak at $1.00, and lower prices are probable. Money is hardening. Hides dull. Wool quiet, large receipts, small sales. Stock here 6,000,000 pounds. Tin and tinplate weak.

From Nashville, Tenn.: The weather is cold and very unfavorable for the growing crops. Wheat is very dull, and there is no demand. Corn is in fair inquiry, but flour very dull.

From Memphis, Tenn.: An improved demand for corn is noted, and prices are steady. Flour is in moderate demand, and prices are unchanged and firm. Meal is firm.

PROVISIONS.

There has been but little done in provisions during the week. On Saturday the market remained flat and unprofitable. There was no improvement in the demand at home or abroad, but western

speculators contrived on Monday to create an advance in pork and lard. This was maintained, and late in the day on Tuesday increased on those staples, although a reaction on Wednesday resulted in a decline of nearly the whole gain in prices made. The foreign trade look upon prices of provisions here as being too high and are reserving their orders. The home demand is very light and outside speculators are afraid to buy to hold for a rise owing to the comparatively high prices of futures. No short interest has been created, apparently for fear of a corner. So the market hangs idly in the hands of the heavy holders.

The following shows the export of hog product from the cities named for the week ended May 19:

	Pork, barrels.	*Bacon and hams, pounds.*	*Lard, pounds.*
New York	3,230	2,561,544	2,156,875
Boston	123	278,823	884,080
Portland	..	..	....
Montreal	484	18,000	....
Philadelphia	..	750,000	825,750
Baltimore	..	12,350	....
New Orleans	4	1,050	110
Totals	3,851	3,621,877	3,866,815
Previous week	4,346	3,805,103	3,109,609
Two weeks ago	2,889	5,807,624	2,555,373
Corresponding week in 1882	4,252	5,580,520	2,705,610

The total export of hog product from November 1, 1882, to May 19, 1883, as compared with the corresponding time in 1881–82, was as follows:

	1882–83, pounds.	*1881–82, pounds.*	*Decrease, 1882–83, pounds.*
Pork	27,902,600	33,284,200	5,381,600
Bacon	258,373,390	268,190,802	9,817,412
Lard	138,021,031	152,152,023	14,130,992
Total	424,302,021	453,927,025	29,625,004

PROVISIONS AND LIVE STOCK REPORTS.

[By Telegraph to BRADSTREET'S.]

From Nashville, Tenn.: The cattle market is firm and prices are very fair.

From Louisville, Ky.: Provisions are quiet, and holders are not disposed to sell at present prices. Live stock is firm for good grades of cattle and sheep. Hogs are dull and lower.

From Buffalo, N. Y.: Provisions are quiet but steady, with an inclination to lower prices.

From Chicago, Ill.: Pork is unsettled and weak at the decline, with little legitimate demand. Lard and meats are weak, with no shipping demand.

From Kansas City, Mo.: The market for shipping grades of cattle is weak and slow. Prices have declined 5@10c. Hogs are dull and irregular, and prices weakening.

From Philadelphia, Pa.: Provisions and groceries have ruled quiet. Dairy produce has declined under more liberal receipts, and as buyers anticipate further concessions, sales are mostly in small lots. Farm products are in good demand, but most of the arrivals of southern vegetables have been in bad order, owing to delays in transit.

From Cincinnati, Ohio: The provisions market is heavy and unsettled. There appears to be little effort to sell, and prices are slightly lower.

From St. Louis, Mo.: Provisions are badly depressed and lower. Hogs in large supply, and are declining with fair sales. Cattle are rather dull and tending downward with large offerings.

THE NEW YORK DRY GOODS MARKET.

Another quiet week has to be chronicled with the importing and commission houses. Jobbers are more active, but still report trade as dull. Retailers say that business with them during the week has not been as good as expected, plenty of shopping done, but not a proportionate amount of buying. The large auction sales of cotton goods during the week, and the report in the market that others will follow, has had the effect of causing some agents to lower prices, but transactions have been of a very moderate nature. Prints and printing cloths are also reported quiet, and woolens are at a very low ebb. In hosiery and men's furnishing a fair activity has been shown.

THE BRITISH COTTON GOODS MARKET.

[By Cable to BRADSTREET'S.]

London, May 24.—The Manchester cotton production is still considered in excess of the demand. For piece goods prices are barely steady. Yarns are in fair inquiry for export, but prices are unaltered.

THE DRY GOODS MARKETS.

[By Telegraph to BRADSTREET'S.]

From Portland, Me.: Dry goods have a discouraging outlook. The fish and lumber business are very promising. The hay crop is assured, there being more acres under cultivation in this state than for many years.

From Boston, Mass.: The dry goods market is quiet, and buyers are ordering only for immediate wants. There are some jobbers who report a better trade than a year ago. There is a pretty good export trade in cotton goods. In woolen goods the market is still overstocked and the demand continues light, and no change for the better is expected until the present supply is materially reduced. Collections are generally good.

From Providence, R. I.: The print cloth market is very dull, the amount of sales being light; 64s are quoted at $3\frac{11}{16}$c., and 56x60s at $3\frac{1}{16}$c. There are about the same number of pieces on hand as last week.

From Buffalo, N. Y.: The dry goods trade, jobbing and retail, for the first half of the week was quiet on account of the unfavorable weather. Considerable activity for the remainder is shown. In jobbing lines business has been confined largely to mail orders for immediate wants. The total is considerably less in volume than the preceding one, but so far for the month a considerable excess as compared with the corresponding month of last year.

From Rochester, N. Y.: Dry goods jobbers have all felt the depressing influence of the weather—a seventy-two hours' rain in this section, which has been a thorough dampener. Retailers had no trade whatever in consequence. Collections, however, are still reported fairly satisfactory.

From Philadelphia, Pa.: The jobbing trade has been moderate in all lines during the past week, and the package movement has continued light. Some liberal sales of cotton goods have been made by agents at comparatively low prices preparatory to semi-annual settlements with the mills, but the general market has undergone little change. Woolen goods are mostly dull and values are weak and unsettled.

From Pittsburgh, Pa.: The dry goods trade has been rather quiet during the past week. Trade for the season however has been satisfactory, and the volume of business is in excess of corresponding season last year.

From Cincinnati, Ohio: The dry goods market is without any new features.

From Cleveland, Ohio: Dry goods business for the week reasonably satisfactory, though the wet weather has somewhat checked mail orders.

From Columbus, Ohio: The trade in dry goods is reported even more quiet than last week, although collections remain very fair.

From Dayton, Ohio: The dry goods market is quiet. Agricultural interests are somewhat affected by the unseasonable weather.

From Chicago, Ill.: Dry goods are meeting with a fair order trade. There is some increase in demand for light fabrics, millinery, notions and clothing. Merchants report the general aggregate trade for the month larger than in May last year, and the result more satisfactory. Collections are good.

From Detroit, Mich.: Dry goods jobbers did very little business in the first half of the week on account of the unseasonable weather, but during the last two days trade quite active.

From Louisville, Ky.: Dry goods are quiet, but the movement is of fair volume for this stage of the season.

From St. Louis, Mo.: Dry goods are quieter than last week, owing to the cold weather. Price-lists have been reviewed, but without decided change, and values are quite steady.

From Kansas City, Mo.: The dry goods trade is very fair. The heavy proportionate increase of sales already reported is fully maintained. Collections are fair.

From Burlington, Iowa: Business would be improved by warmer weather. Jobbers report satisfactory sales, though some lines require pushing, and dry goods generally are moving steadily, but with no new features.

From Des Moines, Iowa: The trade is dull, but little better than last week. Wholesale trade is better, but quiet. The weather is bad and the season backward.

From Milwaukee, Wis.: There has been no change of note. The backwardness of the season has interfered with the movement of light fabrics.

From Topeka, Kan.: The general movement of trade is considerably better. Collections are fair. Produce a little dull, and prices are falling. Dry goods are improved and moderately active.

From San Francisco, Cal.: Dry goods jobbers report a good active trade, with the volume steadily increasing. The city trade is well sustained and prices steady, and collections are good. General business shows more activity.

From Norfolk, Va.: Dry goods jobbers only moderately active and retail departments somewhat improving.

From Wilmington, N. C.: Dry goods merchants have full stocks and the market is dull.

From Savannah, Ga.: Dry goods are steady, but sales have weakened.

From Memphis, Tenn.: The dry goods trade jobbers report fair, and comparing favorably with this time last year.

From Marshall, Tex.: The dry goods trade is only fair.

From Dallas, Tex.: Dry goods and groceries report firm sales for this season, and claim to be largely in excess of same period last year.

From Halifax, N. S.: In the dry goods market there is no change whatever. The wholesale trade anticipate only a moderate business next month.

COTTON.

The New York market for spot cotton for the week past has been dull and steady. Dealings have been very light and almost entirely for home demand. Quotations for spot middling uplands have not varied from the closing price last week more than one point, declining $\frac{1}{16}$c. one day and regaining it the next, until Friday, when it fell to 10⅞c, and closed at that figure, ⅛c. below the closing price last week. The sales for the week have been for export 22 bales, for consumption 2,152 and for speculation 231 bales. The deliveries on contract amount to 200 bales. The total sales foot up 2,405 bales, against 4,819 last week.

Below will be found the closing quotations for prompt delivery uplands at New York on Friday evening, as compared with last week and the corresponding week last year:

	This week.	*Last week.*	*Last year.*
Ordinary	7 15-16c.	8 1-16c.	9 7-16c.
Strict ordinary	8⅜	8½	10
Good ordinary	9 3-16	9 5-16	10 13-16
Strict good ordinary	9⅞	10	11¼
Low middling	10⅜	10½	11 15 16
Strict low middling	10 11-16	10 13-16	11 15-16
Middling	10⅞	11	12⅛
Good middling	11¼	11⅜	12⅝
Strict good middling	11½	11⅝	12¾
Middling fair	12	12⅛	13¼
Fair	12¾	12⅞	14
STAINED.			
Good ordinary	7⅜	7½	9
Strictly good ordinary	8 3-16	8 5-16	10
Low middling	8⅛	10½	10 11-16
Middling	10	11	11 11-16

The market for spot cotton closed steadily.

At New York the market for futures has been dull and easy. Quotations show an average decline of 15 points for near months and 7 points for later months. The sales for the week have been very light and show a large falling off from late preceding weeks, aggregating only 380,700 bales. The sales for the same week last year were 802,100 bales.

The following table shows the closing quotations for futures at New York Friday evening, compared with last week and the corresponding week last year:

	This week.	*Last week.*	*Last year.*
May	10.81	10.97	12.04
June	10.81	10.96	12.04
July	10.79	10.91	12.16
August	10.82	10.97	12.26
September	10.52	10.58	11.95
October	10.22	10.26	11.50
November	10.14	10.16	11.35
December	10.16	10.17	11.35
January	10.24	10.26	11.48
February	...	...	11.62

The market for futures closed steady.

The southern markets have been dull and quiet. Below will be found the sales for the week and the closing quotations for middling uplands at seven leading ports as compared with last year's quotations:

	Week's sales.	*To-day.*	*Last year.*
Galveston	1,159	10¼	11⅞
New Orleans	8,700	10⅛	12
Mobile	1,700	10¼	11¾
Savannah	685	10¼	11¾
Charleston	325	10½	12
Norfolk	2,004	10¼	11¾
Baltimore	313	10¾	12⅛

The total receipts of cotton at the ports since September 1 are 5,775,472 bales, an increase of 1,268,669 bales over the receipts of last year for the same time. The total at each port since September 1 is as follows, compared with the total to the same date last year:

	This year.	*Last year.*
Galveston	808,288	418,603
New Orleans	1,619,897	1,158,566
Mobile	308,366	257,876
Savannah	800,686	713,652
Charleston	563,928	486,948
Wilmington	128,245	132,698
Norfolk	778,406	590,775
Baltimore	70,320	35,573
New York	149,895	166,496
Boston	180,672	217,241
Philadelphia	88,859	71,747

Below will be found the receipts for each day in the week ending Friday, May 25, at eleven leading ports, as compared with last week and the same week one year ago:

	Sat.	*S. & M.*	*Tues.*	*Wed.*	*Thurs.*	*Fri*
Galveston	282	1,184	712	840	351	409
New Orleans	1,253	1,891	2,655	1,560	909	1,916
Mobile	69	197	154	115	4	94
Savannah	178	554	986	816	589	367
Charleston	167	117	90	101	87	88
Wilmington	25	45	53	4	34	49
Norfolk	1,064	997	1,002	677	1,060	1,122
Baltimore	662	594	512	110	....	632
New York	43	30	170	281	25	77
Boston	945	950	695	337	637	868
Philadelphia	1,264	650	510	429	....	433
Totals	5,952	7,215	7,539	5,270	3,696	6,055
This day last week	4,361	8,380	8,071	6,518	6,366	7,715
This day last year	1,787	2,983	5,222	1,664	1,469	2,721

The total receipts at the ports for the week were 38,280 bales, against 43,722 last week and 13,510 for the corresponding week last year.

The receipts at the twenty-four interior towns usually reported were 10,413 bales, against 13,808 bales last week and 4,080 bales for the corresponding week last year. The shipments for the week were 21,379 bales, against 26,991 bales last week and 16,438 bales for the corresponding week last year. The stocks for the week were 113,864 bales, against 122,381 last week and 95,536 for the same week last year.

The Liverpool spot market for the past week was dull and easier, with only a moderate demand, which was freely supplied. Prices dropped on Saturday one point, and have remained unchanged since, the closing quotation last night being 5⅞d.

Below will be found the closing quotations on Friday of low middling uplands for delivery, as compared with last week and the corresponding week last year:

	This week.	*Last week.*	*Last year.*
May	....	....	6 38-64d.
May–June	5 51-64d.	5 55-64d.	6 38-64
June–July	5 52-64	5 57-64	6 39-64
July–August	5 56-64	5 61-64	6 43-64
August–September	5 60-64	5 63-64	6 47-64
September–October	5 53-64	5 59-64	6 41-64
October–November	5 46-64	....	6 30-64
November–December	5 44-64	5 46-64	....

The sales for the week at Liverpool were 40,000 bales (of which 30,500 were American), against 71,000 (of which 48,000 were American) last year. The sales for export were 2,300 bales, against 8,500 bales last year. The sales for speculation were 2,100 bales, against 2,000 bales last year. The amount forwarded was 17,500 bales, against 10,000 bales last year. The stock in port is 961,000 bales (of which 723,000 are American), against 989,000 bales (of which 613,000 were American) last year. The total imports for the week were 61,000 bales (of which 47,000 were American), against 81,000 bales (of which 60,000 were American) last year, and the amount afloat 295,000 bales (of which 136,000 are American), against 405,000 bales (of which 130,000 were American) last year.

The Manchester market closed easier.

COTTON REPORTS.

[By Telegraph to BRADSTREET'S.]

From Louisville, Ky.: Cotton is inactive but steady at previous quotations. Receipts are dwindling.

From Cincinnati, Ohio: Cotton is in increased demand, but prices are without change.

From St. Louis, Mo.: Cotton sales are moderate, because of holders' views being stiff. The stock on hand is larger than a year ago.

From Wilmington, N. C.: The nights are cold and the crops are backward. Cotton receipts are light, and the market is firm.

From Helena, Ark.: Light frost; cold nights; stands very indifferent.

From Savannah, Ga.: The cotton market is very quiet.

From Dallas, Tex.: Cotton receipts and demand light.

From Galveston, Tex.: The weather for the past few days has been extraordinarily cool for the season.

From New Orleans, La.: The week's cotton movement is moderate. Spots are off ⅛c. on low ordinary to middling, inclusive. Good middling and middling fair are $\frac{3}{16}$c. lower. In futures, May have declined 32 points, June 37, July 36 and August 29. The feeling is quiet and apprehensive.

From Richmond, Va.: The weather is seasonable with no unfavorable indications.

From Norfolk, Va.: Cotton receipts continue about as when last reported. Stock of cotton not large and prices are advancing. Factors are holding firmly. The weather is unseasonable for planting.

From Marshall, Tex.: Cotton and the crops generally promise well.

From Providence, R. I.: The cotton market is very dull, the amount of sales being moderate. Middling uplands are worth 11¼c., and middling gulfs 11½c. There is a full stock on hand.

WOOL.

The situation has not radically changed during the week. Trade has been dull in all markets. The forced sale of 11,000 pieces of heavy woolens in the New York auction rooms on Wednesday fairly indicates the backward condition of the season's trade in woolen goods. The prices obtained were 10@15 per cent. below market rates, and afford no encouragement to manufacturers to continue production, which is likely to be much reduced for the balance of the season. This condition of affairs, coupled with the prevalent uncertainty as to the effect of the new tariff on the future of the trade and the general expectation of lower prices for wool in

the near future, promotes caution on the part of buyers, and most of the sales from day to day in the seaboard markets are in small lots to tide over pressing wants. Concerning the new clip there is not much that is new to be said. The cold weather has retarded shearing, but in the southern states a good deal of wool is ready for the market, and, as a rule, finds comparatively slow sale, owing to the extreme views of growers. Seaboard stocks are small, but sufficient for current requirements, as evidenced by the fact that few lots of foreign wool have been withdrawn from bond. The bulk of these imported stocks will be held until the new tariff law goes into effect. At Liverpool, this week, an easier feeling has been developed on carpet wools. The East India auctions opened on Tuesday with a moderate demand. American orders at this sale are said to be small.

AMERICAN WOOL REPORTS.

[By Telegraph to BRADSTREET'S.]

From San Francisco, Cal.: Wool is firm, and the demand is good, with free receipts of the new clip.

From Cincinnati, Ohio: The offerings of new clip wool are increasing, but buyers are inactive. Woolens and clothing are slow.

IRON.

The American pig iron market is still dull and flat, although various prominent firms state tha they consider the prospects much brighter than for some time past. Thus far, however, there are no sales of moment to record. It is reported that from fifteen to eighteen of the weaker pig iron furnaces will be blown out during the next month along the Lehigh valley. Three of the less effective furnaces of one of the leading companies there are already blown or in process of being blown out, though not for the same causes as those which have just been referred to. Still they represent so many furnaces less engaged in making iron. In view of the general understanding that smaller furnaces to the number named will go out of blast it is now considered doubtful if any formal reduction in pig iron will be made. Foreign pig iron is suffering in this market quite as much as the domestic brands. The importations of Scotch during the past week have been very small, much less than in the week preceding. Importers, however, are quite firm asking at $21 for Eglinton to arrive, and $21.50 in store. Three-quarters of the foreign raw iron now coming in at New York has been Spiegel and Bessemer, of which several round lots have been sold on private terms. Manufactured iron is somewhat firmer in view of the threatened strike among the Pittsburgh and other western center iron mill employés on June 1. Steel rails are firm at previous quotations, with no new features to report.

THE BRITISH IRON MARKET.

[By Cable to BRADSTREET'S.]

London, May 24.—Iron is languid and pig cheaper. The finished trade is moderate. The midland districts are dull, and the northern, except in engineering. The strike against wages reduction by the shop employés of Bolckow & Vaughan was the incident of the week.

AMERICAN IRON MARKETS.

[By Telegraph to BRADSTREET'S.]

From Philadelphia, Pa.: Pig is weaker than for years past, and stocks are accumulating. Several companies contemplate an early closing. Muck bars are fairly active and steady. Merchant bars are active and firmer. Nails are in brisk demand and factories are pushed with orders. Sheet is active, but sales are in small lots only. Steel rails are moving fairly. Offers are made for old rails for summer shipment, but few are accepted. Scrap is very dull and weak.

From Pittsburgh, Pa.: The spurt demand for manufactured iron continues, buyers laying in supplies in anticipation of an enforced stoppage of the mills. The manufacturers will not sign the present scale, but are anxious, if possible, to avoid a strike, and it is believed would make certain concessions, and pay more than they would be justified in doing to prevent an interruption of the business.

From Cincinnati, Ohio: Iron droops. There appears to be a feeling that the southern association of furnaces have cut prices in a few instances to effect sales. Manufactured iron is steady, with a fair demand and full stocks.

From Cleveland, Ohio: The iron markets continue depressed, virtually without change. Manufactured iron is in fair demand in view of the strike threatened June 1.

From Chicago, Ill.: Hardware more active than at the dates last year. Metals are steady. There are fair sales of bar and structural iron, which are jobbing freely. Orders are noted for the latter from railroads. Bar is improving, and firmly held at card rates. Nails are jobbing freely. Stocks are low, but are firmly held at $3.25 rates. Pig iron is quiet, with fair jobbing sales; prices are low. Steel rails are selling fairly at steady prices. The northwestern iron mines are producing more ore than they find sale for.

From Detroit, Mich.: The market is sluggish and unchanged. General trade for the week is light. Collections are much below the average.

From Louisville, Ky.: Pig iron is very dull.

From St. Louis, Mo.: Pig-iron prices are stationary, and very little is doing. Manufactured iron is active and firm, and values are tending upward, though quotations are unchanged. Stocks are fairly large, and probably sufficient to last sixty days under a trade of the present volume.

COAL.

There has been a very perceptible improvement in the anthracite coal trade during the past ten days. As may be supposed, it is attributed to the increased length of time, between the present and July, in which work at the mines will be stopped. A further influence appears in the change of views of many dealers who have been hanging back for some time in expectation of lower prices. It is reported in some quarters that the outlook is rather for higher than lower rates by the middle of summer. The reports from the west speak of a noticeable gain in the consumption of free-burning coals. Rates of freight by lake from Buffalo to points in Michigan, Wisconsin and Illinois have been advanced. Western bituminous coals have been forced into the market at various points to which these mines are tributary, to the comparative demoralization of better grades of like coal at those cities. There is no special change to note in the condition of the Maryland bituminous coal market. The increased production of anthracite from week to week is still maintained, as compared with the output in the corresponding portion of 1882. The figures are as follows:

	Tons, 1883.	*Tons*, 1882.
In January	2,075,741	1,833,910
In February	1,937,996	1,605,243
In March	2,375,512	2,108,042
In April	2,511,709	2,135,802
In May, first week	381,065	389,038
In May, second week	440,278	427,756
Totals	9,722,301	8,499,791

—or, to the close of the second week in May, a gain of 1,222,510 tons as compared with a like portion of 1882.

PETROLEUM.

The past week in speculative petroleum circles calls for no special comment beyond the strength exhibited in holding prices of certificates well above the dollar mark. In the earlier part of the week an inclination to advance was strongly marked, and prices did rise to a fraction beyond $1.04. This led to free sales by those who had bought at over $1.00, and the market lapsed once more to $1.03@$1.02, with fractional fluctuations. There was, during the occurrence of the variations in prices on the various exchanges just noted, no well news of sufficient importance to have any special effect on dealers. The statistical position of the product has never of late years been better for an advance, yet few seem satisfied that one will take place, owing to the uncertainties attending this particular line of speculation. There are rumors of course of "a big bull clique in oil," and the same much-mouthed authority names the Standard Oil Company agents, various Wall street magnates and others as members of it. Stocks in tank have been drawn on of late to the extent of nearly 100,000 barrels to make the requisite pipe-line runs. Production is currently reported to be down as low as from 60,000 to 64,000 barrels daily, and consumption at home with the foreign demand will aggregate very nearly as much. There is little reason to doubt that a heavy long interest in oil has been created within the past fortnight, but just how soon, or when it did, or may unload its four or six millions of barrels of oil is a point which it behooves the kite-flying investor to search diligently for, and when found to govern himself accordingly.

The market opened on Friday at $1.03¾, and after touching $1.04, closed at noon at $1.03½. The tone of the market during the earlier part of the day was firm and trading was active. Prices were inelastic, however, owing to the promised coming in during the afternoon of the Murphy well, on lot 740, Forrest county, which has been regarded as quite an important venture. The opinion was early expressed of it that it was the most important well due within the next two weeks. Its coming in would of course depress prices. But it did'nt come. At the close yesterday certificates were quoted at $1.03¾ bid; against $1.02¾ on Friday afternoon of last week, an increase of ½c. on last week.

The record of the prices of certificates of crude at New York during the week ended May 25 is as follows:

	Opening.	*Highest.*	*Lowest.*	*Closing.*
Saturday	1.03⅜	1.03⅜	1.02½	1.02⅞
Monday	1.03	1.03⅞	1.02¼	1.03⅝
Tuesday	1.03⅞	1.04¾	1.03⅜	1.04¾
Wednesday	1.03½	1.03¼	1.00⅜	1.03¾
Thursday	1.00⅝	1.03¼	1.00⅜	1.03¼
Friday	1.03¾	1.04⅛	1.02⅜	1.03¼

The market for refined continued at unchanged prices and practically featureless during the earlier part of the week. The decline in crude developed a weakness, which resulted in shading best brands ⅛c. More firmness was shown later in the week, and the decline was recovered. The quantity of business done has not been large, and the tone of the market has most of the time been tame.

The quotations for certificates of crude petroleum and of petroleum products last evening, as against those of May 18, May 11, and May 4, are as follows:

	May 4.	*May 11.*	*May 18.*	*May 25.*
Certificates, crude	92⅛	92¾	1 02¾	1.03¼
Refined, 110°	7¾	7½	7⅞	7⅞
Refined, 70°	7⅞	7⅞	7¾	7¾
Crude, in barrels	7 @7½	6⅞@7⅞	6⅞@7⅞	6⅞@7½
Case, plain	10	9¾	9½	9½
Naphtha	5¾	5¾	5¾	5¾

The total quantity of petroleum (crude equivalent) exported from the United States from January 1 to May 19 was 221,171,985 gallons, against 219,625,305 gallons in a like period of 1882, an increased exportation of but 1,546,680 gallons, against a decrease of 2,559,312 gallons reported up to May 12. For the week ending May 19, the foreign shipments were 17,203,706 gallons, against 14,164,820 gallons in the preceding week. New York city's exports of petroleum from January 1 to May 19 amounted to 188,117,860 gallons (leaving but 33,054,125 gallons for all other ports, against 39,784,852 in a like period last year), against 179,840,452 gallons in a like period in 1882.

OCEAN FREIGHTS.

The transatlantic business in freights done during the past week has been very moderate. Of course, the interruption on Thursday cut into the week's total considerably. Rates for charters and for berth room have been fairly maintained, but, except for charters for petroleum in the earlier part of the week, no activity worthy of mention can be chronicled. The movement of wheat abroad has been very moderate, the only business done in this line being in room on the berth per steamer. Not much better news comes from the outports. There have been no changes to note in the coastwise freights.

OCEAN FREIGHTS ELSEWHERE.

[By Telegraph to BRADSTREET'S.]

From Philadelphia, Pa.: There has been less doing in grain and petroleum for export, owing partly to the meager supply of tonnage in port, but mainly to the low limits of foreign orders.

From Wilmington, N. C.: Freights—foreign steady; coastwise quiet.

From Savannah, Ga.: Rates for tonnage rather weak.

SPECIAL LOUISIANA CROP REPORT.

[By Telegraph to BRADSTREET'S.]

From New Orleans, La.: Cane products are dull. The cold snap causes a slight uneasiness in regard to the plant. There is more inquiry for rice, and the stock is well held. Prices are unchanged. Flour and provisions are dull. There is no movement of wheat. Corn receipts 150,000 bushels; shipments 250,000 bushels. The market is quiet but strong at 59c. bid and 61c. asked. Crude cottonseed oil 35c. bid, 38c. asked; refined is 45½c.

THE PHILADELPHIA SUGAR MARKET.

Our Philadelphia correspondent sends word that the near reduction in sugar duties has checked trade in raw sugars and molasses. The stock of refined is light, and the market is fairly active.

NORTH CAROLINA NAVAL STORES.

[By Telegraph to BRADSTREET'S.]

From Wilmington, N. C.: Spirits of turpentine sells promptly, but lower figures are anticipated. Rosins are firm, and tar is wanted. Crude turpentine is quiet.

WHISKY MARKET REPORTS.

[By Telegraph to BRADSTREET'S.]

Our correspondents at leading centers of whisky production and sale telegraph as follows respecting the features of that industry: At Cincinnati whisky is in fair demand; prices unchanged. At Louisville it is dull and unchanged.

TOBACCO REPORTS.

[By Telegraph to BRADSTREET'S.]

Our correspondents at tobacco centers wire as follows: At Louisville leaf tobacco is strong and active. Receipts have been small, but are increasing. At Cincinnati tobacco is liberally offered. There is a fair proportion of better grades, and prices are firm. A fair demand has grown for common stuff. The Industrial Exposition commissioners have just announced the premiums to be offered for tobacco this fall, which will stimulate, it is thought, some activity in that direction. The young plants in this section have been injured, and the ground will require resetting. In the vicinity of St. Louis, Thursday night's frost hurt the tobacco plants, which are backward, and the St. Louis leaf market is very strong and upward, with light receipts.

NOVA SCOTIA TRADE FEATURES.

[By Telegraph to BRADSTREET'S.]

From Halifax, N. S.: Business has continued an average, but nothing more. The weather is unfavorable, and has a depressing effect. The shore fishing has commenced well, and during the past week or so prices have ruled lower.

FEATURES OF THE CHICAGO MARKETS.

[Special Correspondence BRADSTREET'S.]

Chicago, May 23.—The general business situation shows little alteration from last week. Bankers report a good demand for money, nearly all lines of trade being in want of more or less funds, a leading feature being an increased call from merchants who find it advantageous to borrow for the purpose of discounting purchase bills, the discounts which they obtain for cash being much greater than the rates they have to pay for loans. But money is plenty to those who offer good paper, and 6 per cent. is gladly accepted. New York exchange is firm at 75 per cent. premium per $1,000 between bankers. The cold and almost winter-like weather of the past few days has checked the demand for many lines of light goods that were moving freely during the closing days of last week, when the thermometer was up in the eighties. The present sales, however, are fully equal to if not larger than at this date last year. This, however, is not a large amount of consolation to merchants, as the weather throughout the west during the fourth week in May, 1882 was wet, and the range of temperature sufficiently low to call overcoats into active requisition, severe frosts being reported in all the western and northwestern states. Hence it will be seen that even the present unseasonable weather is not without precedent. Merchants also find both consolation and compensation in the fact that while their sales fail to show a desired improvement over this date last year, their collections are much better, and they are confronted with less losses from failures.

The grain markets are mainly influenced by the condition of the weather and character of crop advices, hence values are unsteady, and there is scarcely a legitimate feature connected with the trade. At the opening to-day wheat went up ¾@1c. on adverse reports from the winter-wheat fields in this state, but there was little demand except to cover "shorts," and when they were filled the advance was lost, the bulls not being disposed to buy. A few cargoes have recently been taken for shipment, but many think the movement was made to influence prices. Corn is moving out freely, but the receipts are fair. There are also rumors that recent shipments made to interior eastern points are arriving there in bad order, and this renders buyers more than usually cautious, and were it not for the concern felt in regard to the growing crop, a decline would be precipitated. So far as the crop outlook is concerned the prospect is far better than at this date last year. Your readers who will take the trouble to look back will ascertain that there were heavy frosts in all the states from Michigan west. On May 23 and 24, 1882, two inches of snow fell in northern Illinois and Iowa, and ice formed at many places. Hence the present situation is by no means desperate. The provisions market is destitute of a single legitimate feature. There is little demand for consumption; stocks are increasing, and prices are controlled exclusively by local manipulations, and prices to-day close at the lowest figures of the past ten days, mess pork showing a decline of 75c. per barrel, laid 25c., and short sides 50c. per 100 pounds since the date of my last letter. The position of the market is also being improved by a steady increase in stocks in store. The quality of the hogs received is also far better than at this date last year.

THE GERMAN CHICORY TRADE.

According to the Berlin journal *Export*, the following statistics represent the movement of the trade in the years 1880 and 1881:

	—*Exports.*—		—*Imports.*—	
	1880.	1881.	1880.	1881.
	cwts.	*cwts.*	*cwts.*	*cwts.*
Green and dried chicory	242,978	206,154	99,390	182,988
Burnt and ground chicory	178,382	164,154	13,938	15,536

It is stated that out of the 182,988 cwts. of fresh and dried chicory imported in 1881, no less than 163,648 cwts. came from Belgium, and a considerable part of the remainder from Holland. The

movements of imports and exports represent, it is said, a total value of about £275,000 per annum. The principal center of the growth and manufacture of chicory in Germany is the district of Magdeburg. The use of chicory as an admixture with coffee is said to be more general in France, Belgium and Austria than in Germany. Its use in the last-named country is stated to be mainly confined to the lower classes, but the wants of home consumption are of sufficient importance to require annually about 1,000,000 cwts. of unmanufactured chicory.

Considerable interest has been taken, it would seem, in a new application of chicory, which has been discovered by the researches of Herr Bartels. On account of the similarity of its composition to barley, and on account of the amount of bitter principle it contains, it is said to be applicable to the manufacture of a description of beer. Should the technical researches in progress confirm this supposition, it is remarked that the growth of chicory would acquire considerably augmented importance as a branch of German agricultural industry.

*PREVENTION OF FIRE FROM ELECTRIC LIGHTING.**

These rules and regulations are drawn up for the reduction to a minimum, in the case of electric lighting, of those risks of fire which are inherent in every system of artificial illumination, and also for the guidance and instruction of those who have, or who contemplate having, electric lighting apparatus installed on their premises.

The difficulties that beset the electrical engineer are chiefly internal and invisible, and they can only be effectually guarded against by "testing" or probing with electric currents. They depend chiefly on leakage, undue resistance in the conductor, and bad joints, which lead to waste of energy and the dangerous production of heat. These defects can only be detected by measuring, by means of special apparatus, the currents that are either ordinarily or for the purpose of testing passed through the circuit. Should wires become perceptibly warmed by the ordinary current, it is an indication that they are two small for the work they have to do, and that they should be replaced by larger wires. Bare or exposed conductors should always be within visual inspection and as far out of reach as possible, since the accidental falling on to, or to the thoughtless placing of other conducting bodies upon such conductors, would lead to "short circuiting," and the consequent sudden generation of heat due to an increased current in conductors not adapted to carry it with safety.

The necessity cannot be too strongly urged for guarding against the presence of moisture and the use of "earth" as part of the circuit. Moisture leads to loss of current and to the destruction of the conductor by electrolytic corrosion, and the injudicious use of "earth" as a part of the circuit tends to magnify every other source of difficulty and danger.

The chief dangers of every new application of electricity arise from ignorance and inexperience on the part of those who supply and fit up the requisite plant.

The greatest element of safety is therefore the employment of skilled and experienced electricians to supervise the work.

I. The Dynamo Machine.

1. The dynamo machine should be fixed in a dry place.

2. It should not be exposed to dust or flyings.

3. It should be kept perfectly clean and its bearings well oiled.

4. The insulation of its coils and conductors should be practically perfect.

5. All conductors in the dynamo room should be firmly supported, well insulated, conveniently arranged for inspection, and marked or numbered.

II. The Wires.

6. Every switch or commutator used for turning the current on or off should be constructed so that when it is moved and left it cannot permit of a permanent arc or of heating.

7. Every part of the circuit should be so determined that the gauge of wire to be used is properly proportioned to the currents it will have to carry, and all junctions with a smaller conductor should be fitted with a suitable safety fuse or protector, so that no portion of the conductor should ever be allowed to attain a temperature exceeding 150° F.

8. Under ordinary circumstances complete metallic circuits should be used; the employment of gas or water pipes as conductors for the purpose of completing the circuit should not in any case be allowed.

9. Bare wires passing over the tops of houses should never be less than seven feet clear of any part of the roof, and all wires crossing thoroughfares should invariably be high enough to allow fire-escapes to pass under them.

10. It is most essential that joints should be electrically and mechanically perfect and united by solder.

11. The position of wires when underground should be clearly indicated, and they should be laid down so as to be easily inspected and repaired.

12. All wires used for indoor purposes should be efficiently insulated, either by being covered throughout with some insulating medium, or, if bare, by resting on insulated supports.

13. When these wires pass through roofs, floors, walls, or partitions, or where they cross or are liable to touch metallic masses, like iron girders or pipes, they should be thoroughly protected by suitable additional covering; and where they are liable to abrasion from any cause, or to the depredations of rats or mice, they should be efficiently encased in some hard material.

14. Where indoor wires are put out of sight, as beneath flooring, they should be thoroughly protected from mechanical injury, and their position should be indicated.

N.B.—The value of frequently testing the apparatus and circuits cannot be too strongly urged. The escape of electricity cannot be detected by the sense of smell, as can gas, but it can be detected by apparatus far more certain and delicate. Leakage not only means waste, but in the presence of moisture it means destruction of the conductor and its insulating covering, by electric action.

III. Lamps.

15. Arc lamps should always be guarded by proper lanterns to prevent danger from falling incandescent pieces of carbon, and from ascending sparks. Their globes should be protected with wire netting.

16. The lanterns, and all parts which are to be handled, should be insulated from the circuit.

IV. Danger to Person.

17. Where bare wire out of doors rests on insulating supports, it should be coated with insulating material, such as india-rubber tape or tube, for at least two feet on each side of the support.

18. To secure persons from danger inside buildings, it is essential so to arrange and protect the conductors and fittings that no one can be exposed to the shocks of alternating currents of a mean electromotive force exceeding 100 volts, or to continuous currents of 200 volts.

19. If the difference of potential within any house exceeds 200 volts, the house should be provided with a "switch," so arranged that the supply of electricity can be at once cut off.

* Recommended by the Council of the Society of Telegraph Engineers and of Electricians, in accordance with the report of the committee appointed by them on May 11, 1882, to consider the subject. Members of the committee: Prof. W. G. Adams, F.R.S., Sir Charles T. Bright, T. Russell Crampton, R. E. Crompton, W. Crookes, F.R.S., Warren De La Rue, D.C.L., F.R.S., Prof. G. C. Foster, F.R.S., Edward Graves, J. E. H. Gordon, Dr. J. Hopkinson, F.R.S., Prof. D. E. Hughes, F.R.S., W. H. Preece, F.R.S., Alexander Siemens, C. E. Spagnoletti, James N. Schoolbred, Augustus Stroh, Sir William Thomson, F.R.S., Lieut.-Col. C. E. Webber, R.E.

WHEAT CULTIVATION IN THE SOUTH PACIFIC.

The Manchester *Guardian* says: The progress accomplished by each of our Australasian colonies in the cultivation of wheat during the ten years 1871–81 is shown in the following table compiled from official returns:

Colonies.	Acreage under wheat. 1871.	1881.	Production. 1871.	1881.
	Acres.	*Acres.*	*Bushels.*	*Bushels.*
New South Wales..	154,031	221,888	2,229,042	3,405,966
Victoria.....	334,629	926,729	4,503,795	8,714,377
South Australia ...	692,508	1,768,761	3,907,079	8,087,032
Western Australia.	32,275	21,951	355,000	153,657
Tasmania.....	63,332	51,757	847,962	977,365
New Zealand	77,082	365,715	2,448,203	8,297,890
Queensland	3,024	4,708	.. ...	39,612
Totals.....	1,356,861	3,361,529	14,348,681	29,675,899

The largest increase in acreage and production during the ten years is shown in the case of New Zealand. In Western Australia there is an actual decrease. The total acreage exceeds that devoted to wheat in the United Kingdom, and considering that during the earlier years succeeding the gold discoveries Australia did not produce enough wheat for her own consumption the subsequent progress appears satisfactory. The average yield per acre, viz., eight and one-quarter bushels, is exceedingly small, twenty-eight bushels per acre being the standard of a fairly good year in this country.

THE BANK OF ENGLAND AND THE LONDON LOAN MARKET.

The following is from the London *Daily News:* For years past the Bank of England has been charged with the custody of reserves. Other banks have no more thought of keeping large sums unemployed than private persons have thought proper to carry large bags of gold in their pockets. In case of a demand the private person goes to his banker, that banker calls in outstanding loans from the bill-broker, the bill-broker in turn takes bills or securities to the Bank of England, and borrows the ready cash required. Ultimately, an unusual or extra demand for money comes upon the Bank of England, which has transmitted the cash demanded through the links of the chain described. Obviously, however, if one of the links fails the whole chain is weakened, and must not be relied on. By refusing to lend at any time to the brokers the Bank of England virtually renounces the responsibility of cash-keeping for the whole country which tradition and usage have fixed upon it. Hitherto, if the bank has wished to protect its reserve—the cash reserve of the whole country—it has made it difficult for the brokers to borrow, has charged 5, 6, 7, or more per cent. for loans, but has not refused altogether. Now it seems to refuse flatly, and we cannot deny that the refusal must protect the reserve. The difficulty is to estimate to what extent this refusal acts as protection. When the chain was complete by which the rest of the country could draw money from the bank when required, the reserve was seldom allowed to fall below £11,000,000, and now it is barely £10,500,000. Even with an average reserve of £11,000,000 during the past twenty years, the bank rate of discount has been not much under 4 per cent. According to modern ideas and usage, then, a 3 per cent. bank rate is inconsistent with a reserve of only £10,500,000, as at present. It ought, according to these ideas and usages, to be over 4 per cent. At the opening, however, we showed that the bank rate has been continually underbidden, insomuch that an average of over 3½ per cent. bank rate has corresponded with a market rate of scarcely 3. The present market rate for bills is 3 to 3¼, and in some respects therefore the present effective bank rate is nearly equal to what a 4 per cent. nominal bank rate used to be. Still as long as the bank discounts at 3 per cent., it prevents the value of money so rising in London as to turn the exchanges. Other banks, whatever their theoretical duty, do not keep reserves of any magnitude. If the Bank of England were rigorously to refuse to lend to their emissaries, the bill-brokers, the banks themselves would have to keep reserves of cash for the meeting of unusual demands. The bank still lends, however, under the form of discounting bills, and therefore cannot well escape the duty of fulfilling its old functions in the maintenance of a reserve. It would be absurd to say that the bank is not to lend a penny in any form; but so long as it keeps its doors open to borrowers for the relief of other banks it remains the reserve-holder for the whole country. Renounce, as it may, the responsibility of keeping a cash reserve for other banks, the Bank of England ought not to be open to the accusation of lending too cheaply, even in the form of discounts, when the cash reserve of the whole country requires strengthening, and is too small to meet miscellaneous foreign demands, which experience shows can arise in a very inconvenient manner under such circumstances.

CONDITION OF LIVE STOCK IN THE WEST.

Elaborate reports to the Chicago *Drovers' Journal* from the cattle ranges of Colorado, Kansas, Texas, Nebraska, Idaho, Wyoming, Indian Territory, Montana and Nevada show that in the whole the live stock business is in a very thrifty condition. The percentage of loss in all states and territories, during the winter, ranges from 1 to 20 per cent., or a general average of 3½ per cent. The greatest loss was reported by Idaho, Indian Territory, and Kansas. The latter is the only state that reports an increase in shipments of beeves this season; but the general average is reported the same as in 1882.

RAILWAY DISCRIMINATION IN GEORGIA.

The Atlanta *Constitution*, speaking in reference to the alleged unjust discrimination by Georgia railroads against the city of Atlanta, tells of an organization of merchants in that city to make common cause against them, and so secure the recognition which they demand from those who are engaged in transporting produce and goods to and from that city. It appears that a few houses have declined to go into the organization for common defense against the railways. These are exhorted to do differently. The journal named says: "The discrimination has as yet affected only a few branches of business. If not corrected, however, it will very soon bear equally on all. The railroads have the most perfect organization. The merchants have none. If one railroad should decline to go into the 'pool' the rest would be weakened. So every merchant who declines to stand by his brother merchants in the struggle that is threatened weakens their common cause." This sounds strange. The south have been using exultant language over the refusal of the northern, east and west trunk lines to make a reclassification of freight on domestics and other cotton cloths to western points, alleging that the shoe pinches the foot of the New England manufacturer solely because the new cotton fabric mills at the south are making like goods cheaper, and successfully competing in the west and the northwest with the older eastern concerns. Now, it appears that the southern merchants in a similar instance are controlled by an unjust discrimination on the part of railways. This little incident vividly recalls the moral of the story concerning whose ox it was that was gored.

PRINCE BISMARCK AND INSURANCE PROFITS.

The *Pall-Mall Gazette* has the following:

"Capital is so ill-treated in various foreign countries that we cannot be surprised to hear England described as the home of capitalists. In Prussia a case in point has just come up. Prince Bismarck, whose idea of government is that commerce should be in the hands of a military statesman of autocratic tendencies, is reported to be suddenly scandalized at the high profits of fire insurance companies in that country. He does not propose to let this correct itself by the wholesome competition which high dividends always bring into a free field, but is reported to have a scheme for virtually confiscating some of the profits of fire insurance companies. The prince thinks the business ought not to be in the hands of private shareholders lest they should charge excessive premiums. It is true the undertaking of fire insurance by the state would place increased political power in the hands of officials. Pressure could doubtless be put upon individuals at voting times by the additional machinery so supplied, and nice berths could be found for decayed officers or others likely to give a return for state patronage. All the same, Prince Bismarck will find wealth and the wealthy forsake the Fatherland if he cannot keep his fatherly hands off the one and the other.

TRADE EMBARRASSMENTS.

There were 155 failures in the United States reported to BRADSTREET'S during the past week, 11 less than the preceding week, 31 more than the corresponding week of 1882, and 58 more than the same week of 1881. Compared with the previous week the middle states had 39, an increase of 8; New England states 35, an increase of 7; southern states 19, a decrease of 15; western states 46, a decrease of 9; Pacific states and territories 16, a decrease of 2; Canada and the Provinces 24, an increase of 3. The important failures were Jesse Oakley & Co., soap manufacturers; Thaddeus Davids & Co., ink manufacturers; E. G. Rideout & Co., novelties, and White & Runk, wholesale clothing, New York city; F. E. Womrath, furs, Philadelphia. In the principal trades they were as follows: Grocers 26; general traders 15; shoes 13; liquors 10; clothing 9; dry goods 9; manufacturers 9; drugs 7; bakers and confectioners 5; hotels and restaurants 5; tobacco and cigars 4; hardware 4; fancy goods 3; jewelry 3; furniture 3; crockery 3; millers 2; butchers 2; lumber 2; millinery 2; hats 1.

CALIFORNIA.

ANAHEIM.—G. D. Grannaway, grocer, has filed a petition in insolvency.

OAKLAND.—E. C. Fitzpatrick, harness, has failed.

OAKLAND.—Pearson & Laymance, dry goods, have failed and been attached

SAN FRANCISCO.—F. W. Borgrand, shoes, has assigned.

SAN FRANCISCO.—Jonas Cosnar, cigar manufacturer, has filed a petition in insolvency.

SAN FRANCISCO.—B. H. Daly, printer, has failed.

SAN FRANCISCO.—D. A. Healey, shoes, has applied for relief in insolvency.

SAN FRANCISCO.—H. C. Ruhl, importer, has gone into insolvency.

SAN JOSE.—S. A. Rosa, shoes, has sold out.

SAN PABLO.—W. B. Eastin & Co., general store, have failed.

SANTA ANA.—J. Cohn, general store, has applied for relief in insolvency.

SANTA CRUZ.—W. E. Lyman, shoes, has compromised.

COLORADO.

COLORADO CITY.—Stockbridge & Elwell, brewery, have been closed on mortgage

COTOPAXI.—E. S. Hart, general store, gave a bill of sale of stock and mortgage on all realty to D. G. Peabody, and assigned book accounts to M. Balline.

GUNNISON.—Howbert & Peery, shoes, gave a bill of sale to Asa Blood, and were attached for $1,470. The stock was inventoried at $7,309, and Mr. Blood held a chattel mortgage against it for $4,725. The firm also sold out their branch at Crested Butte to James McGee.

GUNNISON.—E. S. Lockett, hotel, has been closed on a chattel mortgage.

CONNECTICUT.

THOMASTON.—F. H. Platt, stoves, has assigned.

DAKOTA.

GRAND FORKS.—Burdick Brothers, grocers, are endeavoring to compromise at 50 cents.

DELAWARE.

WILMINGTON.—Emlen Hewes, commission lumber, has failed and is reported to have left town. He has failed several times.

GEORGIA.

ATLANTA.—C. G. Grosse, merchant tailor, has compromised at 50 cents.

ATLANTA —Smith & Johnston, produce, has assigned.

FORT GAINES.—J. D. Dudley, confectionery and restaurant, is offering to settle with some creditors at 50 cents. These creditors hold judgment, and decline to settle except in full.

MACON.—Henig & Sherwood, grocers, have assigned.

ROME.—T. J. Dabney & Co., drugs, who recently sold out, offer to compromise at 50 cents.

SAVANNAH.—J. O. De Costro, cigars, has assigned.

SUN HILL.—Henry S. Hatch, general store, has failed. Liabilities about $1,500; nominal assets $500

ILLINOIS.

CHICAGO.—The Hammell & Bonnell Proprietary Company, soap, has been closed by the sheriff.

CHICAGO.—Richard Lawless, shoes, has been closed by the sheriff.

CHICAGO.—Edward Lovejoy, pictures, has assigned to R. E. Jenkins. Liabilities $9,500; assets $4,500

CHICAGO.—H. F. Smith, tailor, has been closed by the sheriff.

CHICAGO.—James F. Snow, dry goods, has confessed judgment for $820 and been closed by the sheriff

KENSINGTON.—A. G. Crane, drugs, has been closed by the sheriff.

ROCK GROVE.—G. A. Emerich & Co., clothing, have been attached and sold out.

INDIANA.

EVANSVILLE.—J. P. Elliott, queensware, sold out to C. K. Bement, president of the Merchants' National Bank, who will sell off the stock, and, after satisfying his claim, will pay the other creditors pro rata. Mr. Bement thinks the business will pay 80 cents, and nearly all the creditors have agreed to settle at that figure. Liabilities about $2,000.

EVANSVILLE.—Attachments for $5,000 have been taken out against the Ohio Valley Transportation Company, and one of the steamboats was attached. The crew also libeled the vessels for wages aggregating $3,000. The company, it is said has been financially embarrassed for some time past, as the expenses exceeded the receipts.

INDIANAPOLIS.—V. M. Backus & Co., carriages, executed a chattel mortgage to the First National Bank to secure them and others for $12,000. This covers all personal property, estimated worth about $16,000. The other indebtedness is said to be about $8,000, unsecured. The failure is due to poor business and undertaking too much for their capital.

INDIANAPOLIS.—W. W. Miles, grocer, has sold out and failed.

IOWA.

ATLANTIC.—Cushing Brothers & Monerief, grocers, have been attached for $7,000, and there are mortgages on stock aggregating over $15,000

DES MOINES.—B. W. Morrison, grocer, assigned on the 24th inst. Liabilities reported at $19,000.

EAST NODAWAY.—O. N. Brown, restaurant, has failed.

GRAVITY.—Gould Brothers, harness, have failed.

JEFFERSON.—J. N. Ash & Co., clothing, have failed.

LAMONIA.—C. A. Wickes, grocer, has assigned.

MASONVILLE.—Latimer Brothers, general store, have assigned to A. K. Sullivan. Assets $4,000.

NEVADA.—James Fitzgerald, restaurant, has failed.

KANSAS.

TOPEKA.—Execution has been issued against Wilbur L. Trumbull, picture frames, on a judgment for $700.

WAVERLY.—J. W. Bixler & Co., confectioners, have failed and forced to sell out.

WYANDOTTE.—F. H. Pope, grocer, has been attached and sold out.

KENTUCKY.

LOUISVILLE.—F. C. Gray, groceries and restaurant, has been attached for $1,100.

LOUISVILLE.—M. F. Offutt, drugs, has assigned to M. H. Davidson.

NEWPORT.—Adam Petterman, clothing, has assigned to F. Kellinger. He was unable to obtain further credit on bank accommodations.

LOUISIANA.

DOWNSVILLE.—Etheridge & McKenzie, general store, are reported to have failed.

MAINE.

BOOTHBY.—W. C. Clisby, livery, has been attached for $2,700.

BOOTHBY.—D. W. Hodgdon, grocer, has been attached for $2,000.

CAMDEN.—J. H. Parker, baker, has failed. Liabilities $2,600; assets $600.

LEWISTON.—D. H. Holman, crockery, is in insolvency.

OAKLAND.—Sanford J. Baker, blacksmith, has been attached.

WASHINGTON.—C. K. Flanders, general store, offers 40 cents. Liabilities $3,250; assets $1,200.

WATERVILLE.—L. J. Cote, drugs, is reported to have settled and resumed.

WATERVILLE.—Luce & Miller, drugs, have been attached and business suspended.

MARYLAND.

BALTIMORE.—Peter C. Lynch, saloon, has filed a petition in insolvency. Liabilities $3,595; nominal assets $1,500.

BALTIMORE.—George W. Sheive & Co., wholesale paints and oils, have assigned. Liabilities $7,300; actual assets about $4,000.

MASSACHUSETTS.

BOSTON.—D. C. Calef, grocer, has failed.

BOSTON.—F. O. Cox, table manufacturer, has failed.

BOSTON.—Louis Eggenberg, peddler, has failed and filed a petition in insolvency. Liabilities $2,250.

BOSTON.—The Hathaway Steamship Company has suspended.

BOSTON.—George F. Kimball, groceries and liquors, has failed and will settle in insolvency. Liabilities $9,000

BOSTON.—J. W. Moore & Sons, grocers, have failed.

BOSTON.—W. H. Salterlee, teas, has failed, and offers 25 cents. Liabilities $800.

BOSTON.—The Tremont Boot & Shoe Company has had a mortgage foreclosed, and the stock is advertised to be sold by the mortgagee at auction.

BOSTON.—John H. Varrell, liquors, has failed.

BROCKTON.—H. A. Copeland & Co., shoe manufacturers, have been attached.

DANA.—Goodman, Schofield & Co., woolen manufacturers, are in insolvency.

HAVERHILL.—F. E. Heath, shoe manufacturer, has failed.

HUDSON.—D. F. Pope, livery, who recently compromised at 20 cents, owed about $15,000; assets $5,000.

LOWELL.—B. E. Hale, flour and grain, is reported to have failed.

NATICK.—Robert Best & Son, shoe manufacturers, are reported embarrassed. Liabilities $17,000; assets $11,000.

NEW BEDFORD.—O. E. Gifford, pianos, is in insolvency.

NEW BEDFORD.—T. G. Wing, spices, offers 40 cents. Liabilities $7,300; assets $4,000

NEWBURYPORT.—Sumner & Co., shoe manufacturers, are offering to compromise at 40 cents. Liabilities $24,616; nominal assets $16,174; actual assets $11,000.

NORTH ABINGTON.—J. M. S. Morrison, jeweler, is reported offering 20 cents.

SAUGUS.—Stephen Stackpole, ice, has been attached and had a mortgage foreclosed.

SPRINGFIELD.—E. D Chapman, drugs, has petitioned for a stay of insolvency proceedings. It is said most of the creditors have agreed to accept 25 cents.

TAUNTON.—The Taunton Copper Manufacturing Company has suspended payment on $360,000 of notes held under protest by eight banks in Boston, several in Taunton and one in Plymouth. These notes were indorsed by the late treasurer, S. D. Crocker, who died about two months ago, and there was no one to see to their payment, the company's quick resources being inadequate, although it is said it has more than enough assets to pay all the debts. The business is still running, and current payments are made for supplies.

TURNERS FALLS.—Jacob Yetter, saloon, has been attached for $8,000.

WAYLAND (Cochituate).—J. W. Moore & Co., grocers, have failed. Liabilities reported at about $2,000.

WEST MEDWAY.—The liabilities of Silas P. Holbrook, paper manufacturer, are $8,975; assets light.

WESTPORT (Central Village).—G. E. Tripp, grocer, has failed

WILKINSVILLE.—The Sutton Valley Company, woolens, has been attached, and has given a bill of sale of all property to N. Taft.

MICHIGAN.

HOWARD CITY.—Frank Ashley, dry goods, had his stock taken on a chattel mortgage

LANSING.—Eugene Angell, banker, has assigned to A. N. Hart He also had a dry goods store at Mount Pleasant.

LOWELL.—Coleman & Thomas, hardware, have assigned. Liabilities $5,700; nominal assets $6,500.

MINNESOTA.

MINNEAPOLIS.—Paul C. Herbst, merchant tailor, has assigned to Robert Jamison.

PERHAM.—Eugene E. Luce, banker, is reported financially embarrassed, and the doors were closed on the 24th inst. The branch at Breckenridge was also closed.

RICE'S.—J. P. Carpenter, dry goods and groceries, has assigned.

MISSOURI.

KANSAS CITY.—Elizabeth Borland, dry goods, has been attached.

REPUBLIC.—W. S. McCleery, hardware, is reported to have been closed on attachment.

ST. LOUIS.—Campen, Bierman & Co., wholesale queensware, have assigned.

NEBRASKA.

OMAHA.—J. Dobrackey, shoes, is reported to have left town.

PAWNEE.—Goodbridge & Skinner, market, have closed up.

WATERLOO.—H. P. Patchen & Co., drugs, have been attached.

WYMORE.—George H Strawn, jeweler, is reported to have left town.

NEVADA.

RENO.—J. C. Hagerman, general store, has gone into insolvency.

NEW HAMPSHIRE.

BENNINGTON.—W. E. Downes, general store, who recently sold out, has been attached. He had a saw mill at Greenfield, which was recently burnt out.

CENTREVILLE.—A. A. & D. Nichols, have failed.

PETERBORO.—C. E. Jaquith, lumber, has suspended.

NEW JERSEY.

LAMBERTVILLE.—P. B. Mackey, grocer, has assigned.

PATERSON.—Carrie Rosenstein, fancy goods, has compromised at 60 cents, in notes at three, six and nine months.

PLAINFIELD.—Shepherd, Johnson & Godown, carpenters, have been attached for $700 on notes, and assigned. Liabilities about $7,000. It is thought they can pay about 25 cents.

NEW MEXICO.

DENNING.—Reidlinger & Dugger, saloon, have been attached.

LORDSBURG.—J. H. McCullom & Co., general store, are reported to have left town

NEW YORK.

ALBANY.—Groesbeck & Liney, liquors, assigned on the 21st inst. to Morgan Liney.

BAINBRIDGE.—A. W. Jones, saloon, has assigned.

BAINBRIDGE.—Mrs. A. W. Jones, millinery, has assigned.

CHENANGO.—Daniel Lowell, general store, has assigned. Assets $10,000.

COHOES.—George R. Woodin, grocer, has been closed on a chattel mortgage. Several creditors have replevied their goods.

DUNDEE.—R. E. Alderman, harness, has failed.

ILION.—Charles H. Hubbard, furniture, has assigned.

NEW YORK CITY.—Isidor B. Brooks, jewelry, was in the hands of the sheriff on confessed judgments for $987.

NEW YORK CITY.—Thaddeus Davids & Co., ink manufacturers, assigned on the 23d inst. to James W. Todd, giving preferences for $33,792. These are divided into two classes, the first includes all the merchandise creditors of the firm—thirty-eight in number—whose claims aggregate $11,857, and whatever debts are due School District No. 1 of New Rochelle; the second includes such notes issued in the name of the firm by the late George W Davids, without authority or knowledge of the firm, as appear in any shape on the books, the firm wishing to pay these if they realized any benefit whatever from them. The assignment was made to protect the legitimate creditors of the firm against claims which may arise out of the irregularities of the late George W. Davids. As far as the firm has learned, the amount of notes issued irregularly by him in the name of the firm is over $150,000; besides this they say he misappropriated a large amount of the private funds of Mr. Thaddeus Davids. Of the notes issued it is thought that $70,000 were merely for accommodation of others, for which he received no consideration. The firm claim to have ample assets to pay all legitimate debts. The business was established in 1824, and was always regarded as being prosperous.

NEW YORK CITY.—The schedules of George W. Griffin & Co., shipping merchants, show liabilities $92,983; nominal assets $78,052.

NEW YORK CITY.—The schedules of Henrietta Guggenheimer, laces, show liabilities $2,223; nominal assets 1,524; actual assets $1,315.

NEW YORK CITY.—The Menhaden Company, fertilizers, has been placed in the hands of a receiver, E. H. Hobbs, on the application of P. Munson and others.

NEW YORK CITY.—Jesse Oakley & Co., manufacturers of soap and perfumery, assigned on the 19th inst. to William H. Ames and Herman W. Vanderpoel, giving preferences aggregating $222 902 for confidential debts and wages. The principal preferences were for notes drawn to the order of Aaron J. Vanderpoel $25,000; Vanderpoel, Green & Cuming $5,310; notes discounted by the Quassaic National Bank $10 000; notes discounted by the American Exchange National Bank $31,500; notes discounted by the Importers' and Traders' National Bank $10,000; A. J. Vanderpoel $5,000; estate of Samuel Oakley $22,559; Mrs. S. W. Vanderpoel $6,100; estate of Eli Benedict $38,954; estate of J. Vanderpoel $23,886; Isaac F. Oakley $45,000. Mr. John A. Oakley said the failure was the result of doing too much business for their capital, excessive competition, decrease in profits, large expenses, poor collections, dull trade, and the gradual absorption of capital, which had obliged them to rely on loans, discounts and indorsements of friends The liabilities are about $325,000, and the nominal assets are nearly as large, consisting of the factory, etc., at Newburgh, $150,000, and the balance in stock and accounts. The business was established nearly forty years ago by Jesse Oakley at Newburgh, and was formerly regarded as very successful.

NEW YORK CITY.—Solomon Orgler, cigar manufacturer, assigned on the 19th inst. to William H. Mager, giving preferences for $11,408, of which the largest were to Isaac Bernstein $8,500; E Spingarn & Co $1,158. Mr. Orgler failed in February, 1878, and compromised at 40 cents in notes extending over eighteen months.

NEW YORK CITY.—George E. Powell, cigar manufacturer, assigned on the 22d inst. to James W. Jonas, giving preferences for over $5,000. He previously confessed judgment for $1,435 to J. Powell for money loaned.

NEW YORK CITY.—Richardson, McKinney & Co., oil and mining brokers, suspended on the 24th inst., and 70,000 barrels of oil were sold under the rules for their account.

NEW YORK CITY.—E. G. Rideout & Co., novelties, assigned on the 24th inst. to E. Duncan Sniffen, giving preferences for $29,852, as follows: E. Duncan Sniffen $16,779; John F. Phillips & Co. $2,350; William H. Parsons & Co. $3,194; Julia A. Plummer $1,950; Mary A. Rideout $989; C. H. Stodcard $3,110; Frank A. Munsey $1,500. The failure is attributed to losses in the Caldwell Lithograph Company and falling off in business. About six weeks ago Mr. Rideout sold out his interest in the Lithograph Company for $7,000 cash, and the balance—$14,217—to remain on mortgage. On May 1 he also transferred realty for $11,500.

NEW YORK CITY.—White & Runk, wholesale clothing, assigned on the 24th inst. to Nathan Whitman, giving preferences for $45,000—to William P. Abercroth $3,713; J. H. Lansing $2,000; Lesher, Whitman & Co. $14,086; Yates, Ferguson & Co. $25,000. The business was established many years ago as Runk & White, who dissolved in February, 1872, after the death of William T. Runk, and the latter's son took his place in the firm, the style being changed at present. The liabilities are reported at $150,000, and the actual assets, it is thought, will not exceed $85,000. Depreciation and dull trade were among the causes, it is said, of their failure.

NEW YORK CITY.—Wiley & Wing continue the business of Wiley, Wickes & Wing, wholesale fruits, having settled with their creditors.

NEW YORK CITY.—Wolf & Michel, wholesale millinery goods, assigned on the 21st inst to Leopold Wallach, giving preferences on notes to William Marx & Co. $5,030; Strouse & Brother, Baltimore, $4,633; total $7,693. They began July 1, 1882, claiming a capital of $10,000, of which $4,000 was a loan by Strouse & Brother.

NORWICH.—Eugene Eastman, manufacturer of carriages, has assigned.

OSWEGO.—E. F. Otis, hats and caps, has assigned to E. B. Powell.

NORTH CAROLINA.

PITTSBORO.—The liabilities of J. B. Harris, general store, are about $6,000; nominal assets $7,000; preferences $3,000.

WINTON.—Rogers & Saunders, general store, have assigned.

OHIO.

CINCINNATI.—J. Steinau & Co., wholesale jewelry, assigned on the 25th inst.

CLEVELAND.—Davidson & House, planing mill, offer to compromise at 40 cents. Liabilities about $113,000; assets $54,000.

COLUMBUS.—Jones, Elliott & Co., books, etc., have assigned to Charles Tappan

GALION.—Collins & Wensel, grocers, have assigned to O. R. Cox.

GALION.—Matthew Cronenwelt, grocer, has assigned to I. M. Bloomer.

GALION.—E. & F. Nachtoreib, millers, have failed.

YOUNGSTOWN.—A Delamater, dry goods, has been closed by the sheriff on judgments for $24,000.

OREGON.

PORTLAND.—Pressey & Hinkle, general store, have assigned.

PENNSYLVANIA.

BRACEVILLE.—Execution has been issued against Henry Brace, general store, for $17,000.

BRADFORD.—The interest of M. Maloy in the firm of Leonard & Maloy, groceries and drugs, has been sold out by the sheriff.

CHESTER.—William Ellis, harness, has been levied upon by the sheriff.

GREENVILLE.—Reinor & Campbell, dry goods, have failed, and executions have been issued for over $5,000.

PHILADELPHIA.—Odin R. Edwards, confectionery, etc., was sold out by the sheriff on the 23d inst.

PHILADELPHIA.—Thomas Ewing, manufacturer of ink and mucilage, is advertised to be sold out by the sheriff on the 28th inst.

PHILADELPHIA.—All the right, title, etc., of B. Morgan Ester in the firm of B. K. Ester & Son, canned goods, was advertised to be sold by the sheriff.

PHILADELPHIA.—Adam Frank, druggist, has been sold out at constable's sale.

PHILADELPHIA.—Thomas Garety, furniture and carpets, has been sold out by the sheriff.

PHILADELPHIA.—Simon Goldstein, manufacturer of ladies' coats, has failed. Liabilities about $900; assets small.

PHILADELPHIA.—John W. LeMaistre, white goods, has obtained an extension of four, eight and twelve months. Liabilities said to be $15,000. The stock is reported worth $6,000 and book accounts about $6,000.

PHILADELPHIA.—Samuel Lees, carpet manufacturer, has failed. Liabilities $1,500. Judgments for $825 have been entered against him.

PHILADELPHIA.—Lippincott, McKinnon & Morgan, glass cutters and decorators, were sold out by the sheriff on the 23d inst.

PHILADELPHIA.—Thomas F. McCaffrey, grocer, has been sold out by the sheriff.

PHILADELPHIA.—Moses & Co., stationers, owe $60,000; nominal assets $109,000. It is thought the creditors should obtain nearly the full amount of their claims.

PHILADELPHIA.—Philip Nathans, clothing, was sold out by the sheriff on the 22d inst. The stock was bought in by different parties. It was thought his stock was in excess of his liabilities. Esther Nathans, his wife, is said to have been granted a feme sole petition, and to have rented a store next door to the one occupied by her husband.

PHILADELPHIA.—Mrs. Lena Scheurer, clothing, is reported to have failed, with liabilities of about $9,000.

PHILADELPHIA.—A. Solomon, lace goods, was advertised to be sold out by the sheriff.

PHILADELPHIA.—Dennis Timoney, wholesale and retail groceries and flour and feed, is embarrassed. It is said that he owes from $20,000 to $25,000, and is offering to compromise with his creditors at about 50 cents.

PHILADELPHIA.—Harry Walker, commission yarns, was sold out by the sheriff under judgment held by D. F. De Wolf, his father-in-law. He was also of Bassford & Co., hosiery manufacturers, of Germantown, who were also sold out by the sheriff.

PHILADELPHIA.—Frederick K. Womrath, importer and manufacturer of furs, is embarrassed. The liabilities are reported at $125,000, nearly all of which is said to be owing to relatives, friends and banks, in the form of borrowed money. The merchandise liabilities are thought not to be over $10,000. He is represented to have given judgment for $15,000 to a relative, and this, it is thought, will cover everything. His stock is estimated at $12,000 to $15,000, and it is supposed he has no other valuable assets. He is said to contemplate paying his merchandise indebtedness in full in one or two years.

PHILADELPHIA (Germantown).—Bassford & Co., manufacturers of hosiery, have been sold out by the sheriff. Harry Walker, the Co., who was also in the commission yarn business, became embarrassed last month, and confessed judgment to his father-in-law, D. F. De Wolf, for $6,380, and on the following day Barber, Crawford & Co., obtained verdict against Walker for $497. Walker's investment in Bassford & Co. was said to be $1,000. Everything was bought in by D. F. De Wolf.

PHILADELPHIA (Rising Sun).—George W. Parker, butcher, is advertised to be sold out by the sheriff on the 26th inst.

PITTSBURGH.—Execution for $8,400 has been issued against T. J. Maloney, scrap iron.

PLEASANTVILLE.—J. Locke & Sons, millers, have been sold out by the sheriff.

TAMAQUA.—The liabilities of Jeremiah Boas, shoes, are about $8,000; actual assets $4,000.

RHODE ISLAND.

PROVIDENCE.—Robert Heaton, proprietor of the Alpha Dye Works, is reported to have left town in debt.

PROVIDENCE.—B. B. Reynolds, grocer, has assigned to P. J. McCarthy.

SOUTH CAROLINA.

COLUMBIA.—S. N. Hendrix, grocer, is reported to have been protested.

TEXAS.

AUSTIN.—James & Son, dry goods and clothing, have assigned.

DUBLIN.—Bishop & Lauderdale, grocers, are reported to have been attached.

KYLE.—W. D. Keith, hardware, has assigned.

OWLET.—L. P. Lybrand, general store, is reported to have been attached.

SENTERFITT.—J. M Stillwell, saloon, has been attached for $3,500.

WEATHERFORD.—Horn & Smith, saloon, have been attached for $1,000.

VERMONT.

HARTFORD (White River Junction).—Colburn & Cannon, shoes, are in insolvency. Liabilities about $2,000; nominal assets about $1,000.

MORGAN.—Thompson & Howard, lumber, who recently failed, owe about $50,000; assets about $30,000.

NORTH BENNINGTON.—N. D. Hitchcock, drugs, is reported to have left town with $2,000 of debts unpaid. His brother has a mortgage of $500 on the stock.

RUTLAND.—George W. Hilliard, dry goods, has been attached.

WISCONSIN.

BRADSTREET'S:

A Journal of Trade, Finance, and Public Economy.

PUBLISHED BY THE BRADSTREET COMPANY,
279, 281, 283 BROADWAY, NEW YORK.

Terms, $5.00 per year in advance, including postage.

SINGLE COPIES, TEN CENTS.

SPECIMEN COPIES WILL BE SENT FREE UPON APPLICATION.

As a financial and commercial newspaper the foremost purpose of BRADSTREET'S is to be of practical service to business men.

Its special trade and industrial reports; its weekly epitome of bankruptcies throughout the United States and Canada, and the summaries of assets and liabilities, are alone worth the subscription price.

The synopses of recent legal decisions constitute an exceedingly valuable feature.

As commercial transactions, in the wider sense, are coming to be more and more conducted on a statistical basis, the information contained in BRADSTREET'S is of the first importance both to producers and middle-men.

THE TRADE AND AGRICULTURAL SITUATION THROUGHOUT THE UNITED STATES AND CANADA IS REPORTED BY TELEGRAPH TO BRADSTREET'S UP TO THE HOUR OF PUBLICATION.

FINANCIAL.

BRADSTREET'S

A JOURNAL OF

TRADE, FINANCE, AND PUBLIC ECONOMY.

PUBLISHED WEEKLY BY

THE BRADSTREET COMPANY,

NOS. 279, 281 & 283 BROADWAY, NEW YORK.

London Office, 84 Newgate Street, E. C.

TERMS: $5.00 PER YEAR IN ADVANCE; SINGLE COPIES 10 CENTS.

All communications regarding editorial or literary matters should be addressed to the Editor; all others to the Publishers.

ENTERED AT THE POST OFFICE AT NEW YORK, N. Y., AS SECOND-CLASS MATTER.

SATURDAY, JUNE 2, 1883.

NOTES OF THE WEEK.

For the first time since the fire of April, BRADSTREET'S, with this issue, is printed on our own presses. The full facilities of the mechanical department of the Company's business are now restored. The Bradstreet Company is therefore again fully prepared to receive orders for printing and bookbinding, as before the fire.

Some energy was infused into the stock market yesterday by the news that the great iron strike, which was to have taken place on the 1st of June, had been averted. It came doubly welcome, because least expected. Up to yesterday the week had been extraordinarily dull in Wall street, scarcely enough business doing to keep things alive. Prices had ruled about the same, showing only fractional variations, except in the case of two or three stocks, which were moved by special causes. The progress of the negotiations for the settlement of the troubles among the western roads was kept strangely quiet, and acted as a dead weight on the market. Private advices yesterday were to the effect that an agreement had been reached. The spurting up of prices yesterday gave a more cheerful look to the market, and some hopes were expressed that the rise would last.

The great iron strike will not take place. At the eleventh hour the Pittsburgh mill-owners sent for the president of the Amalgamated Association and offered to capitulate with certain slight modifications of the old scale of wages. Knowing that the victory had been won no quarter was shown, and the manufacturers signed the old scale intact. This was a decided surprise, considering the bold front and loud talk about preferring to shut down rather than concede anything. The boot pinched, because certain western mills would be likely to take the work the Pittsburgh mills would have lost through a stoppage. It was, therefore, due to a lack of harmony among iron mill-owners that the strike was averted; for, rather than have some of Pittsburg's trade go west, it was decided to agree to wages, to pay which, it has been declared, the mills will have to run close to a loss. The iron mill employés are to be congratulated on the peaceful victory won. They will now have work and wages where idleness and a share in a moderate strike-fund were the prospect. Pittsburgh and other industrial cities, also, will be gainers in that general trade will not be disturbed through the stoppage of their leading industries. The signing of the scale practically dispels the iron mill labor troubles, with the possible exception of those in Cincinnati. The latter may require a little more time to settle, but even this is not certain.

Our New Orleans correspondent, in a very interesting letter, directs attention to the important influence which the completion of the Southern Pacific Railroad system is likely to exert on the trade of the Crescent City. The chief advantages claimed for the system are that by reason of its geographical position it will be exempt from the snow blockades prevalent along the northerly routes, and that by reason of being entirely under one management it will be enabled to expedite freight without the delays experienced on the older transcontinental systems on account of the several separate managements interested in them. It is expected that the products of the Pacific slope destined for European export will go to New Orleans by this route. It is thought, in particular, that the facilities possessed by New Orleans for the shipment of grain will attract a good share of the cereal crops of that section. The system also opens up to the business enterprise of the Crescent City merchants the richest and most productive sections of the south and southwest, to which New Orleans should naturally serve as a supply depot and market for products. Experience of the advantages of the new line, it is even said, has brought about a diversion to the Southern Pacific of a large portion of eastern consignments to the Pacific slope.

The recent heavy failures in London monetary circles have caused the *Economist* to devote some attention to the methods of doing business on the Stock Exchange there. The first failure was of Lewin Moseley, who, it will be remembered, was a "note broker," and not a member of the exchange. His stoppage was said to be owing to his losses there, however, and caused loss and inconvenience amongst members. The next was of Turtons & Hadow, well known stock jobbers. One partner committed the firm to purchases of stock aggregating over $10,000,000, and to gambling losses of over $1,250,000. He had also made free use of the system of obtaining loans from other members on his I. O. U. This system of mutual accommodation between members, and also the custom of the banks lending money to the Stock Exchange upon deposit of security, are variously commented upon pro and con, and the *Economist* concludes by saying: "Altogether, the questions raised are really very difficult to answer satisfactorily. Happily, failures like that of Messrs. Turtons & Hadow are few indeed, and if this one tends to make members more careful respecting the nature and extent of their loans in future it will do some service. But in almost any business a man, knowing himself to be insolvent, may launch out in wild speculation upon the chance of getting back his money; and it is almost an impossibility to pass regulations that will prevent his doing so."

The position of the Gladstone administration in England is just now regarded on many sides as precarious. The defeat on the Affirmation bill in particular is thought to afford ground for this belief. Additional reasons therefor are found in the somewhat delicate condition of things in the East, and the opposition have even derived some comfort from the situation in Egypt, the early treatment of which, at least, reflected some credit on the ministry. The people are beginning to see, according to the conservative journals, that the present administration is not the one to be charged with the duty of sustaining England's prestige at a time when difficult questions are likely to arise in her outlying dependencies. But it may be that much of the weakness of the government's position is on the surface only, and it is not improbable that if an appeal were now made to the constituencies a substantial Liberal majority would be returned. The English people are at present very much bent upon the settlement of certain domestic questions, and they will not very long tolerate a state of affairs under which a prolonged obstruction of the public business is possible.

The Gladstone government have at least endeavored to put the public business in train to be done, although it may be that their policy points the way to an advance which the people are as yet unwilling to make. But what has been the conduct of the opposition in the last session, and what are now the sentiments of its leaders? Their efforts have been continually directed to embarrass the ministry, and their sympathy with the policy of obstruction was plainly indicated in the Thermopylæ speech of Sir Stafford Northcote, in which he glorified Leonidas and his Spartans as obstructionists. The people will not be likely to intrust the dispatch of the public business now waiting attention to men who take this view of the parliamentary difficulties which have tried so sorely the patience of the country. Moreover, the conservatives have given no hints of a large and consistent policy, unless we except the vague references to the imperial traditions of which the late Lord Beaconsfield was the representative. The Liberals, at least, have a policy; they are pledged to the consideration and, where possible, to the adoption of measures of social amelioration. Finally, there is now in the Conservative camp no man of such commanding talents as to crush out rivalry and to render possible that unity in the leadership which would be all important in a struggle for mastery with the forces of Mr. Gladstone. The death of Lord Beaconsfield has left the Liberal leader without a rival, and it will be found to be a task of no little difficulty to seriously impair his popularity during the remainder of his public career.

From the annual report of the British mint it appears that no new gold coin was struck in London last year. The same is true of the year before, and yet the supply received from the Australian mints was not much beyond the average amount received in recent years. The relatively small supply of new gold coins received from the home mint is ascribed chiefly to diminished requirements of the internal trade of the country. Mr. Fremantle, the deputy master, gives some tables of the silver coin transactions of the mint which are not without interest. They show, among other things, that during 1882 there was so great a scarcity of silver coin that it was not possible to take back from the circulation anything like the usual proportion of wornout coin. During last year there was a very large demand for new silver coin from the colonies. Not less than £400,375 were sent to them in 1882, the average amount between 1872 and 1882, inclusive, having been only £177,216 per annum. The demand came chiefly from the West Indies, and it has continued to be unusually large since the beginning of the present year. A distinct advance in the direction of simplicity and convenience has been made by the adoption of the decimal system of notation in transactions between the mint and the Bank of England. This system has long been in use in the branch mints at Sydney and Melbourne.

COTTON REPORTING AND THE NEXT CROP.

In giving out our first report regarding the acreage, condition and prospects of the cotton crop of 1883–84 it has been thought well to review briefly the two years' work done by BRADSTREET'S in this direction. It was apparent that no would-be authority up to that date (January, 1881) had done more than give out approximate guesses, based on fragmentary and insufficient evidence. It was an open question, indeed, whether the authoritative reporting of the progress of the crop, with a fairly approximate estimate of the total yield before the final marketing, was a possibility. This being the situation, it was determined by BRADSTREET'S to first get reports so full from the important counties of the cotton belt that they could be published *as reports*, instead of suppressing the actual returns and in their place giving out guesses with an air of mystery. To this end regular monthly cotton reports were begun in the spring of 1881. From month to month the returns were summarized just as received, giving as much detail as possible, with the view of working out a calculation for error. There was, of course, known to be much truth in the frequent assertion that all reports from the south of injury done to growing cotton crops contained a deal of exaggeration; and, again, that the tendency of all estimates received therefrom was to understate the crop. As intimated, the thing to do was to get some sort of a calculation for error. If continuous full reports from practically all the important counties were obtained, and the results impartially given out, it was thought that the average of error could, at least to an important extent, be determined. Communication was speedily established with the business men of the south living in the immediate cotton-growing regions, it being thought that one remove from the planter was the place to get the most trustworthy information. By midsummer BRADSTREET'S reports had become so full that they were generally regarded as fairly complete monthly exhibits of the condition and prospects of the crop. The great injury wrought by the long and severe drouth of that year to the cotton plant first found adequate expression in these columns. The July report for 1881 showed that for the month the dry weather had worked serious harm to the plant on the poorer uplands, but that on the river bottoms the plant, instead of having received injury, was in a promising condition. The subsequent reports revealed the further progress of the drouth until both upland and bottom-land had received its blighting effect. The reports were given out as received, and so stated, leaving, for the time being, the calculation for error to be made by cotton factors and others. The reports were made up on a basis of percentages as compared with condition at the corresponding date of the previous year. The final report, published on December 3, 1881, showed, when summarized, a falling off in condition from the same period of 1880 of 28 per cent., which, after allowing for increased acreage, indicated a crop of 5,014,000 bales. At the time this was given out the current estimates of the crop were 6,000,000 bales and upwards. The amount of error in the reports sent by the business men of the south remained to be determined. The report of December 3, 1881, was based on 1,134 replies from correspondents representing 92 per cent. of the cotton-growing regions. The crop of 1881–82 was subsequently proved to have been 5,456,000 bales, thus revealing an error in the reports sent us of 8 per cent. In other words, the sum of the estimates made by the business men in the immediate cotton-growing regions was 8 per cent. too low. The calculation for error was beginning to develop. It should be noted that the results of two subsequent inquiries as to the amount of the crop of 1881–82 still on plantations revealed in each case a like error of 8 per cent., and in each case an under-calculation. In the spring of 1882 it was thought best to forsake the method of reporting by percentages. The monthly reports had become so full and thorough that we undertook to get at the actual condition of the plant in each county. The monthly reports throughout 1882 told of the progress of the crop, and on December 9 we said:

> In considering the conditions under which the crop of 1882–83 has progressed to maturity, it should be borne in mind that the plant failed to secure a generally good start, and in some regions, notably in Tennessee, a bad stand resulted. On August 5, in summarizing the July report, it was not possible to report the general condition of the crop as good, owing to the excessive rains which had fallen during the month. Instead, the condition was regarded as from fair to good. During August the rainfall was still more excessive. Distinct harm had been done unless the weather for the ensuing weeks should prove exceptionally favorable. At the close of September we were able to report a distinct improvement, owing to better weather. From about the 25th of September until well into November the weather throughout the entire cotton region was scarcely ever surpassed in all the conditions favorable to the maturing of a full crop. In writing of the outlook on October 7 we said: "The weather throughout the south is now warm, and the chances would seem to be altogether in favor of a sufficiently prolonged period of good ripening weather." In the report for October, made public on November 4, out of 912 correspondents, writing from 573 counties, constituting 95 per cent. of the cotton belt, 683 reported the weather for October distinctly good; 181 correspondents reported the weather for the month fair, while only 81 regarded it as unfavorable for the maturing of the crop. The November report clearly demonstrated that the injury from worms had been inconsiderable. Our October report (November 4) concluded as follows: "A good cotton crop is now assured, the only room for speculation being as to its actual size." These points are recalled by way of directing attention to the fact that the real value of any system of cotton reporting depends primarily upon the regularity and thoroughness with which the condition of the crop is followed from month to month throughout the season.

In getting the report published on December 9, from which a calculation was made as to the total outturn, correspondents were asked to give returns of the total yield by counties. In response, detailed estimates were received from 569 out of the 642 cotton-growing counties having over 500 acres each. The returns summarized pointed to a yield of 6,488,000 bales, or, in round numbers, to a crop of six and a half million bales. From present appearances the crop of 1882–83 will reach say 7,050,000 bales, thus revealing that the business men of the south were in their 1882 returns in the neighborhood of 8 per cent. out of the way as in 1881. A small crop had been underestimated, as is usually the case, but it remained to be proved whether the apparent rule would hold good in relation to a big crop. Until this test could be made we would have been unwarranted in adding for error in returns. While two particulars do not often make a general, it is safe to say that in this case two are sufficient, and that, so far as now appears, the business men of the south, in conscientiously sending us returns by counties of the total yield of a given crop, involuntarily underestimate the same 8 per cent. This must be regarded as a most important conclusion. It is not to be thought for a moment, as is sometimes asserted, that the men of business in the cotton regions as a class knowingly misstate facts. From our knowledge of them the contrary is true. It is believed that when the account comes to be more fully made up it will be generally acknowledged that by patiently pursuing the policy outlined above BRADSTREET'S has made a distinct and very important advance in the solution of the crop-reporting problem.

The cotton report to BRADSTREET'S of to-day consists of mail returns to May 18 and telegraphic advices to date. Including telegrams, the replies received number 1,073. These come from 592 counties, representing 97 per cent. of the cotton-growing regions. Having regard to the area reported and the thoroughness of the replies, this is the most satisfactory cotton report yet received from the correspondents of our journal in the south. This is very gratifying, as showing that the men of business there believe in the sincerity and continued usefulness of our work. The following table summarizes our mail returns to the 18th:

States.	*Cotton counties of over 500 acres ...*	*Number of counties reported.....*	*Number of replies received.....*	*Percentage of area reported.....*	*Per cent. increase of acreage.....*	*Total acreage of 1883.....*	*Total acreage of 1882.....*	*Condition of weather.* *Good.....*	*Fair.....*	*Bad.....*	*Planting finished.* *April 15 to May 1.....*	*May 1 to May 15.....*	*May 15 to June 1 ..*	*Condition of stands.* *Good.....*	*Fair.....*	*Bad.....*	*Condition of labor.* *Good.....*	*Fair.....*	*Bad.....*

The reports as to acreage show an average increase of 5 per cent., the largest increase being in Texas. Our question regarding the acreage was as follows, the example relating to Chatham county, N.C.:

BRADSTREET'S estimated the cotton acreage of your county for 1880 at 14,826 acres, for 1881 17,790 acres, and for 1882 16,901 acres. What, in your best judgment, is the cotton acreage of your county this year? Answer—15,000 acres for Chatham county.

The 1,073 replies to the above question indicate a total of 15,984,677 acres in cotton this year, calculated from the decreased acreage of 1882. It is believed that the figures given fairly approximate the present cotton acreage. Our mail advices to May 18 show that to that date the season had been backward—too cold and wet. This was particularly true of Texas, Arkansas, Tennessee and Mississippi, and the two Carolinas, during March and April. It was true, also, of Georgia, Alabama and Louisiana, but not to so great an extent. The advices by mail as to weather are about equally divided between "good," "fair" and "bad," thus showing that on the whole the main element—the weather—had not been above "fair." Planting and the season in general were from fifteen to twenty days behind last year, and this is borne out by the telegraphic advices to date. The condition of the stands on May 18 was from fair to good. The condition of labor is reported from fair to good. We will enter next week more fully into this matter of the condition of labor.

The following indicates the tenor of our telegraph advices to date:

Telegrams from thirty cotton towns, given with our regular commercial news matter, show the condition of the weather and progress of the crop since May 18 to be as follows: Thirteen correspondents report the condition of the plant as unsatisfactory, owing to the weather being too cold and wet or from cold and drouth, while fifteen say there has been a decided improvement and that prospects are much brighter. The crop is still reported from ten to twenty days later than last year from nearly all sections. Rain is much needed in Texas, cotton being already considerably injured from lack of it. Louisiana has had too much rain, causing the season to be from two to three weeks later than last year.

The weather in Mississippi was too cold for cotton up to a day or two ago, but is now warm and pleasant with prospects favorable.

Since May 18 the weather in North Carolina has been good, but the crop is very late, owing to backward spring.

The later outlook from Georgia is good; also from South Carolina.

Alabama reports improvement since May 18.

In the light of both mail and wire advices the condition of the crop cannot be regarded as any more than fair. Reports as to the use of commercial fertilizers reveal that North Carolina will employ considerably less fertilizers than last year, while South Carolina is reported to use slightly more. Georgia is reported as using from five to ten per cent. more commercial fertilizers than in 1882. Alabama is also using more. It will be remembered that the decrease in the use of fertilizers in 1882 compared with the previous year was some 20 per cent. It is apparent that while their future use will naturally increase, the check received last year has yet to be fully recovered from. The reports generally say that the planters are greatly increasing the use of homemade fertilizers.

PROTECTION BY TRADE-MARK.

A Treasury circular relative to the registration of trade-marks calls attention to an amendment in the Tariff act to section 2,496 Revised Statutes, which has escaped general observation, and the effect of which may be very important upon the importations from all countries. The exceptional skill of the manufacturers of American watches is admitted. American manufacturers long since successfully competed with European makers of watches in certain grades. The representative of the Swiss government at the Centennial Exhibition made a report to his government that there would have to be a very severe competition for the market with the American watchmakers. It is known that one effect of the Centennial Exposition was to secure the introduction into Switzerland of American watch-making machinery, which had been despised before, and that Switzerland is now making a desperate effort to

regain its American trade. The system of interchangeable parts in watches, which is particularly American, has recently been put into operation in Europe. Mr. Robbins, treasurer of the American Watch Company, testified before the Tariff Commission that nearly one-third of the product of his establishment was sold in foreign countries; and these watches were sent to Great Britain, to all the English colonies, to South America, to Mexico, to the Cape of Good Hope and to the Indies, and that in London alone $50,000 worth was sold every month. Foreign manufacturers, in order to compete with the Americans, resorted to disreputable practices; and the attention of our government, some ten years since, was called to the fact that in Switzerland and in other countries there was extensive imitation of the works of American manufacturers, and that Swiss watches were exported to this country bearing the marks "Waltham," or "Elgin Watches." This abuse was brought to the attention of Congress by the watch trade, and it was corrected by the law, which is as follows:

Section 2496. No watches, watch-cases, watch-movements, or parts of watch-movements [*or any other articles*] of foreign manufacture which shall copy or simulate the name or trade-mark of any domestic manufacturer shall be admitted to entry at the custom-house of the United States unless such domestic manufacturer is the importer of the same. And, in order to aid the officers of the customs in enforcing this prohibition, any domestic manufacturer who has adopted trade-marks may require his name and residence and a description of his trade-marks to be recorded in books which shall be kept for that purpose in the Department of the Treasury under such regulations as the Secretary of the Treasury shall prescribe, and may furnish to the department *fac similes* of such trade-marks; and thereupon the Secretary of the Treasury shall cause one or more copies of the same to be transmitted to each collector or other proper officer of the customs.

The trade-marks referred to in this section related simply to those of watches, and the law was passed entirely in the interests of the American watch manufacturers. The Senate Finance Committee reported an amendment to this section, which included the words "or any other articles" (placed above in brackets). This made the legislation as to trade-marks general, and it is with reference to this amendment that the circular has just been issued. The effect of making this matter general will, of course, be for some time a matter of speculation; but the change certainly opens the doors to possible fraud, and may result in international complications. Under the direction of the Secretary of the Treasury collectors of customs are to refuse importations to all goods the trade-marks of which appear to the collectors to be imitations of American trade-marks. The collector and the Secretary of the Treasury are by the law made the judges. It is entirely within the conscience of an unscrupulous tradesman to steal the trade-mark of established foreign firms, register it in the Patent Office, claim it as his own, and, on the prima facie case thus presented, the collector is required to exclude what may be the genuine goods. It is said that trade-marks have already been registered at the Patent Office as belonging to Americans which have been in use in foreign countries for half a century. The amendment, undoubtedly, was an ingenious device to still further protect American industries. Under the decision of the United States Supreme Court declaring the trade-mark law unconstitutional it is doubtful whether this provision in the new tax law will stand the test of the courts. The United States Supreme Court in its decision plainly indicated that it was the duty of the treaty-making branch of the government to provide for trade-marks with different countries, under the constitutional provision as to the regulation of commerce. Whatever may be the legal effect of the new law, if unscrupulous American manufacturers shall choose to claim as their own trade-marks which belong to foreign manufactures, very serious complications may ensue. It is enough, perhaps, for the present to call attention to the curious results which the new law may make possible.

FOREIGN TRADE STATISTICS.

The figures given by the Chief of the Bureau of Statistics indicate that for the seven months ending April 30 the value of the excess of exports of merchandise amounted to $124,031,904, while during the same period the net imports of specie only reached the sum of $7,981,054. As will be seen, this statement leaves the liquidation of a very large portion of the excess still to be accounted for. It has been suggested that much of it has been liquidated by the sale of railway shares in this market for foreign account, and that a large amount must be charged to the interest on American loans negotiated in the foreign markets. But be this as it may, one thing at least seems to be tolerably clear, namely, that there is something wanting to the ordinary import and export statistics in order to render them complete, and that, considered as indications of the actual movements of trade, they are very likely to mislead unless used with care. That this should be so is not, perhaps, strange when regard is had to the fact that the figures are collected for a special purpose, not statistical, and that the sources of error to which the original collection of data is exposed are numerous and difficult to avoid. It is plain, too, from the figures given above, that a large part of the operations of commerce is not brought within the range of these statistics. It is important that these considerations should be borne in mind in view of the very free use made of import and export statistics in current discussions. The indiscriminate use of figures of late years has brought statistical science somewhat into disrepute, it being alleged, not without some show of reason, that statistics might be produced and arranged to show almost any result.

It will not be uninteresting, therefore, to inquire briefly into the nature of the statistics referred to with the view of determining the proper weight to be assigned to them and the limitations within which their employment is likely to yield useful results. The original data both as regards quantity and value being derived in the one case from the declarations of importers, and in the other from those of shippers, it will be perceived that a considerable margin of error is to be allowed for. In the case of imports, the collection of correct data is attended with more difficulty than in the case of exports. The values given to the latter are susceptible to a considerable degree of scrutiny and verification by the Bureau of Statistics, but the fraudulent undervaluation of imports is not within the power of such an agency to prevent, a fact which Mr. David A. Wells' experience as a commissioner of the revenue compelled him to recognize. The values which enter into the statistics are different in any case, in some instances widely so, from the values realized by merchants.

But even supposing them to be free from the errors remarked upon above, the mere statistics of imports and exports are still far from accurately expressing the actual business activity of a country. This was ably demonstrated by Mr. Robert Giffen, a gentleman well known to students of statistical science everywhere, in a paper read before the Statistical Society in March last. He found, after a careful investigation, that the unrecorded exports of the United Kingdom, in the shape of freights carried and other charges on the conveyance of goods, apart altogether from interest on investments abroad, amounted to about half the real amount of the recorded exports of British produce; so that, without having some view of these unrecorded exports, no true idea of English trade was possible. Leaving the unrecorded figures out of account, he said statisticians would err in their appreciation of the actual fact of England's business activity by 30 per cent. or more. It is probable that a similar statement, necessary allowances being made, would not be inapplicable to the volume of trade of other countries. In fact, as Mr. Giffen pointed out, the excess on either side, when ascertained, is only one item in an international account, and the figures in the case of each country are no guide to the state of its general account with other nations. It will be seen from this that much consideration is required in the application of figures which appear very simple, and that it is not without difficulty that correct views are arrived at on a subject so complicated as that of international trade relations.

THE SEWAGE PROBLEM AT LONDON.

Information occasionally reaches us that, notwithstanding the expenditure of about $70,000,000 for the construction of sewers in London, the system which is now in operation is by no means satisfactory or complete. It is asserted that the Thames is being seriously polluted, affecting the health of the inhabitants living near the sewage outfalls, which discharge 192,000,000 gallons daily or 70,000,000,000 annually. It has likewise been stated that the sewage deposits in the river are so extensive that the shipping interest is suffering. We read also that vast sums are still expended for new and large intercepting sewers, in addition to the annual cost, amounting to nearly $1,000,000, for maintaining existing works and pumping the sewage. Such statements, when unqualified, naturally lead the average reader to gain a poor opinion of the merits of modern sanitary engineering. The case, however, is by no means as bad as it is made to appear.

The large sums expended for the sewerage of London are not out of proportion to the populated area and the topographical difficulties. The average cost of the sewers per lineal foot, including the enormous collectors, carrying the sewage ten miles below the city, has been $5.68; for Paris it has been $9.62; for Berlin $5.80; for Vienna $6.10; for Hamburg $6.10, and for Frankfort $5.71. The sewerage of London has, therefore, cost less, so far, than that of any other large European city, and millions may still be spent without raising the cost beyond a reasonable sum.

The pollution of the Thames, though great, is not as serious as supposed. The tidal range being eighteen feet, permits a very large quantity of water to carry the sewage to the sea at a fair velocity. During incoming tide it is retained in large storage tanks, which are arched over, and flower gardens conceal the subterranean caverns of filth. It is true that deposits have formed along the bottom of the river, and that the dredged material has been found to contain some of the heavier sewage matter. But this fact appears in a different light when it is stated that a certain amount of dredging is always necessary in the Thames, and that if it is not sewage it will be sand or loam, owing to certain hydraulic laws governing the flow of every river. As the dredging is necessary, it matters little whether the substance taken out is clean or dirty. Careful inquiries have also failed to reveal any injurious effects on the health of the population residing along the Thames resulting from the discharged sewage. They have shown that preconceived ideas had much to do with establishing the belief.

Lastly, in referring to the proposition which has often been made and is now again seriously suggested, namely, of turning the vast quantity of London sewage upon the land and extracting its manurial elements, it seems that it is asked to spend a pound to earn a penny. It is well known that only fresh sewage has any value in this respect, and that when it is in a state of decomposition it benefits the soil but little. The proposition to carry it from thirty to forty miles away in covered conduits, one on each side of the river, and to pump it sufficiently high to flow by gravity, not only prevents it being fresh, but the necessary works embody an expense which those who urge the scheme can hardly realize. The sewage, further, would have to be turned upon an area of not less than 20,000 acres if used for irrigation, and not less than 5,000 acres if filtered through sand. While the value of this proposed territory—which is mostly sand—would undoubtedly be increased somewhat, this increase, however, as experience has amply shown in other cases, would stand in no proportion to the expense of getting the sewage upon it. Unless it becomes positively objectionable to turn the same into the outgoing tidal flow of the Thames at its present outfall—and the Metropolitan Board of Works thinks that this time is yet very distant—it appears to be short-sighted economy to recommend at this time the utilization of the London sewage.

CONDITION OF THE PLANTER IN MISSISSIPPI.

A valued correspondent at Columbus, Miss., writes us as follows, under date of May 26:

The plain truth is that cotton has not been and, under the present system, cannot be produced for less than 9 or 10 cents per pound, actual cost. Take the average price paid to planters, and they do not receive more for cotton than the cost of production; hence as a class they have not made any money for the last ten years. This state of things cannot last; a change must be made, and the question is, what shall it be? There is only one answer: Either produce other things than cotton, or produce cotton at less cost. Our planters, I am glad to say, have patiently and intelligently gone to work to accomplish this, some taking the one course indicated, some the other. For two years the planters owning our black lands have given much attention to fine stock of all kinds, and are meeting with gratifying results. These

prairie lands produce clover, the grasses and grain to perfection. In their wild state, years ago, the whole country was filled with wild horses and cattle, and of course is suited to stock-raising. Our lighter lands do not produce grain and grasses so well, hence stock-raising on these lands is not so remunerative, and it is probable that they will be devoted to cotton, jute, sorghum, fruits, etc. Improved agricultural implements are being used extensively this year for the first time, and I think where used the salvage in labor will greatly reduce cost of the crop raised. I was on a cotton plantation a few days since, and saw a planter, with six men and twelve mules, doing the same amount of work that his neighbor was doing with twenty-four men and twenty-four mules. Of course, this will very much reduce the cost of the cotton cultivated by improved machinery. Possibly the use of machinery may work a revolution in cotton planting, but the tendency is to less cotton and more food crops. Some planters have quit cotton altogether, and almost without exception they are prospering. As to the financial condition of Mississippi planters, it is not good, but it has been improving for two years, not because they have been making money, but because they have lived harder and economized more severely than I imagined was possible, and there seems to be a determined effort on their part to get out of debt and stay out.

Another encouraging feature is that northern and western farmers are coming among us and buying and settling on our lands (they plant no cotton), and even Hartford and Boston capital is finding its way here.

While we are still struggling with poverty, we do so with more spirit and hope than formerly, for we feel that we have a bright future before us.

We are passing through a general shaking-up, social and industrial. I am watching with deep interest the developments going on around me, and I hope that it will not be long before I can give you more encouraging reports from my native state.

THE MASSACHUSETTS LABOR REPORT.

The fourteenth annual report of the Massachusetts Bureau of Statistics of Labor, for 1883, has just been issued. It contains some 400 pages, in four parts, two of which are purely text, while the other two are composed almost entirely of tables.

Part I. is devoted to the question of "Employers' Liability for Personal Injuries to Their Employés." The investigation of the subject was made pursuant to the direction of the legislature, and the part contains the text of two bills submitted for the consideration of the law-makers, either one of which would throw additional safeguards around the workingman, for no influence is more potent with individuals and corporations than that which comes from the contemplation of prospective penalties under the law. The whole question of employers' liability can be given in the well known-nutshell. If to-day, by the negligence of a switchman, an accident occurs on a railway, and a passenger and a brakeman each have a leg broken, the passenger can, under the law, secure damages, while the brakeman, being injured by the carelessness of a fellow employé, can have no recourse. The object of both the bills presented is to give the brakeman the same chance to secure compensation for injuries sustained as the passenger possesses, proper reservation being made in case the brakeman materially contributed to cause the accident by any act of his own. The member of the Suffolk county bar who prepared the argument is plainly in favor of a change in the present law, and argues strongly through nearly 150 pages in favor of the workingmen who, by the carelessness of fellow-employés, suffer accidents, causing injuries and often death. The argument bristles with legal citations relating to cases tried in the English and American courts since 1837. To judges and lawyers the entire part will doubtless be interesting and instructive, but the general public will not care to go deeper than to consider the general principles involved, and which the case of the passenger and brakeman gives concisely. The same general public will undoubtedly make up its mind that the brakeman who suffers an injury, not from his own negligence of duty, should receive proper damages, and in case of his death, the conditions being similar, his legal representatives should receive suitable compensation for their loss. Happily this is a question which legal verbiage cannot befog. The grand principle of justice inherent in the question cannot be covered up, and it is doubtless only a question of time and legislative argument when Massachusetts and other states will have laws which will protect the laborers in all industries from the carelessness of fellow-employés, and thus lead to the adoption of more safeguards by employers, more efficient supervision by those in authority, a stricter accountability from all employés whose negligence may cause disaster and death, and a lessening of the hours of toil of many workers whose apparent carelessness may be the result of overwork. Anything that will make it safer for the workman makes it safer for the general public, and public sentiment will surely demand and sustain a proper law. Massachusetts may or may not be the pioneer state in passing such a law, but she deserves credit for opening the question and supplying such an exhaustive legal consideration of the subject.

Part II. is devoted to the question of the time employed and wages paid in twenty-one of the leading manufacturing and mechanical industries in Massachusetts. A new departure is made in the form of presentation, the individual establishment being taken as the unit, and 2,440 establishments are thus presented in detail, instead of an average, or averages, drawn from the 2,440 as a whole.

There are 352,516 persons engaged in the manufacturing establishments of Massachusetts, of which 207,793, or 58 per cent., were employed in the 2,440 establishments for which time and wages are given. The student of the wage problem will in these tables find ample opportunity for study. Our space will only allow a brief consideration of the general tables which supply consolidations and a few general averages.

The skilled mechanic receives a daily wage running from 80c. to $6 per day. There are but few establishments paying these extremes. In 14 establishments, out of 2,440, the daily wage is $1; in 95 establishments, $1.50; in 97 instances, $1.75; in 567 establishments, $2; in 245, $2.25; in 605, $2.50; in 206, $3; in 15, $4; while in the remainder the price varies between the extremes, and above or below the figures quoted. The ordinary laborer earns as low as 35c. per day and never more than $3, and that in one establishment only. In 471 establishments the average daily wage is $1; in 391, $1.25; in 542, $1.50; in 118, $1.75; in 115, $2; and varying figures in the other cases. In the manufacture of carriages and wagons, clothing, metals and metallic goods, musical instruments, printing and publishing, and stone, the majority of the establishments so engaged pay an average day's wage of $2.50, or over, to skilled mechanics; in building, carriages and wagons, food preparations, furniture, musical instruments, and stone, the majority of the establishments pay to ordinary laborers an average day's wage of $1.50, or over.

Of the 2,440 establishments, 1,960 ran an average of ten hours daily; of the 480 varying from ten hours, 413 worked less than ten and 67 more than ten hours. The daily average for the year, for the 2,440, was 9.92 hours.

The question of actual yearly working time is figured out minutely. Taking the establishments as a whole, the extreme time in months is manifestly twelve, that is, the entire year. These 2,440 establishments actually ran 11.01 months on full time, a little over half a month on less than full time, and were less than half a month idle on an average. In other words, the actual working time (short time being reduced to its equivalent in full time) was 11.36 months, or 290.62 days out of a possible 307, the Sundays and six legal holidays being deducted from 365 to fix the working year.

Part III. considers profits and earnings, the profit part of which is new and untried ground. The question of interest and expenses, two unknown quantities, have always stood in the way of the consideration of the profits question. And yet this question of profits is the fundamental, vital one of the wages question; and just now the wages question is the practical labor question, the bone of contention between the defenders of free trade and protection. If there is any efficacy in protection it will secure the protected manufacturer a profit; if it does not, the foreign manufacturer will drive him from the market. We have not the space to consider the individual showings, but must content ourselves with generalities. We find that but 29 establishments out of the 2,440 failed to make a gross profit—that is, failed to secure for their goods the cost of materials and labor. The bureau handles the question of interest and expenses in an arbitrary way, and then reasons *reductio ad absurdum*. It allows 6 per cent. on capital invested for interest and 10 per cent. on value of product for expenses, and then shows, by some 30,000 arithmetical computations, the result of which it could not foresee or alter, that the results justify the assumption, and that the figures assumed cannot be far from the truth, as an average. By this bold stroke the burden of proof is thrown upon those who dispute the figures. If they say the estimate for interest and expenses is too low, they must produce facts to sustain their estimates. Where they are certainly too high, the resulting apparent loss, in the face of a definite gross profit, proves the bureau's position. If we take the leading industries and arrange them in parallel columns we secure the following picture of profit and (apparent) loss:

Industries that *can* pay 6 per cent. interest on capital and 10 per cent. on value of products as expenses and yet show a *net* profit:	Industries that *cannot* pay 6 per cent. interest on capital and 10 per cent. on value of product as expenses and show a *net* profit:
Agricultural implements.	Arms and ammunition.
Artisans' tools.	Chemical preparations.
Boots and shoes.	Clocks and watches.
Building.	Food preparations.
Carriages and wagons.	Paints, colors and chemicals.
Clothing.	Railroad construction.
Cotton goods.	Shipbuilding.—[7].
Furniture.	
Leather.	
Machines and machinery.	
Metals and metallic goods.	
Paper.	
Printing and publishing.	
Rubber and elastic goods.	
Straw goods.	
Wooden goods.	
Woolen goods.	
Worsted goods.	
And fifty-five others.—[73].	

The seven industries which show an apparent loss on the basis given employ but 11,897 hands out of 352,516, or but a trifle over 3 per cent. They produce $75,684,514 in value out of $631,135,284, or 11 per cent., all but $7,648,759 being food preparations—that is, flour, meal, beef, pork, canned goods, etc. The correctness of the bureau's assumption as regards interest and expenses is thus sustained in two ways: they are not so high but that seventy-three industries out of eighty can pay them, and still clear a net profit; they are not so low that all the industries can pay them—an industry conducted on close margin (food preparations), as is well known, being the marked example. The figures will undoubtedly be assailed, but they bear the test so well that they will certainly stand until more reliable data, if such can be obtained, take their place. This part is a national contribution, though founded on one state's experience. The showings by cities and towns are most interesting. Haverhill and Lynn on boots and shoes can pay the 6 and 10 per cent., and yet clear a net profit, but Marlborough, Natick, Brockton and Worcester, though making a gross profit, do this business on a smaller margin for interest and expenses. The difference in the class of goods made in these places undoubtedly has an influence. Fall River, Lawrence, Holyoke and Lowell all make a net profit on cotton goods. Woburn does on leather, but Lynn, Salem and Boston work on a closer margin. Lowell, Boston and Worcester clear a net profit on machines and machinery, but Taunton cannot. Taunton also fails to clear a net profit on metals and metallic goods, but Attleborough, Cambridge, Boston and Worcester succeed in doing so. Springfield makes paper on a narrower margin, but Lee, Holyoke and Fitchburg all clear a net profit. In woolen goods, North Adams, Pittsfield, Lawrence, Lowell, Dedham, Blackstone, Millbury, Uxbridge and Worcester can all allow 6 per cent. for interest and 10 per cent. for expenses (on capital and value of product respectively), and still show a net profit. The following table shows the average yearly net profit per employé in some of the chief manufacturing cities and towns:

	Profit per employee.	*Earnings of each employee.*
Adams	$125.00	$301
North Adams	207.00	318
Pittsfield	174.00	323
Fall River	78.00	261
New Bedford	72.00	346
Taunton	49.00	404
Haverhill	34.00	348
Marblehead	8.68	283
Lawrence	120.00	325
Lynn	77.00	468
Salem	15.00	343
Montague	55.00	302
Chicopee	74.00	289
Holyoke	117.00	309
Springfield	40.00	397
Westfield	275.00	411
Cambridge	9.43	432
Lowell	143 00	289
Marlborough	21.00	416
Waltham	.62	424
Woburn	77.00	387
Quincy	110.00	412
Weymouth	54.00	438
Brockton	13.00	482
Rockland	26.00	430
Boston	126.00	417
Chelsea	32.00	414
Clinton	128.00	320
Fitchburg	155.00	436
Milford	4.00	385
Worcester	50.00	414

These places, taken at random, are probably fairly representative. Marlborough and Rockland do business on a closer margin while Waltham barely shows a profit per employe on the basis assumed.

A most valuable table gives the percentage of men, women, children and youth respectively in all the industries in the state, and another gives similar facts for thirty-two cities and towns. Naturally, where the men predominate, the average yearly earnings are the highest.

Comparative tables showing profits for the state, the city of Boston, and twenty-nine other cities and towns, for 1875 and 1880, make evident the fact that manufacturers made less money in 1880 than in 1875, after allowing for the gold premium in the latter year. In the state, in 1880 as compared with 1875, wages had been cut down 4.35 per cent. while the net profit of the manufacturers had fallen 7.19 per cent.

The profits tables, both by individual establishments, industries, or cities and towns, require but will repay deep study. They will undoubtedly be heard from in future tariff debates and wage discussions.

Part IV. is a paper upon "Early Factory Labor in New England," or more properly, Lowell, Mass., as it is the only place spoken of, written by Mrs. Harriet H. Robinson, the widow of the well-known newspaper correspondent "Warrington." She was formerly a mill girl at Lowell, and gives a graphic account of factory life from 1832 to 1848, touching briefly upon the ages of the old-time mill girls, their working time, rights and privileges, education, boarding-house life, circulating libraries, social and literary opportunities, savings, newspapers and magazines, dress, morals and health, the strike in 1836, intellectual tendencies, improvement circles, the Lowell Offering and its contributors, the influence of early factory life on the present, and some reflections on the present condition of factory labor.

The entire report forms a valuable and welcome addition to labor literature, and will, no doubt, be eagerly sought for by social economists, labor reformers, and all interested in the wages question.

OCCASIONAL NOTES.

As early as January 20, in the current year, BRADSTREET'S prepared a comprehensive report on the total production of anthracite and bituminous coal of the United States during the calendar year 1882. This was done by the aid of the official reports as to the Pennsylvania output of anthracite, careful estimates of the river and railroad bituminous product by leading operators and dealers, and the best available reports as to the progress of the industry elsewhere. The Rhode Island and Virginia anthracite production was given as estimated by good judges of the work in those states, and a semi-official report was obtained with reference to the new hard coal mines of Colorado. Corrections of the production of bituminous in Illinois, Indiana, Ohio and in various southern states were received, and the total for twenty-one states and territories, other than those named, was thus prepared on the same basis of gain as had elsewhere been noted. The results of this method, while comparatively satisfactory, cannot, of course, be exact for the output of the country as a whole. Yet BRADSTREET'S early totals, when compared with those published by Mr. F. W. Saward in the *Coal-Trade Journal*, April 15, based on later returns and probably quite comprehensive reports from certain quarters, make a very favorable showing. For reasons explained above, neither report can be absolutely correct as to the total for the country. BRADSTREET'S, published January 20, reported a total production of anthracite and bituminous in 1882 of 86,259,000 tons, while the *Coal-Trade Journal*, a careful and reliable paper, three months later gave the total as 86,862,000 tons. The output of Pennsylvania anthracite in 1882, published in this journal, was 29,194,000 tons. Mr. J. H. Jones, the official accountant at Philadelphia, now gives this total as 29,120,076 tons. It was distributed as follows:

To Pennsylvania, New York and New Jersey	19,957,789
To New England	5,004,775
To Western United States	2,213,107
To Southern United States	1,168,730
To Pacific Coast	49,005
To Canada	616,875
To foreign ports	49,735
Total	29,120,076

One of the most encouraging features in the present bright prospects of Mexico is the increased attention received by agriculture everywhere throughout the country. The *Mexican Financier* commends the efforts made by the government of the republic to induce a larger development of the

products of the soil, and remarks that the encouragement given is gradually and surely producing the best results. While the railway and the telegraph are gradually opening up means of communication, immigration into the country is increasing, and fields long idle are being brought into rich production. Part of the immigration is of a private and spontaneous nature, and part of it is in the form of public colonization, fostered and encouraged by the government. The journal mentioned refers to the rapid advance in the production of henequen, cotton, tobacco, coffee, sugar, etc., and remarks that these industries are still in their infancy, and that many foreign products are being introduced for which the soil is well adapted. The production of the country having shown so important an increase, even under the crude and limited systems still largely prevailing there, it is hoped, not unreasonably, that when the advantages of modern industrial science are added to those of location and natural conditions, the growth of the country's prosperity will be correspondingly greater. The *Financier* exhorts those scanning the horizon for new and more profitable fields of labor to turn their eyes to Mexico.

The *Pall Mall Gazette* says that the British shipowners are very earnest in their desire to improve the facilities of transit through Egypt. They are of opinion that the inadequacy of the existing canal for the traffic with which its managers have now to cope has been conclusively demonstrated. Delays arise from various causes. The curves in the canal occasion much inconvenience to the vessels of great length, which have now become so common, and it is a very difficult operation for two large vessels to pass each other owing to the narrowness of the channel. The obstruction it is admitted should not be a subject of surprise when it is recollected not only how the dimensions of vessels have increased, but how the traffic through the canal has developed since its opening twelve years ago. But how to accommodate this traffic and that likely to supervene in the future is the question to be determined. The development of traffic must be expected to continue; transit around the cape is rapidly giving way to traffic through the canal, and a great increase of traffic is expected from India. The British shipowners do not take kindly to the idea of the present Suez Canal Company providing the increased accommodation demanded, partly because they question the feasibility of widening the present canal, and partly because they dislike the administration of the company, which is much criticised for its "red tapeism and circumlocution." Affairs are being put in train looking to construction of a second canal, but nothing very definite has transpired as yet concerning the project. It is said, however, that all the steamship companies doing business with the East have harmoniously combined in the enterprise with private ship-owning firms of the first importance.

SPECIAL CORRESPONDENCE.

THE SOUTHERN PACIFIC RAILROAD AND NEW ORLEANS.

New Orleans, La., May 28.—About five years ago the commerce of this city was in a poor condition, owing principally to the loss of interior trade, the prime cause of ante-bellum prosperity. The great network of railways which had gradually extended northward was also a cause of depression at first, diverting trade to other centers. Northern capitalists, however, soon began to appreciate the development which the natural advantages of New Orleans would permit of, and a new era dawned for this region which is yet in its infancy. Following the building of Eads' jetties, which gave New Orleans a safe and deep channel to the sea, came projected railway lines to connect the Crescent City with the outer world, and finally companies and syndicates were formed, and charters and rights of way obtained. Though for some time these projects were slow in assuming any definite shape, they have at last reached a point which assures a brilliant future to this city. Recently some great projects, long contemplated in railroad circles, have been consummated by consolidating small interests under one management or syndicate.

The Illinois Central and the Louisville & Nashville lines give New Orleans easy communication with the north, east and northwest. The Mississippi Valley Railroad will soon traverse throughout its entire length the rich river delta. Texas has also been united to the Crescent City by three separate routes; but the Southern Pacific system, just completed, seems destined in the near future to become the greatest. Having acquired the control of the entire line from Houston, Tex., to San Francisco, the Huntington syndicate began to look about for some available gate of entry into New Orleans, the objective point of their network of railroads. There were but three ways of accomplishing this. First, by purchasing the New Orleans Pacific, which had already its line in operation from New Orleans to Shreveport; but this being a part of the Gould system it was scarcely for sale, and would have proved but a poor purchase, as it passed through a comparatively unsettled country, and afforded a very bad roadbed. The second was to parallel the Morgan, Louisiana & Texas road; but this would have been very expensive, as the old road owned about all the land available for railroad building. The last was to purchase the entire Morgan interest. This was done, and the Huntington syndicate acquired thereby, not only the lucrative business of the old Morgan system, but also a direct and through route from New Orleans to San Francisco. Of what immense importance this new line will prove here is apparent. The vast products of California and the Pacific slope destined for European export will doubtlessly seek the sea by the shortest and cheapest route. The Southern Pacific, by reason of its geographical position, will be totally exempt from the snow blockades prevalent along the more northerly routes; being entirely under one management, it will be able to expedite freight without the annoying delays so frequently experienced on the older transcontinental systems on account of the several separate managements interested in them and the lack of close connections. The Southern Pacific, it is claimed, will be the cheapest, not because of lower freight charges over the line (rates being about uniform with the Central Pacific), but on account of the means employed by the syndicate to insure quick and cheap handling of freight at this port. Possessed of large and convenient wharves and docks, the Southern Pacific is enabled to afford cheap wharfage to the heaviest tonnage, and grain and other produce and commodities can be loaded direct from the cars, which are brought along the ships' sides.

Another important element is the opening up to New Orleans business enterprise of the richest and most productive sections of the south and southwest, to which New Orleans, by virtue of its geographical position, should serve as a supply depot and a market for products. The Louisiana division of the main line, together with the Alexandria extension, traverse the richest sugar, rice and cotton districts of Louisiana. After crossing into Texas heavily timbered lands are passed, and the richest cotton region of the south is made tributary to New Orleans. At Houston meet about twelve different lines of railway, which extend to all the principal points in the Lone Star State, Arkansas and Missouri. They are obliged to forward all their New Orleans freight over the Southern Pacific route, which is the only connecting link between the great Texas system of railways and the southeast. Unrivalled facilities for the shipment of grain, which have raised New Orleans to the dignity of the second grain-exporting port of the Union, will doubtless attract a good share of the cereal crop of the Pacific slope, and that this is not mere speculation is shown by recent shipments of fair proportions which have come over the Sunset route. Large quantities of California wine are also being brought here, and as New Orleans and its tributary region have always been large patrons of our domestic vintage, increased transportation facilities will, of course, give a new impetus to the trade, and render it a still more powerful competitor with imported wines than it has been hitherto.

But the greatest revolution effected by the new line, and one which affects the whole country, is the diversion to the Southern Pacific of a large portion of eastern consignments to the Pacific slope. In fact the success of this route as a channel for through freight between the east and California has already surpassed all expectations. A prominent San Francisco journal says that "already about one half of the goods shipped from New York to this coast comes by way of New Orleans." The great advantage claimed for the Southern Pacific is the character of the service rendered. By the all-rail lines there has always been more or less delay, and a merchant could never count on his goods arriving on, or in the neighborhood of, any fixed day. Such freight, as we have already seen, passes over the lines of several independent corporations, and the control of the movement of trains is divided, each road governing trains on its line alone. In consequence there has been heretofore, instead of a through service, a series of local services. The average time for freight between New York and San Francisco has been thirty days, with variations oftener above than below this figure. As a consequence there has been no certainty that goods would arrive within the average time.

But the Southern Pacific, controlling the entire line of railroads between San Francisco and this city, together with the recently purchased line of steamships plying between New Orleans and New York, is enabled to give fast and reliable service, which, as we have seen, has already begun to be appreciated by shippers. Freight has already been moved from New York to San Francisco via New Orleans in fifteen days, and the average is sixteen days. It can be moved from New York to this port by sea in six or seven days, and from here to San Francisco in nine days, and over the whole route the Southern Pacific has complete control. The freight rate from here to the Pacific is the same as from St. Louis, the advantage in rates therefore, of which the shippers get the benefit, lies in the steamship line, and this advantage is by no means inconsiderable. The new Southern Pacific route is of course but yet in its infancy, but from such a bright beginning it will surely be safe to look for a most prosperous career and rapid development. Certainly nothing since the completion of the Eads jetties has eclipsed in importance this opening of a new route to the Pacific. L.

LETTERS TO THE EDITOR.

THE HAWAIIAN SUGAR QUESTION.

To the Editor of BRADSTREET'S.

SIR—It is to be regretted that the opponents of the Hawaiian reciprocity treaty should impute corrupt practices and motives to the custom house officials of San Francisco and to reputable citizens of the Pacific coast engaged in the business of sugar refiners. This only weakens their case, if they have any, which is open to debate. Mr. H. A. Brown, of Saxonville, Mass., in a letter to the Secretary of State, calling attention to this question, makes one sweeping allegation, namely, that the class of sugar now imported free from Hawaii under the treaty is of a higher grade than the sugar "commonly imported and known in the markets of San Francisco and Portland as Sandwich Island sugars" prior to 1875. If this were true it would demonstrate that the customs officers of San Francisco were corruptly derelict in their duty, which Mr. Brown also assumes to be the case. But is it true? What evidence is there that the law has been systematically evaded? None whatever. In his letter, which has been published, Mr. Brown admits that a moiety of the Hawaiian sugar imported prior to the treaty may have been of as high a grade as the present imports, but he argues that this fact is immaterial. Everything, therefore, turns upon the meaning of the word "commonly." Does it mean one-half, three-quarters, or the whole? If sugar, varying in color, were "commonly imported from Honolulu prior to 1875, and if a fair proportion of it, say one-half, was similar to the bulk of the sugar now imported, surely the terms and purposes of the treaty have not been violated. This light-colored sugar was "commonly imported prior to 1875," but not in such large quantities as in 1882, because the treaty stimulated production by leading to the investment of American capital in the Hawaiian islands.

Mr. Brown's objection, therefore, on behalf of the sugar refining interests opposed to the treaty, turns upon quantity; but the treaty does not restrict the quantity of sugar that may be imported, and thus his plea in that regard disappears. The fact has been investigated at the New York custom house and in San Francisco, and it has been satisfactorily proven that the sugar now inported from Hawaii is just such sugar as was "commonly imported from the Sandwich Islands prior to 1875." This should settle the point. If the treaty is to be fought, let its principle be attacked. Let it be clearly demonstrated that Americans may not invest their capital outside their own country, in the production of raw sugar for the supply of their own home market, but must leave this source of profit and trade to foreigners. This is really what the opposition to the treaty with Hawaii means if it means anything. Surely, the profits that would accrue to refiners would not compensate the country for this absolute limitation of commercial enterprise. If this principle be recognized as the settled commercial policy of the United States, we should hear no more about extending American commerce; we should become wholly dependent upon foreigners for everything we consume which is not produced in this country, and the stars and stripes would be wholly driven from the ocean. This is the logical outcome of protection and the selfish and unscrupulous opposition to the Hawaiian reciprocity treaty.

It had been alleged in the earlier stages of the opposition to the Hawaiian treaty that foreign sugar was imported into Honolulu and exported thence to San Francisco as islands' product, but the reports of the American minister and consul at Honolulu nailed that lie. There is no possible chance of such evasion of the treaty being attempted, for the Hawaiian planters, in their own interest, would be the first to expose the fraud. They have too much at stake to risk it by conniving at foreigners cutting into their market by introducing smuggled sugar, and the revenue laws of Hawaii are so explicit that an attempt of this kind could not possibly succeed.

Having personal knowledge of the high and honorable character of the collector of customs at San Francisco, I have no hesitation in saying that he will rigidly enforce the law, and that if sugars of a higher grade than the treaty covers be introduced duty will be levied thereon. It is improper, in my judgment, for any person to assail the integrity of a public official, as Mr. Brown does, without a tittle of evidence to warrant the imputation of favoritism and fraud. ROBERT J. CREIGHTON.

New York, May 24.

RECENT LEGAL DECISIONS.

[*Prepared expressly for* BRADSTREET'S.]

The phrase "to become due" does not apply to a debt which has no existence, according to the opinion of the Iowa Supreme Court in the case of Thomas vs. Gibbons, decided in April. The word "debt" means a subsisting debt; a debt which has yet to originate cannot properly be said to be a debt which is to become due.

A railroad company which receives passengers on a freight train is bound to the same care as though they were carried in a regular passenger train, according to the opinion of the Supreme Court of Indiana in the case of the Lake Erie Company vs. Fix, decided on the 18th ult.

Where a note contained the stipulation, "all whose names are signed to or on this note expressly agree to be bound as principal debtor," one signing the note and thus expressly agreeing to be bound as principal is estopped for asserting as against the obligee that he is a surety. Menaugh vs. Chandler et al., decided by the Supreme Court of Indiana on May 18.

The Kentucky Court of Appeals decided on May 23, in the case of Nall vs. The Farmers' Bank, that although a debt may be paid by the execution of a new obligation by different parties, such payment will not authorize the application of the statute of limitations, but so long as the usury can be traced it may be extracted even though a new obligation has been executed by different obligors.

The same court held, in the case of Grogan et al. vs. Allen, that the fact that a judgment which was made the consideration for a note was erroneous was no defense to an action on the note, the judgment being no more open to question than it would be in an action to recover money paid in satisfaction of it.

Another point ruled upon by the same court was in regard to the consideration necessary to support the contract of a surety or a guarantor, and the conclusion arrived at was that where the consideration between the principal and creditor had passed and become executed before the contract of the surety or guarantor was made, and such contract was no part of the inducement to the creation of the individual debt, such consideration was not sufficient to support the contract of the surety or guarantor. Snowden vs. Leight, decided May 23.

The sureties on an official bond furnished by an officer elected for one year cannot be held responsible for acts of their principal for a year subsequent to that covered by the bond, according to the opinion of the Louisiana Supreme Court, in the case of Harrison, Receiver, vs. Murdock et al., decided May 21.

Where a planter consigned to his merchant a lot of sugar and molasses, the product of cane ground at his mill, but belonging to another party, and the merchant sold the cane and applied the proceeds to a debt owing by the consignor, the Supreme Court of Louisiana held that the true owner might recover these proceeds where no new advance had been made to the planter on the faith of the shipment, and this, although the merchant might hold a pledge on the entire crop of the planter, and though the cane from which the sugar and molasses in question was made was grown on his plantation by one of his tenants. Boney vs. Given et al., decided May 21.

A railroad company, it seems, may by its own acts render itself liable as a common carrier beyond the extent of its own route. An application of this

principle is found in the case of Levy vs. The Louisville & Nashville Railroad Company, decided by the Supreme Court of Louisiana on the 21st ult. The plaintiff shipped four carloads of mules from St. Louis to New Orleans on the Iron Mountain Railroad and its connecting lines, consigned to Marx Levy. Defendant received the mules as common carriers at Mobile. Being unable to forward over its own line, owing to interruption, defendant forwarded the mules via Meridian & Jackson, in its own name and consigned to itself, received the mules in New Orleans, made delivery to the original consignee and collected the freight and charges as due to itself, and in all respects dealt with the consignee as if it had been the actual carrier. The court held that by such conduct the defendant made the lines over which the mules were transferred its own, and subjected itself to the responsibility of an actual carrier for damage suffered by the mules on the journey.

In an action for work and labor done on a railroad the contract relied on provided that the work was to be paid for on estimates made by the company's engineer, and that in case of a dispute the matter should be referred to the engineer, and his decision should be final. It appeared that though the estimate made by the engineer claimed to be full and complete yet he in fact omitted to estimate certain specified work done by the contractor. In this case, Kistler vs. The I. & St. L. Railroad Company, the Supreme Court of Indiana held that the estimate of the engineer, if based on a mistake or misapprehension of fact, was not binding on the contractor, and added that if the clause referred to in the contract was to be construed as meaning that a decision of the engineer precluded the contractor from resorting to the court for the settlement of differences it was void as against public policy.

In the case of Sohn vs. Freiberg et al. (a note of which appeared in our issue of February 17) it will be remembered that the Cincinnati Court of Common Pleas decided that a person not a subscriber to a mercantile agency could not maintain an action against another person on the faith of representations made by that person to the agency and taken advantage of by the non-subscriber. This decision was, on the 22d ult., reversed by the District Court, which held that whether a man was held out as a partner was not a question of law but of fact. The court admitted that there might be acts of themselves decisive, but said that where the representation was not of itself public, and might or might not have been intended for third persons, the inquiry must be into the circumstances. The intention of the defendant to limit his statement to the subscribers to the agency it was said could not be a conclusion of law, since intention was not a matter of law. The only question contested by him was whether he made the statement alleged, and that being found by the court, it would follow that it must have been the intention to give the firm credit to whoever might hear of it.

The meaning of the words "legal representatives" was recently in question before the St. Louis Circuit Court, in the case of the Masonic Mutual Benefit Society vs. Lewis, administrator of Dickey, the heirs of the latter being interpleaders. In the certificate of membership in the society held by Dickey it was provided that in case of his death the benefit should be paid to his wife, and in case of her dying before him to her "legal representatives." The question for the court to decide was who were indicated by those words. The public administrator, who was in charge of the estate, claimed that he was the only legal representative. A like claim was put forward by the children of Dickey, their mother having died about three months before their father. Judge Horner was of the opinion that the words "legal representatives" were used in the sense of "heirs-at-law." He said that in life insurance policies the words meant next of kin, and added that, the objects of the society being "to render financial aid to widows and orphans of deceased members," if the fund was awarded to the administrator it would go to the creditors of the deceased and not to his heirs, and the express object of the society would thereby be thwarted.

The question whether the giving a bill of sale amounted to an act of bankruptcy was recently before the English Court of Appeal under the following circumstances: In May, 1882, one Hemingway, a flock manufacturer at Wakefield, applied to his bankers for a loan or credit of £300, which they consented to give him on his obtaining the guarantee of two sureties for its repayment. Two friends of his, one Hauxwell and another, consented to do so upon Hemingway agreeing to give them, by way of security, a bill of sale of the whole of his urniture, stock in trade, machinery and other effects. The bill of sale assigned to the grantees all the grantor's then existing personal property, and enabled the grantees also to seize all property afterward acquired by him until satisfaction of that security. Afterward Hemingway filed a liquidation petition and the property comprised in the bill of sale was claimed by the trustee in the liquidation. In a lower court the bill of sale was held fraudulent and void as against the trustee. The Court of Appeal, in ex parte Hauxwell in re Hemingway, reversed the decision of the court below, and held that the instrument could not be impeached under the Bill of Sales act. Whether its execution amounted to an act of bankruptcy was, in the opinion, a more formidable question; but after mature deliberation the conclusion arrived at was that it was not such an act.

The case of Post vs. The Chicago & Northwestern Railway Company, decided by the Supreme Court of Nebraska on March 20, involved a point of some interest. It appeared that one Tristas purchased in San Francisco a third-class ticket to Boston at a reduced rate. According to a contract printed on the ticket the same was to be good only for twenty days and was not to be transferred. It was further provided that either of the companies over whose road the journey lay might, on the purchaser's failure to comply with the agreements referred to, refuse to accept the ticket or any coupon thereof and demand the full regular fare. Tristas went no further than Omaha, and there transferred the ticket to another, who in turn sold it to the plaintiff. The latter began his journey over the defendant's road, but at one of the stations on the route the conductor examined the ticket and inquired of him whether his name was Tristas. The plaintiff gave his name and admitted that he was not the original person to whom the ticket was issued, whereupon the conductor put the ticket in his pocket and informed the plaintiff that he must pay fare or leave the train. The plaintiff then demanded the return of his ticket, which was refused, and he left the train. Plaintiff afterwards brought this action for damages for defendant's refusal to carry him as a passenger, and secured a verdict, which the Supreme Court of Nebraska refused to disturb. The court said that a regulation of a railroad company providing for cheaper rates of fare between certain points, provided the ticket was used alone by the person purchasing the same and within a certain number of days from the date of issue, was reasonable and proper. In the case under discussion, the contract being that the ticket was to be used alone by Tristas, no one else could acquire the right by the assignment of the same to be carried over the defendant's road. But, although the ticket gave no right to the plaintiff to travel on the defendant's road, still it was his, and if in his possession might be sufficient to enable him to recover the purchase money from the person selling him the ticket. The measure of damages in such a case, however, could not exceed the value of a third-class ticket from Omaha to Boston.

BUSINESS NOTES.

The subject of drawbacks on sugar under the new tariff act is so confusing that the Secretary of the Treasury has been asked by Collector Robertson at New York to appoint a commission, to consist of one customs official and two merchants, to determine its meaning for the benefit of the trade as well as the custom house.

The Boston boot and shoe trade for the past week has been rather more quiet. There were quite a number of buyers on hand, but most of their orders had been placed. Business, however, was satisfactory. Shipments for the week to places outside of New England were 27,775 cases, against 30,690 cases the twenty-second week in 1882. Total shipments since January 1 were 1,019,134 cases, against 940,497 cases same time last year.

The British labor market continues unsettled, owing to strikes and labor disputes. The London *Labour News* of May 15 mentions that 10,000 North Staffordshire coal miners have struck against a 10 per cent. reduction in wages. At Middlesborough there is a strike against a 5 per cent. reduction. Wages and shop-management disputes at Sunderland have disturbed the engineering firms. The Sheffield file-trade strike has assumed large proportions. It is added that about 2,000 workmen are now standing idle, and "the effect of the American tariff is making itself felt in the cutlery branch." Many table-knife manufacturers are leaving for the United States and elsewhere, and the scarcity of ivory is telling unfavorably in many branches of the trade. A 10 per cent. reduction in miners' wages, at Stoke-on-Trent, has caused a strike there, but it is somewhat of a relief to know that the Huddersfield weavers have resumed work. Good laborers are in demand in agricultural districts, and emigration is increasing. The Sunderland bottle-makers' strike is finished. In other leading lines trade is quiet, while a few continue to enjoy exceptional activity.

For some weeks past, according to advices to April 26, the Bombay cotton goods market has been very dull. Stocks have not been materially reduced and prices there are very low—so low, in fact, that that the Manchester mills cannot export at a profit. The product of the Bombay mills was accumulating, production being in excess of the demand. An early improvement was looked for consequent upon the slow but steady taking of the stocks on hand.

There were 242 failures in the United Kingdom and Ireland reported to *Kemp's Mercantile Gazette* for the week ended May 12, against 232 in the like week last year and 283 in the corresponding week in 1881. England and Wales had 214, against 215 and 264 respectively in the weeks named in 1882 and 1881; Scotland had 19, against 14 and 18, and Ireland 9, against 3 and 1. The grocery and provisions trades lead in aggregate failures reported, and dry goods come second, closely followed by brokers, agents, etc., the building trades and liquor sellers.

The British exports of iron and steel to the United States during April, as compared with April in 1882, were as follows:

	April—		*Inc. or
	1882.	1883.	Dec. 1883.
Hardware and cutlery	£33,901	£35,453	*£1,552
Pig iron, tons	47,346	23,247	4,099
Bar, angle, bolt and rod iron, tons	1,441	1,487	*46
Railroad iron of all sorts, tons	16,360	4,518	11,842
Iron hoops, sheets and plates, tons	1,904	2,638	*734
Tin plates, tons	14,499	18,187	*3,688
Cast or wrought, tons	562	717	*155
Old iron, tons	11,210	8,228	2,982
Steel, unwrought, tons	14,474	3,891	10,583
Lead, tons	11	16	*5
Machinery—steam-engines	£17,189	£4,300	£12,889
Machinery—other descriptions	37,817	49,113	*11,296
Tin, unwrought, cwts.	706	661	45
Special return—Iron rails, tons	1,752	....	1,752
Steel rails, tons	14,459	4,342	10,117

A tract of mostly marsh land in Calcasieu and Cameron parishes, La., containing 802,357 acres, has been purchased from the state by a northern capitalist for $100,294. The *Times-Democrat*, of New Orleans, regards the transaction with a favoring eye. It is stated that the intention of the purchaser is to drain this land, improve it, divide it up, and put it into the market in farms to suit. This means an actual advantage to the state as well as a good profit to the investor. The success of the Disston purchase of Florida marshes shows this. Louisiana now expects a like rush of immigrants to these prospectively fertile regions.

At the meeting of Connellsville coke manufacturers at Pittsburgh there were not a sufficient number to make concerted action in reducing the production practicable. Beginning in 1882, with an active demand in the great Connellsville region, prices at the oven ranged between, say, $1.70 and $1.75 per ton. In June of that year prices fell off to $1.40 and $1.50, and in September the price reached $1.15 and $1.25. February last opened with $1.15, and during the month coke was obtainable by close buyers for $1 per ton on cars at oven. Transactions based on $1 to $1.10 were made during March, and the reduction of freights toward the close of April did not improve matters perceptibly. Cutting began in May, and sales as low as 90c. are reported. The coke makers are alarmed, and propose to take steps toward restriction and the scaling down of wages. And so the situation hangs.

The ravages of the cotton worm in Egypt are reported by the Manchester *Guardian* to have been very serious. Last season the injuries to the crop are estimated to have amounted to $2,500,000. The figures are of Egyptian origin, and are subject to liberal reductions. Nevertheless this pest is devastating the cotton fields of the fellahs, who find themselves incompetent to cope with the intruder. It is admitted by the British authorities that whole tracts of Egyptian cotton country have been laid waste. This state of affairs naturally brought the agricultural population of Egypt to the doors of the government officials for aid. Offers of assistance were made, and along with the memorial presented copies of recipes used by planters in the United States in order to exterminate this pest were sent. Subsequently Cherif Pasha received a deputation from the Alexandria Cotton Exchange, the members of which impressed upon him the necessity of promptly appointing a commission for the purpose of dealing with this evil, and suggested that the widest publicity should be given to the remedies they had made known. It was promised that the matter should have Cherif Pasha's earliest attention, and a deputy was named to wait upon a deputation from the exchange. Nothing as yet is reported to have been done.

The following national banks have been organized: The St. Paul National Bank, Minnesota; capital $500,000; Peter Berkey president; F. W. Anderson cashier. The First National Bank of Friend, Neb.; capital $50,000; Linus E. Southwick president; William O. Southwick cashier. The First National Bank of Montezuma, Iowa; capital $50,000; John Hall president; George W. Kierulff cashier. The First National Bank of Idaho Springs, Col.; capital $50,000; Henry Plummer president; George E. McClelland cashier. The Aurora National Bank, Ind.; capital $100,000; Francis Wymond president; Alex. B. Pattison cashier. The First National Bank of Fullerton, Neb.; capital $50,000; Chauncey Wiltse president; Brad D. Slaughter cashier. The Farmers' National Bank of Corder, Mo., has been incorporated, with an authorized capital of $15,000, one-half paid in. H. S. Munger, president of the First National Bank of Geneva, Ohio, is dead. The Ashaway (R. I.) National Bank has elected H. L. Crandell president in place of J. S. Champlin. The First National Bank of Brooklyn, N. Y., has elected John G. Jenkins president in place of N. Wyckoff. The First National Bank of Barre, Mass., has elected N. L. Johnson president in place of H. Wadsworth. The Gardiner (Me.) National Bank has elected I. J. Carr president in place of J. Bradstreet. The First National Gold Bank of San Francisco has elected Daniel Callaghan president in place of R. C. Woolworth.

As is well known, a representative of the Mexican government has been in London for some time past endeavoring to arrange on a satisfactory basis that portion of the debt of Mexico due to bondholders in the United Kingdom. Under the new era of commercial industrial development in Mexico, it has been found necessary to square accounts or make mutually agreeable arrangements thereto with creditors whose claims have been long ignored. The new arrangement with the British bondholders is one of consolidation. The scheme is said by the Glasgow *Herald* to be based on the issue of new bonds against the old bonds of 1851 and part of the loan of 1864. No attempt is made to reduce the capital, but the sum of £12 is regarded by the *Herald* as a very inadequate compensation for the failure of interest during 16 years. The amount of new bonds to be issued is £20,000,000, and as only £15,300,000 are appropriated to the debt, the Mexican government will have £4,700,000 at its disposal for the arrangement of internal debts of the republic, for the remuneration and expenses of the committee, and to defray also the expenses of its agent, the late Mr. Perry, and the expenses of the negotiation of the conversion, and to make provision for an establishment which shall "facilitate the punctual service" of the new issue. The new bonds will be redeemed by purchases at or under £50 per £100 in the market, or by drawings at £50 if the market price is above that sum; but no definite sinking fund is arranged for. The new bonds are to be entirely free from taxes of all kinds.

A correspondent of the London *Times*, writing from Shanghai, says that the trade of China for 1882 will show a considerable decline as compared with that of 1881, and was on the whole much less satisfactory. The totals reached in the latter year headed the list so far. The whole foreign trade for that year was valued at 163,364,000 haikwan taels (about $225,000,000), of which 91,910,000 represented imports of foreign manufactures and opium, and 71,452,000 exports of native produce. The totals here given have reference to the direct trade of the treaty ports, and exclude the trade of the British colony of Hong Kong and the whole Chinese coasting trade, of which latter about half is in British hands. Including these the total China trade, it is estimated, would amount to $500,000,000. The share of the first given total falling to Great Britain and her dependencies was 127,893,000 haikwan taels. The share of the United States, 13,522,000 haikwan taels, was somewhat less than that of the continent of Europe, excluding England. The increase in the volume of foreign trade since the treaty of Tientsin has been steady and continuous, though not at all extraordinary under the circumstances, the gain since 1865 amounting to only 50 per cent. on the value, though being greater measured by quantity.

The writer referred to, however, calls attention to one fact regarding the foreign trade of China which he regards as ominous for the future. This is that almost uniformly during the past twenty years the

value of the imports has considerably exceeded that of the exports, and there is apparently a considerable deficit which has to be made up in coin. In England, he admits, the imports likewise outrun the exports; but England has capital out at interest in all parts of the world, and she practically takes her income in goods instead of cash. With China, on the contrary, circumstances are different. She has no money outstanding in foreign nations; she is a borrower. Again, she is not a silver or gold-producing country in such a way that she can afford to give the precious metals away in return for foreign manufactures. This leads the writer to the conclusion that as a whole China is becoming poorer. It is further intimated that a large amount of capital that formerly belonged to the Chinese has been transferred to foreign lands, and is no longer available for the general internal trade of the country. In fact the dullness and stagnation which prevailed throughout a great part of the year has been attributed to the great scarceness of money among the native dealers. There appears to be a growing confidence in foreign management. A large amount of native capital is seeking investment in public companies managed by foreigners, and in house and land property within the foreign concessions. This is likely to give an impetus to the development of China's mineral resources; in fact several purely native companies have been formed for working coal, copper and other mines.

The British Board of Trade returns for the four months ended April 30 show a decline in exports of domestic merchandise, as compared with a like portion of 1882, of £680,816. This apparent loss was nearly offset, however, by a gain in reëxports of raw materials and colonial produce amounting to £511,000. The importations maintained their steady growth, with an excess in value as against the first four months of 1882 amounting to £5,187,730. The heaviest loss in exportations, as against a like portion of 1882, was in textile yarns and manufactures, which together fell away £751,199. Coal and machinery also went abroad less, the decline in the value of shipments of the same being £659,071. The decrease on exports of minerals and products thereof was £411,511, and on "unenumerated goods" it was £403,767. British farm produce, however, went abroad in excess of the first four months of 1882 to the value of £124,481, sundry manufactures in leather, oils, paper, books, etc., £51,912, and chemicals advanced £10,197. An analysis of the gains and losses in value of importations, as compared with last year, reveals an excess during the four months ended April 30 last in the value of receipts of five classes of foreign products and a falling away in nine others. As may be inferred, most of the declines are small, while the opposite is true of the commodities where increased values of receipts are noted. The heaviest advance made was in imports of foreign farm produce, the total value of which for the four months was £39,097,438, a gain over the corresponding time in 1882 of £5,925,447, or nearly $30,000,000 in one-third of the year.

The increase in the value of raw cotton imported was £1,137,721, the total value in 1883 being £20,612,124. The effect of lower prices prevailing is rendered conspicuous by the fact that, while the gain in value was but a little over ½ of 1 per cent., the increase in the quantity received in Great Britain over that imported in the four months of 1882 was 6½ per cent. The gain in value of "unenumerated goods" ranks third, being £978,492 in a total of £14,325,000. "Sundry manufactures," (as indicated in increased exports), were also received in excess of 1882, amounting in value to £102,697 out of the total value of £4,745,796. Timber, tallow, hides, ivory, etc., under the head of "sundries," were imported to the value of £10,240,259, a gain of £118,907. The heaviest decreased importation was of wool, of which 6⅝ per cent. less was received, valued in all at £11,921,330, a decline of £963,045. Importations of tea, coffee, cocoa, wines, spirits, sugar, rice, tobacco, etc., were valued at £19,621,264, a loss of £640,716. The receipts of flour exhibit the most marked falling away, the decline in quantity being no less than 52⅝ per cent. The value of four months' receipts was £669,626, a loss of £525,300. Chemicals, drugs and dyeware imports dropped off £440,491, to £5,040,183, and minerals and mineral products declined £151,873 in value to a total of £6,018,503. Textile manufactures and yarns received fell away £228,679, to an aggregate value of £7,696,980. The remaining declines were in hemp, jute and silk. The first dropped 12 per cent. in quantity and in value £20,363, to a total of £684,528; jute went into the country 30¾ per cent. more in quantity but £17,538 less in value, the total being £2,196,107. Silk imports were 10 per cent. less in quantity and £87,529 less in value, the total being £1,428,831. It is reported, however, that importations of textile manufactures and yarns are now increasing.

MEMORANDA FROM THE MAY COTTON REPORT.

The following memoranda are taken from the notes of our cotton crop correspondents:

NORTH CAROLINA.

From Cabarrus county: Prospects are bright, and farmers are very much encouraged. There has not been a year since the war that breadstuffs were so cheap. The stand of cotton so far as up is good. The labor in this county is good.

From Chatham county: Our farmers are rather backward in farming operations on account of very wet weather. There has been no replanting, but little cotton being up. Labor is plentiful and efficient.

From Cumberland county: The weather has been wet and cold and planting has been considerably retarded. Labor is plentiful and working well.

From Gates county: The spring has been very backward, and much of the cotton planted has not yet come up. There will be a considerable decrease of acreage, owing to farmers planting more grain. The condition of our labor is good.

From Harnett county: The weather has been very cool and wet, and the season is at least three weeks later than last year. What cotton is up looks very well. There has been about 10 per cent. more fertilizers used this year than last. Floating labor is unreliable.

From Mecklenburg county: The weather was wet and unfavorable to May 1, but since then it has been good, and cotton has come up well. The plant is better and stronger than last season. Labor is satisfactory as to supply and efficiency.

From Pitt county: The ground has been too wet and weather too cold for cotton up to May 4, and all who planted prior to April 25 have been compelled to replant. That planted from April 30 to May 5 is a good stand. Labor is not good this year, the low price of cotton and high price of meat having caused many to give up their crops.

From Richmond county: On account of very wet and cold spring farmers have been unable to properly prepare their land for planting. However, the stand of cotton that is up is good. Labor is good, both as to efficiency and supply.

From Rowan county: During an experience of fifty years in raising cotton in this section I have never seen such an unpropitious spring—rainy and cold weather. Cotton is not sufficiently up to determine what kind of a stand there will be. Labor is plentiful and efficient.

SOUTH CAROLINA.

From Darlington county: Planters are about two weeks behind in their farming work, owing to cold and rainy weather. It is favorable now, however, and we are taking advantage of it with a vim, and with a fair season from now out will make a fair crop.

From Edgefield county: The people are very backward in their farming operations this year on account of so much rain. Some are not yet through planting. Prospects are not very bright for next crop.

From Fairfield county: We are fully three weeks behind this year. The stand from early planting is bad, caused by heavy packing rains. It is too early to say, but farmers are hopeful of good stands yet, providing weather is favorable.

From Laurens county: Too much rain in March and April prevented the plant from coming up well, and the stand from early planting is not good. More labor is needed.

From Marion county: The weather has been good for planting, but rather cool for growing cotton. Planters are using a larger quantity of commercial fertilizers this year than last, and the prospects for a good crop are very fair.

GEORGIA.

From Baker county: Labor is scarce, idle, insolent and inefficient, and owing to this less cotton was planted this year. The weather has been unfavorable, and planting was delayed; the plant has come up slowly and irregularly, and the land is very grassy. The general prospect is nothing like as good as at this date last year. More fertilizers have been used.

From Clayton county: At present the cotton plant looks flourishing, as much so as it has for a number of years. There has been less planted this year than last, but fertilizers have been more generally used. The recent rise in cotton has greatly stimulated the farmers. Labor is plenty.

From Cobb county: The heavy rain of three weeks ago left the ground in bad condition, and this, together with cold and dry weather following, crusted the ground so that cotton could not come up well, but with rain the trouble will be remedied. No apprehension is yet felt.

From Fulton county: The crop is generally considered to be well under way, with as fine prospects as we have ever known. Weather is favorable, and labor good.

From Jackson county: The spring has been unusually cold and wet, baking the ground, and greatly retarding the coming up of cotton, and yet there is not much complaint of bad stand. The sales of fertilizers have been larger than ever before. Labor is very unreliable.

From Jasper county: The season was late, cold and wet weather prevailing, which prevented early planting and growing. The plant looks badly and the stand is below fair. Labor being principally negroes for cotton is bad, they being unreliable.

From Madison county: Cotton has done nothing yet, but few planters have commenced chopping out, owing to the lateness of the season. Farm work of every kind is put back, and the weather continues bad. Labor is scarce, there being less than last year.

From Marion county: Our crop prospect at the present time is as favorable as we could wish for. The stand is a fairly good one, and chopping is now in full operation, and with good weather there will be a good crop.

From Meriwether county: At this writing (May 22) the weather is quite cold, and cotton on gray lands in particular is dying out. Labor is scarce and inefficient.

From Oconee county: A heavy storm of wind and rain came upon us on April 22, and caked so badly that many farmers plowed up their land in order to loosen it, and the consequence is we will have a later stand than usual; some farmers have not finished planting. The labor supply is equal to the demand.

From Putnam county: The stands of cotton up to this time (May 16) are reported good, but it is feared that much of the late planting will suffer and die out from cold nights. Farmers are generally well supplied with labor.

From Randolph county: The preparation of the land for planting is much better this year than last, and the use of home manures much greater. The weather has been rather unfavorable, and stands are not good. Labor is less in quantity, but much better in quality.

From Stewart county: We have never had more favorable spring for starting off of cotton. The stands are good, and labor plentiful and good at reasonable prices.

From Taliaferro county: The successive heavy rains which we had during the early part of spring crusted the soil and has prevented cotton from coming up well, and a stand cannot be obtained until it rains. Many farmers have replanted.

FLORIDA.

From Calhoun county: So far this season everything has been very favorable for the coming crop. Planting was slightly retarded by floods.

From Gadsden county: The weather has been unusually fine for the young plant, and a good portion have finished chopping out. Labor is rather scarce, owing to the higher prices paid by railroads.

ALABAMA.

From Barbour county: Owing to the heavy rains and cold spells farmers have replanted cotton in corn to some extent. The weather is now very favorable for the crop, and farmers are taking a great interest in it and are working hard. Stand is fair.

From Blount county: The cotton prospects are very unfavorable so far this year. If the season should be good from now out, not more than an average crop could be expected.

From Butler county: The spring has been cold and backward, and lice have damaged the cotton plant to some extent. Labor is difficult to control this year, from the fact that they have plenty of provisions. Wages are higher.

From Clark county: Everything is moving on finely for a good cotton crop. Farmers are much further advanced than at this time last year. Cotton is chopping out extensively. Stands are good.

From Coffee county: The cotton crop of this county is backward this season. Stands are poor up to date, and labor scarce at high wages.

From Conecuh county: There is much complaint of plant dying, drouth and cool nights, and farmers who have not yet planted fear to do so, lest the seed swell and never come up.

From Dallas county: With us the spring has been very fine and the weather just right for cotton. More pains have been taken in preparing the land, and the spirit of progress is more noticeable than in former years. Prospects are considered excellent.

From DeKalb county: The condition of our farmers is better than for years past. We expect a larger crop of cotton this year than ever before, and it will be made much cheaper. There are plenty of provisions in the county, and labor is good.

From Macon county: Weather has been generally good. The spring has been late, but the weather is now fine, and prospects are considered good. Labor is working well.

From Marengo county: Stands of cotton are fair but small, owing to very cold spell about two weeks ago. It is very dry now, and rain is much needed. Labor is, generally speaking, good.

From Tallapoosa county: The nights and early mornings are unusually cool, and do not help cotton along. There has been a great deal of rainy weather, and this, taken with the cool weather, have made our stands imperfect.

MISSISSIPPI.

From Amite county: We have had a very wet and backward spring, heavy rains, high waters and several hail-storms have passed over our county, which caused a number of farmers to plough up their entire planting. As a general thing, the stand of cotton is fair. Labor is rather unsatisfactory.

From Clay county: We are having good weather now for the growing and cultivation of cotton. The plant is yet small, but if weather continues good, so that it can be worked, will make a great change in a short time. Chopping is now going on, and though labor is not so abundant as usual, we think it sufficient. Stands are fair and prospects good.

From Coahoma county: The season has been very backward, and planting will not be entirely finished before June 1. The weather since April 22 has been unusually favorable. Cotton that is up looks fair. Labor is rather scarce and unsettled.

From Copiah county: We consider the present crop prospect encouraging. The weather has been favorable for planting, but a little too cool for growing. Labor is entirely satisfactory.

From De Soto county: Season is late, cold weather having prevailed. Cotton stands are reported fair, but about fifteen days later than last year. Labor is working well, contented and efficient.

From Jasper county: The largest portion of cotton was planted in April and has come up a good stand. The condition of labor is good; they all seem to be intent on making a good crop.

From Lafayette county: Planting has been unusually backward this spring, owing to cold, unseasonable weather, and considerable of it is not yet up. What has come up is, however, a good stand. The low price of cotton the past season has caused a good many farmers to turn their attention to cattle-raising. The acreage in cotton will remain about the same as last year, and I think it safe to say that with a favorable season this county will raise more cotton than ever before.

From Panola county: The season for planting has been bad on account of continued rains. However, stands are good at this time, and although the plant is small, with a good season a full crop can be made.

From Union county: A portion of our county has not had rain enough to germinate cotton seed since it was planted, hence the stands are not yet good, but with rain within a week it will come in time to make a fair crop. Labor is plentiful and satisfactory.

From Warren county: The weather has been cold and unfavorable for cotton. The stands are fair, but we need warm sunshiny weather to help cotton along. Labor in this section is abundant and working better than usual.

LOUISIANA.

From Caldwell parish: The weather has been bad for cotton, it being very cold. Much cotton has had to be replanted. Labor is plenty, but very inefficient.

From Franklin parish: The cotton stands are not good, replanting being almost universal. The labor is mostly colored and very unreliable.

From Jackson parish: The cotton plant as a general thing looks well, and stands are good. Labor is good, the help working well. The crop is late some ten days, the spring being quite backward.

From Moorehouse parish: We have had an unusually good spring for preparing the land and planting, but cold nights have retarded growth considerably. Stands can be called fair. Labor is good.

From West Baton Rouge parish: Planting began fully three weeks earlier than last year, and stands are well advanced and very good. Labor is sufficient and prospects very good.

(For additional cotton memoranda see page 348.)

FINANCIAL.

THE LOAN AND INVESTMENT MARKETS.

We are one day short this week, and, so far as business is concerned, we might be short the whole six days and not be much the losers. Except for the spurt in the market yesterday, based on the news from Pittsburgh, there has been next to nothing doing, and the movement of prices up to yesterday was merely nominal. As all the brokers are still in town, there has, of course, been the usual amount of room trading on the Exchange, but the room trading is confined in times like these to chasing eighths and quarters. Mr. Gould announces—he has done it twice within the past ten days—that there will be no decided movement in prices until June 15, when a general rise will take place as the result of news about the condition of the crops. It is not often that Mr. Gould gets his prophesies down to so fine a point as this, finding it more expedient to put them more oracularly and vague. It is interesting, therefore, to learn from him that the next bull movement will begin exactly on the 15th inst., and that the crop outlook at that time will be so good as to justify the movement. Unfortunately for people who would like to make some money by a rise, Mr. Gould's prophesies in the past have often proved to be of that character which, in the slang of the gambling table, it would have been wise to "copper." He has so many stocks for sale that nothing would suit his interests better than to get all Wall street buying stocks in preparation for the rise. He would accommodate all demands. When the time for the rise came, it would then be unavoidably postponed. Nevertheless, Mr. Gould's "points" have sometimes turned out to be good ones; and it is barely possible that this one concerning the 15th of June may be at least approximately correct. It depends greatly on how the winter-wheat crop looks at that time. We cannot, under any circumstances, have as large a crop of that as we had last year—so much is already known. But as last year's was the largest we ever had, some reduction can be suffered, and yet the crop be quite large enough to found some kind of a bull movement upon. There are some other large operators in the market who are known not to share Mr. Gould's opinions on a June rise. What they have to say about the matter we have not heard, unless Mr. Keene's statement, that he looks for the greatest financial convulsion this country ever saw, be taken as his testimony. Probably he looks for it just as much, and no more, as Mr. Gould looks for the rise—that is to say, it is among the possibilities of the future. Mr. Keene continues a determined bear on the market—ostensibly. He may, however, be laying in a line of stocks at these prices in preparation for a brief rise later on, though it does not look like it. The market continues comparatively steady, but it shows no symptoms of buying by any large operator. Mr. Sage also talks enthusiastically of the future of the market, and has diminished his stock operations in favor of oil. The veteran put-and-call seller of Wall street is now writing privileges on petroleum.

One stock has been active this week—St. Paul & Manitoba. This line runs up from St. Paul and Minneapolis to Winnipeg. It is, or was, backed by the Bank of Montreal. Such powerful support as that institution gives to whatever it takes hold of makes it a ticklish thing for the bears to at tack its properties; and while Manitoba stock has been on this market it would appear to have been let alone by them very severely, though it has risen from its once low price to a height very tempting to short sales. It has had very violent fluctuations, but both rises and falls appear to have been manipulated by the "insiders." The road has shown the most astonishing increases of earnings; and it was said that the Canadian Pacific people were interested in it, and sent over the line all the vast amount of materials and supplies which were required to be accumulated at Winnipeg and thereabouts. Besides this, the road has had an extremely enterprising management, as evidenced by the fact that they have no less than eighty chief emigration agents stationed at various places, whose labors have turned an immense number of settlers to the country served by the road. Some short time ago the company declared a bonus dividend in bonds. Whether that was used by the chief men in it as the time to sell out their stock, or some other cause has been at work, is not apparent on the surface; but certain it is that the price of the stock since that time has been on the decline, while various circumstances not favorable to its future have all at once come to light. It is shown that since the beginning of the year its mileage has increased greatly in excess of its increase of earnings; that the earnings are and have been declining; and now the company has come into collision with the Canadian Pacific, which has been completed to a point where it strikes the Manitoba line. The Canadian company put down its freight charges, and the Manitoba company has followed with a sweeping reduction of its own. These things are dropping the price of the stock, and possibly are intended to have that effect. From past experience Wall street may truly say that if the Canadians cannot run a railroad so as to make it pay dividends (there may be a dividend-paying road in Canada, but we do not at this time remember to have heard of it), they at least have shown that they thoroughly understand the art of manipulation.

Among the other events of the week may be mentioned the lease of the Jersey Central to the Reading, which guarantees 6 per cent. dividends on the stock. A 6 per cent. guaranteed stock ought to sell readily at 1.10; Jersey Central looks high at 80 or 81. When one bankrupt road leases another bankrupt road it does not make a solvent corporation of either. The stock of the guaranteeing company is selling about 54, or 16 per cent. below the price of the stock it guarantees. The fact is, Wall street has no belief in the value of the Reading guarantee; it does not believe Jersey Central will get 6 per cent. in cash, though it may get that amount in scrip, or deferred bonds, or some other paper; and it will not buy Jersey Central—at any rate in its present skeptical temper—at any price above what, in a general way, it supposes the company can do in the way of itself giving value to its stock. Thus while the lease business failed to improve the price of stock, the news about the iron trade yesterday had a favorable effect upon it. Somewhere behind this Reading lease the Baltimore & Ohio comes in; and what that company may do is worthy of consideration. At present it is only known to outsiders that the leasing arrangement is backed by the Baltimore company.

A more weighty matter has been the troubles among the western and northwestern systems of roads running out of Chicago concerning the Iowa business. Here, as in the east and other places, the excessive railroad building of the past two years has led to endless trouble. There are more roads than business for them; railroad extension, as it is wont to do, has for the time outstripped the development of the country. Three years ago, only three roads ran to Omaha from Chicago, now there are six, the last comer being the St. Paul, which built from Marion across Iowa to the Omaha bridge. The intrusion of the St. Paul road was most resented by the Rock Island, which had been severely hurt by the repeated invasions of what it considered its territory by the St. Paul company. Bickerings and disputes of various kinds, which have been going on ever since the St. Paul's line was opened for business last year, at last culminated in the Rock Island formally withdrawing from the Iowa pool, which means the pooling arrangement made with the lines running to Omaha. This was promptly followed by a war of passenger rates, which, however, broke out at Peoria, where there has always been more or less trouble from some cause. The managers of the several roads met in Chicago Tuesday, and were able to settle the difficulties at Peoria with very little trouble. Those of the Omaha business were more serious, and up to Thursday night nothing could be learned of what had been done by the managers, who were continuously in session with closed doors. Yesterday there was the same dearth of official news, but private advices said that a settlement had been reached, and this had its influence on the market.

Mr. Sidney Dillon has returned from his western trip, which he took to settle some disputes between the Central and Union Pacific and the Denver & Rio Grande. He reports that his mission was successful; but what was done we have no means of knowing. As he asserts, however, that the main matters in dispute between his own company and the Denver & Rio Grande were not touched, it must be inferred that the satisfactory arrangements he refers to were made on behalf of the Union Pacific with the Central Pacific, and possibly the Burlington road, which now runs to Denver.

The loan market this week has been as easy as last, call loans ruling at 2½ to 3 per cent. The banks are now well supplied with money, as the bank statement of Saturday last demonstrated. Exchange, however, has been on the rise again; and on Thursday the posted rates rose to $4.89½ for demand, which is bringing the actual rate very near to the gold-exporting point. The Bank of England gained some gold during the week, but its reserve remained practically at the figures of last week, only varying a fraction from them. There is a depressing influence at work on the foreign markets in the renewal of troubles in Russia, which seem now to engage the serious attention of Europe and excite grave apprehensions of the future. Government bonds are quiet. The following were the closing quotations yesterday:

	May 25,	June 1,	
	bid.	bid.	asked.
U. S. 5s extended (3½ p. c.)	102¾	103	—
U. S. 4½s 1891, registered	112	112¼	112½
U. S. coupon	113¼	112¾	112½
U. S. 4s 1907, registered	119⅛	118¼	118⅜
U. S. 4s 1907, coupon	119⅛	119¼	119⅜

The bank statement of Saturday was favorable. It showed a large movement of money to this center from the interior, a conservative movement on the part of the banks in the contraction of loans, and a gain to the surplus reserve of $3,416,775, bringing it up to $9,177,400. The following are the comparative totals of May 19 and May 26:

	May 19.	May 26.	Differences.
Loans	$317,328,000	$316,281,500	Dec $1,546,500
Specie	60,558,900	62,826,800	Inc. 2,267,900
Legal-tenders	21,975,100	23,758,300	Inc. 1,783,200
Deposits	307,093,500	309,630,800	Inc. 2,537,300
Circulation	16,151,100	15,944,400	Dec. 206,700

The proportion of total reserve is now 27.96 per cent. of the liabilities, as against 26.41 per cent. for the corresponding week last year.

THE BRITISH STOCK MARKET.

[By Cable to BRADSTREET'S.]

London, May 31.—The stock market is steady, though buying is not active. There are large dealings in Mexican securities.

From New Orleans, La.: There is a little more inquiry for money, but rates are easy. The total clearings for the year ending to-day are $514,506,891. The increase over last year is $13,030,140. Stocks and bonds are dull and but little changed.

From Baltimore, Md.: A disposition to sell stocks caused an easier feeling. The feature was the heavy sales of Marietta. Prices have been weak and lower. Other railroad bonds were dull but steady. Bank stocks were in demand and brought full prices.

THE FOLLOWING WERE THE CLOSING QUOTATIONS FOR STOCKS ON THE DATES NAMED:

TRUNK LINES, WITH THEIR CONNECTIONS.

COMMERCIAL.

GENERAL SUMMARY.

Special telegrams from the principal business centers of the United States to BRADSTREET'S reveal no material improvement in the general business situation since last week. The distributive movement has been retarded by wet and cold weather in the lower lake regions and in states west and northwest. The expectation of an iron mill strike also exerted an unfavorable effect on trade and, to judge from special telegrams received from western iron centers, the news of the abandonment of their position by the Pittsburgh mill owners, is not looked upon further west as favorably as might be expected. The May cotton report to BRADSTREET'S shows that up to May 18 the weather for the season had been only fair. Dispatches to date do not show a general improvement. The acreage for 1883, as indicated by the reports, is 16,126,000 acres. The stand of cotton is reported fair to good. Cotton at New York has declined to 10¾ cents. Wheat has been higher, has declined and latterly has risen again. The last move was caused by the Chicago bull clique and their New York and St. Louis backers, who were assisted by the doubts existing as to the extent of damage done by the cold and wet weather at the west. Corn has been higher and is firmly held. Reports are current of some that has been planted having rotted owing to the prolonged wet weather. Provisions have been in no special demand for legitimate uses. The market has fluctuated daily during the week, with a net decline to date. A few large speculators have control of stocks, and transactions are therefore restricted. Iron remains dull and flat. Prices of pig are unchanged. About thirty-five furnaces have blown out in Pennsylvania and fifteen more will shortly follow their example. Bar has been firmly held at unchanged prices in expectation of a strike at western iron mills. Steel rail mills are well employed and prices are firm at figures last given. Petroleum certificates have been bounding back and forth about $1.20, the reported result of a contest between the Standard Oil Company on the bear side and a syndicate headed by James A. Keene on the other side. Anthracite coal stocks are well cleared up as compared with the corresponding period last year. Prices are fairly well maintained, and the surplus production as against last year is towering toward 1,500,000 tons. Ocean freights are dull but firm. The shipments have been less this week than last, owing to the advance in price of staple commodities on this side. There is no improvement in the wool trade. Supplies of new clip are coming east a little more freely, but the movement is backward as compared with last year. Manufacturers are buying only for current wants. There were 160 failures in the United States reported during the past week, 5 more than the preceding week, 56 more than the corresponding week of 1882, and 93 more than same week of 1881.

THE GENERAL COMMERCIAL MOVEMENT.

[By Telegraph to BRADSTREET'S.]

From Portland, Me.: Slightly improved, but the volume is still light and featureless.

From Troy, N. Y.: Quiet, due in part to holiday.

From Rochester, N. Y.: Considerably behind record of corresponding week last year; very largely to the weather. Collections fair to average only. Outlook for shoe manufacturers less favorable than last year.

From Columbus, Ohio: Bad weather has retarded the trade movement some.

From Cincinnati, Ohio: Excepting the holiday, up to the average.

From Cleveland, Ohio: Materially checked, owing to the continued cold and wet weather. Volume of trade for May is light compared with previous year. Collections are fair.

From Dayton, Ohio: Quiet. Money in good demand.

From Toledo, Ohio: Fair only. Collections unsatisfactory.

From Indianapolis, Ind.: Fair only, in absence of favorable weather. Collections are slow.

From Evansville, Ind.: Continues dull.

From Chicago, Ill.: Somewhat retarded by unseasonable weather. Money easy. Collections fairly good.

From Peoria, Ill.: The weather acts as a damper. Orders restricted.

From Detroit, Mich.: Dull and unsatisfactory, as for weeks past. Collections poor.

From Grand Rapids, Mich.: But slight improvement this week over last. Collections very fair.

From Louisville, Ky.: Fair. Money market easier, and demand for loans small.

From St. Louis, Mo.: The volume is good as compared with same time last year, but it is lighter than lately. Collections are fairly easy.

From Kansas City, Mo.: Satisfactory though less active. Collections fair.

From Davenport, Iowa: Good for several weeks past, but collections few and hard to make.

From St. Paul, Minn.: Only fair, disappointing previous calculations. Buyers cautious; sellers conservative. Money is accumulating here.

From Lincoln, Neb.: Usual slackening experienced, but retail movement steady. Orders from wholesale houses small. Collections moderately easy.

From Lawrence, Kan.: Good, except of clothing, which is fair only.

From Topeka, Kan.: No improvement. Collections satisfactory.

From San Francisco, Cal.: Fairly steady. Opium importations heavy. Hides steadier.

From Baltimore, Md.: Small, except in a few lines.

From Norfolk, Va.: Except in dry goods, moderately active.

From Richmond, Va.: Slightly improved over last week.

From Savannah, Ga.: Fairly good in some lines, but in others not so active.

From Macon, Ga.: Quiet but assuring. Money in light demand.

From Selma, Ala.: There has been a slight falling away, though the movement is still good for the season.

From New Orleans, La.: Has reached a summer basis.

From Galveston, Tex.: Dull, but about as usual for the season.

From Marshall, Tex.: Slow and dull.

From Memphis, Tenn.: Only moderate.

GENERAL INDUSTRIAL FEATURES.

To the surprise of all outside and a good many in the iron trade, the Pittsburgh mill-owners decided to reconsider their decision not to listen to any suggestion as to a compromise. They sent for the president of the association controlling the employés, and, after conferring for some time, ended by agreeing to pay the old rate of wages, viz., $5.50 per ton for puddling. This action settles the expected difficulty in the iron industrial centers elsewhere in the western district. At Cincinnati the situation differed somewhat, and may not be overcome at once. Still, telegraphic advices to BRADSTREET'S from Cincinnati, below, favor the idea that no strike will take place. The claim at Cincinnati has been reduced to the question of paying 50c. extra per ton for using flux in boiling iron, and does not appear likely to cause a serious strike now that the Pittsburgh scale has been signed.

The Chicago bricklayers' strike has ended. The Belleville, Ill., coal-miners' grievances have been taken into consideration by the authorities, and violence is not likely to be again resorted to. The industrial situation in Philadelphia, while no better, presents a prospect for improvement. On the whole, the past week may be said to have considerably clarified the industrial outlook. Special correspondents telegraph us as follows:

From Philadelphia, Pa.: There is no change in the condition of the textile industry. A number of mills are running short time and the demand for goods continues unsatisfactory. Recent accumulations have been largely reduced, however, during the past few weeks by means of low prices, and as some of the mills are turning to better qualities of production the outlook is more favorable. The glass, soap and paper works are generally employed, but there is a good deal of complaint about small margins.

From Pittsburgh, Pa.: A conference between committees representing the Western Iron Association and the Amalgamated Association was held Friday. The session was prolonged until 6 o'clock, when it was announced that the present labor scale had been signed by both committees without modification. This action is hailed with delight by the trades people of Pittsburgh.

From Cincinnati, Ohio: It is believed that the acceptance of the scale at Pittsburgh removes excuse for a strike here, and that the mills will continue operations. Both sides are apparently satisfied.

From Cleveland, Ohio: The possibility of a strike here has been averted by the unexpected action of Pittsburgh manufacturers in signing the scale for another year. In this immediate region a number of the mills have been working non-union forces. These and some others had already signed the scale, forming a majority of the entire number. If the strike had taken place it would really have made but little difference here.

From Chicago, Ill.: The feeling in business circles is better than yesterday, owing to the continuance of work by the eastern iron mills, but uneasiness still prevails over labor question in other branches. The Joliet steel mill reports large contract for rails. The closing of the Calumet, Chicago, and Bay View, Milwaukee, mills throws 19,000 men out; both mills say they expect to resume soon.

From St. Louis, Mo.: Only two mills here employ union men, and they are working. St. Louis millowners think Pittsburgh manufacturers' recent firmness was assumed for speculative purposes and are displeased with yesterday's action.

From Milwaukee, Wis.: The North Chicago rolling mills at Bay View, the only mills to be directly affected by the intended strike, closed this morning. This will necessitate the idleness of 1,100 hands. The effect at present can hardly be considered more than a local business disturbance. It will tell upon the employés and store keepers.

From Detroit, Mich.: The anticipated strike being averted by the Manufacturers Association at Pittsburgh signing the old scale, mill men here are disgusted. They will shut down, notwithstanding, for several weeks for repairs and until their affairs are more settled.

BREADSTUFFS ABROAD.

There has been no special change in the British markets for breadstuffs during the week. The features noted have been manifestations of weakness and a continued dullness. A more welcome report has been received respecting the progress of the British wheat crop. The rain of Saturday last greatly benefited the crops, and even the *Mark Lane Express* felt constrained in its Monday review of the situation to regard the harvest prospect as much improved. Trade in wheat and corn, however, had not improved, the domestic supply was restricted and prices weaker. Imported wheat was inanimate and weaker. Prices of English wheat were quoted at 43s. 7d., against 48s. 1d. in the corresponding week one year ago. Beerbohm's cable advices on Friday last and on Thursday of this week reveal no change in quotations for No. 2 red winter wheat for prompt shipment and for one month hence, being in each case and on both dates 44s. 3d. Recent cables from London state that the weather continues to favor the growing crops. The French wheat markets are quiet, and the demand but nominal. There has been no reported improvement noted in the outlook for the wheat crop in France since the intelligence received of the decreased acreage to winter wheat in a late number of *L'Economiste Français*. The indifferent attitude of the English grain markets to the constantly recurring short crop reports in the United States is indicative of either a large stock of incredulity on the other side, or a conviction that the world's supply, as has been previously indicated, bids fair to furnish enough for all demands likely to be made upon it.

The quantity of grain in passage to the United Kingdom and the continent May 31, as per Beerbohm's London cable of that date, was as follows:

	March 31		March 25	
	Wheat, qrs.	Corn, qrs.	Wheat, qrs.	Corn, qrs,
To United Kingdom...	2,350,000	440,000	2,375,000	250,000
To continent.....	440,000	25,000	430,000	35,000
Total quarters	2,790,000	465,000	2,805,000	285,000
Equal bushels.....	22,320,000	3,720,000	22,440,000	2,280,000
Increase.....	....	1,440,000		
Decrease..... ..	120,000			

Late advices report English and French country grain markets unchanged. The tendency of corn at Liverpool is lower, a decline of ½d. having been recorded Thursday. For prompt shipment it was 3d. lower.

AMERICAN WHEAT MARKETS.

The advance made by wheat at eastern and western speculative centers during the closing days of last and the earlier days of this week was a product of the speculative temper of those interested in that branch of the trade, backed, as it was, by liberal orders to buy from the country from many sections of the winter-wheat states, where the most damage has been done to the crop. The spurt was begun last Friday by the St. Louis clique sending in heavy orders to buy. This was continued Saturday, and effectually aided by a prominent New York grain speculator and others from this city, who bought large lots. The advance was not sustained, however, and was principally manifested in Chicago. The main reasons for the sudden weakness shown was in a very general faith in the opportunities for a share of the damage to wheat to be made good; in the confirmation of the news from the Pacific coast of the exceedingly bountiful harvest in prospect there and in Dakota, Minnesota and elsewhere in the northwest, not to mention the confidence in a full spring crop. The manipulators for a rise were aided, of course, by the wheat report of the Northwestern Millers' Association, which pointed to a reduction of nearly 100,000,000 bushels from the yield of 1881-82. But the diffidence or unwillingness of exporters to step in and buy, added to the other evidences of bearishness enumerated above, apparently prevailed for the time over the power of orders to buy. Prices on this side being relatively higher than abroad, a portion of the indisposition to buy here will be thus explained. The receipts of wheat from farmers' hands have fallen away during the week. The receipts at tidewater increased from 1,188,443 bushels in the week ending May 19 to 1,547,953 bushels last week. The Atlantic ports shipped abroad last week 788,973 bushels, against 619,374 bushels in the preceding week. From September 1 to May 26 the movement abroad from the Atlantic ports was 7,041,637 bushels, against 4,097,126 bushels in a like portion of 1881-82.

The course of the wheat market during the past week is indicated by the following prices in the New York and Chicago markets, for July wheat on the dates mentioned: New York, Saturday last, $1.24⅜; Monday, $1.25¼; Tuesday, $1.25⅜; Thursday, $1.24⅜; Friday, $1.25⅛. At Chicago, Saturday, $1.16¼; Monday, $1.17; Tuesday, $1.16; Thursday, $1.15⅝; Friday, $1.15⅝.

The total receipts of wheat at Chicago, Milwaukee, Detroit, Toledo, Indianapolis, Peoria and St. Louis during the week ended May 25 amounted to 582,201 bushels, against 692,600 bushels in the preceding week, and the shipments to 808,473 bushels, against 343,241 bushels in the week previous.

The visible supply of wheat in the United States and Canada (east of the Rocky Mountains) May 26, as against the preceding week, showed a decrease of 399,723 bushels.

CORN.

Corn was firm and 1c. higher on Saturday last, in sympathy with wheat. It fell back ¼@⅜c on Monday and Tuesday, but was still firmly held and has since advanced. There has been some orders to buy, and options are moderately active. The news of colder weather at the west had some influence on prices of corn during the latter part of the week, and there have been unfavorable returns as to the growing crop. The movement of corn from farmers to leading western cities increased during the past week as compared with that ending May 26, while the shipments have been quite as liberal as for ten days preceding. The receipts of corn at the Atlantic ports for the week ended May 26 were 2,129,310, against 2,374,080 in the preceding week, while the exports from the same points amounted to 1,729,815 against 1,250,124 bushels. From September 1 last to May 26 the exports of Indian corn were 31,789,964 bushels, against 24,141,368 bushels in a like portion of 1881-82. The visible supply of Indian corn in the United States and Canada, east of the Pacific coast, May 26, had decreased 2,243,517 bushels as compared with May 19. The course of the corn market during the past week is indicated by the course of prices at New York and Chicago on the dates given, as follows: At New York, on Saturday, 66⅛c.; Monday, 65¾c.; Tuesday, 65⅝c.; Thursday, 66¼c.; Friday, 66⅝c. At Chicago, Saturday, 57c⅜.; Monday, 57¾c.; Tuesday, 57c.; Thursday, 57½c.; Friday, 57¾c.

The total receipts of corn at Chicago, Milwaukee, Detroit, Toledo, Indianapolis, Peoria and St. Louis, for the week ending May 25, were 1,460,883 bushels, against 1,290,304 the week preceding, and the shipments were 2,279,583 bushels, against 2,182,161 in the preceding week.

The closing prices of breadstuffs in New York last evening, as against those of the Friday preceding and the corresponding date last year, were as follows:

CLOSING PRICES OF BREADSTUFFS IN NEW YORK.

	May 25.	June 1.
No. 2 flour	$2.75 @3.50	$2.65 @3.50
Superfine flour	3.50 @4.00	3.50 @4.00
Com. extra flour	4.00 @4.25	4.00 @4.50
West India shipping flour	5.25 @5.30	5.50 @5.60

The visible supply of grain in the United States and Canada, east of the Pacific coast, May 26, 1883, as compared with the dates named, were as follows:

	Wheat, bushels.	*Corn, bushels.*	*Oats, bushels.*
May 26, 1883	20,116,864	13,142,341	4,102,571
May 19, 1883	20,516,587	14,085,858	3,871,243
May 27, 1882	9,427,798	9,294,180	2,264,975
May 28, 1881	14,999,921	9,822,828	4,589,330

The above shows a decrease of 399,723 bushels of wheat, 1,243,517 bushels of corn, and an increase of 231,331 bushels of oats.

AMERICAN GRAIN REPORTS.

[By Telegraph to BRADSTREET'S.]

From Philadelphia, Pa.: The export demand for grain has continued moderate. Orders have been better for corn than wheat, but in most cases limited below market rates, and transactions have been light. Speculation has been only moderately active. Flour has been dealt in chiefly in small lines for home consumption, but values have ruled steady.

From Cincinnati, Ohio: Flour is stronger in tone, and under increased consumptive demand has advanced 15c. Wheat has advanced; receipts have fallen off 20 per cent. Corn is in moderate demand from distillers at easier prices. Receipts of country produce have been liberal.

From Toledo, Ohio: Weather cold and heavy rains. Corn, wheat and potatoes are suffering in consequence.

From Evansville, Ind.: The weather has continued wet and cold, and is proving disastrous to the late planted corn, rotting it badly. This will necessitate replanting. The wheat, oats and grass crops are generally good.

From Louisville, Ky.: Grain is dull but firm. Crop reports are fairly satisfactory. The weather is showery and favorable. Flour is active and a shade higher.

From St. Louis, Mo.: All grains unsettled and excited, but in heavy sale.

From Davenport, Iowa: The receipts of grain are good.

From Lincoln, Neb.: The crop prospects are good. The weather is cool.

From Lawrence, Kan.: The wheat prospects continue fine, but the uplands may be short. General crop prospects are excellent.

From Topeka, Kas: Wheat is dull; stock here is being shipped to market. Corn is fairly active.

From San Francisco, Cal.: Wheat and barley continue to decline. The crop prospects are very promising. There were fifteen wheat clearances during May, and there have been 352 since July 1.

From Baltimore, Md.: Flour is firm and the demand is good. Holders are asking full prices. Wheat is steady, with moderate supply. Offerings of southern corn have been liberal. The market is quoted dull and lower. Farmers report early wheat on good land promising. The corn crops are reported severely cut by worms.

From Wilmington, N. C.: Breadstuffs are steady; grain firmer.

From New Orleans, La.: Bulk grain is without any new feature.

From Memphis, Tenn.: Cornmeal is easy, and corn quiet. Oats are plentiful and prices low. Flour is reported stiff.

From Indianapolis, Ind.: The crop prospects show some improvement, but it is thought considerable corn will have to be replanted.

From Chicago, Ill.: Wheat to-day (Friday) is unsettled, opening weak. It is now firm. The bull combination is manipulating the market. There is no demand for No. 2 to ship. Receipts of wheat are increasing. Corn is strong. There is a good shipping demand, and it has advanced 1c. Oats are firm, in sympathy with corn. The crop outlook is better.

PROVISIONS.

At New York the provisions market has suffered during the week. An advance has been made each day, and with one exception, when merely the advance made was lost, the declines have been greater than the rise in prices. On Saturday last the provisions market closed firm. Since that date this has been varied to steady merely, and later still to weak. The declines in prices have occurred when the smaller speculators stood aside. Free purchases to a limited extent would would send prices up from 3 to 15 points, when the speculators would scalp the market, withdraw, and let prices down again. This petty seesawing has been about the only feature of the week. There is no special trading done, and the large operators are maintaining a mysterious indifference, which is a primary cause of the haste of others to cut off small profits from hasty deals and retire.

The following shows the export of hog products from the places mentioned below for the week ending May 26:

	Pork, barrels.	*Bacon, pounds.*	*Lard, pounds*
New York	1,789	2,547,435	2,157,028
Boston	328	388,222	1,470,463
Portland	..	....	....
Montreal	500	128,500	....
Philadelphia	..	900,000	5,000
Baltimore	5	2,543	89,461
New Orleans	60	1,800	550
Totals	2,682	4,008,500	3,722,502
Previous week	3,851	3,621,877	3,866,815

The total export of hog product from the abovementioned places from November 1, 1882, to May 26, 1883, was as follows:

	1882-83, pounds.	*1881-82, pounds.*
Pork	23,439,000	33,892,400
Bacon	262,366,890	272,576,520
Lard	141,743,533	156,248,136
Totals	432,569,423	462,716,056

PROVISIONS AND LIVE STOCK REPORTS.

[By Telegraph to BRADSTREET'S.]

From Philadelphia, Pa.: Provisions are only in jobbing demand and prices as a rule are easier. Dairy produce is in larger supply and lower.

From Cincinnati, Ohio: Provisions have not equalled expectations. Stocks are light and prices unchanged.

From Chicago, Ill.: Provisions are unsettled. Opening firm, they lost the advance. Speculative manipulators destroy confidence. All legitimate dealers are driven from the trade. There have been 22,500 tierces of lard refused on a June contract, the buyer claiming adulteration. The uncertainty of the labor problem also weakens confidence in meats and pork. Lard oils are weak and lower; linseeds dull.

From Louisville, Ky.: Provisions are quiet and firm. Live stock is dull and easy. Produce is in liberal supply, active and lower.

From St. Louis, Mo.: Provisions are weak and inactive. Hogs have been active all the week at firm prices, but are declining now. Receipts are large. Cattle are in brisk sale, with very large offerings, and the market is weakening a little.

From Kansas City, Mo.: Provisions are quiet, but active. There is an order demand for packing-house products, but prices are still weak. Cattle are quiet and unchanged. Hogs are active, but prices are weaker.

From Topeka, Kan.: Cattle trade is dull and weak. Hogs steady and sheep active. A considerable number of the latter are being brought to market this week.

From Baltimore, Md.: Jobbers of provisions are doing an active business, and prices remain steady.

From Wilmington, N. C.: Provisions are easy, and prices tending downward.

From New Orleans, La.: Provisions are firm with the principal advance in bacon. Corn and oats are locally 1@2c. lower.

From Memphis, Tenn.: Meats and lard are quiet. Live stock dealers report sales rather light and prices holding firm.

THE NEW YORK DRY GOODS MARKET.

Business during the past week with first hands shows no improvement over the previous in respect to the volume of sales. The market has shown a stronger tendency in regard to prices, but the demand has been mostly of a requirement character. Some improved business is anticipated for the ensuing week on account of the past two being shortened by the intervening holidays. The month of May has been a quiet one generally, though some of the jobbing houses report business considerably ahead of the corresponding period of '82. Retailers say that the steady and agreeable weather prevailing keeps business in fair condition for them, but that a rise in the temperature would give some improved trade for summer goods.

THE BRITISH COTTON GOODS MARKET.

[By Cable to BRADSTREET'S.]

London, May 31.—Manchester cotton buyers of home and export yarns are able to obtain slight concessions this week, and prices of goods are weak. There are some fears of a possible blockade of China ports.

THE DRY GOODS MARKETS.

[By Telegraph to BRADSTREET'S.]

From Portland, Me.: Dry goods are in fair demand for a dull season, and somewhat improved from last week.

From Boston, Mass.: Trade has been fair. Jobbers report business to some extent satisfactory. Commission houses find a steady but rather light demand on the part of jobbers, but in cotton goods there is a good export trade. Woolen goods remain very quiet, and manufacturers are beginning to talk about shutting down for a time to relieve the market of surplus stocks.

From Providence, R. I.: The print cloth market is steady and firm, the amount of sales being moderate; 64's are quoted at 3⅝c. and 56x60's at 3⅛c. There are about 145,000 pieces on hand.

From Rochester, N. Y.: Jobbers report a perceptible increase in sales as compared with the preceding week, and will average fairly with the corresponding week last year. The retail line has also shown a slight improvement, notwithstanding the unpropitious weather.

From Philadelphia, Pa.: The jobbing trade has ruled quiet, although a fair business has been done by a few houses. The package trade has been generally inactive. It is too late for much demand for spring and summer wants and too early for fall trade. There is a good deal of irregularity in jobbers' and retailers' prices on cotton goods.

From Pittsburgh, Pa.: About the same; quiet, but satisfactory for the season.

From Cincinnati, Ohio: The volume is light. Spring trade is over. Prices are unchanged.

From Cleveland, Ohio: Reasonably good, considering the unseasonable weather the last of the week.

From Columbus, Ohio: The movement of dry goods has improved slightly despite the weather. Collections fair.

From Dayton, Ohio: The trade is improving.

From Chicago, Ill.: Dry goods are moderately active on orders, but the trade suffers from the recent heavy rains, which check the retail trade. Millinery sales are quiet but fully equal to the opening of June last year. Clothing is rather dull. Cool, moist weather restricts sales.

From Peoria, Ill.: The trade look for an improvement with settled weather.

From Detroit, Mich.: Dry goods only moderately active. A cold rain five days out of the past seven affected retail trade seriously and jobbers have suffered in consequence.

From Indianapolis, Ind.: Trade fair only.

From Grand Rapids, Mich.: Fairly active.

From Louisville, Ky.: Dry goods are jobbing quietly, and retailing actively.

From St. Louis, Mo.: Only fairly active because of the unseasonable weather, but values are quite steady.

From Kansas City, Mo.: Sales this month show a large increase over the like month last year, and the market is still active, though the spring trade is almost closed.

From Davenport, Iowa: Fair only.

From St. Paul, Minn.: Sales values are not up to the standard for the season. An improvement is anticipated for June. The order trade is slightly better, mostly from traveling men. Some country customers are buying ahead of wants, believing prices are at bottom, as they rule steady, with a decline on some brands. Shirtings, sheetings, tickings, cheviots, prints, ginghams and assorted goods are selling. There is some demand for mosquito netting.

From Lincoln, Neb.: Dry goods find a very dull market.

From Lawrence, Kan.: Moderate only.

From Topeka, Kan.: Moderately active.

From San Francisco, Cal.: The dry goods market is steady. Business in staples and fancies is fair for the season. Standard cottons are firm and the demand is large. Ginghams are cheap and stocks of off brands large.

From Baltimore, Md.: Fairly active, but country orders are beginning to fall off. The principal demand was for staple checked dress goods, from local and nearby dealers. Prices rule steady, and collections are slow.

From Norfolk, Va.: Rather quiet.

From Richmond, Va.: Not quite as active as a week ago.

From Savannah, Ga.: Dry goods merchants complain of another dull week.

From Selma, Ala.: The dry goods trade has not been as good as in the early part of the month, though it is still fair.

From New Orleans, La.: Is dull, as usual at this season.

From Marshall, Tex.: In fair demand only.

From Memphis, Tenn.: Dry goods have been comparatively dull.

COTTON.

There is nothing new to write in regard to the market at New York for spot cotton for the week ending Friday, June 1 (which is one day short, Wednesday being Decoration Day); like last week it has been dull and steady. Transactions have been limited and almost entirely for home demand. Quotations closed 2 points lower last night, at 10¾c. for spot middling uplands, than one week ago, the price dropping a point on Monday and another on Thursday. The sales for the week are as follows: For export, 105 bales; for consumption, 1,522 bales, and for speculation 113 bales. The deliveries on contract amount to 3,500 bales. The total sales foot up 1740 bales against 2,405 last week.

Below will be found the closing quotations for prompt delivery uplands at New York, on Friday evening as compared with last week, and the corresponding week last year (quotations are based on the American standard of classification and on cotton in store, running in quality not more than half a grade above or below the grade quoted):

	This week.	*Last week.*	*Last year.*
Ordinary	7 13-16c.	7 15-16c.	9⅜c.
Strict ordinary	8¼	8⅜	9 15 16
Good ordinary	9 1-16	9 3-16	10¾
Strict good ordinary	9¾	9⅞	11 3-16
Low middling	10¼	10⅜	11⅝
Strict low middling	10 9-16	10 11-16	11⅞
Middling	10¾	10⅞	12 1-16
Good middling	11⅛	11¼	12 7-16
Strict good middling	11⅜	11½	12 11-16
Middling fair	11⅞	12	13 3-16
Fair	12⅞	12¾	13 15-16

STAINED.

	This week.	*Last week.*	*Last year.*
Good ordinary	7¼	7⅜	8 15-16
Strictly good ordinary	8 1-16	8 3-16	9 15 16
Low middling	8¾	8⅞	10⅝
Middling	9⅞	10	11⅜

The market for spot cotton closed quiet.

The future market during the past week has been very dull and inclined to weakness. Business has been slow, with only a very moderate demand. Quotations show an average falling off in prices of 4 points for new months and 2 points for later months. The sales foot up 366,500 bales, against 329,000 bales for the same week last year.

The following table shows the closing quotations for futures at New York Friday evening, compared with last week and the corresponding week last year:

	This week.	*Last week.*	*Last year.*
June	10.77	....	11.98
July	10.77	10.81	12.07
August	10.77	10.79	12.16
September	10.49	10.82	11.86
October	10.21	10.52	11.45
November	10.12	10.22	11 29
December	10.14	10.14	11.30
January	10.20	10.16	11.45
February	10.30	10 24	11.58
March	...	...	...

The market for futures closed firm.

The southern markets have been dull and easy. Below will be found the sales for the week and the closing quotations for middling uplands at seven leading ports as compared with last year's quotations:

	Week's sales.	*To-day.*	*Last year.*
Galveston	3,305	10⅛	11⅞
New Orleans	12,550	10⅛	12
Mobile	700	10⅛	11¾
Savannah	1,425	10⅛	11¾
Charleston	275	10¼	12
Norfolk	1,805	10 3-16	11¾
Baltimore	130	10⅝	12 1-16

The total receipts of cotton at the ports since September 1 are 5,805,752 bales, an increase of 1,283,864 bales over the receipts of last year for the same time. The total at each port since September 1 is as follows, compared with the total to the same date last year:

	This year.	*Last year.*
Galveston	811,837	420,030
New Orleans	1,628,810	1,160,894
Mobile	309,208	258,717
Savannah	802,454	715,554
Charleston	564,699	488,101
Wilmington	128,300	132,726
Norfolk	884,400	594,021
Baltimore	71,917	35,578
New York	150,739	166,654
Boston	182,876	219,777
Philadelphia	91,877	72,714

Below will be found the receipts for each day of the week ending Friday, June 2, at eleven leading ports, as compared with last week and the same week one year ago:

	Sat.	*S. & M.*	*Tues.*	*Wed.*	*Thurs.*	*Fri.*
Galveston	227	974	1,072	710	283	283
New Orleans	1,335	1,692	2,702	1,057	574	1,493
Mobile	71	76	130	5	237	323
Savannah	241	225	345	83	388	456
Charleston	187	144	61	37	23	316
Wilmington	6	22	15	1	3	8
Norfolk	838	1,366	802	831	509	1,648
Baltimore	400	....	15	..	333	849
New York	163	21	....	135	18	398
Boston	570	342	123	573	....	596
Philadelphia	355	20	537	....	781	2,325
Totals	4,393	4,882	5,865	3,432	3,149	7,725
This day last week	5,952	7,215	7,539	5,270	3,696	6,055
This day last year	2,471	2,490	2,781	1,893	2,361	2,585

The total receipts at the ports for the week were 30,280 bales, against 38,280 last week and 14,696 for the corresponding week last year.

The receipts at the twenty-four interior towns usually reported were 7,805 bales, against 10,295 bales last week and 3,293 bales for the corresponding week last year. The shipments for the week were 19,520 bales, against 20,603 bales last week and 13,977 bales for the corresponding week last year. The stocks for the week were 103,454 bales, against 113,677 last week and 86,484 for the same week last year.

At Liverpool the market for spot cotton has been dull and easier, with a very moderate inquiry, which was freely supplied. Prices have fluctuated during the week between 5⅞d. to 5¾d., closing at

the latter figure, 2 points decline from the closing quotations last week.

The market for futures has been easy and steady, with a small falling off in prices.

	This week.	*Last week.*	*Last year.*
June	...	5 51-64d.	6 38-64d.
June-July	5 50-64d.	5 52-64	6 38-64
July-August	5 53-64	5 56-64	6 42-64
August-September	5 57-64	5 60-64	6 46-64
September-October	5 52-64	5 53-64	6 41-64
October-November	5 44-64	5 46-64	6 29-64
November-December	5 43-64	5 44-64	....

The sales for the week at Liverpool were 45,000 bales (of which 33,000 were American), against 46,500 (of which 31,000 were American) last year. The sales for export were 1,630 bales, against 6,400 bales last year. The sales for speculation were 1,820 bales, against 1,800 bales last year. The amount forwarded was 20,500 bales, against 10,500 bales last year. The stock in port is 978,000 bales (of which 730,000 are American), against 1,032,000 bales (of which 632,000 were American) last year. The total imports for the week were 84,000 bales (of which 55,000 were American), against 106,000 bales (of which 63,000 were American) last year, and the amount afloat 278,000 bales (of which 110,000 are American), against 356,000 bales (of which 89,000 were American) last year.

The Manchester market closed easier.

COTTON MARKETS.

[By Telegraph to BRADSTREET'S.]

From Philadelphia, Pa.: Cotton has ruled steady in price, but there has been no demand except for small lots to tide over immediate wants.

From Louisville, Ky.: Cotton is dull and prices are ⅛c. lower than last week.

From New Orleans, La.: With the exception of the operators already in, cotton is without go. The week's movement has been small, with previous quotations of spots maintained; futures have dropped 3 to 12 points.

From Norfolk, Va.: The receipts of cotton hold up well.

From Providence, R. I.: The cotton market is dull, and sales are reported small. Middling uplands are worth 11c. and middling gulfs 11¼c. There are about 10,000 or 12,000 bales on hand.

From Baltimore, Md.: Shippers of cotton appear to be holding off and spinners are only buying for needs. The market is dull.

From St. Louis, Mo.: Cotton is a little downward and very quiet with light offerings.

From Cincinnati, Ohio: Cotton is without animation and prices have declined slightly notwithstanding the severe weather.

COTTON CROP REPORTS.

[By Telegraph to BRADSTREET'S.]

From Charlotte, N. C.: Weather since the 18th has been, part of the time, too cold, and altogether too dry. Where the plant is up it has made fair progress, but there is considerable late planting which is not up, owing to lack of moisture.

From Raleigh, N. C.: Weather has been dry and cool, and plant is very backward. Reports as to stand are conflicting, but think most farmers are satisfied. To-day is showery, with seasonable weather. Crops will improve rapidly, as they are generally clean.

From Wilmington, N. C.: Weather is warm, with heavy rains. Cotton is growing better. Receipts are small, and market dull.

From Charleston, S. C.: The condition of cotton is unsatisfactory. The plant is small and backward; weather is too cold and dry.

From Columbia, S. C.: Have had good rains, and the condition of the cotton crop is good.

From Greenwood, S. C.: Outlook is unfavorable. Much cotton not yet up. The weather has been cold and dry.

From Spartanburg, S. C.: Cotton is small—not growing well; cold weather and some frost make condition unsatisfactory.

From Rome, Ga.: The cotton crop outlook is fine and weather fair, with good rains. The plant is healthy.

From Savannah, Ga.: The weather moderated after the rain, which was needed for growing crops.

From Eufaula, Ala.: Cotton is all up and a good stand, and the bulk of it is chopped out.

From Montgomery, Ala.: Cotton crop prospects are greatly improved since 18th.

From Prattville, Ala.: The cotton crop has improved greatly since the 18th. The days and nights are warmer, yet the condition of the crop is considerably behind that of last year at same date. Cultivation is good.

From Selma, Ala.: The crop is two weeks later, with fair stands, but the plant is small. The weather is favorable, and plant is growing.

From Columbus, Miss.: Cotton has suffered from cold weather since the 18th ult. We had a light frost on the 23d, but stands were not materially injured. Weather is now warm, but too much rain.

From Meridian, Miss.: Weather since the 18th has been generally cold with two slight frosts; fine rains yesterday, and now warm and favorable. Cotton is very small, and late stands not as good as usual, owing to the cold nights.

From Natchez, Miss.: Cotton stands are very good. There has been considerable improvement since the cold spell. The crops is two weeks behind. Weather at present very good.

From Port Gibson, Miss.: Weather has been too cold, and not seasonable. Crop prospect moderately promising, but plant generally small.

From Arcadia, La.: The cotton crop in this section is about two weeks late as compared with same time last year; the stands are fair and prospects good at present; have had favorable weather for cleaning crop during May. We had good rain yesterday in this vicinity.

From Arcadia, La.: Crop is later by ten days, but condition is better now, and prospects more favorable.

From Baton Rouge, La.: Since May 18 weather has been cool and showery, affecting cotton unfavorably. We had frost here on 23d, which did material damage to crop.

From Clinton, La.: Condition of the crop is unsatisfactory. It is late and grassy, and prospects not as good as on the 18th. Weather rainy.

From Shreveport, La.: Have had good rains within past few days, and prospects good, but the crop is three weeks late.

From Calvert, Tex.: The weather has been favorable, and cotton is in good condition and doing well.

From Corsicana, Tex.: Condition is decidedly worse since May 18, in consequence of continued drouth and prevalence of unusual strong, chilly, dry winds. Have had no good rains in this county for seven weeks, and one-fifth of the land intended for cotton never got planted and one-sixth planted has never come up. There are no present indications of rain, and not over three-fourths as much cotton above ground in this county as one year ago. The crop is fully two weeks later.

From Fort Worth, Tex.: The weather is fine. Cotton very late but doing well; the acreage very large.

From Galveston, Tex.: Have had a little rain in some sections during the past week, but generally dry weather.

From Marshall, Tex.: The weather has been too cold, but the condition of the crop is good.

From Terrell, Tex.: Cotton is two weeks late and plant not healthy. It is not growing well on account of cool weather.

From Waco, Tex.: The weather since the 18th has been very dry and unusually cool. Planting is stopped, but not finished. One-half of the cotton planted is not yet up and cannot come up until it rains; what is up looks tolerably well.

From Helena, Ark.: The stands of the new cotton crop generally reported unsatisfactory, and plant backward, but situation somewhat improved last few days.

WOOL.

There is no important change in the general condition of the wool trade. Prices in seaboard markets hold comparatively steady under moderate offerings, but there is a noticeable lack of confidence among dealers as well as manufacturers, and the future of the market is a matter of general uncertainty. The consumptive demand is light, and as a good many mills have curtailed production or are about doing so in consequence of the dull trade in woolen goods, there is no immediate prospect of any improvement. The high prices asked in primary markets continue to retard free operations in the new clip. While the speculative buying of local operators and a few western and eastern manufacturers contribnte momentary support to values in the country, the great body of Boston, Philadelphia and New York dealers are holding off, and there appears to be a pretty general belief that prices will ease off later in the season. The more desirable clips of Virginia, Kentucky and Indiana are selling fairly, but there is general complaint of dullness in Kansas, territorial, Texas and California wools, and stocks are accumulating. The only change in the situation from last week is that middlemen are making greater efforts to attract the attention of eastern buyers. Foreign markets are very dull and weak for combing and carpet wools but the position for clothing (Australian) fleeces is represented as stronger. It is worthy of note that Lincoln fleeces, similar in character to Canadian combing wools, are now lower in the English markets than for seventy years past. They are quoted at 9½d. per pound, against 10½d. for several months past. The average price for these wools for fifty years past has been 16½d. per pound.

AMERICAN WOOL REPORTS.

[By Telegraph to BRADSTREET'S.]

From Philadelphia, Pa.: The aggregate movement has been a little larger, but there is no activity in the market. Manufacturers are cautious. Prices are comparatively steady under light supplies. New unwashed is opening 1@2c. per pound lower than at same time last year.

From Cincinnati, Ohio: There is an active demand. Kentucky and Indiana are furnishing the greater portion of the supply. Dealers buy freely under a steady market.

From Louisville, Ky.: The local mills are about supplied and shippers are forcing prices down.

From San Francisco, Cal.: Wool inactive. Stocks 7,000,000 pounds.

From Savannah, Ga.: Hides and wool are dull and the demand is not improved. Receipts are fair.

IRON.

There is no special change in the pig iron market. About 35 furnaces have blown out along the line of the Reading railroad, and within the next ten days some 15 or 18 in the Lehigh valley will do likewise. These comprise all that are now known to have had an intention to close out within the immediate future. There are no signs of an improvement in American pig at an early day, and the trade now looks ahead to a hoped-for revival in general trade in the late summer or early fall which shall make its influence felt on the iron trade as well as other lines of industry. Prices remain unchanged. Arrivals of Scotch pig during the week have been very light, in part on account of a steamer from Glasgow being past due. The total will not be over 600 or 700 tons, and the sales to arrive have been rather under than over those figures. Prices for Scotch are also unchanged, on the basis of Eglinton at $20.50@$21. This shows that prices of the better grades of Scotch iron still continue relatively higher than those of corresponding American brands. Bar iron has been firmer at 2.20c.@2.30c. This has been in part on account of the expected strike of western iron mills, which it is now learned is not to take place. Steel rails continue firm at $38@$40 at the mill for standard weight rails. Nails are firm and in fair demand at unchanged rates. Most of the varieties of manufactured iron are dull and not in special request.

THE BRITISH IRON MARKET.

[By Cable to BRADSTREET'S.]

London, May 31:—Iron quotations are lower in spite of good shipments. The ship-building trade is getting fewer orders. The effect of the new American tariff is anxiously looked for.

THE AMERICAN IRON MARKETS.

[By Telegraph to BRADSTREET'S.]

From Philadelphia, Pa.: Pig is dull and weak. Prices are lower than for several years past. Additional furnaces have gone out of blast, and buyers cannot be induced to cover future requirements at any reasonable price. Refined bars are more active and firmer. Nails are in good demand and steady. Plate and tank are dull—buyers anticipating lower prices. Structural iron is stronger with more inquiry, especially for bridge work. Steel rails are more active.

From Pittsburgh, Pa.: In the absence of transactions in pig iron it is difficult to give exact quotations. Eighteen to nineteen dollars, four months, might be a fair quotation for forge iron, and $21 to $22 for foundry, according to brand. The signing of the labor scale may have a beneficial effect on the market, but at present it is very dull. The Allentown trouble cannot affect Pittsburgh or the western trade, and the Marshall metal is held by strong enough parties to tide over the present low market.

From Cincinnati, Ohio: Pig iron is weak as a rule. The only exception in this respect is car wheel. Manufactured iron has been variable, owing to prospective strikes. Stocks are only fair and the demand good.

From Cleveland, Ohio: The ore market is comparatively stagnant. Pig iron continues dull. Manufactured iron has been in active demand, in view of the expected strike.

From Chicago, Ill.: Hardware and tools are jobbing freely. Refined iron and nails stocks light and firmly held. Pig iron is dull and irregular.

From Detroit, Mich.: The market looks as if it would remain very quiet until September.

From Louisville, Ky.: Pig iron dull and weak. Bar iron is in good demand and selling at 2.20c. from store; stocks are light. Nails are in steady demand and quoted at $3.25 from the store, and the tendency is to advance. Hardware is moderately active. Iron consumption hereabouts is at a good average.

From St. Louis, Mo.: Pig iron very dull, and buyers and sellers are apart. Quoted values are unchanged. Manufactured iron is apathetic, but there is a very unsettled feeling under the surface.

From St. Paul, Minn.: Hardware very active. Nails scarce and strong. Bar iron slow and firm.

COAL.

There is little that is new to report respecting the anthracite coal trade. Stocks are light, and there is good reason to believe that, with the half-time at the mines yet scheduled, there will be no difficulty in placing the output up to the close of the half year. The comparatively small quantity of coal in yard and stock elsewhere, in view of the fact that the year's output thus far has furnished 1,305,687 tons of coal in excess of the corresponding date last year, augurs extremely well for the general condition of the coal trade. There are no features of note to add in reference to the trade in bituminous. The movement of both varieties is fair, though trade in anthracite is the more active. Actual rates for the latter are still below schedule prices, although cutting is not so severe at present as it has been since the season opened. Next week, following one of full time at the mines, will be half-time only. The official report of the quantity of anthracite coal mined this year as compared with last is as follows:

	Tons, 1883.	*Tons*, 1882.
In January	2,075,741	1,833,910
In February	1,937,996	1,605,243
In March	2,375,512	2,108,042
In April	2,511,709	2,135,802
In May, first week	381,065	380,038
In May, second week	449,278	427,756
In May, third week	756,259	685,129
In May, fourth week	491,900	479,853
Totals	10,970,460	9,664,773

PETROLEUM.

The decided advance in the prices of certificates of crude oil which marked last week's transactions has become a veritable boom. As a matter of course, after the gain of 17c. per barrel between last Friday evening and the close on Thursday, not much in the way of decorum or coolness was to be expected from the brokers on 'change. Again, therefore, do we hear of the greatest excitement on record, and find it verified by the pandemonium on the two oil-trading floors of the city. So eager were the speculators for an opportunity to buy and sell after the close of business hours that the sidewalks and an up-town hotel late in the evening witnessed transactions aggregating over one-third of a million barrels. As explained in these columns a month or so ago, the statistical position of petroleum for some time past has warranted an advance. Production and consumption have come close together, and stocks in tank were drawn on to meet a slight spurt in the export demand. Still, the price of certificates did not hold any small advance made. The cause of this was a fear of the possibilities as to production of numberless new wells going down and and which were coming in almost daily. Some were large producers, and an important point was to determine their staying powers. Within the past two weeks many of the new wells have given out. The decline in their output has gone down conspicuously in one case from 500 barrels to 3 barrels. Several important ventures were dreaded as probable gushers, in that they would mark an extension of territory to be worked. Thus far these have been failures. Old wells which have declined have been torpedoed and declined again. This marks a great decline in the prospective supply, and prices have, therefore, been quick to respond. To cap the climax, on Thursday there came the report of operations in the regions for May. It was a very "bullish" document and sent prices bounding into the air. The exploitation of the regions in May was notably large, hence the decline in output noted gains added force to raise quotations. The number of wells completed in May was 236 against 215 in April. The total new production showed a large decline, or 3,500 barrels in May, against 4,581 in April. The number of wells drilling May 31 was 195, against 206 the last day of April, and the number of rigs up and building shows a decline of 36. Thursday's sales were very large, aggregating at the two exchanges in New York alone, over 9,000,000 barrels, or one quarter of the entire stock of oil in tank in Pennsylvania.

On Friday morning speculation in pipe-line certificates began at $1.21. No further news had been received from Pennsylvania, and apparently the way was clear for oil to be quoted at $1.30, as freely pre-

dicted on Thursday night. Transactions were heavy, buying spirited, and quotations ran up to $1.24, when, to the surprise of some, a reaction took place, and certificates of crude went back to $1.18 quite as precipitately as they had risen. The explanation was that a severe contest was in progress between the Standard Oil Company on the bear side of the market and "a powerful bull syndicate" at Oil City and New York, at the head of which is said to be Mr. James R. Keene. The latter gentleman's successful encounter with the corporation named, in connection with opposition pipe-line company control, and in an attempt of the Standard to crowd him to the wall by bulling Union and Central Pacific stocks recently—these current beliefs respecting the two forces at play, lent added interest to the contest. After prices had gone down to $1.18 they reacted, and the morning session closed at $1.20⅛ bid. It may be inferred from the above, the movements of the oil market yesterday in the absence of any news were due to the manipulation of the two speculative interests named. The Standard is currently believed to have been badly caught short of oil last week, which of course intensifies its interest to get even. At the close last night the price of certificates was $1.19¾, against $1.03¼ on Friday night last week, a gain of 16½c. in the week.

In sympathy with the rise in prices of certificates of crude, refined was very firmly held all the week at the highest prices last quoted. On Thursday there was an advance all around.

The quotations for certificates of crude petroleum and of petroleum products last evening, as against those of May 25, May 18, and May 11, are as follows:

	May 11.	*May 18.*	*May 25.*	*June 1.*
Certificates, crude..	92¾	1.02¾	1.03¼	1.19¾
Refined, 110°.....	7½	7⅝	7⅝	8
Refined, 70°.....	7⅜	7¾	7¾	8⅛
Crude, in barrels...	6⅞@7⅜	6⅞@7⅜	6⅞@7½	7⅜@8
Case, plain.....	9¾	9½	9½	9½
Naphtha.....	5¾	5¼	5¾	5¾

The prices of certificates of crude at New York, during the week closing last evening, have been as follows:

	Opening.	*Highest.*	*Lowest.*	*Closing.*
Saturday.....	1.03½	1.05⅞	1.03¼	1.05½
Monday.....	1.08¼	1.09	1.07⅜	1.08½
Tuesday.....	1.08¾	1.12¼	1.07⅞	1.10⅝
Thursday.....	1.11	1.19⅜	1.11	1.19⅜
Friday.....	1.21	1.24	1.18	1.19¾

The total quantity of petroleum (crude equivalent) exported from the United States from January 1 to May 26 was 232,497,452 gallons, against 229,307,961 gallons in a like period of 1882, an increased exportation of 3,189,491 gallons, against but 1,546,680 gallons reported up to May 19. For the week ending May 26, the foreign shipments were 11,325,467 gallons, against 17,203,706 gallons in the preceding week. New York city's exports of petroleum from January 1 to May 26 amounted to 197,044,731 gallons, against 187,987,106 gallons in a like period in 1882.

OCEAN FREIGHTS.

The ocean freights market has been less satisfactory to those interested than last week. While rates have not advanced, prices of oil have sought levels which have checked exportation. The demand for wheat for export has also been less. Ocean freight rates are therefore firm but dull. Grain has gone abroad per steamer to a limited extent. At Wilmington, freights, foreign and coastwise, are steady.

WHISKY MARKET REPORTS.

[By Telegraph to BRADSTREET'S.]

From Cincinnati, Ohio: Whisky is steady and unchanged.

From Louisville, Ky.: The market is somewhat firmer. About 10,000 barrels have been exported to Bermuda, Liverpool and Hamburg to gain an extension on the time to pay the tax. Dealers who have paid the tax and put the goods in stock are getting better prices than by selling them in bond to speculators. The distilleries, with two or three exceptions, have all stopped, and the sum total of fine goods made in Kentucky this season for ageing purposes, not counting highwines and goods made for immediate use, will not exceed 7,000,000 gallons, which is less than one-fourth of what was made in this state last season. Over-production in the past few years has made stocks unprecedentedly large, but they are being slowly yet steadily reduced by the great curtailment of production this season, and the immense consumers' demand. While whisky at first hands is quiet, the jobbers who sell among consumers are still having a brisk distributive business. The fine quality and relative cheapness of straight Kentucky whisky has opened up many markets and forced them into wider channels of consumption. The statistical position of Kentucky whiskies is regarded as promising. All that is needed is a restoration of confidence.

TOBACCO REPORTS.

[By Telegraph to BRADSTREET'S.]

From Cincinnati, Ohio: Tobacco has been received freely, and transactions have been liberal. There appears to be a growing belief that prices will decline under still larger receipts.

From Evansville, Ind.: Farmers say that the tobacco plants have been damaged by bugs, but promise a fair supply.

From Louisville, Ky.: Leaf tobacco receipts are improved, but not large. The market is active under a good demand for all grades. Prices are receding a little from the high figures reached during the period of light receipts, and the present course of the market is in buyers' favor. The weather is favorable for prizing and handling. The planting season has commenced with a good supply of plants.

From Norfolk, Va.: There is a large shipping business in smoking, north and west. Tobacco prospects favor a large yield.

From St. Louis, Mo.: Tobacco is higher, and selling freely.

SPECIAL MINNESOTA TRADE REPORT.

[By Telegraph to BRADSTREET'S.]

From St. Paul, Minn.: Boots and shoes are easy, with no increase of sales. Hats and caps have a lessened trade. Clothing is in moderate request, compared with a month ago. Drugs are quiet, and agricultural implements are active.

SPECIAL NORTH CAROLINA TRADE REPORT.

[By Telegraph to BRADSTREET'S.]

From Wilmington, N. C.: Timber receipts are light. Lumber is quiet, and shingles are firm. Rosins are firm. Tar is wanted. Crude Turpentine is steady. Spirits of turpentine steady; demand steady.

SPECIAL GEORGIA TRADE REPORT.

[By Telegraph to BRADSTREET'S.]

From Savannah, Ga.: Cotton opened dull, with poor prospects at the close. Rice market steady with the inquiry improved; the stock of rough on hand is very small. Money is stringent, with a more general demand.

SPECIAL LOUISIANA TRADE REPORT.

[By Telegraph to BRADSTREET'S.]

From New Orleans, La.: There is more movement in cane products. Sugar is firm. Molasses is dull. Rice is steady; fair to prime, 5⅜ to ⅞. The cane crop is fully one month backward. Flour is 15c. higher and strong at the advance. Crude cottonseed oil is 36c.

FOREST CULTURE IN GERMANY.

The following is taken from the London *Journal of the Society of Arts* for May 18:

Forests in Germany were originally common property, ownerships of forests being unknown. Of the lands suitable for agricultural purposes each one took possession yearly of a fixed portion for cultivation. From the forests, however, each one took as much as he desired, and from wherever he pleased, excepting those groves which were set apart for religious purposes. Traces of the ownership of forests by private persons are found in the sixth century. At this stage of proprietorship, one could not claim particular woods, and prohibit the use of the same by others, unless the felling and using of the timber had actually commenced. Mr. Zimmerman, the United States Consular Agent in Berlin, states that the earliest forest properties were so-called privileged forests. By privileged forests are meant such as were the property of emperors, kings, princes, and other rulers and nobility. The privileges at first extended only to the exclusive right of hunting, fishing, etc., in the forests; but later complete control of them was claimed, and they were appropriated by the nobility, and held as property belonging solely and entirely to themselves. In the earliest times traces of forest protection and preservation are to be found. In the middle of the thirteenth century a penalty of three "schillings" was attached by law to the cutting of wood in a forest without permission. After the privileged forests came the private proprietorship of forests, then the county forests, and lastly the state forests of to-day. The laws and regulations under which the utilization of forests was most justly and equitably permitted, occur between the years 1500 and 1800. Proper management of forests and discretion in felling the trees first began to be practiced in the mining districts. Then it was necessary to have at hand the wood absolutely required there in connection with the working of the mines, and the mine owners were compelled to preserve the existing forests. After the mining districts the forests in the neighborhood of cities and towns began to be cared for. The "Erfurt" forest economy dates back as far as 1359. In the Nuremburg district in 1368, and in the Frankfort-on-the-Main district in 1423, the planting of the pine tree was introduced. The first forest schools were established in Germany about the year 1717. They were so called high schools, in which certain district officials (Revierverwalter) were the teachers. These schools were at first self-supporting; later, they received assistance from the state, or were made state forest schools or academies. Thus, forest academies were established at Dreissigacker in 1801; Tharandt in 1816; Nelsungen in 1816; Aschaffenburg in 1820; Hohenheim in 1820, and at Eisenach in 1830. To each of these academies three professors were detailed for duty, one to instruct in forest economy, one in natural history and science, and one in mathematics. In Baden, forest culture was added to the list of subjects studied at the Polytechnic Institute at Carlsruhe in 1832, and in 1838 the same was done at Brunswick. A chair of forestry was established at Giessen in 1825, and later also at Heidelberg, Munich, Tübingen and Leipsic. At the last three, however, because of the forests being too remote for the practical instruction necessary for a student of forest culture to have, and for other reasons, the subject was dropped. In Prussia, the incitement to the study of forestry came from the state. From 1770, on the proposition of Minister Van Hagen, lectures on forest botany were delivered at Berlin, and excursions into the forests were made for the purpose of examining on the spot the subjects treated in the lectures. In 1821 a forest academy was established at Berlin in connection with the university there. This academy was, in 1830, removed to Eberswalde, where it now is. The instructors at this academy consist of the director, three master foresters and five professors, and the subjects taught are as follows: Forest culture in general, method of forest appraisement, the manner of keeping and rendering accounts of income received and expenditures made on account of forests, the protection of forests, utilization of the same, and huntsmanship, history of forest culture and statistics relating to same, geodesy and draughting, mathematics, physics and mechanics, botany, zoology and entomology, mineralogy, geology and chemistry, and Prussian civil and criminal law. Excursions are made into the forests three times weekly, and lectures and practical demonstrations are then given. In 1868 a second Prussian forest academy was established at Münden on the same principle and with nearly, if not quite, the same course of instruction. In the opinion of Professor Daukelmann, of the forest academy of Eberswalde, a reorganization of this course of study will take place within the next ten years, so that forestry subjects alone, such as preservation and cultivation of forests, botany, zoology, etc., will be taught at the forest academies; and general or relative subjects, such as geodesy, draughting, mathematics and law will be made a separate course for the forestry student at a university. Before admittance to the forest academy can be obtained the applicant must be over twenty years of age. He must also have certificates to the effect that he has passed the requisite final examinations at a Prussian gymnasium or "realschule" of the highest grade, that he has passed his examinations as *élève* forester, and that he has a good character, and possesses the means necessary for his subsistence while studying at the academy. A thorough forester, in Prussia, is an adept in natural history relative to forests and their inhabitants, at the same time a geologist, botanist and chemist, and the possessor of a good general knowledge of the laws of his country. He knows every foot of land in his district, at the various stations he notes the rainfall, the force and direction of the prevailing winds, their humidity and dryness, the temperature, etc. For the encouragement and assistance given to these men by the state, the return made by them in the management of its forest interests is of the greatest value. The Prussian forestry corps at present consists of 1 chief general master forester, 3 general master foresters, 30 chief master foresters, 1 forest director in Hanover, 93 master foresters, 685 chief foresters, 3,354 district foresters, 356 forest keepers, and 70 minor officials.

MEMORANDA FROM THE MAY COTTON REPORT.

TEXAS.

From Hayes county: The crop is backward on account of a very late, cold spring. We are beginning to need rain, but not seriously. So far the farms are in better condition now than at this time last year, though not so far advanced. We have plenty of labor for cultivating, but not enough to gather closely.

From Johnson county: Our season has been a peculiar one. The spring was very late, cold and rainy. Early cotton is a good stand, and intermediate planting a bad stand. The acreage is fully 25 per cent. greater, and with fair weather the crop promises to be a good one.

From Henderson county: The cotton prospects are rather unfavorable. The cold, backward spring, coupled with excessive rains, has retarded planting to a considerable extent. There seems to be a disposition among farmers to curtail the acreage in cotton and increase the acreage of cereals. Labor is very unsatisfactory.

From Harris county: Cotton is remarkably promising this season. Stands are almost perfect, the land is well ploughed and planted, and rains sufficient to help cotton along. The acreage will be increased 8 to 10 per cent.

From Lamar county: This season's crop in this county was curtailed some 30 per cent. by the November freeze, which, coupled with the low prices that have prevailed during the past six months, has discouraged planters to such an extent that the cotton acreage will be reduced from 10 to 20 per cent. Labor is fair as to supply and efficiency.

From Navarro county: Owing to last year's large crop and the late gathering of it most farmers got very late starts this year, and heavy rains in March packed the ground so that few could plow in the black land, and therefore not more than half the cotton is in the ground yet. With good rains hereafter when needed all the lost time may be readily recovered, and the situation, taken as a whole, is favorable to as full a yield in proportion as last year was at this time.

From Bell county: The planting season this year has been remarkably favorable. We have had plenty, but not an excess of rain, and the crop has got a good start. The stands are up very good, and there is sufficient labor to make the crop.

From Fort Bend county: The crop this year is very backward on account of the late spring and hard winter, but cotton is looking well and would warrant the conclusion that with favorable weather we will have a bountiful crop. Labor is as good as usual, all hands being busy at their posts.

From Bowie county: The season thus far has been very rainy and cold. The farmers have been troubled a good deal about preparing the land, consequently cotton is late, and owing to cold nights the plant comes up slowly and very small. Labor as a general thing is very scarce and poor.

From Brazos county: Planting was finished by May 1. The plant, though small, is in good condition, and the stand better than we have had for years. The weather has been rather too cool for rapid growth, but aside from this the prospects are good. Laborers are working well.

ARKANSAS.

From Nevada county: Owing to increased planting of cereals the cotton acreage will be reduced this year. The weather has been bad for the sprouting of the seed, which makes the plant ten days late, and too early to determine the stands. We hear no inquiry for laborers or complaint as to inefficiency.

From Union county: Day labor is scarce, for the reason that nearly all freedmen and whites have secured homes, opened lands, and are farming on their own account. During chopping and picking time the weather was cold and wet, the thermometer frequently going down to 30°, but notwithstanding this the stands are fair, and cotton is looking very good.

From Jefferson county: Up to this time we have had little or no warm weather, and while farmers are generally as far advanced with their crops as usual, we need good sunshining days to develop the plant, which is just now in a very precarious condition. There is plenty of labor to be had in the county.

From Lincoln county: Owing to heavy rains and cold weather our planting was very backward, and we cannot yet tell what the stands will be, but think, with seasonable weather, they will be good. The labor we have is good and working well, but the supply is a little short.

From Calhoun county: We consider the cotton crop prospects for the year very good; a heavy crop has been planted, which has come up well, the stands being good. Labor is plentiful and working well.

From Dorsey county: The outlook for cotton this year is better than last, as people have gone to work with more energy, while the weather has been favorable.

From Jackson county: The weather has been

good both for planting and growing; the plant is up with a good stand and looks healthy. Our supply of labor is rather short, but will be able to procure enough to make the crop without trouble.

From Clark county: Last year at this time our cotton was all planted and up with good stands, but this year the county was flooded with rain, and planting is ten days later. The weather is fine now, and indications point to good stands. Labor is good, but a little scarce.

From Columbia county: It has been almost too cold for cotton this spring, but where it has been planted long enough it is up and doing very well. There will be less planted in this county by 10 per cent. this year; the farmers have found out that there is more money in raising cattle and provisions. Labor is equal to the demand.

TENNESSEE.

From Shelby county: We had a heavy rain fall April 21. Cotton planted previously to that time is a fair stand, while on that planted since the stand is only fair. Supply of labor is good and working well.

From Williamson county: The weather has been too cool for growing; for planting it was good. Cotton has come up fairly well, and prospects are fair. No complaints heard against labor.

From Maury county: There was so much rain in April that planting was delayed at least two weeks. The stand is very bad, and a great portion of it will be plowed up or replanted, and it is too late to replant successfully.

From Rutherford county: The weather was too wet at early planting, since then it has been too dry. The stand is fairly good, and as yet there is nothing to discourage the planter. Labor is satisfactory.

TRADE EMBARRASSMENTS.

There were 160 failures in the United States reported to BRADSTREET'S during the past week, 5 more than the preceding week, 56 more than the corresponding week of 1882, and 93 more than the same week of 1881. Compared with the previous week the middle states had 34, a decrease of 5; New England states 25, a decrease of 10; southern states 25, an increase of 6; western states 56, an increase of 10; Pacific states and territories 20, an increase of 4; Canada and the Provinces 17, a decrease of 7. The important failures were The Levett-Muller Electric Light Company, New York; John Raber, brewer, Brooklyn; Edward Buckley, wool, San Antonio, Tex.; The Ætna Iron Works Company, San Francisco. In the principal trades they were as follows: General traders 28; grocers 19; liquors 11; clothing 10; manufacturers 9; shoes 8; drugs 6; dry goods 5; millinery 5; fancy goods 4; hardware 4; tobacco and cigars 4; jewelry 4; commission 3; hotels and restaurants 2; crockery 2; bakers and confectioners 2; grain and flour 2; produce and provisions 2.

ALABAMA.

WARSAW.—John W. Peel, general store, offers to compromise at 25 cents.

CALIFORNIA.

ANAHEIM.—S. S. Federman, general store, has assigned.

DOWNEY.—J. Sleisinger, general store, has failed.

EUREKA.—A. B. Smith, crockery, has compromised at 50 cents.

FRESNO.—F. J. & R. B. Stockton, general store, have filed a petition in insolvency.

RED BLUFF.—Murphy & Co., general store, have failed.

SAN FRANCISCO.—The Ætna Iron Works Company, foundry, has failed. Two attachments were issued against the property, one for $14,000 in favor of the estate of Henry Smith, and the other, $18,784, in favor of the London & San Francisco Bank. The company was incorporated December 1, 1882, with an authorized capital of $500,000, of which $75,000 was paid in, and succeeded the Ætna Iron Works.

SAN FRANCISCO.—S. E. Cohn, varieties, has assigned.

SAN FRANCISCO.—J. Danaher, saloon, has failed.

SAN FRANCISCO.—M. Dannmeyer, trading as M. Dannmeyer & Co., grocers, has been attached.

SAN FRANCISCO.—Linforth, Rice & Co., agricultural implements, have failed. Liabilities about $43,000; assets $32,000.

SAN FRANCISCO.—T. Sullivan, shoes, died on the 22d ult., and his stock has been attached.

SILVER MOUNTAIN.—The Isabella Gold and Silver Mining Company has filed a petition in insolvency.

STOCKTON.—J. B. Ford, varieties, has assigned.

COLORADO.

DENVER.—W. I. Peoples, saloon, has been closed out under a chattel mortgage.

FORT COLLINS.—James Conroy, trading as Conroy & Co., grocer, has been attached and assigned.

TRINIDAD.—Charles Vorndorf, saloon, is being sold out by the constable.

CONNECTICUT.

ANSONIA.—Arthur C. Langdon, grocer, has assigned.

BETHEL.—Frank B. Drew has assigned.

DANBURY.—Hawley & Co., dry goods, have assigned to W. R. Lewis.

HARTFORD.—J. G. Wells & Co., crockery, have been closed on an attachment to secure an old claim. When Mr. Wells settled with his creditors at 25 cents he gave a note to C. H. Brainerd, who held a second mortgage on the Capital avenue building of $15,000. Mr. Brainerd wanted money and attached, as Mr. Wells could not take care of the note.

MIDDLETOWN.—Louis Baer, gents' furnishing goods, has been attached and closed.

SOUTH NORWALK.—Henry R. Fitch, planing mill, offers to compromise at 30 cents cash.

DAKOTA.

LISBON.—Gilbertson & Lee have been closed by creditors.

MAPLETON.—Schonmel & Klitcha, general store, have been closed by creditors.

DELAWARE.

NEWCASTLE.—B. F. Lancaster, general store, has been closed by the sheriff.

WILMINGTON.—Emlen Hewes, lumber, has returned home and assigned to S. P. Adams. The liabilities are about $60,000, and the assets are estimated at between $20,000 and $25,000.

DISTRICT OF COLUMBIA.

WASHINGTON.—J. R. Cornell, grocer, who recently assigned, offers 50 cents

WASHINGTON.—B. F. Harvey, shoes, has assigned, giving preferences for $1,500.

FLORIDA.

TAVARES.—A. A. St. Clair, general store and saw mill, has assigned to J. J. Daniels. Liabilities reported at $50,000. The assets are composed largely of lands and orange groves of uncertain value, which may sell for enough to cover liabilities, but it is thought doubtful.

GEORGIA.

CARROLLTON.—A. F. Sharp, general store, has assigned.

CHIPLEY.—Taylor White, general store, has settled at 50 cents and gone out of business.

MACON.—The liabilities of Henry & Sherwood, general store, are estimated at $4,000; nominal assets $3,000.

MACON.—A receiver has been appointed for Powers & Boifreuillet, tobacco and cigars.

ILLINOIS.

BLANDINSVILLE.—M. H. Watson, drugs, has been closed by the sheriff.

BRAIDWOOD.—H. (Mrs. S.) Flaxman, clothing, has been closed by the sheriff.

CHICAGO.—Goldstein Brothers, wholesale jewelers, have been closed by the sheriff.

CHICAGO.—Fred. Kaehler, coal and wood, has assigned.

CHICAGO.—Anton Kadow, tailor, has assigned to Willis Smith.

CHICAGO.—Marcus Kronberg, jewelry, has been attached for $400.

CHICAGO.—Simon Mendel & Son, wholesale notions, have assigned.

QUINCY.—A receiver has been appointed for Brown Brothers & Co., wholesale confectioners.

SANDWICH.—Thomas E. Culver, general store, has confessed judgments for $400 and gone out of business. Liabilities about $2,500; assets covered by execution.

INDIANA.

CURVETON.—John Reid, miller and grain, has failed.

MIDDLETOWN.—J. D. Farrell & Co., general store and grain, have assigned.

MIDDLETOWN.—George L. Swain has assigned.

MISHAWAKA.—John Klein, shoes, has failed. Liabilities about $2,000; assets small.

NEW HARMONY.—Fred. Heckman, saloon, is reported to have assigned to E. D. Owen, and to have sold out the stock.

OWENSVILLE.—Hillyard & Landford, grocers, have sold out by bill of sale. Liabilities $1,300; assets $640.

RUSSIAVILLE.—R. T. Chandler, drugs and groceries, is reported to have been closed by the sheriff.

IOWA.

ATLANTIC.—E. A. Whitney, grocer, has been closed out by mortgagee.

AUDUBON.—E. S. Foster, grocer, has compromised at 50 cents and resumed.

BELLE PLAINE.—Jonathan A. Wickersham, dry goods, gave a chattel mortgage for $11,300, and has been attached.

OTTUMWA.—The Ottumwa Printing Company is reported trying to compromise.

PRAIRIE CITY.—D. A. Pool, drugs, has assigned to J. B. Roach. Liabilities about $4,000; assets $2,500.

KENTUCKY.

LOUISVILLE.—Louis Korb, wall paper, has assigned to Philip Korb.

OAKWOOD.—Thomas Clarke, general store, has assigned.

LOUISIANA.

DEVALL.—George W. Hamilton, general store, has failed and been sold out by the sheriff. Liabilities $2,500; assets $1,000.

MAINE.

AUGUSTA.—V. D. Pinkham, stage, has been attached.

AUGUSTA.—Josiah P. Wyman, doors, sash, etc., has been attached.

BANGOR.—W. H. Edmunds, jeweler, offers 25 cents.

BOOTHBY.—The liabilities of W. C. Clisby, livery, are about $2,900; assets $1,250. The liabilities are for indorsements for D. W. Hodgdon.

BOOTHBY.—The liabilities of D. W. Hodgdon, flour, etc., are about $20,000; assets $4,000.

BOOTHBY.—Huff Brothers, hardware, owe about $3,000; assets $1,200. They were involved by indorsing for D. W. Hodgdon.

BRUNSWICK.—William R. Field, restaurant, has failed, and is trying to settle at a small figure. His property is heavily mortgaged. Liabilities $13,000.

CHINA (Week's Mills.)—E. W. Merrill, carriage maker, has been attached.

LEWISTON.—The liabilities of D. H. Holman, crockery, are $2,300; actual assets $1,200.

SKOWHEGAN.—A. S. Burke, grocer, has failed.

ST. ALBANS.—M. Bigelow, of Bigelow & Prescott, general store, is reported to have left town, having previously sold his interest to his brother. There are a number of unpaid claims against him, and the firm has also been attached. They owe $4,500; nominal assets $2,800.

MARYLAND.

BALTIMORE.—The liabilities of J. W. Lewis & Co., oyster packers, are about $8,000; liabilities merely nominal.

BALTIMORE.—George N. Mackenzie, Jr., saddlery hardware, has assigned to George G. Hooper.

MASSACHUSETTS.

BOSTON.—Batchelder & Co., leather, have been petitioned into insolvency.

BOSTON.—Creditors of Finn, Carson & Co., hats, have petitioned for a stay of proceedings in insolvency.

BOSTON.—W. C. Fisk & Co., produce, have failed.

BOSTON.—Gates & Co., printers, are compromising at 20 cents.

BOSTON.—Hathaway & Co., ship brokers, and the Hathaway Steamship Company, are in insolvency.

BOSTON.—I. W. Moody, stationer, owes about $13,350; no unencumbered assets.

BOSTON.—George H. Ryder, organ manufacturer, has been petitioned into insolvency.

BOSTON.—John F. Willey, saloon, has failed and gone into insolvency.

BROCKTON.—Charles S. Chase, furnishing goods, has been attached.

CHICOPEE.—It is said the estate of George W. Nowell, grocer, will pay 29 cents.

FAIRHAVEN.—The liabilities of W. H. Dwelly, livery, are about $4,100, of which $2,760 is secured by mortgage. There are no unencumbered assets.

HATFIELD.—Elisha Hubbard, tobacco, is in insolvency. Liabilities $11 000; assets $5,500 in real estate, fully mortgaged.

HAVERHILL.—The liabilities of F. E. Heath, shoe manufacturer, are $10,300. It is said he will offer 25 cents.

LYNN.—H. A. Lindsey, shoe manufacturer, has suspended. Liabilities $9,000. He offers 40 cents.

MONSON.—Eugene F. Willis, clothing, offers 62½ cents.

PROVINCETOWN.—The liabilities of Young & Brothers, fruits, are $1,000; assets $260.

SPRINGFIELD (Indian Orchard).—The liabilities of Catherine E. Bolger, millinery, are $3,000; nominal assets about the same, mostly real estate heavily mortgaged; the stock, valued at $400, is mortgaged for $200.

TAUNTON.—At a meeting of the stockholders of the Taunton Copper Manufacturing Company it was voted to reduce the capital stock from $450,000 to $126,000, and then to increase it to $252,000. From the sale of this new stock, the sale of the real estate in New York, and the personal quick assets, it is hoped enough will be realized to pay the debts. Should this arrangement fail, it is thought that the company will have to go into liquidation. There is no disposition on the part of the creditors to press the company, and it is expected that the result will be known in the next thirty days. The committee reported that they found the name of the late Mr. Crocker on $400,000 of the company's paper.

WESTBORO.—E. L. Jones, dry goods, has had a mortgage foreclosed.

MICHIGAN.

ADA.—L. W. Shellhouse, general store, has assigned.

ALLEGAN.—G. W. Hartson, grocer, has been closed up under a chattel mortgage.

BLOOMINGDALE.—O. P. F. Reynolds, general store, has been attached.

DETROIT.—Showerman & Wheat, grain commission, have suspended.

MINNESOTA.

AVOCA.—John Rigg, general store, is in the hands of the sheriff.

MORA.—T. B. Vickery, saloon, has been attached.

MISSISSIPPI.

MERIDIAN.—McQueen & Co., dry goods, have failed. Liabilities $10,000; nominal assets $7,000.

MERIDIAN.—Mrs. Sarah D. Niolin, millinery, has assigned.

MISSOURI.

SALEM.—S. L. Devens & Co., drugs, have been attached. Liabilities about $2,700; assets about $400.

SEDALIA.—Theodore Springer, dry goods, has failed. Liabilities about $5,000; assets $3,000.

NEBRASKA.

DAVID CITY.—J. K. Murphy & Co., drugs, have mortgaged all their property.

OMAHA.—A. F. Berguist & Brother, carriage manufacturers, have been attached.

OMAHA.—J. K. Lund, butter and eggs, is reported to have left town.

PLEASANT HILL.—Oren Norton, general store, has failed.

PONCA.—J. F. Higgins & Co., grocers, have failed.

TEKAMAH.—T. F. Storey, harness, has failed.

NEVADA.

RENO.—S. Jacobus, tailor, has failed.

NEW MEXICO.

LAS VEGAS.—Marwede & Gruner, hardware, have assigned. They claim assets $12,000; liabilities $6,000.

SAN MARCIAL.—Spear Brothers, general store, have been attached. Liabilities $10,000, of which $7,000 is to local creditors. They claim assets of $17,000.

NEW YORK.

ALBANY.—S. & C. A. Baker, jewelry, have assigned to Hugh Guyer.

ALBANY.—The schedules of George W. Clark, grocer, show liabilties $3,797; nominal assets $1,953; actual assets $1,285.

ALBANY.—The schedules of Groesbeck & Liney, liquors, show liabilities $4,341; assets $978.

BROOKLYN.—John Raber, brewer, assigned on the 29th ult. He confessed judgments for $35,666, of which the largest were to B. Raber $14,541; Alois Raber $15,639; S. Gollhoffer $4,160. His liabilities are about $70,000 unsecured; $70,000 on mortgages, and $35,666 confessed judgments, making a total of about $175,666. The assets consist of the brewery property, which it is said cost $125,000, mortgaged for $70,000, other real estate and accounts. He took the brewery about seven years ago to secure himself for advances, but it did not prove profitable.

BROOKLYN.—Robert Raphael, tailor, assigned on the 28th ult. to W. H. Mott, giving preferences for $6,100.

BUFFALO.—The schedules of the Jost Brewing Company show liabilities $37,543; nominal assets $25,601; actual assets $15,255.

CHENANGO FORKS.—The liabilities of Daniel Lowell, general store, are about $10,000. He gave preferences for $3,200, of which $2,000 was to his wife.

MALONE.—William C. Orcutt, hops, has assigned. Liabilities about $28,000.

NEW YORK CITY.—The schedules of E. D. Bassford, crockery, show liabilities $49,109; nominal assets $30,280; actual assets $18,841.

NEW YORK CITY.—The schedules of Blossom, Hayne & Co., naval stores, show liabilities $156,739; nominal assets $104,218; actual assets $46,006.

NEW YORK CITY.—Cohn & Fox, shoe manufacturers, assigned on the 31st ult. to Louis Ober, giving him a preference for $2,582. The liabilities are said to be about $25,000. They attribute the failure to shrinkage and dull trade.

NEW YORK CITY.—The schedules of Aaron W. Haines, woolens, show liabilities $67,662; nominal assets $13,912; actual assets $10,387.

NEW YORK CITY.—The schedules of Joseph Kopetzky, liquors, show liabilities $46,131; nominal assets 43,456; actual assets $37,684.

NEW YORK CITY.—The Levett-Muller Electric Light Company offers to compromise merchandise debts of $5,000 at 25 cents, which creditors are not inclined to accept. The president, Mr. Levett, says the company also owes $16,000 for advances from officers. In November he claimed that the company was worth $25,000, of which $20,000 was in cash and accounts due, and $5,000 in machinery free and clear. He now says the company had to pay back the money received from a branch company; that the plant is now owned by Mr. Muller, and is mortgaged for $1,000; that the company has expended all its money in experimental work; that it has assigned the patents to him, and a new company has been organized as the Levett-Muller Electric Company.

NEW YORK CITY.—Max Lilienthal, tobacco importer, assigned on the 28th ult. to Meyer Auerbach.

NEW YORK CITY.—Myers Brothers, stationers, assigned on the 31st ult. to Fred. M. Littlefield, giving preferences to the Nassau Bank $3,818; Louis S. Levy $2,500; Catharine C. Myers $2,000; Henry Lee $300; George J. Luck $1,000; C. W. Jencks & Brother $500; total $10,118. They succeeded C. D. Myers about five years ago, and carried on two stores.

NEW YORK CITY.—Ezekiel Schreiber, grocer and baker, assigned on the 31st ult. to Marks Louis, giving four preferences aggregating $1,730.

NEW YORK CITY.—Charles Strassman, millinery, assigned on the 1st inst. to Israel Lesser, giving preferences for $1,895.

NEW YORK CITY.—Dora Taylor, millinery, assigned on the 28th ult. to Elias M. Sperling, giving six preferences aggregating $2,200.

NEW YORK CITY.—Enrique Trujillo, shipping and commission, assigned on the 28th ult. to J. H. Dougherty, giving a preference to James E. Ward & Co. $7,055.

OGDENSBURG.—George H. Armstrong, hardware, was advertised to be sold out by the sheriff.

OSWEGO.—The liabilities of E. F. Otis, hats, are about $5,000.

NORTH CAROLINA.

ASHEVILLE.—S. Van Gilder, shoes, has assigned.

ELIZABETH CITY.—J. M. Jackson, sewing machines, has assigned to Gairkin & Co.

GOLDSBORO.—Hauff & Son, musical instruments, have assigned.

SMITHFIELD.—J. T. Cobb, general store, has assigned to his clerk, W. M. Ives.

OHIO.

AKRON.—Simon Katz, millinery, has been closed by the sheriff.

CARDINGTON.—Kahnheimer & Son, clothing, have called a meeting of creditors.

CINCINNATI.—Joseph H. McMackin, saloon, has assigned.

CINCINNATI.—Newburgh, Frenkel & Co., wholesale clothing, offer 40 cents, secured at four, eight and twelve months.

CINCINNATI.—The liabilities of Joseph Steinau & Co., jewelry, are $11,600; assets $4,200.

CLEVELAND.—M. Wolinsky & Brother, clothing, have assigned to Michael Meyers.

DELPHOS.—Fred. Beyer, merchant tailor, has assigned to his father, F. Beyer, on account, he says, of the embarrassment of the Delphos Brewing Company, of which he was a stockholder. He claims he will pay all merchandise debts in full.

DRESHLER.—W. T. Marvin, grocer, is reported to have been burnt out and assigned.

GALION.—B. H. Chadwick, jeweler, has had a chattel mortgage of $1,500 foreclosed.

HEMLOCK.—Saunders & Primrose, general store, have assigned.

IRONTON.—Wise & Adamson, tobacco and cigars, are advertised to be sold out by the sheriff.

JACKSONVILLE.—V. D. Lewis & Brother, general store, have assigned.

NORWALK.—The works of the Dauntless Manufacturing Company have been closed for several weeks, and the stockholders have been unable to get fresh capital. The Norwalk National Bank has begun suit to foreclose a mortgage lien of $25,000.

URBANA.—Marion Weaver, clothing, has been closed by the sheriff.

WEST SALEM.—Meyer & Hawk, clothing, have been sold out by the sheriff.

PENNSYLVANIA.

ALLEGHENY CITY.—The stock of J. G. Stand & Son, soap, has been sold by the sheriff, but business is carried on in the name of Mrs. Stand. Liabilities $30,000; assests in real estate about $15,000.

CARLISLE.—R. F. Sipe, furniture, has assigned.

CHAMBERSBURG.—John M. Pomeroy, publisher, has had execution issued against him for $2,204.

DU BOIS.—D. Levi, clothing, has been closed by the sheriff on judgment for $2,186.

HAMBURG.—William Bossler, cabinet maker, has been closed by the sheriff.

HARRISBURG.—Mrs. Mary A. Huntsberger, millinery, has been closed by the sheriff.

McDONALD'S.—J. R. Thompson, drugs, has been closed by the sheriff.

NEWVILLE.—Jonathan E. Ferree, grocer, has been closed by the sheriff.

PHILADELPHIA.—The Allentown Iron Company, it is said, has found it impracticable to profitably run its furnaces without modernizing them, which would cost upward of $500,000, and neither the stockholders nor the bondholders show any disposition to make the necessary advances, and it is the general belief in the trade that the funds will not be raised, and that the property will revert to the bondholders. The bonds issued amount to about $342,000. It is said current supply bills will be provided for.

PHILADELPHIA.—John W. Elliott & Brother, manufacturers of cotton goods, have suspended. Liabilities about $39,000, including advances on consigned goods. The merchandise debts are $22,000; assets $18,000.

PHILADELPHIA.—Ewing & Co., Adelphian Chemical Works, have been sold out by the sheriff on judgments for $1,527.

PHILADELPHIA.—Judgment for $515 has been recorded against Edmund L. Hall, grocer, on which execution has been issued.

PHILADELPHIA.—Kehrum & Robb, cotton and yarn brokers, have failed. Liabilities about $9,000; assets $1,500. On the 29th ult. confessed judgments to the amount of $3,788 appeared against them, and execution was issued.

PHILADELPHIA.—John Price MacMullen, grocer, is offering to compromise, it is said, at about 40 cents. Liabilities about $22,000; assets $14,000.

PHILADELPHIA.—L. Sykes & Son, manufacturers of bolts and nuts, now offer 50 cents in 10 per cent. instalments, payable in 6, 12, 18, 21 and 24 months, secured by a mortgage of $6,000. Liabilities about $26,000, of which $12,000 is unsecured; assets $20,000.

PITTSBURGH.—Execution has been issued against W. M. Goodman, saloon.

PITTSBURGH.—The liabilities of W. D. Hartupee, engines, are about $12,000; assets about $5,000. It is thought the secured creditors will absorb the assets.

PITTSBURGH.—The liabilities of Morris Jackson, clothing, are about $7,000; assets about $3,000, covered by judgments.

TITUSVILLE.—Patch & Almas, millers, offer to pay their first mortgage creditors, whose claims aggregate $10,000, in full in one and two years; to pay their second mortgage creditors $7,100 in full in the third and fourth year, and to pay the unsecured creditors $4,700 in five years, without interest.

TITUSVILLE.—William Robinson, shoes, has assigned and given a bill of sale for about $7,000.

WAYNESBURG.—A. H. Black, grocer, is in the hands of the sheriff.

RHODE ISLAND.

PROVIDENCE.—Julius Lyons, notions, has assigned to Myer Noot. Liabilities $1,672; assets estimated at $200.

PROVIDENCE.—At a meeting of the creditors of MacNamara Brothers, liquors, it was voted to accept a compromise of 25 cents cash. The liabilities are about $18,000; actual assets $6,000.

WARWICK.—I. H. Greene, shoes, has had a mortgage foreclosed.

TENNESSEE.

BRISTOL.—I. A. Nickles, hotel, has assigned.

TEXAS.

AUSTIN.—The liabilities of James & Son, dry goods, etc., are $7,518; actual assets about $4,000.

DE LEON.—A. Cottrell, saloon, has been closed for non-payment of license.

KYLE.—The liabilities of W. D. Keith, hardware, are $14,000; assets about $7,000.

SAN ANTONIO.—Edward Buckley, wool, has assigned. Liabilities $275,000; assets $150,000. He owned several sheep ranches.

TERRELL.—J. G. Lawrence & Co., general store, have sold out for $13,000 to three St. Louis creditors, to whom they were indebted $12,000. Mr. Lawrence is dead, and his estate is said to be insolvent.

UTAH.

OGDEN.—The Pilot Publishing Company has assigned and sold out.

VERMONT.

BENNINGTON.—The liabilities of N. D. Hitchcock, drugs, are about $3,000; assets about $500. Insolvency proceedings have been instituted against him.

ST. JOHNSBURY.—Quinlon Cook, grocer, has been closed by attachment.

RUTLAND.—George W. Hilliard, dry goods, has been petitioned into insolvency by creditors.

VIRGINIA.

BIGGSVILLE.—H. R. Parker, general store, has failed.

CHASE CITY.—T. A. Butler, general store, has assigned.

CLARKSVILLE.—A. J. Chandler, general store, has assigned.

PIG RIVER.—H. M. Darnall, general store, has assigned.

PORTSMOUTH.—W. White & Son, lumber contractors, have assigned to J. H. Gayle. Liabilities reported from $25,000 to $30,000.

WEST VIRGINIA.

MINEVILLE.—Ernest Naedele, general store, is reported to have assigned to J. H. Strother.

WISCONSIN.

MENASHA.—Kennedy & Finlan, auction, have been closed by the sheriff.

MILWAUKEE.—William Prietz, grocer, has been closed by the sheriff.

PRINCETON.—Otis L. Warren, general store, has assigned.

TRADE LAKE.—M. C. Swanson, general store, has failed.

MANITOBA.

OTTERBURN.—J. L. Ewing, general store, has obtained an extension.

PORTAGE LA PRAIRIE.—H. J. Woodside, jeweler, has assigned.

WINNIPEG.—D. Catlin & Son, grocers, have assigned.

WINNIPEG.—S. J. Cohn, jeweler, has assigned.

NOVA SCOTIA.

ST. PETERS.—L. J. O'Toole, general store, has assigned.

PROVINCE OF ONTARIO.

COLBORNE.—T. D. Flynn, grocer, is reported to have sold out and left town.

DUNDAS.—Thomas Seaman, merchant tailor, has assigned.

LEAMINGTON.—M. Truax, general store, has called a meeting of creditors.

LONDON.—H. W. Dennis, grocer, has assigned.

MITCHELL.—William Colwell, stationer and jeweler, has had execution issued against him.

MUIRKIRK.—J. G. Leitch, general store, offers to compromise at 75 cents.

ORANGEVILLE.—E. Sawtelle, hardware, is in the hands of the sheriff.

PARKHILL.—Alex. Weir, fancy goods, is reported to have failed.

ST. WILLIAM.—U. Reynolds & Co., general store, have been sold out under a mortgage.

TORONTO.—Stalker & Co., dry goods, have suspended.

WARDSVILLE.—George Gordon, drugs, offers to compromise at 50 cents.

WEXFORD.—McKenzie & McKinnon, wagon makers, offered to compromise at 50 cents, and assigned.

PROVINCE OF QUEBEC.

MONTREAL.—A. Lemonier, trunks, is being sued, and his stock is under seizure.

THREE RIVERS.—P. H. A. Gravel, tobacco, is offering to compromise.

IMPORTANT NOTICE.

SCIENCE.

The undersigned begs leave to state a specimen copy of SCIENCE—the new weekly illustrated paper—will be sent to any address on receipt of ten cents. It should be borne in mind that SCIENCE is the only periodical of its class in America, and every reading American can well afford to have it regularly sent to his home, in order to get concisely the scientific news, in all departments of science, from all parts of the world. SCIENCE is owned by The Science Company, whose directors are Daniel C. Gilman, of Baltimore, President; Alex. Graham Bell, of Washington, Vice-President; Gardiner G. Hubbard, of Washington; O. C. Marsh, of Yale College; and Samuel H. Scudder, of Cambridge, Editor and Treasurer. The price of SCIENCE by the year is $5. (52 numbers, two volumes, 1,500 quarto pages, neatly printed and well illustrated.) By single numbers, 15 cents each.

ENTERED AT THE POST OFFICE AT NEW YORK, N. Y., AS SECOND-CLASS MATTER.

SATURDAY, JUNE 9, 1883.

NOTES OF THE WEEK.

The New York stock market was started on an advance at the close of last week when the news was unexpectedly received from Pittsburgh that there would be no strike in the iron trade. The movement was begun with the coal stocks, though they were not affected by the Pittsburgh troubles at all, and when the market showed signs of flagging, on Thursday, the Gould stocks took up the running and carried it on with a rush. Western Union was advanced that day 3 per cent. The rise has been general, and few stocks have been left behind, while the strength of the bull cliques is such, they having nearly all the usual floating stock of the street in their hands, that they can continue to advance quotations with little difficulty.

The Bullitt bill, whose purpose was the consolidation of the twenty-five or more departments in the city government of Philadelphia, has failed to pass the Pennsylvania legislature. It was generally supported by the Republicans and opposed by the Democrats. This, apparently, for no better reason on the part of the Democrats than a selfish one, as they have of late profited as a party through the misgovernment of Philadelphia by Republicans. In 1854 a consolidation act was passed whereby the entire county of Philadelphia was put under one municipal government, thus doing away with several outlying independent corporations. The act was a stroke of economy. Since 1854, such has been the encroachment upon the people that the comparatively simple government of that day has developed into a most expensive confusion of executive departments, and this while the executive, the mayor, has little executive power worth mentioning, save such as attach to the office as chief of police.

The chief difficulty, now, in Philadelphia in the way of securing better government is the union of legislative and executive duties which exists in the persons of councilmen. A committee of Philadelphia councilmen has very much to do with the direction of the various city departments. Thus the man who appropriates the money has directly to do with its expenditure. The leading principle of the Bullitt bill pointed to getting rid of this confusion of responsibility. When American cities were villages the councilmen were able to combine both legislative and executive duties; but at the present day, when the annual budget of a leading city is equal to or greater than that of one of the states of the Union, such a confusion causes a deal of harm. Strange to say, the principle is entirely ignored in relation to New York city by such journals as the *Evening Post*, which would have the local legislature made up of a committee of executive officers. It is to be hoped that the reformers in Philadelphia will not weary in well doing; that instead they will now set about organizing more effectively to secure the passage of the Bullitt bill, or a similar measure, at the next regular session of the legislature. So much has been accomplished in Philadelphia in the way of municipal reform that other cities can learn much therefrom.

The pilotage question was again the subject of discussion at a meeting of the New York Chamber of Commerce on Thursday. A report of a special committee was presented which reviewed the attempt to induce the recent legislature to reduce the pilotage fees, and declared that it was not surprising that the shipping interest was becoming more and more inclined to look upon the abolition of compulsory pilotage by Congress as the only available means of reform. The report, however, expressed the opinion that the Pilot Commissioners had not exhausted the means of reform which the state law placed at their disposal, and recommended a resolution requesting the Pilot Commissioners to withdraw the licenses of all pilots not actually engaged in sea service for at least eleven months in the year, and to authorize and encourage, without delay, the use of four steam pilot-boats for service at this port, and to take all necessary steps to have such steam pilot-boats properly manned and fitted out. The report of the committee was adopted unanimously. The committee appear to have given an earnest and thorough consideration to the pilotage question, and their suggestions will be commended by all interested in the commerce of the port of New York. The recommendation regarding the introduction of a steam pilotage service will be particularly welcomed. The only wonder is that it should be necessary to make such a recommendation in the leading port of the country to-day. It remains to be seen what good will follow the proposed requests to the Pilot Commissioners. A uniform regulation of the pilotage service of the entire country under federal authority would be a great improvement on the present system, and it will be well for commerce when that is brought about.

The objectionable features of the bills of lading issued by the steamship lines plying to the port of New York were also discussed before the Chamber. A special committee appointed to consider the subject reported that in nearly all cases the risks excepted and the conditions imposed are such that the merchant who insures his goods finds, upon examination, that he is not insured against the exceptions and conditions of the bill of lading he receives. Until a reform could be effected shippers were advised to protect themselves by accepting these objectionable bills of lading only under protest, and were told that they might refuse to receive bills of lading containing improper conditions, and, according to decisions of American jurists, might hold the ships liable for refusing to issue at their request such bills of lading as custom and law in this country dictate. The Chamber of Commerce is doing good service in endeavoring to clear up a matter not very generally understood. It is well that the law and the commercial usage in relation to mercantile documents of such importance as bills of lading should be thoroughly discussed, with a view of bringing about remedies for existing abuses, to be followed, if possible, by the adoption of a uniform international system.

The president of the New York Produce Exchange recently made the statement that if the citizens of New York would have the Erie canal remain the great regulator of transportation it must be enlarged so as to double its present capacity. In an article which we reproduce elsewhere the St. Louis *Globe-Democrat* draws from this statement the inference that unless freight carrying on the Erie canal is subsidized there is no security against large amounts of grain going down the Mississippi or reaching the seaboard through other ports than New York, or what amounts to the same thing, that New York can only retain its commercial supremacy by virtually paying freights from the west through taxation. However this may be, one would think that it hardly becomes a journalist from the Mississippi to twit New York with its inability to maintain its commercial supremacy without a resort to increased taxation of its citizens. Under the circumstances, it may not be improper for us to remind our contemporary that the country has heard somewhat during recent years about taxation to develop the transportation facilities of the Mississippi river and thus promote the commerce of cities like St. Louis.

Our correspondent at Buffalo, in a letter which will be found in another column, shows that while the abolition of tolls has been an important factor in the increase of the business of the Erie canal, it is yet too soon to determine just how important it has been, and that other causes also contributed in a considerable degree. He points out that the business of the canal has been proportionally better this year since the opening of navigation than it was during the same time last year, but he also directs attention to the fact that the canal did an even more active business in May, 1880, than in May of this year. The difference between the amount of transportation through the canal thus far during the present year and that for the same period last year he attributes in part to the fact that the railroads last year were in active competition with each other, and that by reducing rates to a point that did not pay for transportation they took considerable business from the canals, whereas this year the roads are in better agreement and maintain a living rate.

We give place elsewhere to a letter from our correspondent at Philadelphia, in which he sets forth that, notwithstanding the recent large increase in the population of the city, the growth in number and capacity of its industrial establishments and the improvement of its outlying territory, it has lost ground in many respects as a commercial center. The writer shows that a considerable proportion of the products of the local mills is sold by commission houses in New York city, and that many local commission firms have been obliged to establish branch houses there in order to retain this portion of their consignments. This state of affairs has come about in spite of the Quaker City's facilities for doing business with the near-by towns and villages, and the cheapness of rents, and other differences in respect to expense which give that city an advantage. This condition of things is attributed by some to the conservative spirit of the Philadelphia traders and to a lack of vim and energy on their part. Our correspondent, however, is of the opinion that the lack of railroad competition has had much to do with the gradual shifting of trade in certain branches to New York city, and he expresses the opinion that the advent of three or four competing lines, having through connections with the west, would mark a new departure in the history of the trade of the port.

POLITICAL PARTIES AND THE TARIFF.

The attitude of the great political parties in the United States toward the overshadowing question of our commercial policy is unsatisfactory in the extreme. This without reference to the particular declarations on the subject made by either of them. Declarations there have been and in plenty, but in the years of peace that have elapsed since the settlement of the questions growing out of the war there has been no serious attempt on the part of either to bring its asserted policy to the test of popular ratification. This was perhaps not to be expected of the dominant party, which, already in possession of power and with an inherited policy, was mainly anxious for the preservation of existing conditions. Besides, its history was bound up with the imposing events which marked the era of secession and reconstruction, and, its aggressive impulse having been for the most part spent, it has of late felt no call to contend for supremacy on issues other than those upon which its early prestige was built. With the opposition the case is otherwise. Traditional supporters of the doctrine of free trade (that is of a revenue tariff) and long without a political policy acceptable to the major part of the voters throughout the Union, they have yet made no consistent and determined effort to secure the adoption of their commercial policy by the people. On both sides the political campaigns of recent years have been fought upon issues which for all practical purposes can be considered only as survivals of a time and of circumstances that have forever passed away.

It will not be without interest at this point to recall the exact position of the two parties upon the tariff question, so far as that has been set forth in their national platforms. The first declaration made by the Republican party upon the subject in a national platform was in that of 1860, when it substantially adopted the position formerly held by the Whig party. The declaration then made was reaffirmed in 1872, in 1876 and in 1880. In the latter year the section of the party platform dealing with the tariff read: "We affirm the belief avowed in 1876, that the duties levied for the purpose of revenue should so discriminate as to favor American labor." The record of the Democratic party in favor of free trade is almost unbroken. In 1868, it is true, a somewhat ambiguous statement of principle was made, the party declaring in favor of "a tariff for revenue upon foreign imports, and such equal taxation under the internal revenue laws as will afford incidental protection to domestic manufactures." In 1872, again, the Democratic convention at Baltimore adopted the Liberal Republican platform, which, putting forth no declaration of principle, remitted the discussion of the tariff question to the people in their Congress districts. In 1876, however, the party returned to its traditional position demanding "that all custom-house taxation shall be only for revenue," and in 1880 it declared in favor of "a tariff for revenue only." Notwithstanding this declaration, the party leaders, where possible, deserted this part of their platform during the campaign following.

The great question of commercial policy referred to is as yet far from settled. This must be plain to any one who recalls the agitation of the question during last year. The appointment of a commission to revise the tariff, and the substantial adoption of the report of that body by Congress in its closing hours, were recognitions by the national executive and legislature of the widespread demand for some measure of tariff reform. It was plain from the beginning, however, as we took occasion to point out, that the settlement of the question then reached could not be regarded as in any sense a permanent one. In any view, the task of effecting a just and reasonable settlement of the tariff is attended with grave difficulties. The method adopted by the Tariff Commission rendered that task, as far as they were concerned, an impossibility. They did not proceed upon any principle, but sought by a dexterous adjustment of details to satisfy the claims of many widely differing, oftentimes antagonistic, interests. Such a procedure can never result in any other than a temporary settlement. That such, and such only, would be the outcome of the work of the Commission was evident from the beginning to all who considered the question and its inherent difficulties without prejudice. In fact, the chief interest attaching to the work of the Commission lies in the fact that it has done something toward making plain the obstacles which prevent a permanent adjustment of the tariff in the way attempted by that body.

The political situation in this country to-day then may be summed up as follows: There are two great political parties, with practically no difference of policies, so far as can be learned from their platforms, save upon one issue, which is studiously avoided where possible. That issue concerns a great question of national commercial policy which remains as yet unsettled. This is, we repeat, a wholly unsatisfactory state of affairs, and for very sufficient reasons. We have before pointed out the evil effects which the continuance of such conditions is likely to entail upon our trade development. The insecurity of ventures liable to be wrecked by the caprice of the legislature will naturally operate to check the pulse of enterprise. The element of uncertainty present under existing conditions cannot but affect most detrimentally the commercial interests of the country. So much for the point of view from which intelligent business men must regard the situation. There is an additional political reason of great force upon which sufficient stress has not been laid. It is that a party without a policy swiftly degenerates into a faction; that the conflicts of parties for supremacy, which are ordinarily useful in developing the merits and defects of principles and measures, are, under circumstances such as those which now confront the country, only too speedily degraded into greedy scrambles for the possession of office and power. There is here a great and menacing danger to the republic. For years the country has rung with complaints that the parties are but "organized appetites"; that they have regarded their organizations as ends rather than as means to ends; that, in a word, they have already proceeded far upon the road which must ultimately lead to the serious impairment of our institutions. There is doubtless much exaggeration in these pessimistic views, but it is undeniable that they contain a deal of truth. It is of high importance to withstand the beginnings of evil—assuming that we see but the beginnings—and to pronounce an emphatic dissent from the peculiar public spirit, or rather the lack of public spirit, which marks the attitude of the political parties in this country to-day. An improved civil service, even assuming that to be possible under the conditions we have remarked upon, would preserve to us the shell alone without the vivifying spirit of our institutions. Parties are but lifeless things when divorced from the only reason of their existence, the organized advocacy and enforcement of measures of public policy; and when that principle of life is wanting, they are only stimulants of disorder and disease in the body politic. When that stage is reached, the sooner the offending members are cut off and cast away the better.

THE WASHINGTON STATISTICIANS AND THE PRESS.

The statistician of the Bureau of Agriculture at Washington is engaged as an individual in an unseemly controversy with the *Commercial Bulletin*, a New York newspaper. By a strange process of reasoning the individual is able to divorce himself from the statistician, and in consequence to disclaim responsibility for the acts of his official predecessors. It appears that the newspaper in question, calculating from what it supposed to be the bureau's acreage figures, or 41,000,000, was led to regard the wheat crop of 1882 as about 600,000,000 bushels, more or less. In a late issue the *Bulletin* undertook to show that, starting with the census figures of 1879, an area of 41,000,000 acres for 1882 is reached by adding the yearly percentages of variation in acreage subsequent to the census reported by the bureau. The present statistician reported the acreage of last year as barely 37,000,000 acres. In a late issue the *Bulletin* said: "If the statistician has any regard for his own reputation or for the interest of the public in having correct information on these important matters he is bound to explain the reasons for this glaring discrepancy between his estimates and the data afforded by the census."

This strong statement compelled a letter from the individual disclaiming responsibility for the acts of his predecessor in office. It had been thought that there is no interregnum in government, and that the present statistician is to the public necessarily responsible for the past doings of his department so far as relates to the accuracy of the statistics given out. If errors have been made, and the present statistician undertakes to reply to those who assert as much, it is his bounden duty to acknowledge the errors, while pointing out, if thought desirable, the safeguards erected against recurring error. If it was in bad taste for the *Bulletin* to name in controversy the present chief of the department, it was worse for the statistician to disclaim as an individual responsibility for the past. By way of rejoinder, the *Bulletin* calls up the record of the present statistician in cotton-crop reporting from 1866 to 1876 inclusive, and shows that for nine of these years the returns as to the size of the cotton crop averaged 11.4 per cent. below the actual yield, the underestimate varying from 2.5 to 16.8, and that for one of the years an overestimate of 12.5 per cent. was made.

The simple truth is that a government office is not, and never can be, the best means of reporting the condition and yield of the country's crops, provided always that private enterprise has sufficient prestige to command the situation. Everything is done in a perfunctory manner at a government office. Professional enthusiasm is a necessary prelude to success. Besides, as we have already pointed out, crop reporting is essentially news-getting, and it is the newspaper enterprise which promises to command success. It is to be hoped that the statistician of the Bureau of Agriculture will pursue the even tenor of his way without being in the least disturbed by the doings of the newspapers or other "amateur" crop reporters.

THE GOVERNMENT FISCAL YEAR.

The time has come when it is possible to make a pretty accurate estimate of the condition of the Treasury at the close of the fiscal year 1883, which will end June 30 next. The official statement for the eleven months of the fiscal year, which ended May 31, has been published. To complete the figures for the year it is necessary only to make an estimate of the receipts and expenditures for the month of June. The returns thus far in the month very clearly indicate that the receipts will be considerably less than for the month of June of last year. If, therefore, the actual receipts for June of last year be taken the total will be at least as great as the actual total which will appear in the official statement at the end of the fiscal year. Estimating, therefore, that the receipts for the month of June of this year will be the same as they were in that month last year, the official statement which will be furnished in the early days of July will be substantially as given below. It will be noticed that no account is taken of the postal receipts and expenditures in this statement. The postal authorities have not been able to complete their estimates even for the eleven months. They are not even prepared to make an approximate estimate. The effect of the new law reducing postage, although it does not go into operation until October, is already felt in the postal receipts. Business firms, which have generally made large orders for the "return envelopes," have greatly reduced their orders, so that they will not have a large stock of three-cent envelopes when the two-cent law goes into effect. The most conservative opinion is that the postal surplus this year, if there is any, will be very inconsiderable, while, owing to the changes in the law, a very considerable deficit is certain in the next year.

RECEIPTS FOR FISCAL YEAR 1883.		
Customs, to May 31	$102,932,366.37	
Customs, estimated to June 30	17,106,134.70	$210,038,501.07
Internal revenue, to May 31	$133,710,992.94	
Internal revenue, est'd to June 30	13,113,795.38	146,824,788.32
Miscellaneous, to May 31	$36,728,054.21	
Miscellaneous, est'd to June 30	1,566,858.97	38,294,913.18
Total receipts, actual and estimated		$395,158,202.57
EXPENDITURES.		
Ordinary, to May 31	$129,265,477.70	
Ordinary, estimated to June 30	8,767,990.85	$138,033,468.55
Pensions, to May 31	$65,045,734.47	
Pensions, estimated to June 30	8,000,000.00	73,045,734 47
Interest, to May 31	$56,328,086.90	
Interest, estimated to June 30	3,094,377.58	59,432,464.48
Total expenditures, actual and estimated		$270,511,667.50
Estimated surplus June 30, 1883		$124,646,535.07

It is not necessary to compare this statement with the estimates of the Treasury, as it is not at present official. It is, perhaps, sufficient to say that while it approximates to the estimate made at the beginning of the year, yet the surplus revenue falls very considerably below that estimate, and is less by many millions than the extravagant estimate of $150,000,000 "available surplus," of which so much was heard for a time in Congress.

The United States Treasury has its own way of keeping its books and of computing what it calls "surplus revenue." In previous issues we have called attention to what we characterized as misleading methods of stating this surplus. In making this

statement we suggested that the net available surplus revenue at the end of the fiscal year 1883 would be less than $100,000,000, and that, if the balance-sheet of the government should be made up as the balance-sheet of a private business house would be, the *net* available surplus would be very considerably less than $100,000,000. The results of another fiscal year serve, it would seem, to emphasize the statements made at that time.

In the foregoing statement the *apparent* surplus at the end of the fiscal year is $124,646,535. This is, unquestionably, at least $5,000,000 in excess of what the real figures will be, owing to a certainty of diminished receipts from customs for the present month as compared with the corresponding month last year. But, granting that the receipts will be the same, the apparent surplus, on the basis of the Treasury method of calculating, will approximate $124,646,535. This statement, we maintain, does not accurately represent the condition of the Treasury as it will be July 1, in the form at least in which the exhibit would be made if conducted by a private firm. It probably will be given out that the surplus is about the sum indicated. Yet no account would be taken in such a statement of the sinking fund. Even if a large amount of bonds has been redeemed, the sinking fund provision is a law of the land which must be observed, and the item of the sinking fund the current fiscal year is about $45,000,000. The Treasury will, undoubtedly, admit that from this apparent surplus the amount of the sinking fund required by law to be set apart as a separate fund must be taken. That would reduce this apparent surplus to about $79,000,000.

The Treasury Department, under nearly all secretaries since the war, has agreed with the conservative financial opinion of the country that 40 per cent. shall be the maximum reserve for the redemption of the outstanding legal tender currency. That 40 per cent. reserve has not been maintained with any regularity by the present administration of the Treasury. It must be remembered that the "Reserve Fund" at the commencement of the year was nineteen or twenty millions short of the 40 per cent. requirement. At the date of the last debt statement, June 1, the cash balance was reduced nearly $12,000,000 below the 40 per cent. reserve. Yet that cash balance was subject to draft for a great many unpresented demand liabilities, and could not all be used as a reserve fund for the redemption of greenbacks. Since June 1 it is said that the reserve has been reduced even below that sum; but as official figures on this subject are only furnished at the end of the month it is enough to quote those of June 1. The Treasury authorities certainly should not question the propriety of filling up the cash balance to the 40 per cent. limit. The reserve fund is as much a moral obligation as the sinking fund. The requirement that it should be set aside ought to be a legal one. To restore this fund to the 40 per cent. limit would take $12,000,000 more from the apparent surplus, and would reduce this apparent available surplus to $67,000,000. This is very near to the figure which we predicted last October would be the net surplus revenue.

The Treasury authorities probably would not be willing to make any further reductions from the apparent net surplus beyond the two indicated:

1st. Provision for sinking fund, $45,000,000. 2d. Amount necessary to bring the reserve to the 40 per cent. limit, $12,000,000.

They may not even be willing to concede that the reserve fund should be made good for the inroads made upon it by the purchase of bonds. Conservative financial methods require that it be made good.

It is certainly a fair matter for discussion whether or not, if the condition of the business of the Treasury should be set forth as the affairs of a business house are, the net available surplus should not be even further reduced. And here it will be well to draw the distinction which we have often drawn before. The net available surplus, as it is understood in business, is the balance which remains after making provision for all current liabilities. It is, in short, the net surplus—the dividend fund—after all demand liabilities have been met, or provided for, and any sinking fund satisfied. The Treasury surplus is simply the balance of the cash in the Treasury at any certain period, generally at the end of the month or of the fiscal year. In striking this balance no account is taken of outstanding demand liabilities which may not have been presented, or of continuing appropriations which have been voted and which pass over into another year, which are demand liabilities necessary to be paid from cash in the Treasury whenever presented. Certainly no business house would be satisfied with a balance-sheet which did not take such items, and all of such items, into consideration. There are such items, and a great many of them, aggregating a very large sum, of which no account will be taken in the Treasury statement, and which has not been considered in the statement which is given above. For instance, there are unexpended balances of appropriation which will not be covered into the Treasury, but which are "continuing appropriations," and will be carried to the account of the next fiscal year. The amount of these appropriations, which will be available on July 1 next, and are now payable on demand, cannot be estimated until after the books for the fiscal year shall be closed. The amount, however, is pretty uniform for the successive years. The amount for the pending year, on account of the river and harbor and the Geneva award appropriations, is likely to be somewhat larger than usual. For the fiscal year 1881 the balance of continuing appropriations amounted to $30,656,980; for the fiscal year 1882 the amount of continuing appropriations carried over into this year was $30,822,143, distributed as follows:

Legislative	$75,375.20
Executive proper	.....
Department of State	110,198.71
Treasury Department	7,672,715.25
War Department	6,300,542.95
Navy Department	2,665,817.25
Interior Department	13,685,958.46
Post-Office Department	.....
Department of Agriculture	142,511.60
Department of Justice	24 00
Total	$30,822,143.42

There are two items alone in the appropriations of the current year aggregating about $28,000,000, a very considerable portion of which will run into the next year. They are the Geneva award, nearly $10,000,000, and the river and harbor bill, nearly $18,000,000. There were $4,000,000 of river and harbor appropriations on hand at the beginning of this fiscal year, and, as a comparatively small amount of work has been done, a very large balance will remain. Nevertheless, this, with the others, is a demand liability.

The items which a business house would consider in its balance-sheet, and which are not considered by the Treasury, are as follows:

Apparent Treasury surplus.	*Current demand liabilities not included.*	
$124,646,535	Sinking fund	$45,000,000
	Deficiency in 40 per cent. reserve	12,000,000
	Continuing appropriations	30,000,000

It may be again stated that the figures for the apparent Treasury surplus are too large, as the June receipts will not be as large as were those for June of last year. But if the sinking fund shall be set aside, as the law requires, and the deficiency in the reserve fund made good, as prudence requires, the apparent Treasury surplus will be reduced to $87,646,535. If, in addition, the demand liabilities of $30,000,000, which are a current bill payable, shall be provided for by any reservation in the cash balance, the net available surplus, upon which there would be no demand, would be still further reduced by that amount to $57,646,535. The Treasury never does make any provision for these continuing appropriations. They are regarded as a constant quantity every year. And it is, of course, not expected that they will be presented for payment at one time. Nevertheless, these $30,000,000 are an outstanding demand obligation of the government, and it cannot be properly said that there is an available surplus of a certain sum without taking into consideration the money that has been voted.

We, perhaps, have been able to make it clear from the foregoing statement that we were not wrong last year when we warned Congress not to be misled into extravagant appropriations on account of a supposed $150,000,000 surplus. It would be wise, we think, for the Treasury to adopt a system of stating its accounts so that the public would not be misled into thinking that the "cash balance" is necessarily, or even at any time, the "net available surplus revenue." The cash balance as stated at the Treasury is never likely to be what the net available surplus or dividend fund of a business house is until the government shall go into liquidation and provision shall have been made for all its outstanding liabilities.

DRY GOODS CLASSIFICATION AND RAILWAY RATES.

The present classification of dry goods freights has become a matter of serious concern to eastern manufacturers and shippers. Especially is this the case in regard to all the cheaper grades of cotton goods, as print cloths, sheetings, denims, tickings, warps, etc. Under the present classification the same freight has to be paid on such goods as on silks, satins and velvets. When it is taken into consideration that a case or bale of such goods selling in the market at say 7c. per yard is charged the same freight as a case of fine satins at $3 per yard, the practical point of the present classification is apparent. The risk of damage by fire, water, or contact with oil is the same, while the percentage of loss sustained is widely different. A case of cotton goods might cost less than $100, while the case of satins would be worth about $3,000. They both weigh alike, and consequently pay the same amount of freight, the proportion on the case of cotton goods being about 4 per cent., while on the case of satins it is only one-tenth of one per cent.

Although there have been repeated reductions in dry goods freights since the close of the war, the present percentage of freight paid in the value of the goods is about 200 per cent. more than twenty years ago. This will be seen more clearly from the following example: Taking Chicago as the point of delivery, a bale of cotton goods worth $600 in the war time, and cases worth from $1,000 to $1,200, were charged $2.50 per hundred pounds, being about 1⅛ per cent. on their cost. The present market value for the same manufactures is about $50 for the bales and $100 for cases, while the freight charged is 75 cents per hundred pounds, or 3½ per cent.

Freight is classed under four different heads. Still keeping Chicago as our point of delivery, we find that freight of the first class is charged 75c. per hundred, second class 60c. per hundred, third class 45c. per hundred, and fourth class 35c. per hundred. Correctly speaking, there is a fifth rate for the transportation of large quantities of crude materials. With but few exceptions, all dry goods are classified as first-class freight. The exceptions mentioned are bags, hemp, carpets, cocoa matting and floor oil-cloth, which come under the head of second class, and burlaps are rated as fourth class. This high tariff of freight adds materially to the cost of low-priced goods, in some instances as high as 12½ per cent., and in no case less than 2 per cent. Take, for instance, a bale of wool twine or cotton butts, the present market price for either of which is 6c. per pound. One hundred pounds cost $6; 75c. freight to Chicago makes an addition of 12½ per cent. From this excessively high rate of freights arises a danger to eastern trade; southern manufacturers of cotton goods are competing strongly for western trade, and though their market prices are ⅛@¼c. per yard more, it must be borne in mind that this is "freight paid" to point of delivery, and in many cases it is cheaper to purchase in the south at the advanced rate than to buy in this market with the present heavy freight charges. This is especially the case with low-priced goods.

These matters are of interest to merchants all over the country. Mr. L. G. Woodhouse, of Marshall, Field & Co., Chicago, and Mr. Smith, of George C. Richardson & Co., New York, are active in the movement to obtain reduced freights, and they have the coöperation and support of all the prominent houses. At a meeting, held some two weeks ago, the New York State Railroad Commissioners seemed inclined to consider their arguments, and a further hearing was set down for the 13th inst. at the Chamber of Commerce, from which we hope to hear important results.

THE IRON TRADE.

The condition of the iron industry and its outlook have been rather more freely discussed by prominent members of the trade within the past few days than has been their wont. Two events of significance are responsible for the generous outgivings of private opinion. The first was the sudden and, except at Pittsburgh, altogether unexpected collapse of the threatened strike in the mills at the west, and the second was the further cut in the prices of American pig iron. These were enough. Although it was announced three weeks ago that another reduction in the price of pig was contemplated by the Thomas Iron Company, it had since been intimated that the forty to fifty furnaces out, or now blowing out, along the line of the Reading Railway and in the Lehigh valley would probably render any further lowering of quotations unnecessary. This did not prove

correct, for on Monday a further cut in prices was made of $2 per ton on No. 1 and $1 on No. 2 iron, bringing the prices down to $20 and $19 respectively. The reasons given for this are plain. The market, having so long been a declining one, consumers having been buying in five, ten, twenty-five, and only occasionally in fifty-ton lots, instead of contracting for the season's supply, and expecting a drop in prices from month to month, they have declined to take the iron except for immediate needs. This attitude on the part of buyers, together with the decreased requirements generally, in sympathy with the present condition of most lines of trade and industry, has developed an excess capacity for the production of pig iron. The shutting down of some furnaces did not appear to have the effect desired. The Thomas Company itself closed two of its smaller stacks. It intends, however, to keep the larger improved furnaces at work, but to do this it must sell the product. Finding it would not go off at $22@$20, it is now offered at $20@$19 for Nos. 1 and 2 respectively. And it is not improbable, if the depressing causes continue, that the price will go down still further. Considerations of this nature have caused considerable speculation as to the state of the pig iron industry. The most significant view expressed has been that if leading manufacturers can sell their iron delivered at tidewater at $19 for No. 2 foundry, and at $18 prospectively (if necessary), how insignificant becomes the column after column of editorial discussion in western and southern journals as to whether the new southern pig iron furnaces can make a ton of pig iron at a cost of $16. For it is not claimed that the offers of Pennsylvania iron at $19@$20 are made at a loss. The present situation, then, has brushed away the cobwebs hanging about the much-discussed point whether Pennsylvania foundry irons can be sold at tidewater at $20@$21 at a profit. It also drops overboard much of the sentimentality about the necessity for a high tariff on foreign pig iron. The reason is near at hand and easy to understand. American best grade pig at New York is now underselling corresponding brands of English and Scotch, duty paid on the dock, with a wide margin.

The western Pennsylvania mill owners have come in for a good share of abuse from their brethren in Ohio and elsewhere during the week. The latter, particularly at Youngstown, Ohio, have charged the Pittsburgh people with bad faith. It appears that to the latter was left the entire matter of arranging the new scale of wages to be signed June 1. Word was sent to all members of the Western Association of Iron Mill Owners by the Pittsburgh members that the demands of the men for the old rate of $5.50 would positively not be granted. It was known, or believed, that the men would not back down, from which a strike was confidently expected by iron men at Cincinnati, Youngstown, Milwaukee, Chicago, St. Louis and elsewhere in the west. It is explained that orders for work had been refused and arrangements made by them to shut down promptly on the 1st inst. As will be recalled, at the last moment the Pittsburgh mill owners themselves sent for the representatives of the employés and proposed terms, which were not accepted. They then conceded everything and signed the old scale. The charge comes from the Mahoning valley, Ohio, "that the Pittsburgh manufacturers never intended to refuse the scale, and have been quietly taking all the orders they could get, securing a number which the Youngstown mills refused." This charge is perhaps the now regretted outgiving of disappointment and resentful feeling. So far as we are aware no steps have yet been taken to substantiate the charge. It is easy to perceive, if it were made plain that the allegation was indeed true, that the Western Association of Iron Mill Owners would soon be a thing of the past. But the fact remains that a number of iron mills shut down each summer, a month, or thereabouts, for repairs, alterations, or other and kindred reasons. Those of the western mills who governed themselves on the basis that a strike was to take place will probably utilize the vacation thus rudely thrust upon them in the way referred to. It is reported that the Pittsburgh mills have secured a fair quantity of orders for work, and it is therefore not easy to perceive how this branch of the industry is undergoing any more severe trials than other lines. There has been too much stress laid upon the decline in railway building this year and its alleged effects on the iron trade. The falling away has not thus far been over 25 per cent. On the other hand, the locomotive industry is enjoying a very busy season. Some of the leading works are reported as having orders which will keep them employed well into 1884. The railway car and equipment shops are likewise well supplied with orders. Bridge building, requiring vast quantities of iron and steel, has received a great impetus during the past decade, and now constitutes a special demand upon the manufactured iron and steel trades. In a late number of the Pittsburgh *Commercial Gazette* we find a reply to the allegations made as quoted above respecting the Pittsburgh iron makers. The explanation of the right-about-face action complained of is given as follows: "The iron manufacturers acted in their associated capacity. The conclusion reached was that there should be a reduction, and a reduction was demanded. When they found that it could not be had without a strike the majority decided that the demand should be withdrawn. * * * The condition of the trade, to say nothing of other considerations, justified a demand for cheaper labor, but the chief obstacle in the way was the continued high price of living. * * * There is no ground for charging insincerity on the manufacturers, and they should rather be commended than criticised for the risks they have taken." This amounts to merely a denial. The charge, as noted above, is that Pittsburgh has all along continued to accept orders, which would preclude the possibility of a strike having been seriously entertained there. But the spirit manifested further on in the same article points more distinctly to the future of the iron trade in the United States than anything we have recently seen in print in a recognized organ of eastern manufacturers. The plea was made in a newspaper criticism of Pittsburgh methods, to the Amalgamated Association to hereafter let the west alone and deal with the Pittsburgh manufacturers exclusively. In reply to this the journal named says: "Our manufacturers have reached the conclusion that the time has come when they must look out for themselves, and when the struggle begins which is to end in the 'survival of the fittest,' they will not be found lacking in either pluck or endurance." This is what the friends of a vigorous, independent and self-sustaining iron industry in America have long been wishing for, when each tub shall stand on its own bottom, sell the contents on their merits, and keep constantly in mind that not only is free competition the life of trade, but that the most improved methods and a keen insight into the future are the main factors to be relied upon. Neither Pittsburgh, nor Youngstown, nor Tennessee nor Wisconsin mills will suffer if placed on this basis. And if the Pittsburgh men believe that "the time has come" when "the struggle begins which is to end in the 'survival of the fittest,'" they are very likely to go into the contest better equipped than some of their rivals.

OLEOMARGARINE.

The facts show that the status of poor grades of oleomargarine grows more and more precarious. It is not denied that much trash is still manufactured and put upon the market and consumed by the public. But it is indisputable that the business of manufacturing oleomargarine is being more and more monopolized by a few large firms, who owe their success to the fact that they early discovered that the manufacture of any but the best possible artificial butter meant failure and loss. It could easily be shown, by reference to the name of one of our prominent city manufacturers, that no symptoms are swifter in showing themselves than the symptoms of adulteration in any given lot of the artificial butter that has been packed and sold. The entire lot is often ruined by the lack of keen vigilance on the part of the manufacturer, or by his intentional neglect or carelessness. Such a course soon determines the fate of that manufacturer, for the trade is very cautious about buying oleomargarine; and that part of the trade whose acts are influential will not buy any but the highest grade of the artificial butter. It is only when pure natural butter is high in price that dealers will resort to buying oleomargarine. If the butter market continues steady they increase their stock of the oleo slowly, and find no difficulty in disposing of it, provided it maintains its consistency and tone.

The legislation in this state in reference to oleomargarine has been mainly directed against fraud in its sale. It appears, however, to be impossible to prevent cheating where the retailers of the article are concerned. The law provides for the labeling of both boxes and packages, but the retailers find no difficulty in so exposing oleomargarine for sale that, while complying with the law, he succeeds in deceiving his customers as to the real nature of what they buy for butter. In cases where this evasion of the law is pernicious some remedy should be found. But where the oleomargarine is as sweet and good or even more so than the average dairy butter, and the public eat it with as much satisfaction, no injury is suffered by anyone, and legislators can afford to let well enough alone. As it is, the present statutes are not very effectual. The manufacturer complies with the law by stamping his tierces or boxes with the requisite description. This is all that is demanded of him. He may use what ingredients he pleases in his process, for that right is secured to him in the same law.

The retailer is required to exhibit what he has purchased in receptacles which bear a like denomination to those in which he received the oleomargarine. He has learned to do this without anyone ever knowing that he does it. Again, the law prohibits the use of *any* coloring matter to impart to the artificial product a color resembling that of yellow butter or any shade of the same. This provision is clearly evaded by the manufacturers.

Then, as it is a misdemeanor to sell, or offer for sale, oleomargarine without declaring at the time to the customer its real character, it no doubt happens every day that retailers insult the law and deprive the public of its protection. The real question for present solution is, what can be done to stop the manufacture and sale of inferior oleomargarine? The pure oleomargarine butter will take care of its own claims for consideration and eventually assert them practically. If a system of inspection of manufactories could be established whereby the use of rancid and low grades of butter in connection with other components no less objectionable in the production of a so-called oleomargarine butter should be absolutely prevented, we think the artificial butter might be swiftly recognized as a valuable and desirable food.

RUSSIAN PETROLEUM AGAIN.

The American petroleum trade will be interested to learn that Baku, on the west shore of the Caspian sea, has finally obtained a direct connection with Moscow by rail. A correspondent of the London *Daily News*, writing from "Baku on the Caspian," May 5, sends that journal a lengthy account of the initial journey over the Caspian Railway from Tiflis, the capital of Trans-Caucasia (360 miles), to Baku. The latter city had previously shipped its refined oil north on the Caspian sea in tank-boats, as it still does. These ascend the Volga and connect by rail lines to various parts of the empire. Last fall a line of rail from Poti, on the east shore of the Black sea, was completed across the Caucasian isthmus to Baku, by which considerable oil has gone west to Poti, and thence by vessel to Hungary, Turkey, or through the Dardanelles to Italy. As pointed out by a correspondent of BRADSTREET'S some months ago, this Russian oil is being more largely used, not only in Russia, but in Germany, Austria and Turkey than formerly. The fact, as alleged, that it is inferior when refined to American in the proportion of about 3 to 5, can hardly be expected to exert a great influence against it in its own markets, considering its cheapness and the less fastidious requirements of the mass of the population there. Recent consular reports received at Washington have already told of the new use for Russian petroleum—that of adulterating American oils, which are then sold in Russia, Germany and elsewhere as pure American. It is easy to perceive why our petroleum exporters do not see anything threatening in the immediate future of the Russian (or Hungarian) petroleum-producing regions, and it is unquestionably to be explained by the fact that the foreign demand, as a whole, has continued to grow, despite reports of increased foreign production and shipments, and in view of the additional fact that our exports to Russia, while not large, have actually been increasing. They were in the fiscal years ended June 30:

	1882	1881	1880
Refined Oil.....gals.	2,862,665	1,329,083	1,654,730
Naphtha..... "	49,850	78,757	54,587
Totals..... "	2,912,515	1,407,840	1,709,317

But these figures, while they suggest the continued growth of this export trade to Russia, are likely to be deluding in that no account is made of the relatively greater growth in the use of petroleum in that portion of the globe than our increased exports explain. The correspondent of the English journal named says that he found the petroleum regions at or near Baku very prolific. The soil actually oozes with the greasy product, is putty-like to the touch, and little rills of the stuff are seeking the lowest levels in all directions. The surface of the country is spiked with chimney-like towers (instead of derricks), up which flows the oil, whence it runs through pipes (as with us) to reservoirs near the refineries a short distance away on the shore of the Caspian. On the question of the productivity of these "mines," as the correspondent prefers to call them, he says that some of them "can produce enough oil to light the whole of Asia, and that the Russians are doing their utmost to beat the Americans in the markets of the Old World. But even the Rusians do not always hit the mark, or only

succeed in doing so by a happy chance or after long and patient trial." With a sense of thrift it is added that "a nice little contract" awaits some ironmaster in England, or Belgium, as the principal oilmaster in Oleopolis is asking the Russian government for permission—which no doubt he will obtain—to lay down lines of pipes all the way from Baku on the Caspian to Batoum on the Black sea, a distance of some 460 miles. This completed, and a heretofore expensive freight tariff will be in part removed, which will renew the interest in Austria and Germany in Russian petroleum as against that from Hungary and elsewhere. The total yield of petroleum at "Oleopolis," near Baku, however, is given at about 20,000,000 poods, which will hardly warrant the statement as to the capacity of some of the wells there for "lighting all Asia." At the outside the 20,000,000 poods equal but two months' production in the Pennsylvania regions.

OCCASIONAL NOTES.

The recent report of the New Hampshire insurance commissioner enforces the conviction already pretty general among judicious observers that the facilities for the insurance of property and the readiness with which the amount of the insurance is realized have been fruitful in temptations to the employment of reckless and dangerous methods in building as well as to frauds of other kinds. The commissioner must have had a discouraging experience within his jurisdiction when he uses language like the following: "If a property is unproductive, unsalable, unfavorably located, mortgaged or otherwise afflicted, the embarrassed owner, with a conveniently weak, moral fiber, may leave things lying around loose, or, if the case is desperate, apply the ever-ready match and thus bring quick relief." Abuses like those referred to are such as almost invariably accompany the introduction of economic methods, and are only to be avoided by a strict scrutiny into the circumstances of every case, and by the rigid enforcement of the criminal law where the circumstances justify its application.

Evils of a nature not very dissimilar have been and doubtless will be for some time to come connected with the modern credit system which has so powerfully assisted the operations of commerce, and those who have devoted most consideration to the bringing about a remedy have expressed themselves in favor of the employment of means such as we have suggested above. At all events those are the only means likely to be effective until the "data of ethics" commend themselves to the intelligence of men in general with much more force than they seem to do at present. In connection with what has gone before one inference from the facts given in the report will be of interest. It seems that there is a practical (or, perhaps, judging from one standpoint, a patriotic) discrimination against foreign corporations engaged in the fire insurance business in New Hampshire. Thus we learn that the losses and expenses of the town and state mutual companies were comparatively trifling, while the outside companies doing business in the state have had to suffer. It may be that this result has been largely due to the inability of companies not on the ground to apply a sufficiently searching scrutiny and to enforce the legal sanctions against fraudulent practices such as have been referred to.

The conviction is gradually gaining ground that the prison system of the country as a whole is not everything that could be wished. Some judicious students of penology like Mr. Vaux, of Philadelphia, have done good service in pointing out the defects of the system generally in vogue, and in making clear the lines upon which a true and intelligent reform should proceed. They have been practically at one, however, in pronouncing the system at present followed as a failure. A similar conclusion has been reached by Mr. W. M. F. Round, the secretary of the Prison Association of New York, who, in a recent lecture, declared that the prison system of the country must be regarded as a gigantic failure. In support of his position he gave some figures which have a grave significance. He said for instance that during the last ten years the criminal classes had increased three times as fast as the population, and that thirty-three hardened criminals are turned out of the prisons every day in the year. One in fifty of the inhabitants of New York state and one in eighteen in New York city are, he said, habitual criminals. These are startling facts which need no comment. It will be well for the country if expositions such as this shall have the effect of inducing the legislators of the country and the public in general to take thought for the preservation of society from its enemies. As Mr. Round suggested, it is impracticable to kill these enemies; they must be reformed. Hence the need of a change in the administrations of our prisons, which as at present conducted are anything but reformatory institutions.

At the meeting of the Free Trade Conference in Detroit a report was adopted recommending among other things that the free trade work of the country be organized under the general direction of the American Free Trade League, and that a general secretary be appointed with headquarters in the city of New York. Mr. David A. Wells was elected president, Mr. R. R. Bowker, of New York, secretary, and Mr. H. J. Philpot, of Iowa, western secretary. Mr. Philpot reported a rapid growth of free trade sentiment among the farmers of his state. Other western men made similar reports. The address of the conference declares that revenue reform has become a prominent vital issue in national politics. It further sets forth the desire of the conference to obtain to the greatest practicable extent the same freedom of trade which exists among the states of the Union. The abuses of the present tariff are declared to be the chief obstruction to the continued development and prosperity of the country and the most serious hindrance to American industrial progress. It is further asserted that "protection does not protect the classes it claims to protect; that to protect the few at the expense of the many is inconsistent with the principles of republican government," and that "the revised tariff of 1883, raising some duties and by an intentionally confused classification maintaining others it pretends to reduce, is only the device of alarmed protectionists to avert honest revenue reform."

Coming to the question of the protection to American labor asserted to be secured by the tariff, the address declares that the higher wages which generally prevail in America are due to superior advantages which would be increased by the removal of tariff restrictions. While there is absolute free trade in labor and the manufacturers can import the cheap labor of Europe, the laborer is denied the right to buy goods in the cheapest market. American labor, it is said, even in protected industries, is discovering that it gets no higher wages by protection. Labor is paid less in protected European countries than in free trade England, and in highly-protected cotton manufactures the wages paid here, says the address, are actually less than the wages paid in England. The present policy is roundly denounced for the reason that it compels the farmers to buy in a protected market and to sell in an unprotected one; that it restricts the farmers' market by shutting out those who would exchange with him; that it burdens the manufacturer by adding to the cost of his materials without increasing the amount of his sales, and that it taxes the poor man far more heavily than the rich man. The protective tariff is attacked upon constitutional grounds as being a tax not for public purposes. The repeal of the navigation laws is also demanded. The conference does not favor the immediate formation of a new party, but in case existing parties in their utterances, or their candidates, or in designating their leaders in Congress, persistently oppose or evade reform, then revenue reformers are advised to prepare for independent political action.

Not every lover of the oyster, it may be safely assumed, has realized that in swallowing one of those delicious morsels he was appropriating a piece of mechanism vastly more delicate and complicated than the best repeater watch turned out of our modern manufactories. That such is the fact, however, we have the authority of Prof. Huxley, who, in a recent address before the Royal Institution of Great Britain, discussed "Oysters and the Oyster Question" with his accustomed felicity of illustration. Remarking upon the enormous fertility of the oyster he declared that it was within rather than outside of the mark to say that the adult contained 1,000,000 of progeny. The animal attains its adult age in the third or fourth year, and it has been conjectured that some specimens endowed with extreme vitality reach the age of twenty or twenty-five years. Oysters do not thrive well, it appears, except in water where there is 3 per cent. or more of salt. They are extremely sensitive to cold and heat, and for this reason shallow water secures to them only a precarious existence. The oyster also suffers considerably from competition, and in localities where the population is dense it rapidly deteriorates.

Passing to a consideration of the commercial aspects of the oyster question, the lecturer said that for the last thirty years oysters had been getting dearer and perhaps scarcer. Three causes had been assigned to account for this: First, the increased facility of transport, which had greatly raised the price of fish of all kinds; second, the existence during the last twenty years of unfavorable meteorological conditions, which had occasioned the destruction of enormous quanties of larvæ; and, third, over-dredging. In regard to the first cause he said that the state could not, in these days, pass sumptuary laws which, to be effective, would require to be applied to foreign countries as well. Neither could the seasons be regulated so that the second evil could not well be overcome. In regard to over-dredging, the chief remedy proposed was a close time when oysters were breeding. This would be ineffective, he thought, unless there were also a means of securing that in the open season no more than a certain proportion of oysters should be taken. He thought that the mass of oyster legislation should be abolished, and that in place of it all that should be done was to afford facilities to those who would undertake to cultivate suitable parts of the seashore as oyster fisheries. Regulations, he believed, were, after all, of the smallest possible consequence. What should be done was rather to trust to providing an abundance of young and to keeping off their enemies as far as could be done. Even when regulations were carried as far they well could be, the results, he thought, were uncertain in the last degree.

A somewhat amusing incident is reported from the city of Newburg, in the State of New York, which is of interest as illustrating the thrifty nature of much of the public virtue abroad to-day. The Common Council of the city, probably with the view of rebuking a niggardly and unappreciative constituency, unanimously resolved, a few days ago, to draw from the city treasury $3,200 for their services during the current municipal year. There being eight aldermen, each would receive only the modest sum of $400. The resolution called for quarterly payment, and made $100 payable at once. Notwithstanding the moderation of the aldermen (a thing certainly to be marveled at), a great deal of indignation was aroused, the grounds of which appear to have been that the action referred to was taken without consulting the mayor, and without any notice to the people of the city, and that no previous common council had ever received any pay. The result was that after meeting, in response to a summons from the mayor, and after listening to a vigorous denunciation of their action by that official, the city fathers recalled their previous action and directed the obnoxious resolutions to be expunged. Such was the lame and impotent conclusion of a movement which at least had the merit of boldness in its inception, and which, as a precedent, might have proven a boon to neglected public servants throughout the country.

The Louisville *Courier-Journal* gives space in its columns to a letter from Judge Russell Houston, the chief attorney for the Louisville & Nashville Railroad Company, in which the recent decision of the United States Supreme Court, in the Illinois railroad case, is discussed, and its bearings on the charter of the Louisville & Nashville Railroad Company are considered. This letter develops some points of general interest. The writer takes the view that the recent Supreme Court decision does not cover cases where the legislature of a state has fixed a maximum rate of charges in the charter creating a company. Fixing such a maximum has the effect in his opinion of making a contract in the charter such as will be sufficient to restrain the state from afterward limiting the amount of charges for fares and freights. He bases his opinion largely upon the decision of the Supreme Court in Chicago vs. Iowa, 94 U. S., 155, in which case the court used the following language: It was within the power of the company to call upon the legislature to fix permanently this limit [of charges for fares and freight] and make it a part of the charter, and if it was refused, to abstain from building the road and establishing the contemplated business. If that had been done the charter might have presented a contract against future legislative interference. These suggestions of the Supreme Court have been followed to the letter by the Louisville & Nashville Railroad Company and by the railroad companies of Tennessee, and the legislatures of those states having fixed the limits of charges in the charters, Judge Houston conceives that contracts have been established in each case which cannot be altered without the consent of the companies. The point is a nice one, and it will be interesting to see how it will be finally settled.

Recent vital statistics from France indicate increasing sterility in that country. The census of December, 1881, showed a total population of 36,905,788, an increase over the census of 1876 of 766,260. The gross increase was 945,643, and the decrease (in thirty-four departments) was 179,383, thus leaving a net increase as given above. Of this augmentation five-sevenths was in large towns, for 561,869 of the gain was reported from cities of over 30,000 inhabitants. This indicates that the great centers of population still attract the rural inhabitants. The increase of the population of France in fifty years, as shown by the difference between the census returns of 1831 and 1881 (32,569,223 and 37,672,048 respectively), was 5,102,825. The gain in the population of the United Kingdom in the same fifty years, exclusive of emigration, was 10,854,148, and it was estimated that 2,453,481 persons left Ireland between 1851 and 1877. The emigration from France, of course, has been comparatively insignificant. But notwithstanding the heavy emigration from the United Kingdom and Ireland, the latter have witnessed an actual growth of 18,000,000 population, as against the 5,000,000 in France. Taking the five years ending 1880, the population of England increased at the rate of 340,118, against 95,039 per annum in France. This contrast is the more conspicuous when shown in connection with the yearly increases in various countries of late years: France (average for fifty years) 95,039; Germany (for five years) 493,360, and United States (for ten years) 1,155,446. The yearly gain in population per 10,000 of inhabitants has been: France 26; Great Britain 101; Germany 115, and United States 260.

SPECIAL CORRESPONDENCE.

BUSINESS OF THE CANALS.

Buffalo, June 1.—The first weeks of canal navigation this year have afforded much encouragement to the friends of free canals. All the boatmen have found cargoes at remunerative rates, and the movement of freight, most especially of grain, by canal has been large. The canals were officially opened May 7. The number of canal boats clearing from Buffalo up to date was 861. Last year canal navigation opened April 11, yet the number of boats clearing up to this date in 1882 was but 1,251. That is to say, 861 boats have cleared in a little more than three weeks of 1883, against 1,251 boats in more than six weeks of 1882. In 1882 grain paid a toll beside freight of 1c. per bushel. This year all tolls are abolished by constitutional amendment. Has the abolition of tolls made all the difference in the amount of business done? Many ardent friends of the canals say it has. They do not care to go back of the figures above given. But more thoughtful people readily see that there are some very good reasons beside the abolition of tolls to increase the canal business this spring over that of a year ago. In the first place there was much more grain to go forward at the opening of navigation this year than last year. The quantity of grain in store in Buffalo was not larger this spring than last, but the amount brought forward by lake was considerably larger. During the May just passed the amount of grain, including flour, received here by lake was 10,988,852 bushels. In May last year the amount was 7,253,458, and in May, 1881, it was 7,858,434 bushels. Indeed, the receipts by lake of May, 1883, were the largest of any May on record, with the single exception of 1880, when they amounted to 11,855,978 bushels. With so large an amount of grain to go forward the canal was sure to get an unusually large amount of carrying business. But it is worthy of notice that the canal did an even more active business in May, 1880, than for May of this year.

Considerable importance is also attached to the fact that the railroads last year were in active competition with each other. Rates were reduced very low, and considerable business was taken from the canals by carrying at a rate that did not pay for transportation. This year the roads are in better agreement and maintain a living rate. Nevertheless the statistics show that the railroads as well as the canals have carried more grain this year than last. The whole number of bushels of grain sent forward by rail from Buffalo in May, 1883, was 2,124,304, and in May, 1882, it was but 1,121,541.

It thus very clearly appears that the great factor to be taken into consideration in determining the amount of canal transportation for a given year is the amount of grain to be shipped. The canals get a part and the railroads a part, almost without regard to rates and tolls. That the removal of 1c. per bushel of toll is not the only circumstance that has increased the canal business this year is further shown by the fact that canal freights have been nearly or quite as high this year as last, notwithstanding the removal of tolls. The canal freight on a bushel of wheat from Buffalo to New York now varies from 4½c. to 5c. The boatman has to pay no toll out of this. Last year wheat was carried for 4½c., when 1c. toll had to be paid. The difference

goes into the boatman's pocket. But that is a very good place for it to go, for with rates only netting 3½c. per bushel above tolls no new boats would be built, and canal transportation would soon become a thing of the past. Rather than have his boat lie idle and support his family and feed his team while earning nothing at all, the boatman will take cargoes at 3½c.; but no one would embark in the business at that rate, and those in it would go out as soon as possible.

No one should, however, make the mistake of supposing that the abolition of tolls has had no effect on the increase of canal business. It is an important factor; just how important it will not be easy to determine. But it will be readily understood that without tolls abolished or greatly reduced the carrying trade must have continually drifted away from the canal. Large as is the amount of grain the railroads carry now, they are doing everything to increase it. Instead of two roads carrying freight from Buffalo to New York, we now have five, and shall soon have six. The New York Central & Hudson River and the New York, Lake Erie & Western are the old roads. Their capacity is larger than ever before. The new roads are the Lehigh Valley, the Buffalo, New York & Philadelphia, and the New York, Lackawanna & Western. All these are competitors for the grain-carrying trade, and several of them have grain elevators of their own here and control lake vessels. The New York, West Shore & Buffalo Railway will be open in a few months, and will also compete for this traffic. It is believed that by January next the number of trains leaving Buffalo daily will be about one hundred.

It seems clear, therefore, that the abolition of tolls was necessary to keep the canal in use. Its value as a check on high rates resulting from possible railroad combination is too well understood to require argument. No one interested in maintaining the commercial supremacy of the state would be willing to see the canal fall into disuse. The people have seen its value when they have insisted on reducing the tolls from 6c. per bushel to nothing within a comparatively few years. They are now willing to maintain the canal by taxation as a safeguard and protection against railroad monopoly. It may yet appear necessary to increase its capacity and the facilities for doing business upon it. But it will hardly be disputed that, in view of the circumstances, the abolition of tolls was the right thing to do, and it has had the effect of encouraging the boatmen and increasing canal traffic. That is sufficient for the present. The future will develop its own necessities.

TRADE POSITION OF PHILADELPHIA.

Philadelphia, May 28.—It is a matter of painful consciousness to Philadelphia business men of liberal spirit and progressive ideas that the trade of the port is not commensurate with its opportunities and natural advantages. Its eminence as a manufacturing center and its commodious harbor and nearness to the ocean make its deficiencies as a distributing and export market more conspicuous than if, like Baltimore, it was less liberally endowed with these important adjuncts of a thriving business center. The Quaker City has grown wonderfully of late years, particularly since it became world-famous as the locale of the great Centennial Exhibition of 1876. Its population has largely increased, its industrial establishments have grown in number and capacity, and its outlying territory has been built up and improved in every direction. But, despite these evidences of prosperity that abound on every side, it has lost ground in many respects as a commercial center. This fact is recognized and admitted by all who are in a position to know the truth. The thousands of cotton and woolen looms and spindles that in more prosperous seasons give employment to a vast number of workingmen and women and extend the reputation of its manufactures to the remotest bounds of the Union add comparatively little to its greatness as a distributing market. The great bulk of the product of the local and near-by textile mills is sold by commission houses in New York city. So general has become the practice of manufacturers to make New York the shop-window, so to speak, for the display of their wares that the majority of the local commission firms have been obliged to go there and establish branch houses or offices, in order to retain this portion of their consignments. As it is possible, therefore, for interior jobbers to make all their purchases, even of Philadelphia-made goods, in New York, the number of southern and western package-buyers visiting this market is now comparatively small and is steadily decreasing. It is complained also, and not without reason, that the patronage of local jobbers is sometimes more freely extended to New York commission houses than to those of Philadelphia. This tendency of the commission trade in manufactured goods to gravitate toward New York is noticeable also in other lines of trade. Philadelphia has gained ground as a market for wool and some other descriptions of manufacturing supply because of her convenience to the mills; and her general jobbing trade, as distinguished from the larger wholesale business between manufacturers or producers and distributors, has grown steadily in recent years. Her facilities for doing business with the tributary towns and villages of Pennsylvania and the near states have been sufficient to cause a general enlargement of this class of trade proportioned to the natural growth of the city and dependent markets. The cheapness of rents and the difference thus made in the various items of expense connected with the jobbing trade have given the city a considerable advantage in the handling of this business. But any wide extension of the range of the jobbing trade has been prevented by the same causes that have operated against Philadelphia merchants in reaching out after the larger wholesale trade and the development of the export and import trade. Just what these causes are is a matter about which there is wide diversity of opinion. By some the slow progress made is largely attributed to the conservative spirit that seems to govern all the commercial comings and goings of the descendents of the city's Quaker founder. There are certainly numerous evidences of this lack of vim and energy in the recent history of the trade of the past. It is no longer a matter of dispute that the vast business of refining, storing and exporting petroleum, which is preëminently a Pennsylvania product, with a natural affinity to Philadelphia as a commercial center, has been allowed to fall into the hands of New York merchants by reason of unwise legislation and public indifference, for which the business men of Philadelphia are primarily responsible. The following figures, showing the export movement for four years past from the two ports, attest the comparative insignificance of the amount handled at this port:

	New York, gallons.	*Philadelphia, gallons.*
1879	293,992,095	92,243,108
1880	264,067,119	54,673,946
1881	367,890,039	110,240,610
1882	387,332,070	85,568,134

During the same time the receipts of wheat and corn at this port have declined from 40,000,000 bushels (in 1879) to 10,500,000 bushels (in 1882), and the export movement has fallen off over 80 per cent., a decrease that is also measurably attributable to lack of enterprise on the part of the trade. But back of this apparent indifference of the trading community lies another, and probably the true, reason for the gradual shifting of the current of trade in certain branches to New York city, and the discouragement of fresh endeavor and new blood and brains and capital from the effort to redeem and enlarge it. This is the lack of railway competition. Without disparagement of the great corporation that has been for so many years the main dependence of the receiving and distributing trade of Philadelphia, it may be safely asserted that the advent of three or four competing lines having through connections with the great west would soon mark a new departure in the history of the trade of the port. The growth of Baltimore trade, under the stimulus given to it by the competition of the Pennsylvania and Baltimore & Ohio Railroad companies, is a conspicuous example of the truth of this proposition. The growth of that port is the more remarkable, inasmuch as it lacked the immense aggregation of manufacturing industries possessed by Philadelphia. The business of New York has been largely built up and retained by the active efforts of the railway companies centering there to advance their own interests by inviting and developing the trade of the port. Their rivalries have given her a large share of the opportunities by which her merchants have been enabled to divert trade from this city. There are indications that this important factor of railroad competition will not long be lacking for the broader development of the trade of the Quaker City, and the commercial public are interested observers of the movement now in progress to this end. The consolidation of the Reading and New York Central interests in the connection of the Jersey Shore & Pine Creek and the new South Pennsylvania Railroad, as well as the combination of the New Jersey Central and Reading interests with the Baltimore & Ohio Railroad (by which the latter will secure a Philadelphia terminal) cannot fail to impart a vast stimulus to the trade of the city.

Another drawback to the development of the grain and general export trade has been the slowness of merchants to recognize the tendency to transition in ocean transportation from sailing vessels to general cargo or line steamers. All the other Atlantic ports are better equipped for export business through competing steamer lines already established. New York has thirty-seven lines regularly plying between her docks and foreign ports; Boston has eight lines, Baltimore four, and Philadelphia only two, one of which is a weekly line to Liverpool and the other a monthly line to Antwerp. At other ports also the facilities for loading transient steamers are greater. At Philadelphia an exclusive policy debars the occasional general cargo steamer, seeking a cargo, from the docks of the regular lines.

RECENT LEGAL DECISIONS.

[*Prepared expressly for* BRADSTREET'S.]

In the case of Woodruff vs. Saul, decided May 1, the Supreme Court of Georgia laid down the rule that when a debtor agrees with his creditors that he will pay them a certain per cent. of his liabilities in consideration that they are to discharge him from his debts, if he privately agree to give a better or further security or to pay to one more than to the others, the contract with the other creditors is void.

A local liquor law required the sum of $1,000 to be paid for license to retail in a county in Georgia. The ordinary of the county granted a license receiving therefor $500 in cash and a note for $500. Suit being brought by the county upon the note the maker and indorsers set up the plea that the ordinary had no authority to take the note, and that the consideration for the same was illegal. The Supreme Court of Georgia held that the consideration was not illegal, and that while the ordinary should have required the payment of the whole sum in cash, it being his duty to do so, yet the party applying for the license had obtained and enjoyed the same and could not avoid the payment of his note on the ground urged by him. County of Appling vs. McWilliams, decided April 24.

Where a man knowing himself to be insolvent conceals his insolvency from the vendor of goods, and buys property not intending to pay for it, he perpetrates a fraud which will entitle the seller to reclaim the property, according to the opinion of the Supreme Court of Indiana in the case of Brown vs. Goodyear (decided May 28), in which the court followed recent approved precedents.

Where a policy of insurance requires that the insured shall truly state all incumbrances existing on the property at the time of the insurance, and also contains a condition that concealment or misrepresentation shall make such insurance void, a failure to disclose all the incumbrances on the property is such a concealment as invalidates the policy. Indiana Insurance Company vs. Brehon, decided by the Supreme Court of Indiana on May 29.

A mortgage of goods executed by a partnership must be recorded in the counties where the parties reside, according to the decision by the Supreme Court of Indiana in the case of Granger vs. Adams, on the 28th ult. The particular ruling of the court in the case referred to was to the effect that a mortgage on partnership personal property, executed by one partner in behalf of the firm, recorded in the county where the property was situated and the business of the partnership was conducted, and where the partner executing it resided, but not recorded in the county where the other members of the firm resided, was not valid as against creditors.

Where goods are sold "on memorandum"—that is, "sale or return,"—the title passes to the party to whom they are delivered, subject to a defeasance by the exercise of an option to return the goods. Such was the ruling made by the St. Louis Court of Appeals in the case of Ammidown vs. Powell on the 29th ult. Until the option (to return) is exercised the goods are at the risk of the vendee, and if an accident happens which renders a return of the goods impossible the vendee becomes absolutely liable at the price agreed to.

The same court, in the case of Gugarty vs. Veiths, reaffirmed the principle (which one would have thought sufficiently well established) that material alterations in a contract discharge the surety if made without his consent.

The following description in a chattel mortgage, viz., "One hundred and twenty-five acres of wheat, more or less, growing on the south half" of a specified government section, was recently held by the Supreme Court of Minnesota to be sufficiently definite, and to be in substance the same as "the wheat (be the same more or less) growing on the south half." Manor vs. Sheehan et al., decided May 25. The court added that where a chattel mortgage is executed in good faith and for a valuable consideration, and not for the purpose of defrauding any creditor of the mortgageor, its validity is not affected by the fact that its condition misrepresents the obligation or liability in fact secured and intended to be secured by it, and the real consideration of the mortgage may be shown to repel an attack of the mortgagee's creditors.

The rule excluding oral testimony to vary a written contract does not apply to a collateral obligation that involves no departure from, but supplements, the writing where the writing on its face does not contain the entire agreement. This principle was applied in the case of Lubke et al. vs. Methudy et al., decided by the St. Louis Court of Appeals on the 29th ult. In this case it appeared that the plaintiffs agreed to purchase 520 walnut logs for $2,750, and defendants agreed in writing that that number of logs were at a certain place and that defendants had good title. The writing omitted all mention of the quantity of lumber in the logs or their size. The court took the view that a writing which was silent upon the points referred did not contain the entire contract, and it admitted testimony to show that the purchaser bought solely on the faith of oral representations of the seller at the time as to the measurements of the logs, and that they contained not less than a certain number of feet. It was further held that, on proof of such representations, the plaintiffs suing for breach of contract might recover, notwithstanding that the representations were not embodied in the written contract.

The question of the right of a state and of a municipality respectively to tax a bridge within the territorial limits of both was raised in the case of The Louisville Bridge Company vs. The City of Louisville, decided by the Kentucky Court of Appeals on the 26th ult. The court held that the taxing power of the state may be exercised upon all property within its territorial limits which receives the protection of its laws, unless the tax amounts to a regulation of commerce in some way, either by obstructing or otherwise diminishing the free navigation of the waterways over which the commerce of the country is carried, or by discriminating in favor of local and against foreign or ultra-state subjects of commerce. The fact that property may be employed in a commercial venture or for commercial purposes does not sanction its exemption from the common burdens of taxation borne by other property used in other pursuits of life. The right of way of the Louisville Bridge Company over the Ohio river and the bridge over it were held to be proper subjects of state taxation, being within the territorial limits of the state of Kentucky and receiving the equal protection of its laws. Although the bridge was a public way over which commerce was carried, the court said it constituted no branch or part of the general government and was not used by it to regulate commerce. Upon that part of the question respecting the right of the municipality to tax a different answer was given, the court holding that the bridge was not properly subject to municipal taxation, although within the corporate limits of the city. The court said that it received no protection from the municipal government, and could never become a part of the city so as to be near to, occupied, or surrounded by its population residing on lots adjoining it. In addition the court remarked that the mere fact that the bridge never would have been built but for the proximity of the city, and that it was profitable by reason of the patronage of the city, could not authorize its taxation.

The thirteenth article of the constitution of Indiana provides that no political corporation in the state should ever become indebted in any manner or for any purpose to an amount in the aggregate exceeding two per centum on the value of the taxable property within such corporation, to be ascertained by the last assessment for state and county taxes previous to the incurring of such indebtedness, and all bonds or obligations in excess of such amount given by such corporation shall be void. In reliance upon this constitutional provision an action was brought to restrain the city of New Albany from issuing an order for the payment of an indebtedness contracted for the erection of fire-alarm signals, on the ground that the city's indebtedness already exceeded the constitutional limit, and the issuance of the order would be in violation of the provision referred to above. The Supreme Court of the state in the case of Sackett vs. The

city of New Albany, decided on May 28, held that all indebtedness voluntarily created by a city within the state for any purpose in excess of the maximum provided in the constitution (viz., two per centum on the taxable property within the limits of the city) fell within the inhibition of that instrument. In the word "indebtedness" might be included any agreement by the city to pay money where no suitable provision had been made for the discharge of the obligation imposed by the agreement. The court said that it was obviously the intention of the legislature in submitting and of the people in adopting the constitutional provision mentioned, to arbitrarily restrict the power of municipal corporations to contract debts to a limited percentum of their taxable property, and to require where that limit of indebtedness had been reached that such corporations should be compelled to pay for whatever of value they might obtain without the incurrence of any further indebtedness whatever. The inhibition, it was held, extended and was applicable to debts contracted on account of the current and ordinary expenses of the municipal corporation. An application for a restraining order, it was added, was the proper remedy in such a case.

In the United States Circuit Court at St. Louis, on the 4th inst., Judge Treat handed down decisions in two series of cases which practically settle the barbed-wire controversy, concerning which such a widespread interest has been excited in the west. The suits were brought by the Washburn & Moen Manufacturing Company and Isaac L. Ellwood against Henry Fuchs and others. The first series of cases involved the validity of the patents on the invention; the second the validity of the patents on machinery for making the wire. The earliest barbed-wire patent was issued in 1867, since which time a great number of issues and reissues have been had. Most of those have been acquired by the Washburn & Moen Manufacturing Company, and Ellwood, the plaintiffs in the cases just decided. Injunctions were sought against the defendants on the ground that they had infringed the patents held by plaintiffs. These injunctions were refused by the court, who held the reissued Kelly and Glidden patents void on the ground that a reissue cannot be upheld under an original patent where devices not suggested in the original are imported into the reissue, making thereby a combination distinct from the original. The second series of cases, involving the validity of the patents on machinery, were also decided against the company. The effect of the decisions is to release all restrictions on the manufacture of barbed wire, and to save to the farmers what has hitherto been paid in royalty.

BUSINESS NOTES.

The May report of the Silk Association of America, giving values of importations of silk at New York, shows that the total for May last, $1,681,988, was less than in any like month since 1879, in which year it was $1,352,389. Silk piece-goods continue to represent one-half the receipts. Silk and cotton fabrics amount to about one-fifth of the whole.

The Manchester (England) *Guardian* has news that the Sultan of Morocco has interfered with a Mr. Curtis, agent of the Sûs and North African (English) Trading Company. The interference appears to have grown ont of the intimate relations of the Sultan with Spain, which government is exhibiting considerable jealousy of English commercial advancement in northwest Africa.

That useful periodical *Bullion*, lately "a monthly review of transport, trade and money," has become a quarterly. It still reviews transportation, trade and money, but includes as well a manual of American railways and allied interests, telegraph and shipping, and thus fills an important niche in American journalism. A number of competent judges who have examined it have spoken of it in high terms.

A coöperative congress has been held at Edinburgh, Scotland. The results of the past year in the United Kingdom have been only partially satisfactory. It claims to have been successful to a certain degree, in overcoming the retail credit evil, and in pushing to the wall a number of ill-judged ventures, which were certain in time to succumb, and for these acts is congratulated by certain of the London newspapers. Coöperative production, however, "the crown of the whole movement," is about where it was forty years ago in the United Kingdom, and the reason therefor does not appear to have been pointed out. Coöperative farming does not seem to have been successfully attempted either, although but two instances of trial are noted, both failures. "Two swallows do not make a summer," any more than one, and the congress therefore found room to argue that these unfortunate attempts do not show the impracticability of the project. The peculiar land laws of Great Britain were alleged to have, and probably did exercise, an influence against success.

A recently published tea chart in London shows that the increase in the consumption of India tea during the past six years has been very rapid. In England the growth is shown in quantities consumed quarterly. In the first three months of 1878 it was 3,215,000 pounds, and in the first quarter of 1883, 5,152,000 pounds. The price has also declined from 1s. 7d. to 1s. 1d. The ability of India to supply tea and its favorable reception in England, as indicated by the above, causes satisfaction.

The few tin-plate manufacturers in the United States appear to be determined in their efforts to be protected sufficiently to enable them to get a larger share of the enormous trade enjoyed here by the English manufacturers. To this end the American Tin-Plate Association was organized in Pittsburgh June 4. As expressed by the association itself, its object is "to introduce, foster and develop the tin-plate industry, and to endeavor to have such laws passed as will afford adequate protection to the trade."

A recent cable from Paris states that at a meeting of the Suez Canal Company it was decided to examine the project for the construction of a second canal. Even Count de Lesseps favored this movement, although two months ago he was reported to be ridiculing it. He now goes so far as to prophesy that another canal will be built, after the Englishmen have decided to go ahead with or without his coöperation. In the meanwhile the company (the second company) are seeking fresh concessions from Egypt before beginning work.

The demand for Australian frozen meat continues dull at an average price of 6d. per pound for mutton. The report of the Australian Frozen Meat Export Company for the six months ended May 1 shows a net loss of £3,080. This, it is explained, was caused by the high price of sheep in Australia, owing to the drouth there last year. English papers say that the steamer Great Eastern has been purchased by a company interested in the American fresh-meat trade, and is to be used as a cold storage dead-meat warehouse or station in one of the large ports on the south coast of England.

New Orleans is very properly congratulating herself on her increasing prominence as a grain exporting port. For the past month the shipments of grain amounted to 1,317,549 bushels, and for the entire season the receipts there have amounted to 11,732,250 bushels, against 3,640,465 bushels last year, an increase of 218 per cent. Owing to the high water prevailing in the Mississippi at present the *Times-Democrat* is of the opinion that the grain business of the port will continue late into the summer. There is, it adds, every reason to hope that this river route will not be closed at all to boats and barges this year by low water.

At a meeting of produce dealers, held at the Mercantile Exchange buildings during the past week, it was announced that a list of forty-one houses in that trade had been secured, pledging the rejection of the trade dollar after June 15. The committee named to take into consideration the reformation of trade abuses also reported that there was some difficulty in reconciling the various views entertained in regard to cold storage, but the committee hoped in another month to be able to suggest some practical reform for this and other abuses which have been referred to them for consideration. There will be another meeting to consider allied topics within the coming week.

The Birmingham *Iron Age* of late date has some interesting particulars concerning the putting into operation of Sloss pig iron furnace Number 2. The initial furnace of the Sloss company completed the first year of its operation on May 1, during which time it has put 24,000 tons of iron into the market. The company was formed in May, 1881, with a capital of $400,000. The first furnace was built in 11½ months, very quick time, and the second in 10½ months thereafter. Sloss furnace Number 1 makes an average output of 85 tons per day, while the new, Number 2, will make 125 tons. The two together are capable of turning out over 250 tons of iron in a day. Number 2 is strictly a modern furnace. Its stack towers 161 feet above the ground. Its three Whitwell hot-blast stoves are 75 feet high and 18 feet in diameter. The furnace is 75 feet high, with a 17 feet bosh. The Sloss furnaces pays to its laborers $2,000 a day, besides what is paid to railroads for freight. They are now running in first-class condition. Alabama and Birmingham in particular is to be congratulated.

The California fruit raisers, especially growers of oranges, are glad to obtain one cent apiece for them at wholesale. When the same fruit reaches Chicago, for instance, they cost the consumer seven to ten cents apiece. But the added cost is not the result of exorbitant charging on the part of the eastern retailer. It means that the Pacific railways must have and are in a position to take enormous profits, $225 per car having been the rate for oranges from Los Angeles, Cal., to Chicago. This state of affairs bore hard upon the California fruit raisers in that it almost entirely restricted them to their home markets. The freights to the east acted as a prohibitive tariff in favor of oranges cheaply freighted from Florida, Havana, and the more distant east. About June 1, however, for some occult reason the freight rates were lowered $100 per car. As a natural result the reduction has largely stimulated exportation of the fruit from southern California. The exact increase is not known. Oranges are going forward from Los Angeles and other points a train-load at a time.

The following national banks have been organized: The First National Bank of Homer, Ill.; capital $50,000; Solomon Plant president; E. I. Fisher cashier. The Puget Sound National Bank of Seattle, W. T.; capital $50,000; Bailey Gatzert president; J. Furth cashier. The Farmers' National Bank of Owenton, Ky.; capital $60,000; J. Holbrook president; J. C. Revill cashier. The Front Royal (Va.) National Bank; capital $50,000; Giles Cook president; J. H. French cashier. The First National Bank of West Greenville, Pa., has changed its name to the First National Bank of Greenville. The Childress & Harris Bank of Terrell, Tex., has succeeded the banking house of B. M. Childress & Brother, with a cash capital of $75,000; James Harris is president, W. T. Childress vice-president, and A. D. Childress cashier. Beryam B. Sherman, president of the Mechanics' National Bank of New York, has resigned on account of ill health. Hosea Webster, president of the Brooklyn Savings Bank, is dead. The Middletown (Conn.) National Bank has elected M. B. Copeland president in place of J. H. Watkinson. The First National Bank of Danville, Pa., has elected D. M. Boyd president in place of T. Beaver.

In discussing the naval stores trade of the United States of late years the *Commercial Bulletin* notes that the sources of supply have been subject to many changes, one state yielding to another in productive capacity. Georgia produces the largest amount, but North Carolina formerly took the lead. The latter's decadence is due to the gradual decrease in the number of pine trees. Georgia and Florida will yield well for many years. New York is becoming more of an export port every day, and will continue to hold her own, as southern ports lack the necessary means of transportation and capital. Great Britain is our best customer, the Netherlands and Germany coming next in order. France, at one time our greatest competitor, now furnishes barely enough for its own consumption. The total number of barrels of spirits of turpentine exported from the United States in 1879 was 98,117. In 1880 it had increased to 142,130 barrels, since which time that quantity has not been exceeded in any one year. In 1881 the total was 120,202 barrels and in 1882 it was 135,018 barrels. The exports of rosin, which amounted to 815,663 barrels in 1877, had declined to 751,179 barrels in 1880, advanced to 920,943 barrels in 1881 and to 906,882 barrels in 1882.

The Louisville (Ky.) *Commercial* of late date contains an interesting article entitled "Growth of Eastern Kentucky." This advancement of the eastern end of the state is correctly ascribed to the construction through that region of the Chesapeake & Ohio Railway. The gain already made is very marked. The freight traffic which has grown up there already requires the use of 800 cars, and new lines of railway, being needed, are being discussed by those competent to build them. The threshing machine, the saw mill, the steamboat, the newspaper, the discovery of coal strata and other signs of radical advancement are already perceived in the new country thus opened, and from which one has heretofore associated with such matters as the "Breathitt county troubles" of a few years hence and the Lawrence county "regulators." The outlook, therefore, appears as if the "mountain counties" would stand shoulder to shoulder with the "blue-grass regions" of Kentucky. As it is pointed out in the journal named, the duty of the state is to encourage the building of more railroads in eastern Kentucky and in other parts of the state, to extend the work of the geological survey and the publication of its results, and to take measures to exterminate the illiteracy that has kept these counties in the background for so many years.

The immigration at New York during May and since the first of the month has shown a marked increase as compared with that during the first four months of the current year, although somewhat behind the total for the first four months of 1882. The record of arrivals during the first and second months of 1883 was so much smaller than last year at corresponding times that the total for this year was believed to be likely to fall considerably behind that of 1882. This view has been changed since May, owing to the gain mentioned. The increases of late, however, but corroborate the weekly returns of the Irish and English emigration movement mentioned from week to week in BRADSTREET'S as reported in London, in the reviews of the labor market there and in Ireland. The increases have been largely of Irish, Scandinavians and Germans. During the first three months of 1883 the total number of immigrants landed at New York was 49,652, against 68,685 in the corresponding period last year. The immigration for April was 53,853, against 69,700 for the same period last year, an increase of 4,231 over the total of the three months previous, and a falling off of 15,847 as against April, 1882. The total from January 1 to May 1 was 103,535, a decrease of 34,850 as compared with the first four months of 1882. Since May 1 there has been a sudden increase, the total for the first ten days being 22,876, or only 476 less than for the first ten days in May, 1882. The immigration for the month will probably exceed that of May last year, when it was 88,768. The class of immigrants now arriving are of the younger and preferable class, although they appear to be possessed of less money. There are not many of the immigrants (mostly Irish) arriving here who have of late been sent out by the British authorities with their passage paid and $5 to start them in the new world on their arrival. Boston has received the greater part of them, as the fare to that city is cheaper than to New York.

The capital of the territory of Dakota has been removed from Yankton to Bismarck. A commission of nine was appointed by bill by the territorial council early in the last session to decide where the permanent capital should be located. Any town desiring to become the capital was to pay to the territory the sum of $100,000, $20,000 of which must be deposited with some national bank and certificate of deposit placed in the hands of the commission at the time the bid is made, and the town so bidding was also to give the territory 160 acres of land for the capitol site. The site was to be selected by July 1, By the terms of the bill the organization of the commission was to be effected within the limits of Yankton. In view of the state of public feeling at the capital the commissioners believed that if they attempted to hold a meeting there an injunction would be served upon them. They met at Sioux City, and were furnished a train by the Milwaukee & St. Paul road, upon which they rode through the city of Yankton, passing by the bivouac fires of the sentinels who had been set to watch for them. They reached the city at 5.30 o'clock in the morning, and organized on board the train as it passed through the city. Eleven towns made bids to become the capital. Bismarck was the grand choice of the southern Dakota towns. The latter could not agree among themselves, and so Bismarck was chosen. The only railroad now entering Bismarck is the Northern Pacific, but the St. Paul *Pioneer Press* says that it will not be many months before all the northwestern trunk lines will extend their roads to the new territorial capital. In 1882, 27,481,141 pounds of freight were shipped from Sioux City to Bismarck. The down-stream freight during the year amounted to 3,700,000 pounds, including wool, buffalo robes, hides and bullion. The receipts of freight by rail during the year 1882 were 61,092,302 pounds, and in the same period 17,541 passengers landed there. As early as 1877 the listed improvements in the way of buildings footed to the handsome valuation of $140,650. The town is fast becoming an agricultural center.

FINANCIAL.

THE LOAN AND INVESTMENT MARKETS.

The unexpected news last week that the threatened iron strike at Pittsburgh had been avoided gave the signal for a rise in the stock market which has been maintained since. It was somewhat characteristic of the ways of Wall street that the coal stocks should have been promptly advanced in price because the strike did not take place, and therefore the consumption of coal would, it was asserted, continue as large as ever; while the actual facts are that the coal stocks known to the New York Stock Exchange represent only four roads, neither of which runs into the territory which would have been affected by the Pittsburgh strike. These roads serve the anthracite coal field on the eastern slope of the Alleghanies, and the iron furnaces along their lines burn anthracite coal, while the furnaces of the Pittsburgh district burn the soft bituminous coal found in that locality; and had they blown out as a consequence of the strike, more business would have been given to the eastern anthracite burning furnaces, which at this time are in need of all they can get. Any port in a storm, however; and the stock market having been brought down to a point where there was no particular desire on the part of any of the leaders to try and put it lower, the news from Pittsburgh was as good a reason as any, and the coal stocks offered the most promising conditions for starting a rise. Lackawanna was smartly advanced; but the strongest movement has been in Jersey Central and Reading. The former of these two stocks has been run up by the clique which owns most of it, with marked success, which was not a difficult task in view of the fact that to effect the lease of the road to the Reading Company a large majority of the stock had been purchased by that company, leaving a comparatively small amount floating around in the street. To bid up the quotations was easy under such circumstances, but the pinch will come when the selling is to be done—for of course the Reading, having no more use for the stock, is desirous to get the load off its hands and get its money back. The guarantee of 6 per cent. dividends has furnished the excuse for advancing the price. Reading has also been advanced to keep the other movement in countenance.

Monday, Tuesday and Wednesday were devoted to this work, while the St. Paul clique thought the moment opportune for putting up the price of their specialty, if only to counteract the depressing effect of a new issue by the company of $3,000,000 of new stock. The issue was authorized at the annual meeting on Tuesday, and the whole amount was taken by President Mitchell in payment for advances he had made to the road. The price at which he took it was not stated, but it was generally understood to be par. In such cases as this it is well understood that the stock has been sold in advance of its issue, the same as in some other cases which might be mentioned; so that for the time the sales are the same as "short" sales. After the issue is made the borrowed stock is returned, and delivery made of the newly issued certificates, which completes the transaction. It might not appear to the casual observer that there was anything in the issue by a company of 30,000 shares of new stock upon which to found a bull movement in that particular property; but in this case there were two reasons advanced for it. First, it was pointed out that the new issue was much less than had been anticipated, which was perfectly true, for some seven or eight millions had been expected; secondly, that the $3,000,000 of stock had wiped out the floating debt of the company, and thereby greatly improved its financial position. This was only partially true. That portion of the floating debt owing to President Mitchell was wiped out; but the company's last report showed that it had on January 1st last a floating debt of seven millions, and there is nothing that any one can discover in the records of its business since that date to show how it could have paid off the other four millions. Further issues of stock are looked for to wipe off this score. As to bonds the company has exhausted its power to issue them. It has a bonded debt of nearly $90,000,000. But the company has also some very shrewd men at the head of it, who, if they were carried away by the mania for excessive extension which raged among railroad men so violently during the past three years, have at least retained their clear insight into the condition of the stock market, and especially the situation of St. Paul stock. The last new issue they put forth was apportioned among the stockholders as a "privilege," when a certain large operator in the street was heavily loaded up with the stock. To save himself from worse loss he had practically to take care of the new issue, and work off the heavy burden afterward the best way he could. As he got out from under another new buyer appeared in the field, supposed to be the Standard Oil Company clique. They bought as he sold, and they have been carrying the load ever since. Upon them has fallen the task of supporting the price under the constant dripping of stock which took place while the plan of last Tuesday's issue was maturing. On that morning a block of no less than 8,000 shares, it is said, was dropped, knocking down the quotations 1 per cent., and for a short time quite demoralizing the whole market. After the news of the new issue was out the clique set to work in earnest to bid up quotations; and plentiful dispatches from the locality of the road that the crop outlook was never before so fine have contributed to assist the movement. Union Pacific, Central Pacific and Lake Shore were also briskly bid up by their respective supporters; and this, with the boom in the coal stocks, gave the market a real bull look, and the "great June rise" on the fine promise of the crops was the burden of the general song.

Meantime it was noted that the Gould stocks had shown no special signs of activity. They had advanced in harmony with the rest of the market, but had taken no lead, and by Thursday morning it had come to be commented on that Mr. Gould was only following and not contributing much, if anything, in support of the bull movement. Whether from this or some other cause, Mr. Gould that day stepped into the arena, and with quick movements put up Western Union 3 per cent. from its closing figure of the day before. The market had shown some signs of flagging, when this sudden advance gave it a full head of steam again. All sorts of rumors were in circulation as to the cause of the advance, but none could be traced to an authentic source, while some were speedily shown to be distinctly false. The highest quotation made for the stock was 87, and from this figure it dropped back as speedily as it had risen to 85⅞, but there was another rally of the market in the last hour, and the price closed for the day at 86½. The stock had a rest yesterday, but the rest of the market went on jubilantly, and the whole street was put into good temper and the liveliest expectations aroused of a long pull on the bull side.

The loan market has been in a state of summer ease through the week, the rate on call loans ruling from 2 to 3 per cent., while time loans are offered at 4 per cent. Exchange rates, however, have been on the rise, and on Wednesday all the leading houses but one advanced their posted rates to $4.86½ and $4.90. This put the actual rates up to the gold-exporting point; but no gold has gone out yet, and the rates have weakened a little since. The paucity of commercial bills offering through our light export movement in cereals has brought the "balance of trade" between this country and Europe to a point where the exchange brokers say the movement of securities one way or the other turns it; and London has again been selling us our own securities during the week. The advance in exchange on Wednesday was said by the brokers to be due entirely to the selling movement from London. The Bank of England rate remains at 4 per cent., and its reserve increased fractionally during the week. Consols are lower.

In government bonds there has been no movement of note. The following were the closing quotations yesterday:

	June 1, bid.	June 8, bid.	June 8, asked.
U. S. 5s extended (3½ p. c.)	103	103⅜	—
U. S. 4½s 1891, registered	112¼	112⅞	113⅛
U. S. coupon	112¼	112⅞	113
U. S. 4s 1907, registered	116¼	118¾	119
U. S. 4s 1907, coupon	119¼	119¾	120

The bank statement of Saturday showed no material change in the items, except an expansion in the loans. There was a trifling decrease of $105,750 in the surplus reserve, which, however, is now $9,071,650. The following are the comparative totals of the statements of May 26 and June 2:

	May 26.	June 2.	Differences.
Loans	$316,281,500	$317,575,800	Inc. $1,294,300
Specie	62,826,800	62,251,500	Dec. 575,300
Legal-tenders	23,758,300	24,552,500	Inc. 794,200
Deposits	309,630,800	310,929,400	Inc. 1,298,600
Circulation	15,944,400	15,971,300	Inc. 26,900

The proportion of total reserve to liabilities is now 27.95 per cent., against 26.32 per cent. at the same date last year.

From Baltimore, Md.: In the money market funds continue plentiful. Prime commercial paper brings 4½@5 per cent., and collateral loans on demand 4@4½ per cent. Very little was done in stocks. Virginias were stronger and Marietta bonds more quiet.

From New Orleans, La.: Money more in request for time paper, and firmer. Call loans are unchanged. Financial circles are a little unsettled by the application of Mrs. Gaines to the United States District Court for a mandamus to compel the city to levy a tax to pay her claim.

THE FOLLOWING WERE THE CLOSING QUOTATIONS FOR STOCKS ON THE DATES NAMED:

	June 9, 1882.	June 1, 1883.	June 8, 1883

COMMERCIAL.

SUMMARY.

Special telegrams from leading business centers throughout the United States show that there has been a distinct, though not a great, improvement in general trade. A prominent favoring influence has been better weather. The distribution of light-weight clothing and summer fabrics were first to feel the change for the better. The movement of staples has also been more active at the larger centers, particularly west and northwest. The industrial situation still exhibits the evidences of over-production in several lines, and to that extent no improvement has been made. Wheat has been lower. The prospects for spring wheat have continued to grow steadily brighter, and although bear crop advices have rather lost their potency through having been discounted by the speculators, still the generally better crop outlook since the warm weather, has served together with the large amount of wheat in sight and favorable advices from abroad, to keep prices down. Corn has been rather firmer and fractionally higher. This has been on account of a better demand therefor at home and from the other side, as well as numerous statements from the west of damage and the necessity for replanting. Provisions have been lower. Pork and lard have been in no demand here or from foreign shippers. London advices consider prices here altogether too high, and buyers there are not in the market for American products. It is thought that pig iron has touched bed-rock, but members of the trade say more furnaces will have to blow out before a recovery in prices can set in. Stocks at furnaces tributary to New York and Philadelphia markets are said to amount to 160,000 tons, which constitute a seriously depressing influence. More orders have been received within a few days than in a similar period for a long time. The anthracite coal trade is in a healthful condition. The surplus of one million and a half tons over the quantity mined at a corresponding time last year, it is asserted, will prove no obstacle to the prosperity of the trade, as it has already gone very largely into consumption and stocks are relatively small, and the trade look for a profitable season. Prices it is thought will be higher for July. Petroleum on the whole is lower. The fight between the bull syndicate and the Standard Oil Company still continues. The fluctuations in prices of certificates have been marked and an enormous quantity of oil—on paper—has changed hands. The statistical position of petroleum favors an advance; but some operators object and seem to be powerful enough to prevent one. Ocean freights continue dull. Petroleum charters have been the feature of the week. Consumers of wool have been buying cautiously, and only for near wants. Values have ruled steady, but there is an unsettled feeling as to the future of the market. There were 148 failures in the United States reported during the past week, 12 less than the preceding week, 18 more than the corresponding week of 1882, and 66 more than the same week of 1881.

THE GENERAL COMMERCIAL MOVEMENT.

[By Telegraph to BRADSTREET'S.]

From Portland, Me.: Decidedly improved.

From Boston, Mass.: In some departments of manufactured goods there has been a little more activity, owing to the increased demand from New England dealers, but the general volume of trade is about the same, and no decided increase is looked for this month. There is no desire to stock up beyond what is actually needed for current demand, and the prevailing tendency of values is more or less in buyers' favor. Money is in abundant supply, and good mercantile paper is readily discounted by the banks at from 5 to 6 per cent., most of the transactions being at 5 to 5½. Paper with manufacturers' names are taken at 4 to 4½ per cent. Some of the banks run a little short for a few days, and paid as high as 3½ for balances, but this has no effect on the general market.

From Buffalo, N. Y.: Somewhat more liberal during the past week, but still lacking decided activity except in a few lines. Staples are in fair consumptive demand, but general trading is confined to purchases for immediate wants.

From Troy, N. Y.: No improvement in the outlook. Trade continues depressed and far less satisfactory than at same time last year.

From Rochester, N. Y.: The weather which for some time past has been unfavorable is now all that could be wished. Collections are reported satisfactory. Retailers in this and other lines report trade looking up, though many will be obliged to carry over considerable stock, and for this reason the outlook for fall trade with jobbers is not so good as last year at this season.

From Cleveland, Ohio: A fair week in most jobbing merchandise lines, without special features.

From Evansville, Ind.: Reviving some, though slowly. Collections fair.

From Indianapolis, Ind.: Very fair, and a more cheerful feeling pervades. Movement is averaging well for the season. Collections have improved slightly, and prices are steady.

From Chicago, Ill.: Considerably improved. Groceries active again, and sugars firm. Money is in fair demand, and plenty at 5 @ 7 per cent. Collections are fairly satisfactory.

From Peoria, Ill.: The favorable weather of the past few days will have a tendency to stimulate trade in all branches.

From Louisville, Ky.: Rather quiet. Prices are easy and the demand, limited to current assortments, is easy. Market rates are the same. Money is quiet. The east-bound railroad tonnage from Louisville for the past five months shows an increase of 42 per cent. over the same period last year.

From St. Louis, Mo.: Better than last week, owing to the fine weather.

From Kansas City, Mo.: Light, owing to wet and inclement weather. Much depends on this until wheat is harvested. No special activity expected till then.

From Detroit, Mich.: The volume is considerably increased over last week. Collections are only fair.

From Burlington, Iowa: Reported light; the demand is regular, but there is a very moderate city trade. Some collections complained of.

From Milwaukee, Wis.: There has not been a very brisk business done nor is it to be expected at this season of the year; but the volume in most lines has been quite up to the average with same time last year.

From Minneapolis, Minn.: Jobbers report a large trade in all lines, with fair collections.

From Omaha, Neb.: The past season's trade has not been up to a fair average. Should the weather of yesterday and to-day continue, trade in all branches must improve.

From Lawrence, Kan.: Good, but no marked features in any line.

From Topeka, Kan.: A slight improvement this week, and all business is steady and fairly active.

From San Francisco, Cal.: Rather quiet.

From Baltimore, Md.: Only moderately fair.

From Richmond, Va.: Very quiet.

From Norfolk, Va.: The recent change to summer weather has a depressing influence upon trade generally, except the wholesale grocers and truck dealers. Steamers' carrying capacity out of this port is heavily taxed.

From Savannah, Ga.: Fluctuating, with little improvement. Heavy freights by northern steamers are caused by large shipments of truck produce.

From Galveston, Tex.: Only moderate.

From Nashville, Tenn.: Trade very quiet with the jobbers.

From Memphis, Tenn.: Quiet, except the large shipments of new potatoes and cabbage of late.

INDUSTRIAL.

The industrial situation is worse in some respects than last week, but in others it may be considered better. The bituminous coal miners in the railroad pits in the vicinity of Pittsburgh are at work awaiting the results of arbitration over the dispute as to wages, and the members of the Amalgamated Iron and Steel Association in the western district are mostly at work instead of striking against the reduction of wages. Reading rolling mill puddlers struck for an advance of 25c. per day and are getting it. The South Chicago Iron & Steel Company started up June 3 with half its force, and the striking Cincinnati bootmakers have returned to work at the old rates. On the other hand, there is trouble in the woolen and the paper industries at the east, and considerable woolen machinery has stopped running during the past ten days. The stocks carried over a year ago, and, as it is alleged, the changes made in the tariff on wools, and two unusually prolonged seasons antagonistic to the interests of the retailer, appear to have conspired to allow production to greatly exceed consumption. Many eastern cotton mills are are similarly affected, owing however to somewhat dissimilar reasons.

INDUSTRIAL FEATURES.

[By Telegraph to BRADSTREET'S.]

From Portland, Me.: Mechanics here are well employed.

From Philadelphia, Pa.: There is no improvement in the situation as regards textile productions. Some mills are running on part time, and additional stoppages are noted. One large concern running on woolen and cotton goods has shut down for an indefinite period. Other industries are fairly employed.

From Chicago, Ill.: The labor situation has improved. No further trouble is expected.

From Minneapolis, Minn.: The arrival of immigrants continues unprecedentedly large; they are mostly bound for Dakota and Manitoba, and are generally of an excellent class. More prairie land will be broken this season than in any preceding.

BREADSTUFFS ABROAD.

American wheat on the London market has been weaker and still rules dull. Corn has continued inactive and ½d. per cental lower. The leading journals abroad which give particular attention to the breadstuffs markets have apparently come to accept the existing conservative view with respect to the prospective yield of wheat on this side rather than the extreme views as to damage done the winter crop which have proceeded principally from Columbus, Ohio, St. Louis and Milwaukee. Even the *Mark Lane Express*, which favors the highest prices consistent with the demands of the English farmer, gives currency to and appears to accept the latest advices, that improvement has taken place in the growing crop here and that the yield is likely to prove larger than earlier estimates indicated. By far the most sensible remarks made of late concerning the price of wheat here and in London, in so far as they are based on the probable requirements and the world's supply, are in the London *Miller* of May 21. That journal says: "It should be noted, however, that America reckons without other countries, and looks for its own expected deficiency to rule the European market, which is a conclusion that facts scarcely warrant. India, Chili, New Zealand and Russia are now very important factors in determining the price of wheat, and at this moment Indian and Chilian sorts at 41s. to 42s. are making other varieties suspiciously dear. As to English farmers' reserves they come forward freely enough, and mostly in excellent condition, but sellers demand full terms, so that London makes an average of about 45s., and Norwich on Saturday quoted good wheat as worth 46s. The average of the country has attained 43s."

Fine weather is reported in the agricultural regions of France, which is naturally very welcome. In Germany heavy rains fell about Whitsuntide; they have been succeeded by brilliant sunshine. The demand there is improved, and prices are tending in sellers' favor. The Paris and London country markets for home-grown wheat are slightly easier. Fine, brilliant weather prevailed in the United Kingdom last week, which had a beneficial effect on the growing wheat, which is stronger and healthy.

The quantity of grain on passage to the United Kingdom and the continent June 7, as per Beerbohm's cable of that date, was as follows:

	Wheat, qrs.	*Maize, qrs.*
To the United Kingdom	2,150,000	390,000
To continent	460,000	65,000
Total quarters	2,610,000	455,000
Equal bushels	20,880,000	3,640,000
Compared with the week ending May 31:		
To the United Kingdom	2,350,000	440,000
To continent	440,000	25,000
Total quarters	2,790,000	465,000
Equal bushels	22,320,000	3,720,000
Decrease bushels	1,440,000	80,000

AMERICAN WHEAT MARKETS.

The prices of wheat at New York during the major portion of the week have exhibited an unmistakable tendency to decline. On Saturday last a fractional advance was made, chiefly owing to firmer markets at the west. In fact this characteristic has been noticed for several weeks past. Speculative interests at St. Louis, Chicago and from New York, acting through Chicago brokers, have been engaged in an active buying, and to this fact must be largely attributed the extra strength noted. Occasional sectional crop reports have lent color to bull views of the situation, which, with the now reduced estimates of the known damage to the winter wheat crop, have constituted the only support to the manipulations of those favoring higher prices. On the other hand, the heavy stock of wheat in sight, the increased receipts of wheat at western points from farmers' hands, the obstinacy of foreign buyers in refusing to purchase at present quotations, the generally improved weather in the west, and the latest crop reports telling of increased acreage and probable yield on the Pacific coast and in the northwest, all these elements have contributed to fortify the bearish views at all home markets and to depress prices slightly.

The receipts of wheat at tidewater for the week ending June 2 decreased from 1,547,953 bushels on May 26 to 1,420,284, or 127,669 bushels. The exports from the Atlantic ports for the week ended June 2 amounted to 802,848 bushels, against 788,973 bushels, a gain of 13,935 bushels only. From September 1, 1882, to June 2 the exports of wheat from the Atlantic ports amounted to 57,080,364 bushels, against 36,561,571 bushels in a corresponding portion of the preceding year, a gain of 20,518,793 bushels.

The course of the wheat market during the past week is indicated by the following prices in the New York and Chicago markets, for July wheat on the dates mentioned: New York, Saturday last, $1.24½; Monday, $1.23⅜; Tuesday, $1.23½; Wednesday, $1.22⅜; Thursday, $1.23; Friday, $1.23. At Chicago, Saturday, $1.15¼; Monday, $1.13¼; Tuesday, $1.13½; Wednesday, $1.12⅝; Thursday, $1.13⅛; Friday, $1.13⅛.

The total receipts of wheat at Chicago, Milwaukee, Detroit, Toledo, Indianapolis, Peoria and St. Louis during the week ended June 2 amounted to 778,973 bushels, against 583,203 bushels in the preceding week, and the shipments to 505,233 bushels, against 751,370 bushels in the week previous.

The visible supply of wheat in the United States and Canada (east of the Rocky mountains) June 2, as against the preceding week, showed an increase of 137,951 bushels.

CORN.

On Saturday the weather reports from the heavy corn-growing belt were unfavorable, and a low thermometer was generally reported. This naturally stiffened the market and prices advanced fractionally. The trading in this cereal was also more animated, and the shipping demand likewise had a tendency to keep prices well up. On Monday, however, notwithstanding the improved tone to the market, due to more liberal transactions, warm and favoring weather was reported throughout the region most interested and a fractional decline in prices was the consequence. On Tuesday a continuation of Monday's record marked the corn market and another slight decline was made. Later in the week more weakness was shown in corn, although June deliveries were contracted for on a much firmer basis and even at a slight advance in price. More strength was shown late in the week in response to a better demand. The receipts of corn at the Atlantic ports for the week ended June 2 were 1,712,393, against 2,129,310 in the preceding week, while the exports from the same points amounted to 1,164,646, against 1,729,815 bushels. From September 1 last to June 2 the exports of Indian corn were 32,954,610 bushels, against 24,379,811 bushels in a like portion of 1881–82. The visible supply of Indian corn in the United States and Canada, east of the Pacific coast, June 2, had increased 354,205 bushels as compared with May 26. The course of the corn market during the past week is indicated by the course of prices at New York and Chicago on the dates given, as follows: At New York, on Saturday, 66¾c.; Monday, 66⅝c.; Tuesday, 66c.; Wednesday, 65⅞c.; Thursday, 65¾c.; Friday, 66⅛c. At Chicago, Saturday, 58⅛c.; Monday, 57½c.; Tuesday, 57c.; Wednesday, 56⅛c.; Thursday, 56⅜c.; Friday, 56¾c.

The total receipts of corn at Chicago, Milwaukee, Detroit, Toledo, Indianapolis, Peoria and St. Louis, for the week ending June 2, were 2,522,820 bushels, against 1,570,228 the week preceding, and the shipments were 2,519,442 bushels, against 2,352,928 in the preceding week.

The closing prices of breadstuffs in New York last evening, as against those of the Friday preceding and the corresponding date last year, were as follows;

CLOSING PRICES OF BREADSTUFFS IN NEW YORK.

	June 1.	*June 8.*
No. 2 flour	$2.65 @3.50	$2.60 @3.60

AMERICAN GRAIN REPORTS.

[By Telegraph to BRADSTREET'S.]

From Portland, Me.: The crop prospect in Maine is good.

From Philadelphia, Pa.: Flour has been only moderately active, but stocks have been considerably reduced and are generally held with confidence. Grain values have been depressed by the improving crop outlook and the downward tendency of values in the west, but the feeling at the close is rather stronger. There is more inquiry for export, and shippers' bids are nearer to market rates, especially for corn.

From Evansville, Ind.: Weather warm and rainy. Grain is strong, with an upward tendency. Offerings in both corn and wheat are light.

From Indianapolis, Ind.: Wheat and corn are lower and the crop prospects are improving. The weather is growing warmer.

From Chicago, Ill.: Wheat is steady. Favorable weather and good crop reports from the north and west, and increasing stocks prevent buying. The bears, fearing manipulation by the strong bull combination, decline to sell freely. The shipping demand is confined to the off grades. Corn is in fair speculative and shipping demand, but splendid weather, large receipts, increasing stocks and improved crop-prospect prevent an advance in prices. Oats are firm and receipts large. Rumors of corner in June and July sustains prices.

From Peoria, Ill.: The weather for the past few days has been very favorable for the crops.

From Louisville, Ky.: Wheat is making good progress, with seasonable weather. The stand on good lands looks fair, but on poor lands, and on that sown after corn, many acres are hardly worth harvesting. Corn is rapidly improving. The grain trade is stagnant and nominal. Flour is quiet and firm.

From Detroit, Mich.: The growing wheat is in good condition all through the state.

From St. Louis, Mo.: Grains are weak, but fairly active. Corn is in good export demand.

From Kansas City, Mo.: Wheat is reported damaged in many places by excessive rains.

From Minneapolis, Minn.: Higher temperature has ruled during the week, with some rain, which was beneficial to the growing crops. The season is favorable for the wheat plant, which is in fine condition. It is well rooted and shooted, and we are promised a good crop. Oats, barley and flax are looking well, with a large acreage sown. The corn crop is backward and not promising. Warm weather, however, would bring it forward rapidly. July and August make the corn crop in Minnesota. The movement of wheat from first hands is light, and it is generally conceded that the reserve in farmers' hands is small. The local market rules steady and firm. Receipts for the week were 301,000 bushels. Flour quiet. Less than one-half the mills are running. Shipments for the week were 58,000 bushels.

From Omaha, Neb.: The past month has been a very wet one, and nearly all the corn has had a second and some a third planting. Farmers have been unwilling to part with money or the balance of last year's crops until a better promise of a new crop is perceived. Hence collections have been and are still poor. A change in weather took place yesterday, and it now seems as though the much-needed hot season had set in.

From Lawrence, Kan.: Corn is backward, owing to cold spring and rains. The wheat prospects are excellent, and merchants are generally well satisfied with the outlook.

From San Francisco, Cal.: Wheat and barley are weak. The crop prospects are favorable for unprecedented harvests.

From Baltimore, Md.: The flour market is without activity, but prices rule steady and firm. Transactions in southern wheat have been limited owing to light offerings. Prices are steady. Western wheat is quiet. A steady demand continues for southern corn and the market is firm. Western grades are dull and prices have a tendency to lower.

From Wilmington, N. C.: Grain and breadstuffs are inquired for and the market is steady.

From Savannah, Ga.: The grain market is well stocked, with a fair demand.

From New Orleans, La.: Breadstuffs are steady. Bulk corn is quiet and easier owing to the advices from Europe and heavy receipts in the west. Sales this week were 150,000 bushels at 59¾c. to 60½c. The market is more firm at 59½c. Nothing is doing in wheat. Receipts of corn were 340,000 bushels; shipments 400,000.

From Nashville Tenn.: The weather is good for the growing crops. The prospects for a harvest in some localities are now good. Flour is firm and active. Wheat is firm.

From Memphis, Tenn.: Flour is strong, with a tendency toward an increase in price. Cornmeal is quiet and corn dull.

PROVISIONS.

The McGeoch-Fowler imbroglio at Chicago, consequent upon the refusal of the former to accept the latter's make of lard in settlement of a contract, on Friday last, alleging that it was not up to the standard—that it was adulterated—has continued to be the sensation of the week in provisions circles. On Saturday speculation in hog products was very dull. Everybody, in fact, appeared to be waiting till the outcome of the Chicago squabble. The market was weak, and pork and lard declined on the average about 13c. and 10c. respectively. This week opened with continued weakness. The exports are reported less, the home demand also smaller, and these facts, combined with continued fair receipts of hogs at western points, served to again depress prices. On Tuesday there was more animation, but entirely on speculative account. Pork and lard declined sharply at the west, but more than recovered themselves, entirely the outcome of the struggle between the long and short interests. The legitimate trade in these commodities suffered no change. The two commodities named declined again on Wednesday in response to late advices as to increased receipts of hogs at the west and the decline in exports for the season. They have since been firmer, owing to the efforts to hold up prices by heavy traders.

The following shows the export of hog products for the week ended June 2 from the places mentioned:

	Pork, barrels.	*Bacon, pounds.*	*Lard, pounds.*
New York	1,523	2,003,804	2,646,772
Boston	68	489,548	486,396
Portland	...	...	....
Montreal	518	6,500	....
Philadelphia	6	850,203	330
Baltimore	278	60,924	11,500
New Orleans	124	750	2,300
Totals	2,517	3,411 729	3,147,298
Previous week	2,682	4,008,500	3,722,502

The total export of hog product from the abovementioned places from November 1, 1882, to June 2, 1883, was as follows:

	1882-83, pounds.	*1881-82, pounds.*
Pork	28,942,400	34,926,000
Bacon	265,708,619	270,792,853
Lard	144,890,831	158,380,248
Totals	439,631,850	470,099,101

Liverpool reports a week market, with prices off 6d. on bacon, 3d. on lard, and 1s. on tierced beef. Fairbank's circular gives the total stock of lard in the United States, June 1, as 217,446 tcs., against 240,716 tcs. at the corresponding date last year, and 132,666 tcs. in 1881. The totals of "prime steam" deliverable on contracts are 191,589 tcs. for 1883, 211,028 tcs. for 1882, and 97,918 tcs. for 1881.

PROVISIONS AND LIVE STOCK REPORTS.

[By Telegraph to BRADSTREET'S.]

From Buffalo, N. Y.: Provisions are inactive and weak, under the influence of liberal receipts of hogs.

From Philadelphia, Pa.: Hog products have ruled very dull, even in jobbing lines, and values have generally favored buyers. Butter has accumulated, but there is more disposition on the part of buyers to anticipate requirements at low prices, and holders are more confident. Cheese is lower and in better supply.

From Chicago, Ill.: Provisions are weak, and stocks large. The prospect is that the summer production will equal the consumption, which is unusually small for the season. Prices are only sustained by the efforts of strong parties who hold the property and dare not let it go down.

From Louisville, Ky.: Provisions are dull and drooping. Live stock easy and moderately active.

From St. Louis, Mo.: Provisions are lower and very quiet. Both cattle and hogs are inactive and declining with large supplies. Horses and mules getting scarce and advancing in price.

From Kansas City, Mo.: Provisions continue weak despite a fair demand.

From Topeka, Kan: The market is in its normal condition, and prices are unchanged.

From Wilmington, N. C.: Provisions are lower. The demand is very light for this section.

From New Orleans, La.: Provisions are dull and easier.

From Nashville, Tenn.: Cattle trade very quiet.

From Memphis, Tenn.: Meats and lard are not brisk. Prices of live stock keep up as receipts in all grades continue light.

THE NEW YORK DRY GOODS MARKET.

Business for the week has ruled quiet with the importing and commercial houses, while an increased demand has been apparent in seasonable goods, such as lawns, nun's veilings, and light fancy prints, etc. Sales in other departments have fallen off. The request for woolens has been very light, owing no doubt to the many auction sales. Ten thousand pieces of various brands are to be sold at Wilmerding, Hoguet & Co's. on the 13th inst. Jobbers of dry goods say business for the week, though quiet, has been of fair proportions, as there has been some increased request for summer goods. Retailers are fairly active and expect to do an increased business with a continuation of the present weather.

THE DRY GOODS MARKETS.

[By Telegraph to BRADSTREET'S.]

From Portland, Me.: More active, and a better feeling.

From Boston, Mass.: There has been a little more demand for summer goods, and jobbers are distributing a little more freely, but there is no animation in the general market. Agents are not selling anything of consequence for the fall trade, and movements are confined to small lots. They are not disposed to make any more concessions on leading cotton fabrics, but prices are somewhat irregular, owing to accumulations of outside makes. Woolen cloths for men's wear move very slowly, and the market continues in an unsatisfactory condition.

From Providence, R. I.: The print cloth market is quiet and steady, the sales being moderate; 64s are quoted at 3⅝c, and 56x60's at 3⅛c. There are about 130,000 pieces on hand.

From Rochester, N. Y.: Dry goods jobbers report a very satisfactory business during the past week, fully 20 per cent. in excess of corresponding week last year. A good trade is anticipated for the entire month, which will virtually close the present season.

From Buffalo, N. Y.: Is very good in both jobbing and retail departments; sales for the first week of the month showing an increase of 15 per cent. over the corresponding week of last year. Prices on staples are firm with an upward tendency.

From Philadelphia, Pa.: The general jobbing trade is moderate in volume and mainly in small lots on orders for re-assortment. The usual between-season's lull pervades the market for package lots.

From Pittsburgh, Pa.: More active than last week, owing to seasonable weather.

From Cleveland, Ohio: The weather has been warm, and in light, seasonable goods the retail trade has materially improved. The wholesale dry goods trade continues as favorable as throughout the spring.

From Columbus, Ohio: The spring trade in dry goods is now about over, although business is reported more brisk than last week. Collections quoted good.

From Indianapolis, Ind.: Satisfactory and averaging well for the season. Collections somewhat better.

From Chicago, Ill.: Dry goods are in better demand. Sales of light summer fabrics are larger than at any previous time this season, as well as of notions, finishing goods and millinery.

From Peoria, Ill.: A fair average movement for the season.

From Louisville, Ky.: Jobbers report as satisfactory the little movements on orders. Spring collections are coming in better than usual and failures among the country trade are less frequent. Sheetings are slightly lower.

From Baltimore, Md.: Business is rather quiet, and no activity of consequence is expected for several months. Collections are reported a little slow.

From St. Louis, Mo.: With warm weather dry goods are active and firm, and sales of all summer lines are much better than last week.

From Kansas City, Mo.: A satisfactory order trade is reported, and sales still continue ahead of the like period last year.

From Detroit, Mich.: Dry goods are quite active. Jobbers and retailers are both doing a satisfactory business.

From Burlington, Iowa: Very light. Country stocks seem to be ample.

From Milwaukee, Wis.: There has been some bright weather the past week; more encouraging to the dry goods retailers, but the season for jobbers has substantially passed and trade among them must of necessity be dull, though there is a strong feeling that a good fall business will be realized.

From Minneapolis, Minn.: The dry goods trade has been considerably in excess of last year.

From Topeka, Kan.: Dry goods are a shade better than last week. Collections good.

From San Francisco, Cal.: There is a fair amount of trade doing in dry goods. Jobbers report a good inquiry from Oregon and the state.

From Richmond, Va.: The dry goods trade is very dull.

From Norfolk, Va.: Quiet.

From Wilmington, N. C.: Dry goods are dull.

From Savannah, Ga.: Dry goods are active for leading lines, and jobbers report sales for the season satisfactory. They are reducing stock as much as possible, preparatory for fall demands.

From Galveston, Tex.: The jobbing trade is inactive.

From Memphis, Tenn.: The dry goods trade is approaching the summer dullness.

THE CLOTHING MARKETS.

[By Telegraph to BRADSTREET'S.]

From Boston, Mass.: There is a satisfactory movement in the clothing trade, though no special activity. Manufacturers report sales during May fully as large as for the corresponding month last year, and claim to have disposed of most of their spring stocks. They are now actively engaged in making up for the fall trade, which usually starts in July or August.

From Chicago, Ill.: Summer clothing and hats are in better request.

From Lawrence, Kan.: The clothing trade is brisk.

COTTON.

The market for spot cotton at New York for the past week shows no material change. Trading has been dull and spiritless. Prices have been lower, having dropped ⅛c. on Wednesday, to 10⅝c. for spot middling uplands, and closing at the latter figure last evening, 2 points off from the closing price one week ago. The sales for the week foot up as follows: For export 2,500 bales, and for consumption 1,053 bales. The deliveries on contract amount to 4,300 bales. The total sales foot up 3,553 bales, against 1,740 bales last week.

Below will be found the closing quotations for prompt delivery uplands at New York, on Friday evening, as compared with last week, and the corresponding week last year (quotations are based on the American standard of classification and on cotton in store, running in quality not more than half a grade above or below the grade quoted):

	This week.	*Last week.*	*Last year.*
Ordinary	7 11-16c.	7 13-16c.	9⅜c.
Strict ordinary	8⅛	8¼	9 15 16
Good ordinary	8 15-16	9 1-16	10¾
Strict good ordinary	9⅜	9¾	11 3-16
Low middling	10⅛	10¼	11⅝
Strict low middling	10 7-16	10 9-16	11⅞
Middling	10⅝	10¾	12 1-16
Good middling	11	11⅛	12 7-16
Strict good middling	11¼	11⅜	12 11-16
Middling fair	11¾	11⅞	13 3-16
Fair	12½	12⅝	13 15-16

STAINED.

	This week.	*Last week.*	*Last year.*
Good ordinary	7⅛	7¼	8 15-16
Strictly good ordinary	7 15-16	8 1-16	9 15 16
Low middling	8⅜	8¾	10⅜
Middling	9¾	9⅞	11⅝

The market for spot cotton closed weak.

The market for futures during the past week has been quiet and steady. Business has been light. Every day has recorded a decline, varying from 1 to 6 points for near months and 1 to 4 for later. The total sales for the week foot up 370,900 bales, against 452,400 for the same week last year.

The following table shows the closing quotations for futures at New York Friday evening, compared with last week and the corresponding week last year:

	This week.	*Last week.*	*Last year.*
June	10.58	10.77	12 05
July	10.62	10.77	12.14
August	10.34	10.77	12.21
September	10.04	10.19	11.92
October	9.94	10.21	11.51
November	9.96	10.12	11 35
December	10.03	10.14	11.36
January	10.13	10.20	11.50
February	10.23	10 30	11.65
March	...	...	11.77

The market for futures closed dull and easy.

The southern markets have been steady and inclined to dullness. Below will be found the sales for the week and the closing quotations for middling uplands at seven leading ports as compared with last year's quotations:

	Week's sales.	*To-day.*	*Last year.*
Galveston	5,579	10⅛	11⅞
New Orleans	10,500	10	12
Mobile	1,300	10	11¾
Savannah	1,075	10	11¾
Charleston	175	10	12
Norfolk	2,212	10⅛	11¾
Baltimore	186	10½	12 1-16

The total receipts of cotton at the ports since September 1 are 5,828,931 bales, an increase of 1,291,711 bales over the receipts of last year for the same time. The total at each port since September

1 is as follows, compared with the total to the same date last year:

	This year.	Last year.
Galveston	817,044	420,720
New Orleans	1,636,151	1,162,892
Mobile	309,766	259,650
Savannah	804,406	717,088
Charleston	565,195	489,227
Wilmington	128,477	132,831
Norfolk	788,360	596,787
Baltimore	73,167	35,582
New York	150,844	167,807
Boston	185,684	222,135
Philadelphia	92,213	74,866

Below will be found the receipts for each day of the week ending Friday, June 8, at eleven leading ports, as compared with last week and the same week last year:

	Sat.	S. & M.	Tues.	Wed.	Thurs.	Fri.
Galveston	891	479	493	1,096	1,514	824
New Orleans	699	1,853	2,446	1,163	432	748
Mobile	....	101	109	287	36	25
Savannah	533	444	155	361	323	136
Charleston	41	76	33	153	34	159
Wilmington	14	67	861	16	10	65
Norfolk	535	695	178	536	757	676
Baltimore	112	....	80	..	....	565
New York	22	99	738	13	....	....
Boston	550	229	..	573	483	215
Philadelphia	272	61	....	....	....	....
Totals	3,669	4,127	5,093	4,108	3,589	3,813
This day last week	4,398	4,882	5,865	3,432	3,149	7,725
This day last year	2,406	2,656	3,330	2,247	2,002	2,128

The total receipts at the ports for the week were 25,238 bales, against 30,280 last week and 14,978 for the corresponding week last year.

The receipts at the twenty-four interior towns usually reported were 5,930 bales, against 7,829 bales last week and 2,650 bales for the corresponding week last year. The shipments for the week were 14,164 bales, against 18,810 bales last week and 12,427 bales for the corresponding week last year. The stocks for the week were 95,119 bales, against 103,512 last week and 76,383 for the same week last year.

The Liverpool market for prompt delivery uplands has been quiet and easier, with a moderate inquiry, which was freely supplied. Quotations remained unchanged through the week, closing at 5¾d.

The future market at Liverpool has been dull and steady. Prices have suffered an average decline of about three points for near months and one point for later ones.

	This week	Last week.	Last year.
June	5 44-64d.	...	6 39-64d.
June-July	5 44-64	5 50-64d.	6 39-64
July-August	5 49-64	5 53-64	6 43-64
August-September	5 53-64	5 57-64	6 47-64
September-October	5 49-64	5 52-64	6 41-64
October-November	5 43-64	5 44-64	6 29-64
November-December	5 41-64	5 43-64	....

The sales for the week at Liverpool were 38,000 bales (of which 28,500 were American), against 94,000 (of which 55,000 were American) last year. The sales for export were 1,420 bales, against 14,500 bales last year. The sales for speculation were 530 bales, against 11,000 bales last year. The amount forwarded was 17,500 bales, against 9,800 bales last year. The stock in port is 984,000 bales (of which 740,000 are American), against 998,000 bales (of which 606,000 were American) last year. The total imports for the week were 67,000 bales (of which 54,000 were American), against 55,000 bales (of which 34,000 were American) last year, and the amount afloat 260,000 bales (of which 99,000 are American), against 326,000 bales (of which 70,000 were American) last year.

BOOTS AND SHOES.

[By Telegraph to BRADSTREET'S.]

From Boston, Mass.: The boot and shoe trade is as large as usual at this season. The manufacturers are well supplied with orders for early delivery, but not so much in hands for later months. Prices are steady. Nearly all the larger firms have placed their orders, and manufacturers are very busy. It is a matter of comment that the boot and shoe trade is about the only interest of importance that maintains a continued activity. Prices are close, but the volume of business is larger than last year, and satisfactory.

From Chicago, Ill.: Boots and shoes are meeting with an average sale.

THE BRITISH COTTON MARKET.

[By Cable to BRADSTREET'S.]

London, June 7.—Manchester cotton quotations are very dull. Yarns are rather cheaper.

Supplies of raw are thought to be ample until the next crops.

Imports from India in May were 221,000 cwts. less, from Brazil 44,000 less, while from the United States they were unaltered.

COTTON MARKETS.

[By Telegraph to BRADSTREET'S.]

From Providence, R. I.: The cotton market is dull, and sales are reported small. Middling uplands are worth 11c. and middling gulfs 11¼c. The stock on hand is about the same as last week.

From Philadelphia, Pa.: The consumptive demand has continued light, but prices have ruled steady.

From Louisville, Ky.: Cotton is dull and quotations unchanged, but the tendency is in buyers' favor.

From St. Louis, Mo.: Cotton is dull and slightly weaker. There are no spinners in this market now.

From Baltimore, Md.: Dullness prevails in the cotton market, and operations are light.

From New Orleans, La.: The feeling in cotton circles is that cotton prospects are fairly good, and that though a great deal of the visible supply of cotton may be already bought for future delivery, the amount in sight is large. The local cotton movement is small. Spots have dropped ⅛c.; futures 9 to 17 points on the year.

COTTON CROP REPORTS.

[By Telegraph to BRADSTREET'S.]

From Galveston, Tex.: Fine rains during the past week, favorable to the growing crops.

From Wilmington, N. C.: The weather is warm, with frequent rains. The cotton crop is backward. Receipts are small and the market is dull.

From Helena, Ark.: The weather is favorable, and the cotton has commenced to grow, but the stands are imperfect.

WOOL.

The situation has developed no change for the better during the past week. The volume of business has increased to some extent under more liberal offerings of new unwashed wools, which manufacturers whose stocks have run low have been obliged to purchase to bridge over early wants; but there has been a noticeable absence of speculative feeling, and little, if anything, has been done by large consumers in the way of providing stocks for future requirements. This hesitancy on the part of buyers is due largely to the prevailing uncertainty as to the practical effect of the new tariff on the markets for wool and woolen yarns and manufactured goods. It is believed in some quarters that this influence upon prices has been already discounted in many lines, but extreme caution is likely to characterize the trade until the matter has been actually put to a test. The unsatisfactory condition of the woolen goods trade also restricts demand. A good deal of machinery has been stopped during the week, and further suspensions are probable during the next thirty days. This movement to curtail production has been inaugurated by manufacturers as a remedy for the existing depression in the distributing trade. Some of the Rhode Island mills have announced a total stoppage for sixty days, and other mills in New England and the middle states have reduced their capacity and will work on short time for an indefinite period. The exact extent of the curtailment of production cannot be determined, but the suspensions announced are sufficient to cause a marked decrease in the consumption of wool during the next two months. Country markets continue quiet, but comparatively steady, at prices that are generally above a parity with the eastern markets. Stocks at primary points are therefore accumulating, and there is general expectation of lower prices as the season advances. Shearing is under way in Ohio and Pennsylvania, but few sales of new washed wools have yet transpired.

AMERICAN WOOL MARKETS.

[By Telegraph to BRADSTREET'S.]

From Boston, Mass.: Wool is dull and remains without improvement. There is no prospect of a favorable change at present. Buyers both here and in interior markets are holding back. Sales of the week were 1,400,000 pounds of all kinds. Ohio and Pennsylvania fleeces have been sold at 37@38c. for X, and 38@42c. for XX and XXX. Michigan fleeces have been sold at 36@37c., and a choice lot of 10,000 pounds at 38c. From 35@37c. is a fair quotation for Michigan X, and a lot of 15,000 pounds New York X sold at 35c. per pound. Combing and delaine fleeces quiet. Prices have ranged from 40@46c. for combing and delaine, and Kentucky combing at 25½@29c. per pound for low and good. In unwashed wools a fair business has been done, with sales of about 600,000 pounds of all kinds, including fine and medium western at 23@30c, choice northern California at 28@30c., and territory from 20@27c. per pound. Pulled wools in fair demand at 25@40c. for common and good supers, and 44@45c. for choice eastern and Maine. Considerable carpet wools have been received from Rosario, about one-half of which was on manufacturers' account. The market is very dull, and manufacturers do not offer within 2c. per pound of cost.

From Philadelphia, Pa.: Trade has been moderately active but purchases have been chiefly in small lots to bridge over near wants. Supplies small for the time of year, and prices consequently steady, but a decline generally expected when assortments increase.

From Chicago, Ill.: Wool is quiet. The prospect is that the clip will be fully up to last year's. Sheep are in splendid order.

From Louisville, Ky.: Wool quiet and barely steady, with liberal stocks.

From San Francisco, Cal.: Lower; large stocks; no buyers.

From Savannah, Ga.: Shearing has been going on for the past three weeks; much wool has been clipped and forwarded to market; sales are made quickly for fine lots.

IRON.

It is believed by many in the trade that the drop in the prices of American pig iron made on Monday places them at the lowest point at which they are likely to go as the result of the existing causes of depression. The cut from $22 to $20 for No. 1 and from $20 to $19 for No. 2 American, made by the Thomas Company, is but the formal admission and recognition of prices to which other sellers have been cutting in the shape of rebates on purchases made of them. During the past week sales of pig iron have been noticeably greater in this market than in the same space of time for several months. It cannot now be said that prices are any stronger than was to be expected after the decline, but the feeling in the trade has certainly improved, and buyers who have been out of the market for a long time have begun sending orders for larger lots than customary sales here have been averaging of late. The depressing effect of 160,000 tons of pig iron at the furnaces tributary to New York and Philadelphia markets still hangs over the situation, and it is believed that a few more furnaces will have to go to the wall before consumption can meet production and eat into stocks at all. The opinion has been expressed, however, inasmuch as heavy buyers are sending out sizable orders, and from the fact that the wants of the trade are always largest in the latter half of the year, that the outlook is fairly bright for a moderate revival in demand after July. Scotch iron here, despite somewhat lower prices abroad, is unchanged in quotations and it has enjoyed rather better inquiry. Arrivals have aggregated about 700 tons, part going in yard. The sales have been nominal. Stocks are unimportant, and to this fact the slightly better feeling in the Scotch trade is attributed. There are no new features to report in other lines. Bar is dull. Steel rails are firm at $38@$40.

THE BRITISH IRON MARKET.

[By Cable to BRADSTREET'S.]

London, June 7.—Pig iron, after a depression early in the week, is rather steadier. Makers of finished iron complain of the absence of new orders. Prices are weak. Shipments to the United States in May were about 250,000 tons less; to Australia there has been a good increase.

THE AMERICAN IRON MARKETS.

[By Telegraph to BRADSTREET'S.]

From Philadelphia, Pa.: Pig is lower again and very dull, but the general tone of the market for finished iron is good, considering all the influences at work. Fears of over-production create apprehensions as to summer and fall trade. Nails are the strongest thing on the list. Merchant bar is firm and fairly active. There is more doing in construction iron at the recent sharp concessions. Steel rails are selling fairly for summer delivery, and negotiations are pending for large lots for late fall delivery below $38. Old material is declining.

From Pittsburgh, Pa.: As a rule the iron mills are pretty busy working on orders which were booked in anticipation of a strike and stocking up to tide over the usual stoppage for repairs July 1. Were it not for these causes they would be experiencing a quiet time. Prices are low and far from being satisfactory. There are prospects of a continued demand for nails.

From Cleveland, Ohio: The situation here has changed but little, if any, during the week, and is much the same as during May.

From Chicago, Ill.: Hardware is ordered freely for the season, and bar and structural iron are moving freely; prices are firm; nails are in small supply, in good demand for consumption, and firm.

From Detroit, Mich.: In iron business is flat and prospects are poor. The ore mines in the northern peninsula are making very fair contracts, but the output for the season will probably be less than half what it was last year.

From Milwaukee, Wis.: In the iron trade there continues the same depression of last week, and the furnaces of the North Chicago Rolling Mills at Bay View are still out of blast.

From St. Louis, Mo.: Manufactured iron is very firm with a tendency to stronger prices. The demand is good. Pig iron is considered the key to the price problem, and is weak and unsettled. Buyers do not approach holders' figures and transactions are small.

From Minneapolis, Minn.: Hardware is and has been especially active.

COAL.

The week ending June 2 was a busy one at the anthracite mines, and the output was therefore heavy. Trade in this variety of coal, while not yet enjoying that degree of activity which many have expected and which has been so long deferred, still shows marked gains as against the opening of May. More coal is now going into consumption, and prices, while no higher, are in many instances nearer the schedule rates than formerly. The anticipated revival in the demand for anthracite coal in the west has already made its appearance, as pointed out by the appended special dispatches to BRADSTREET'S from Buffalo and Milwaukee. The opinion has been expressed that the coastwise trade in coal will be compressed into an unusually short period of time this year, which points to higher freights. The demand for bituminous at Pittsburgh and other western centers will not now be so ruinously curtailed as was likely had the strike in the iron mines in that region taken place. The railroad mines are still at work, awaiting the result of arbitration.

COAL MARKET REPORTS.

[By Telegraph to BRADSTREET'S.]

From Boston, Mass.: The coal market is dull. There has recently been an unsuccessful movement looking to an advance in price to domestic consumers, but in the present condition of the market it is improbable that an advance could be sustained. Receipts at this port last week 89,356 tons, against 22,772 tons for the previous week. Receipts since January 1, 765,588 tons, against 685,333 tons same time last year.

From Providence, R. I.: The coal market is dull; prices range low, and the stock on hand is small.

From Buffalo, N. Y.: The movement of coal here has been in very liberal proportions, but prices have been subject to some concessions from card rates. A satisfactory feeling exists. Stocks for shipment are low and will not exceed 85,000 tons. With the season thirteen days shorter than last, shipments by water to date will aggregate 263,337 tons, as compared with 240,446 tons in 1882, and 112,603 tons in 1881.

From Chicago, Ill.: Coal is quiet. Bituminus is plentiful, weak, and held in moderate supply.

From Milwaukee, Wis.: The steady increase of the coal trade of Milwaukee is one of the most significant features of her commerce in addition to the large local consumption for domestic and manufacturing purposes. The excellent facilities now offered for shipping to all parts of the northwest has given advantages possessed by few if any other lake ports. The eastern coal companies have not been slow to perceive and profit by these advantages, which is evidenced by the establishing of several immense yards here by wealthy eastern concerns recently.

PETROLEUM.

There is scarcely anything new to be said about the petroleum speculative market during the past week. The manipulations of the previous week were continued, and the fight between the longs and shorts has become intensified. During the earlier portion of the week the bears seemed to have achieved a partial victory. Rumors of iron-firm failures (so far as can be learned, erroneously reported to have lost money on oil) and the dropping of several blocks of oil of 50,000 barrels each onto the market, had the combined effect of breaking down prices. On Monday, therefore, the decline amounted to 7c. during the day, and on Tuesday another decline was forced, by similar tactics, of 3¾c., a total decline in two days from the highest figure of Monday of 12c. On Wednesday some strength was gathered, and offers to buy brought price up from $1.11¼ at the opening to $1.18¼, and at the close the quotation was $1.18. The market opened strong on Thursday at $1.19, and advanced to $1.20. Here the little buyers became anxious to realize on their holdings, and free sales were made during the day, under the influence of

which prices gradually lowered, resting at the close at $1.16¾. The confidence of the bulls in higher prices continues undiminished, and there is nothing in the news so far received from the regions to disturb them in their position. There has been a small increase in the production of the Cooper district, owing to the wells having been torpedoed. The average daily pine-line run during May was 67,872 barrels, against 68,841 barrels in April, and the average daily shipments 63,656 barrels, against 63,252 barrels in April. The daily average exports from New York in crude equivalent during May was 45,750 barrels, and in April 26,538 barrels. The wells therefore ran less oil to the tanks of the pipe-line companies in May than April, and the pipe-lines have shipped more oil out of the regions than in April. The exports have increased 80 per cent. at New York alone, which port now does by far the largest share of the export trade in petroleum. There is as yet no prospect of an increased production. No twin brother to the famous Cherry Grove region has been discovered. With the pipe-line companies continuing to ship more oil with exports increasing and production generally evincing signs of a gradual though certain decline, the bulls in oil are confident of winning. Yet there is nothing more disastrous than to speculate in oil on just such logical views of the situation as these. The total pipe runs for May to the 30th amounted to 2,037,249, and the shipments for the same period were 1,566,422 barrels. The large runs are explained partly by the removal of all well stocks and in part from additions of private stocks. This was due to the advance in price, and should the high figures be maintained, in all probability the wells will be kept bare of stocks.

The speculative market for petroleum opened on Friday at $1.16¾. During the morning there was little or no news beyond the fact that the Cooper tract wells have declined since June 1 about 1,000 barrels, which indicates that this region is rapidly becoming exhausted. Prices were made during the day solely by the representatives of the bull syndicate and the Standard Oil Company. At the close at noon a decline to $1.16⅛ had been made. The afternoon session began at $1.16, a further drop of ⅛c. Almost at once the bears began an onslaught, which crowded prices down by eighths to 15¾ at 2 oclock. At the close the quotation was $1.15¾ bid, against $1.19¾ at the close on last Friday, a decline of 4c. for the week. The market continued very nervous towards the close, became excited, running up as high as $1.16⅜ and dropping off again to $1.15¾ at the last hour.

The following exhibits the fluctuations in prices of certificates of crude during the week ended last evening:

	Opening.	*Highest.*	*Lowest.*	*Closing.*
Saturday	1.19½	1.25⅛	1.18⅜	1.19⅞
Monday	1.21	1.21⅜	1.14	1.14⅜
Tuesday	1.14⅜	1.15⅞	1.09⅝	1.11⅛
Wednesday	1.11¼	1.18¾	1.10⅞	1.18
Thursday	1.16	1.22	1.15¼	1.16¾
Friday	1.16¾	1.17¼	1.15	1.15¼

Prices of refined weakened on Monday in sympathy with crude, and prices were reduced ⅛c. Crude in barrels was also cut down ⅛c. On Tuesday another eighth was lost on refined, but on Wednesday the market stiffened and later in the week this strength was maintained.

The quotations for certificates of crude petroleum and of petroleum products last evening, as against those of June 1, May 25 and May 18, are as follows:

	May 18.	*May 25.*	*June 1.*	*June 9.*
Certificates, crude	1.02¾	1.03¼	1.19¾	....
Refined, 110°	7⅜	7⅜	8	7¾
Refined, 70°	7⅜	7¾	8¼	7⅞
Crude, in barrels	6⅞@7⅜	6⅞@7½	7⅜@8	7¼@7⅞
Case, plain	9½	9½	9½	9½
Naphtha	5¾	5¾	5¾	5¾

The total quantity of petroleum (crude equivalent) exported from the United States from January 1 to June 2 was 250,137,653 gallons, against 247,971,318 gallons in a like period of 1882, an increased exportation of 2,166,335 gallons. For the week ending May 26, the foreign shipments were 17,640,201 gallons, against 11,325,467 gallons in the previous week. New York city's export of petroleum from January 1 to June 2 amounted to 210,296,785 gallons, against 202,709,903 gallons in a like period in 1882, an increase of 7,586,882 gallons this year. The bureau of statistics report of exports of petroleum and petroleum products from the United States for April shows a total of 34,614,996 (actual) gallons of oil shipped, valued at $3,172,492, against 47,273,230 gallons in April, 1882, valued at $4,186,953. For the ten months ending April 30, the totals are 396,941,154 gallons, valued at $35,195,865, against 461,435,569 gallons, valued at $42,394,212.

PETROLEUM MARKETS.

[By Telegraph to BRADSTREET'S.]

From Baltimore, Md.: Refined petroleum is dull and prices lower.

OCEAN FREIGHTS.

During the past week the only chartering of importance at New York has been for petroleum vessels. This has been fairly active with an exception on Tuesday, when the uncertainty of prices of petroleum developed in that market kept shippers out of the market. Steam rates in the berth have been fairly active for provisions as well as for cheese. For grain they have been spasmodically active only. On the whole the market has continued moderately active only, and rates, except in the instances noted, dull.

OTHER OCEAN FREIGHTS MARKETS.

[By Telegraph to BRADSTREET'S.]

From Boston, Mass.: Dull, and rates to all points are merely nominal.

From Philadelphia, Pa.: There has been more doing in petroleum than in grain charters, but no activity in either. Rates have ruled fairly steady Liverpool steamer room has been in fair demand for grain and miscellaneous shipments.

From Baltimore, Md.: The freight market remains steady and quiet.

From Wilmington, N. C.: Ocean freights, foreign and coastwise, are steady.

From New Orleans, La.: Ocean freights are dull. Liverpool, steam, cotton 5/16d. Two steamers are chartered for grain to Cork for orders or the continent at 5s. 6d. per quarter, if ordered direct 3d. off. Oil cake or meal, by sail, direct to ports of the United Kingdom or the continent 28s. per ton.

ATLANTIC COAST FISHERIES.

[By Telegraph to BRADSTREET'S]

From Portland, Me.: The fishery trade here is good.

From Boston, Mass.: Receipts of new mackerel are increasing, but not yet large enough for the demand, and dealers have large orders on hand unfilled. Prices are higher than last year. Codfish are scarce, with no movements of importance.

WHISKY MARKET REPORTS.

[By Telegraph to BRADSTREET'S.]

From Louisville, Ky.: Whiskies are slow and steady.

TOBACCO REPORTS.

[By Telegraph to BRADSTREET'S.]

From Louisville, Ky.: Leaf tobacco is strong, with an advance during the week: of ½@¾c. on dark lugs and leaf. Burleys firm and well supported. The receipts are large, but the offerings are readily taken, and stocks are not accumulating. Weather very favorable for the planting season, and a good acreage is being started. Manufactured tobacco is firm and active.

From St. Louis, Mo.: Leaf tobacco is firm, active and in liberal offerings of improving quality.

LUMBER.

[By Telegraph to BRADSTREET'S.]

From Minneapolis, Minn.: The lumber market is steady and fairly active. The late rains are bringing the logs out of the small streams and the lumber mills running to their full capacity, with logs enough in sight to keep them busy to the close of the season.

From Wilmington, N. C.: Timber and lumber are quiet and shingles firm.

HIDES AND LEATHER.

[By telegraph to BRADSTREET'S.]

From Buffalo, N. Y.: In the leather trade buyers prefer waiting until more is known regarding the crops before making purchases for full requirements.

From Chicago, Ill.: Tanners report a better manufacturing demand for leather.

From Savannah, Ga.: Hides are dull, but fair receipts are reported.

NAVAL STORES.

[By Telegraph to BRADSTREET'S.]

From Wilmington, N. C.: Spirits of turpentine is firm at the advance. Rosins, tar and crude are steady.

From Savannah, Ga.: Naval stores are firmer for fine rosins and dull for lower grades.

SPECIAL LOUISIANA TRADE REPORT.

[By Telegraph to BRADSTREET'S.]

From New Orleans, La.: Sugar is well held. Molasses is dull though the stock is considerably reduced. It is feared there is too much rain for the cane crop. Rice is active, strong and higher. Fair to prime is 5½ to 6⅛c.

THE CHICAGO BUSINESS SITUATION.

[Special Correspondence to BRADSTREET'S.]

Chicago, June 6.—Although this is the first week in summer the demand for loans at the banks keeps up remarkably well, but the supply of funds is above the requirements of borrowers and the market is easy at 5@6 per cent. to those who offer choice paper or collaterals. New York exchange meets a large demand, this partly due to the fact that all other eastern cities and towns are buyers here, and rates are steady at 60@75c. premium per $1,000. The warm weather of the past few days has called out a better demand for light summer goods of every description, and merchants report an improved trade, and but for the fact that there was a larger amount of moisture than was desirable the sales of such fabrics would have been much larger. Summer clothing, hats and straw goods have sold more freely, and a slight increase is reported for the better grades of boots and shoes. Staple hardware, bar and all classes of structural iron and nails have met a fairly satisfactory demand at steadily supported prices. The demand for all leading lines of groceries is more active, especially for sugars, which are very largely called for by consumers, and stocks are moderate. Merchants say collections are good as could be expected at this season, and that the general tone of advices regarding the growing crops is much better than at this date during the two years immediately preceding, winter wheat being the only article that does not promise a large yield. The labor troubles seem in a fair way of a speedy adjustment; in fact the question may be regarded as already settled. Nearly all the iron mills have resumed work, and the remainder will do so within the next fortnight. The lumber trade is more active, but it is generally conceded that the prices realized leave very little profit after deducting the cost of manufacture and distribution. The coal trade is dull, but should the crop outlook continue good during the current month the manufacturing establishments will all resume active operations, and coal men really feel more encouraged than at the opening of May. The grain markets are demoralized and weak. The stocks are large, steadily increasing, and these facts, in connection with an improved crop outlook, discourages buying by legitimate dealers, and the trade was never before so completely under the control of reckless speculators, who have reduced the business to a level with the lowest species of gambling. The same is true of provisions, the market for hog product being destitute of a single legitimate feature; hence prices go up and down at the will of manipulators, while the statistical position is daily being weakened by increasing stocks and the fact that prices are too high to allow a free consumption.

THE YIELD OF PRECIOUS METALS.

According to a special report of the Director of the Mint the yield of the mines of the United States for the year 1882 was $32,500,000 in gold, $46,800,000 in silver—a total of $79,300,000. Compared with the previous year, this shows a decline of $2,200,000 of gold and an increase of $3,800,000 of silver. The comparative decline in the production of gold was greater in California than in any other state or territory, the yield being $1,400,000 less than in 1881. This resulted from the interruption of hydraulic mining in some of the northern and middle counties of the state, owing to litigation, and also from a falling off in the production of the quartz mines at Bodie. In Oregon, where the mining is chiefly placer, there was a diminution, and also in Nevada, Idaho and Dakota. In silver the principal increase was in Idaho, Montana and New Mexico, Idaho showing an increase of $700,000, Montana, $1,740,000, and New Mexico, $1,500,000. Colorado furnished about $500,000 less silver than in 1881. The production of the country was from the states and territories as follows:

	Gold.	*Silver.*
Alaska	$150,000	....
Arizona	1,605,000	$7,500,000
California	16,800,000	845,000
Colorado	3,360,000	16,300,000
Dakota	3,300,000	175,000
Georgia	250,000	....
Idaho	1,500,000	2,000,000
Montana	2,550,000	4,370,000
Nevada	2,000,000	6,750,000
New Mexico	150,000	1,800,000
North Carolina	190,000	25,000
Oregon	830,000	35,000
South Carolina	25,000	....
Utah	190,000	6,800,000
Virginia	15,000	....
Washington Territory	120,000	....
Wyoming Territory	5,000	....
Totals	$32,500,000	$46,800,000

In 1882, $9,939,975 were paid in dividends by incorporated companies; this was a slight falling off from the preceding year. One hundred and seventy-five companies made assessments upon their stockholders amounting to about $9,000,000. The excess of production over consumption of the year, added to the net imports of gold, resulted in a net gain to the circulation of less than $200,000 in gold, but by coinage and net imports of coin the metallic circulation gained nearly $39,700,000 in gold, and about $27,600,000 in silver coin. California still maintains the second place in the list of gold and silver producing states and territories. Its gold fields show no evidence of exhaustion; on the contrary, the magnitude of the deposits in the ancient river beds, the number and permanence of the quartz lodes, as well as the virgin ground, insure a golden harvest for many years to come.

Nevada shows a decrease in gold and silver of about $1,500,000, which is chiefly due to the rapid decline in the yield of the great Comstock lode, which reduced it from first to the third rank. This State has suffered probably more than any other mining section from stock speculations and mismanagement in mining, but a reaction seems to be setting in, and mining in Nevada is being conducted on a more substantial basis.

In Idaho the production of gold was slightly less than in the preceding year, but there was a notable increase in silver, due to the development of the mines of the portion of Alturas county known as the Wood River country. This is one of the latest discovered mining regions of this country.

In Montana, as in Idaho, the mining industry has increased in importance, the increased yield having been in silver, which, from $2,630,000 in 1881, is in 1882 $4,370,000. The opening of the territory by the Utah & Northern Railroad has largely added to its prosperity. Utah shows an increased production of $400,000 in silver. The yield of its great mines, the Ontario and Horn Silver, has largely contributed to this. Arizona has maintained her large production of nearly $8,500,000. The mines of Cochise county, in which the principal mining district—Tombstone—is situated, yielded over $1,000,000 more than in the previous year, but in Pima county the yield fell off $600,000 from reduced production of the Harshaw mine, and in Pinal county there was a less yield by $350,000.

New Mexico has not hitherto appeared as a large producer of bullion, but in the last two years rich discoveries have been made in the Black Range and Lake Valley regions, which have increased the annual production to $1,800,000. In Colorado it has been claimed that there was a large excess of production in 1882 over that of 1881, but an examination of the reports of shipments of ore and bullion and of the smelting work shows that the increase has been in the value of the base metals. The principal gain was in Lake county and the San Juan region, the latter resulting from the opening of new mines and improved facilities for shipping ore and bullion.

ENGLISH CAPITAL INVESTED IN SOUTHERN LANDS.

The *Times-Democrat*, of New Orleans, has the following: It is noticeable that most of the large land purchases now being made in this country are by English syndicates or capitalists. It was an English company which purchased 311,000 acres of land in the Panhandle of Texas the other day, and an English syndicate that bought 1,300,000 acres of bottom land in the Yazoo district of Mississippi, which they will drain and place in good condition for cultivation.

The Florida purchase made of Disston is even larger. Disston obtained 4,000,000 acres of land from the state of Florida and resold half of it, 2,000,000 acres, to an English company, headed by Sir E. J. Reed, the famous civil engineer, which company proposes to drain this country, divide it into 20 acre lots, clear two or three acres on each, erect a house and furnish a settler with a home immediately on his arrival.

Besides these, there have been heavy purchases of lands by English companies in Kansas and Colorado, but the south still seems to be the favorite place of investment for their capital.

Those Englishmen who have come here to see and investigate these purchases have all returned home well pleased with them. They give as the reason why so much English capital is now turned toward America, the small outlet there is for it at home. Land in England is at a discount; the manufactories are overproducing, and there is no room for more. The only place where money may be invested with profit and safety is in America, and the best investments here are in the cheap lands to be purchased in the south.

These investments are, of course, merely experimental as yet, and it remains to be seen whether they will prove profitable or not. If they should, the south ought to be able to command as much capital from England as it desires to improve and develop its waste places.

ST. LOUIS OPINION ON THE ERIE CANAL QUESTION.

The *Globe-Democrat* says: No less an authority than the president of the New York Produce Exchange tells his fellow-citizens that if they are to maintain their commercial supremacy, "and would have the Erie canal remain the great regulator of transportation, it must be enlarged so as to double its present capacity." This must be rather discouraging to the New Yorkers who have been reducing canal tolls for years, and finally abolished them altogether. It would seem to be a confession that unless freight-carrying on the Erie canal is actually subsidized there is no security against large amounts of grain going down the Mississippi or reaching the seaboard through other ports than New York. The presumption is that the people who would be called on to foot the bills in case the capacity of the canal was doubled will express themselves to the effect that they have done enough in behalf of the commercial interests in giving them the use of the canal free, especially as it remains to be proved that there will be an adequate return from the outlay involved in the enlargement.

If things have reached such a stage that New York can only retain its commercial supremacy by virtually paying freights from the west through taxation the time has come for the city to surrender. But we presume that the president of the Produce Exchange overstated the matter. New York will long retain the commercial supremacy, but it will monopolize things rather less in the future than it has in the past. Other points will enjoy their percentage of the increase of national business also. The volume of exports from the United States will grow indefinitely, and they need not necessarily all find their exit through the Narrows. No amount of digging can furnish water courses which can compete with the gigantic network of navigable rivers in the Mississippi valley, and the mouth of the Mississippi must be the outlet and inlet for a vast amount of merchandise. Railways cannot place their rates low enough to divert much of this trade from its natural channel. The limit of low prices has been almost, if not quite, reached. Free tolls on the Erie canal have done their utmost, and still the Mississippi business grows and must continue to grow with the population and products of the interior of the continent. The export business of the United States cannot be controlled at any one port. The country is too big for that. Competition will exist wherever there is a good harbor commanding communication with a productive region. And it is all the better that it is so. It keeps wharf and storage charges down to the lowest practicable point, and benefits thus both the producer and consumer. There may be wisdom in doubling the capacity of the Erie canal. It may strengthen New York's hold on trade in a way to justify it. But the assertion that it is a necessity, if true, is a revelation of a growth in other quarters which is of a permanent nature.

TRADE EMBARRASSMENTS.

There were 148 failures in the United States reported to BRADSTREET'S during the past week, 12 less than the preceding week, 18 more than the corresponding week of 1882, and 66 more than the same week of 1881. Compared with the previous week the middle states had 37, an increase of 3; New England states 28, an increase of 3; southern states 27, an increase of 2; western states 40, a decrease of 16; Pacific coast states and territories 16, a decrease of 4; Canada and the Provinces 32, an increase of 17. The failures generally were not important. The Grafton Iron Company of Pittsburgh, Pa., and Leetonia, Ohio, asked an extension, and A. O. Tinstman & Co., coke manufacturers of Pittsburgh, assigned. In the principal trades they were as follows: Grocers 23; general traders 20; liquors 11; shoes 9; clothing 9; dry goods 6; millinery 5; hardware 5; manufacturers 5; furniture 4; tobacco and cigars 3; produce and provisions 3; lumber 3; flour, grain, etc. 3; hotels and restaurants 3; jewelry 3; brokers 2; drugs 2.

ALABAMA.

BIRMINGHAM.—Hugo Cahn has failed and left town.

BIRMINGHAM.—George O. Dinckelberry, dining-room, has been sold out by the sheriff.

BIRMINGHAM.—A. V. Fletcher, grocer, has failed.

BIRMINGHAM.—A. W. Fulghum, lumber, has failed and it is said will pay nothing.

CALIFORNIA.

ALAMEDA.—T. Marks, merchant, has filed a petition in insolvency.

COLUSA.—J. Dunlap, grocer, has filed a petition in insolvency. Liabilities about $5,000; nominal assets $2,000.

REDDING.—Mrs. George Groves, millinery, has assigned and called a meeting of creditors.

SAN DIEGO.—G. A. Hart, general store, has filed a petition in insolvency.

SAN FRANCISCO.—A. J. Durand, commission, has filed a petition in insolvency.

SAN FRANCISCO.—N. Giamboni & Co., restaurant, have assigned.

SAN FRANCISCO.—R. Munk, printer, has filed a petition in insolvency.

SAN FRANCISCO.—T. G. Parker & Co., tailors, have filed a petition in insolvency.

SAN FRANCISCO.—T. Sullivan, shoes, has filed a petition in insolvency.

SAN FRANCISCO.—J. Wray, formerly butcher, has filed a petition in insolvency.

SAN FRANCISCO.—E. Ziebelin, flowers, has filed a petition in insolvency.

SAN JOSE.—J. C. Koppel, tobacconist, has sold out and called a meeting of creditors.

SANTA ROSA.—Rosa O. Morrison, general store, has been attached.

CONNECTICUT.

DANBURY.—The liabilities of Hawley & Co., dry goods, are $12,900; assets about $12,000. In addition Mr. Hawley owns real estate valued at $7,000 and mortgaged for $2,000. It is believed the creditors will realize in full.

DANBURY.—E. J. Kennedy, confectioner, has been closed by attachment.

HARTFORD.—C. E. Hosmer, cigars and jewelry, has been attached.

MIDDLETOWN.—Parmelee & Bidwell, shoes and gents' furnishing, have assigned.

NEW HAVEN.—Charles Scully, trading as Charles Scully & Son, shoes, has assigned to Stephen B. Butler.

NORWICH.—Edward F. Twist, teas, has assigned to Merritt D. Dexter.

SOUTH NORWALK.—Mullings Brothers, carriage makers, have assigned.

WINDSOR LOCKS.—M. J. Gilligan, shoes, has assigned to John Coats.

DAKOTA.

BATHGATE.—Parkhurst & Lyons, general store, have failed and gone out of business.

DELAWARE.

GEORGETOWN.—John J. Wilkins, general store, has been closed by the sheriff.

DISTRICT OF COLUMBIA.

WASHINGTON.—John Dowling, teas and coffees, has assigned, giving a preference to Thorn, Abram & Co.

GEORGIA.

ATLANTA.—The estate of George H. Brown, crockery, offers to compromise at 20 cents. Liabilities $2,000; nominal assets $1,500; preferred claims $400

BRUNSWICK.—Goldsmith & Work, general store, are said to have settled at about 37 1-6 cents.

ILLINOIS.

CARTERVILLE.—H. G. Price & Brother, drugs, have assigned to George L. Powell.

CHICAGO.—The stock of Kempton & Flint, brick manufacturers at Jefferson, has been levied upon by the sheriff.

EL PASO.—M. C. Young, dry goods, has assigned.

MOUNT STERLING.—Michael Connery, harness, has failed and left town.

TOWER HILL.—P. H. Sims, grocer, has assigned.

WESTLAKE.—Humphreys, Walters & Co., general store, have been placed in the hands of a receiver.

INDIANA.

CONNERSVILLE.—Mrs. Charles Ayler & Son, dry goods, have assigned.

INDIANAPOLIS.—S. J. Hadley & Son, agricultural implements, have assigned.

INDIANAPOLIS.—Leopold Mayer, clothing, has assigned.

MUNCIE.—W. R. Maddy, formerly Maddy Brothers, grocers, has assigned.

IOWA.

BURLINGTON.—The Ray & Filley Company, agricultural implements, has assigned to Charles Willner. Liabilities about $20,000. The assets, it is thought, are sufficient to pay in full. The company succeeded the business of Ray & Filley, and was incorporated in February, 1881, with a paid in capital of $15,000.

DALLAS CENTRE.—Barr & Frick, general store, have been attached.

DES MOINES.—The Atlas Distilling Company has assigned to C. C. Cole, on account of a disagreement among the stockholders. The company previously gave two realty mortgages for $31,332.

DES MOINES.—McNutt & Co., grocers, have assigned to L. J. Subae. Liabilities $525.

HOPKINTON.—W. H. Dillon, flour, has been attached by five creditors for $2,045. Liabilities about $6,000; assets $1,900.

McGREGOR.—Eugene C. Scott, furniture, is in the hands of the sheriff.

KANSAS.

EMPORIA.—Wilborn & Co., dry goods, have assigned. They became overstocked.

REPUBLIC.—Forsher & Kamp, drugs, are reported embarrassed.

KENTUCKY.

CADIZ.—L. E. Penn, jeweler, is reported to have failed.

HOPKINSVILLE.—N. B. Edmunds, agricultural implements, has assigned. Assets $3,000.

HOPKINSVILLE.—Frank F. Gorman, tailor, has assigned to H. J. Stiles, Jr. Liabilities $4,800; assets $2,000.

LOUISVILLE.—William Conry, grocer, has assigned to Harry Stucky.

PEMBROKE.—Harvey Smith, saloon, is reported to have assigned to T. F. Hanna. Liabilities $1,200; nominal assets $900.

PRINCETON.—J. W. Hunter, general store, has assigned. Liabilities $7,500; assets $5,500.

WEST POINT.—Fischer & Jenkins, general store, have assigned.

MAINE.

BANGOR.—James Cunningham, grocer, has failed, and offers 40 cents. Liabilities $5,800; actual assets $3,200.

CASCO.—D. H. Dyer & Co., general store, and Taylor & Spiller, lumber, have given trust deeds for benefit of creditors.

DOVER.—Miss L. E. Spurling, millinery, has failed.

GARDINER.—Alfred Chase, grocer, is in insolvency. Liabilities $5,000; nominal assets $1,600.

GARDINER.—Parker Patten, fish, has been attached.

PORTLAND.—The Ocean Street Railroad Company has been attached.

PORTLAND.—The Whitney Gaiter Shoe Company owe about $6,000; assets about $1,000. It has gone into insolvency.

PRESQUE ISLE.—J. H. Atherton, saloon, is in insolvency.

SKOWHEGAN.—A. S. Burke, grocer, offers 33 cents. Liabilities $4,000; actual assets $2,500.

SPRINGVALE.—Samuel Valleri, general store, has failed, and is said to be settling at 50 cents.

MARYLAND.

BALTIMORE.—T. W. Boyer, grocer, offers 33 1-3 cents in thirty days. Liabilities about $5,000; assets $1,850.

BALTIMORE.—H. X. Hall, shoes, has assigned to W. B. Trundle. Liabilities $7,000; nominal assets about $3,500.

BALTIMORE.—Petition has been filed to foreclose a mortgage against the estate of Philip Schmick, slater.

ROCK SPRING.—L. T. Jenkins, general store, has been closed by the sheriff and left town.

MASSACHUSETTS.

AYER.—Briggs & Keely, iron founders, have settled at 35 cents.

BOSTON.—George W. Dean & Co., wholesale fruits, have failed.

BOSTON.—The Hathaway Steamship Company owes about $44,300, of which $10,000, due the Manufacturers' Loan and Trust Company, is secured by mortgage on the steamer Secret, and $2,700 owed seamen for wages is secured by liens on steamers. The assets consist of steamer Hunter, libelled for seamen's wages for $1,200; insurance of $8,000 (face value), less premium notes on the lost steamer City Point; office furniture in Boston and Annapolis, N. S., $125; claim against Mr. P. Warden about $600; scow and plant at Annapolis, N. S., $50; and two cargoes of coal (attached) $800.

BOSTON.—E. N. Hunting, brush manufacturer, has been attached by two New York creditors for $943.

BOSTON.—W. L. Wade, produce, has failed. Liabilities about $2,000; no assets.

BROCKTON.—The stock of Charles S. Chase, hats, has been sold by the sheriff.

BROCKTON.—H. A. & C. Copeland, shoe manufacturers, have gone into insolvency.

HOLBROOK.—C. B. Holbrook, provisions, has failed.

LYON.—R. C. Judkins, shoe manufacturer, has been closed by attachment. Liabilities about $48,000; assets small.

MALDEN.—C. Batchelder, currier, is in insolvency.

MAYNARD.—The Riverside Co-operative Association has been attached.

MEDFORD.—Jerome E. Collins, fish, is in insolvency.

NEW BEDFORD.—James W. Spencer, carpenter and builder, has failed.

SPRINGFIELD.—E. D. Chapman, drugs, will settle at 25 cents.

STONEHAM.—B. G. Barker, jeweler, is reported to have failed. Liabilities $2,300; nominal assets $750.

WESTPORT.—George E. Tripp, grocer, offers 50 cents.

MICHIGAN.

DAVISBURG.—G. W. Dennis, hardware, has been attached

PORT HURON.—D. Campbell, grocer, has been closed by creditors.

LOWELL.—Clark & Smith, grocers, have been closed up under a chattel mortgage.

MINNESOTA.

MINNEAPOLIS.—E. A. Nordquist, shoes, has given a bill of sale.

MINNEAPOLIS.—Willover & Co., and L. N. Alger, saloon, have been attached.

MINNEAPOLIS.—S. H. Wright, furniture, offers to compromise at 50 cents.

NORTH BRANCH.—August Johnson, saloon, has assigned.

PERHAM.—E. E. Luce, banker, who recently failed, has assigned to C. H. Peak.

MISSOURI.

CHARLESTON.—John Jones, grocer, has assigned to J. C. Russell. Liabilities $2,000; assets $744.

KANSAS CITY.—R. Fritz, saloon, has had a mortgage foreclosed.

KANSAS CITY.—P. J. Kennedy, saloon, has been closed by the sheriff.

ST. LOUIS.—Flint & Co., 5-cent store, have assigned. Assets $4,100.

ST. LOUIS.—Quinn & Bosher, hats and caps, have been attached and are advertised to be sold out by the sheriff.

ST. LOUIS.—Samuel L. Marks & Co., cigars and commission, gave a chattel mortgage for $4,092 and assigned. Assets $7,000.

MONTANA.

FORT BENTON.—William Foster, saloon, has been attached.

NEW HAMPSHIRE.

OSSIPEE.—Moulton & Linington, lumber, are reported to have failed.

NEW JERSEY.

MULLICA HILL.—J. H. Mounce, flour, feed, etc., has failed.

NEWARK.—Simon Fleischer, wholesale millinery, has assigned.

SALEM.—J. H. Mounce & Co., millers, have failed. Their liabilities are reported at $70,000.

TRENTON.—William J. Owens, clothing, has been closed by the sheriff.

NEW MEXICO.

ALBUQUERQUE.—Casey & Moore, cattle, have been attached.

ALBUQUERQUE.—Mrs. C. Pishenot, grocer, has been closed by creditors.

SAN MARCIAL.—Speare Brothers, general store, have been attached.

NEW YORK.

ADDISON.—J. W. Gordly, tailor, has been closed by the sheriff.

BROOKLYN.—Eben D. Newman, lumber, has assigned to Frank R. Jones.

BROOKLYN.—David Rubens, dry goods and millinery, has assigned to Moses Sonborn.

BROOKLYN.—John Vecchio, shoes, has assigned to W. A. Berganime, giving preferences for $2,300.

COTTAGE.—John Crandall, manufacturer of lumber, is reported to have assigned.

HORNELLSVILLE.—George W. Hurd & Co., grocers, have assigned.

NEWBURGH.—Mrs. E. J. O'Reilly, grocer, has been closed by the sheriff.

NEW YORK CITY.—The American Metaline Company, lubricants, has been placed in the hands of John C. Campbell, as receiver, on the application of Charles C. Tracy, the secretary, who, with others, obtained a judgment for $11,159 for money loaned, part of which was satisfied by a sale of part of the company's property. The debts, which on January 1 were $62,000, are said to be entirely to stockholders. It was incorporated about ten years ago with a nominal capital stock of $1,000,000.

NEW YORK CITY.—The schedules of Belcher & Bagnall, machinery, show liabilities $10,335; nominal assets $7,289; actual assets $3,862.

NEW YORK CITY.—Gustave Busch, furniture, assigned on the 8th inst. to Otto Pullick, giving three preferences to relatives for $1,485.

NEW YORK CITY.—William Cockcroft, Jr., manufacturer of baseballs, assigned on the 7th inst. to James O. Weill.

NEW YORK CITY.—The schedules of Cohn & Fox, manufacturers of shoes, show liabilities $24,865; nominal assets $11,674; actual assets $7,056.

NEW YORK CITY.—John A. Estlund, furniture, assigned on the 5th inst. to Philip Sondheim, giving a preference to Dora Estlund $800.

NEW YORK CITY.—Francis F. Leich, desk manufacturer, assigned on the 8th inst. to Lazarus Nordlinger, giving three preferences for $3,250.

NEW YORK CITY.—The schedules of Maxfield & Co., wholesale fruits, show liabilities $160,894; nominal assets $151,009; actual assets $68,689, consisting of good accounts $51,537, stock $17,152.

NEW YORK CITY.—The schedules of Myers Brothers, stationers, show liabilities $14,335; nominal assets $23,295; actual assets $18,018.

NEW YORK CITY.—The schedules of Jesse Oakley & Co., soap, show liabilities $309,596; nominal assets $294,394; actual assets $160,635.

NEW YORK CITY.—The schedules of Solomon Orgler, manufacturer of cigars, show liabilities $17,570; nominal assets $14,711; actual assets $6,637.

NEW YORK CITY.—George B. Pelham, architect, and his wife Eliza, assigned on the 7th inst. to John J. Bowes. He has been recently building an apartment house on 57th street, west of 9th avenue, in the name of his wife. The lot cost $22,000, and is with the building mortgaged for $50,000.

NEW YORK CITY.—Louis R. Philip, clothing, assigned on the 6th inst. to Alexander Kornes, giving a preference to Hammerslough Brothers $1,906.

NEW YORK CITY.—Charles Philipsen, artificial flowers, assigned on the 5th inst. to Samuel J. Goldsmith, giving six preferences for $829. Liabilities $4,399; nominal assets $5,333; actual assets $1,392.

NEW YORK CITY.—Eugene Rubino, oil broker, failed on the 5th inst.

OLEAN.—B. E. Founce, saloon, has been closed by the sheriff.

ORISKANY FALLS.—Marion F. Hall, groceries and clothing, has been attached.

OSWEGO.—The liabilities of E. F. Otis, hats, are $4,800; nominal assets $3,450.

WEST NEW BRIGHTON.—Sprague & Voorhees, grocers, have assigned to Robert P. Brown. Liabilities about $900; assets about $500.

NORTH CAROLINA.

NEW BERNE.—J. J. Tolson & Co., grocers, have assigned.

OHIO.

AKRON.—Myron A. Craig, millinery, has assigned to H. C. Sanford.

DEFIANCE.—Strong & Co., planing mill, have assigned to C. A. Flickinger.

FINDLAY.—J. W. Gassman, saloon, sold out to Samuel Brown, and is reported to have failed.

KENT.—W. W. Paton & Co., dry goods, have been closed by the sheriff.

NEWPORT.—Dana Watson, general store, has assigned.

PENNSYLVANIA.

BERWICK.—R. S. Bowman, publisher of *The Independent*, is in the hands of the sheriff.

BRADFORD.—David Levi, clothing, has been closed by the sheriff on judgments aggregating $4,386.

BROOKDALE.—The personal property of Munson & Knight, manufacturers of leather, has been sold out. Liabilities about $70,000; actual assets $20,000; prefered claims $16,500. They do not continue.

PHILADELPHIA.—Dennis Colfer, paper hangings, has been closed by the sheriff on judgment for $880. Liabilities about $1,880. It is thought the judgment will cover all the assets.

PHILADELPHIA.—John W. Elliott & Brother, cotton goods, have assigned to Andrew Campbell, James G. Carson, of Clough & Carson, and a representative of Buckingham & Paulson, New York. It is said the creditors will give them a release in consideration of the assignment.

PHILADELPHIA.—George Evans & Co., military clothing, have been closed by the sheriff. Their merchandise liabilities are about $5,500, which they claim to be able to pay in full. They were embarrassed by giving accommodation paper to A. L. Bonaffora.

PHILADELPHIA.—Edmund L. Hall, grocer, was advertised to be sold out by the sheriff. He is said to owe $700 for merchandise, though the creditors seem to expect nothing, as it is said the judgment creditor will hardly find enough to satisfy his security.

PHILADELPHIA.—The Iron Publishing Company is in the hands of the sheriff on a judgment for $1,007.

PHILADELPHIA.—James W. McDermott, hotel, has been closed by the constable for non-payment of rent.

PHILADELPHIA.—John Price MacMullan, grocer, is offering to compromise at 40 cents, payable 10 cents cash and notes for 10 cents each in two, four and six months, secured by his father. Liabilities $30,000; actual assets $15,000.

PHILADELPHIA.—Joseph W. Price, dry goods, is said to have obtained a settlement at 30 cents.

PHILADELPHIA.—Jacob Schaal, saloon, is advertised to be sold out by the sheriff on the 12th inst.

PHILADELPHIA.—Mrs. Lena Scheuer, clothing, is said to have made an offer of 25 cents at three and five months notes, secured by her husband's brother, Moses Scheuer.

PHILADELPHIA.—E. P. Wetzler, stock broker, has failed. The liabilities are reported at $20,000.

PHILADELPHIA (Paschalville.)—Judgment for $531 has been entered against Mark Schofield, painter, and his wife offers to compromise with his creditors for about 40 cents.

PITTSBURGH.—The Grafton Iron Company has asked an extension of six years. The liabilities are currently reported at $600,000. The company was incorporated under the Ohio state laws, the furnaces being at Leetonia, Ohio. The capital was said to be $200,000, and was owned by Gruff, Bennett & Co., Robinson, Rea & Co. and Henry King, all of Pittsburgh.

PITTSBURGH.—The liabilities of W. McKenney & Son, scrap iron, are about $41,000; assets about $17,000. It is said an offer of 25 cents was not accepted by creditors.

PITTSBURGH.—A. O. Tinstman & Co., coke, have assigned to A. A. Hutchinson. The Mt. Braddock Coke Company, of which they were the proprietors, has also assigned.

SUMMIT HILL.—Judgments for $6,800 have been entered against Mrs. Susan McHugh, general store, and execution was issued.

WILLIAMSPORT.—Peter Fessler, butcher, has been attached.

WILLIAMSPORT.—Edson Sellen, trading as Edson Sellen & Co., dry goods, is dead, and his widow is offering to compromise at 50 cents. Liabilities estimated at $10,000; assets about $8,000.

RHODE ISLAND.

PAWTUCKET.—Henry Jerauld, commission yarn, has assigned.

PROVIDENCE.—Henry Green, clothing, has assigned to Meyer Nort.

SOUTH CAROLINA.

GREEN POND.—H. J. Grant, general store, has assigned.

TENNESSEE.

BRISTOL.—W. N. Keller, stoves and tinware, has assigned.

TEXAS.

GALVESTON.—William Pohl, groceries and feed, has been attached for $1,000.

HAMILTON.—H. M. Bouldin, general store, has been attached.

LINDALE.—J. W. Thorn & Brother, general store, have been attached.

VERMONT.

RUTLAND.—The liabilities of George W. Hilliard, dry goods, are $17,813.

ST. ALBANS.—Matthews & Wilbur, general store, have been attached.

VIRGINIA.

LANGYHERS.—Robert C. Mitchell, general store, has had execution issued against him.

WASHINGTON TERRITORY.

CHENEY.—J. C. Davenport, proprietor of the Bank of Cheney, has suspended. He is also of the firm of Davenport, Thompson & Co., general store, who have failed. The liabilities of the bank are said to be about $70,000.

WEST VIRGINIA.

CHARLESTON.—Martin & Summers, shoes, have assigned to L. Beeghymer. Liabilities about $1,200; assets $600.

WISCONSIN.

CLAY BANKS.—F. Paarman, general store, gave a chattel mortgage for $4,000, and assigned to J. Wellamer.

MANITOBA.

BIRTE.—Thomas McKenzie, late Nelson & McKenzie, general store, has assigned.

REMLAND.—Herman Dyck & Co., general store, have assigned.

WINNIPEG.—J. G. Craske, grocer, has assigned.

NEW BRUNSWICK.

ST. ANDREWS.—E. H. Stimson, dry goods, has assigned.

NOVA SCOTIA.

HALIFAX.—Thomas W. Arthur, stationer, has assigned.

HALIFAX.—Davidson & Crichton, dry goods, are reported to have suspended.

PROVINCE OF ONTARIO.

ALLISTON.—George Fletcher, miller and general store, is being pressed by the Ontario Bank for settlement of overdue claims for about $11,100.

BOWMANSVILLE.—A Dickson, dry goods, offers 60 cents.

CAYUGA.—T. G. Gardiner & Co., general store, have assigned.

CHATHAM.—S. & P. Pentland, shoes, have failed, and the stock is advertised for sale by a trustee.

FOREST.—G. Brooks, miller, is reported to have left town.

HAMILTON.—S. S. Cann, book peddler, is in the hands of the sheriff.

HAMILTON.—John Schwarz, cigar manufacturer, has assigned.

LISTOWEL.—Davidson & Davidson, general store, have been attached.

LONDON.—C. B. Hunt, trading as Hunt Brothers, millers, owes about $36,000, of which $16,000 is to ordinary creditors, and $20,000 to his father's estate. He says he has compromised with the ordinary creditors at 25 cents.

LONDON.—John Wand, machinist, is reported to have left town.

PICTON.—R. A. Foster, drugs, has been closed out under a chattel mortgage.

RIDGETOWN.—The stock of Smith & Benton, grocers, has been taken for loans.

SAILORS' ENCAMPMENT.—John M. Ross, general store, has compromised at 60 cents.

SPRINGFIELD.—John Martin, miller, is reported to have assigned.

ST. THOMAS.—The stock of George Lampman & Co., shirt makers, has been seized by the landlord, Mr. Lampman having been missing for several days.

WATFORD.—E. Devine & Co., printers and publishers, have assigned.

PROVINCE OF QUEBEC.

CEDARS.—T. Marcoux, general store, has assigned.
